Started a new project at URL:
http://ac6v.com/oldprefix.htm
Covers USA Amateur Radio History, Callsigns, Old and New License
Privileges, etc. Origins of terms, DX, Ham, Lid, Mayday, Pan Pan (at
least opinions thereof)
It is preliminary -- need inputs to complete, help on info on the old
Class A, B, C Privileges, MARS Calls, and other historical facts. Thanks
in advance.
Comments and feedback welcome.
Flames will be extinguished.

Yeah, and when we talk about a construction article from their magazine on the air, we gotta change modes to CW to send the name of the magazine? Maybe we can't say "73" or "CQ" on phone anymore, cuz those also originated in Morse-only days? I just love it when these purists come down from Mount Newington with their engraved stone tablets!

Since you claim the device isn't licensed (how do you know?), look
under part 15 of the FCC regulations.

However, don't automatically assume that there is some sort of jammer
on campus. It could be that your building is remarkably well
shielded. Any jammer strong enough to cover your school building
would have to be noticed on the outside as well.

And while you're busy tilting at windmills (look up the expression if
you don't get it), ask yourself why you'd want a portable telephone in
a classroom in the first place.

'JYZ is DX? I thought he was on an island near Panama City. Last time I looked, Panama City counts for the US. Now I wonder how many DX stations need a US contact?.....

No DXer considers 14.313 a "DX" frequency despite the fact that activity there is sometimes spotted on the DX PacketCluster under the clowns-on-the-air category.

It has been my experience that the biggest "radio Cops" turn out to be no-code techs that have had a licenses for a year or so. I had one start on me one morning when I used the term handle.

He proceeded to tell me how "handle" was a CB term and not used on the repeater. Being the shrinking violet I am, I went on to explain I used "handle" on 11 meters when it was a ham band along with a dissertation about correcting people who may be new and somewhat hesitant such as your wife.

One time, at a hamfest in AZ, I said into my 2m simplex transceiver, "Hey
Harold, y'all got yore ears on?" One ham looked at me rather pathetically
and said, "We hams don't talk like that. How long have you been a ham?"
I replied, "45 years". :-)

Being something of a nite owl at the time, I got used to White Castles in St. Louis which is as far west as they went. Last time I was down there, out of nostalgia I stopped in on Hampton Av. Somehow they are not the same without the wino sleeping in the corner.

It's the state beaurocracy gone berserk.

It's an experiment to see what happens when you require the sellers of electricity to sell-off their means of producing electricity, remove the limits of wholesale pricing, but keep the limits on consumer pricing. The power producers can limit supply so that the wholesale price will go as high as they want, and the guy selling it to the end user is stuck with the loss. It's as screwed up as anything could possibly be. Edison, the company that built practically everything we have out here, is getting totally screwed. Electricity has always been bargain priced out here. Our taxes will have to go up to pay for it now.

Tree Huggers:
Hug that tree today! You were so busy protesting new nasty power plants, that may cause acid rain and could hurt the trees, you may have to burn it tomorrow to keep warm.

While other factors enter the picture, I have to grin a bit when I see the NIMBY folks, that fought the building of new power plants, cut off from their internet protest sites because they have no electricity.

The problem will be solved when the big one hits, and Nevada ocean front property becomes available.

Once again, Scott you pull out this tired chestnut. I think this is the 73rd time I have seen it. Anyone so easily traumatized, by a single individual, must have a really hard time dealing with any day to day activities.

You ran into an idiot, get over it! We have our share same as any other facet of life.

You have latched on to this single incident to cover your own inability to do what is necessary to get a ham license.

Would it not be a lot better to go in as one of the gang and simply excel, or would you rather spend a life time extolling the ignored virtues of a CBer? You are being as supercilious as the ham you are bringing up as an example.

> licenses indefinitely?

47 CFR 97.103(c) - "The station licensee must make the station and station records available for inspection ...."

Expired licenses are part of the "station records" for they are the only thing that can prove that operation during that [now] expired term was pursuant to a license and therefore legal.

For most amateurs, their station records need ONLY consist of their licenses plus any CSCE's for [unexpired] exam element credit not reflected in their current licenses. However, the partially-quoted section goes on to indicate that the local FCC EIC may require more, with a cross-reference to sub-section 47 CFR 0.314(x).

Obviously, other "special" operations will have more records. Automatic repeater systems will have local coordination applications and grants (cf. 47 CFR 97.205(c)), restrictions from use (47 CFR 97.205(e)), and in California, maybe even court documents! Space operations will have the pre-launch notification letters (47 CFR 97.207(g)). Licensees who act as volunteer examiners will have paperwork in their records appropriate to that function (47 CFR 97.525 et. al.). Spread Spectrum users will have a log of all transmissions (47 CFR 97.311(e)). What's interesting about the latter case is that it is the ONLY one with a record retention period (one year) specified. There may be other cases or special operations that I haven't cited.

You ask "what records?" There's your answer. For all except spread spectrum operations, there is NO limit on the recordkeeping retention time frame. That would include all license documents, expired or not.

While I agree with some of the replies that a cell phone is not really a necessity in school, there is the issue of obstructing legal communications. I do not want someone deciding for me when and where I can use a radio device. Your first stop should be http://www.fcc.gov and do a search for jamming or interference. If nothing solid turns up, try http://www.arrl.org Calling the ARRL may expedite the search for answers on this and they may be able to give the school a call. What city / state is this school?
When I saw your post the first thing that came to mind was the Littleton CO. incident, what if they had been using a cell phone jammer?

Why guarantee a profit? That is ultimately what regulation does and has to do. I believe you are on Northern States Power which as utilities go is a good one in a lot of respects. But if you called there I will bet that now and certainly the next cold snap you will be buying power from the Nebraska Public Power System via MidContinent Area Power Planners lines, a loop from NSP to Chicago to St Louis to KC to Omaha and back. You will pump it back next summer.
The history of consumer-owned power in Nebraska is a great one with rates about 20 percent lower than the national average. Right at the moment I am probably being supplied by the nuke at Fort Calhoun on time, on price, and reliable as sin.

Public power is one of the legacies of Senator George Norris. Norris Dam on the TVA is named for him, GW Bush is being inaugurated 20 Jan rather than March 4 because of him, and Nebraska has a one-house legislature because of him although the local 'conservatives' cum idiots limited the sessions making filibusters possible (Norris was in on a famous filibuster so one of the things he pushed was unlimited sessions). My water and gas come from a more local Metropolitan Utilities District that also does its job extremely well.

The trick -- and it is hard to do -- is to limit the scope of the utility's responsibilities and not to politicize everything. The TVA nearly foundered until David Lilianthal(?) firmly put them in the power business.

I am as much a fan of free enterprise as anyone but I just do not see where electric power should be free or particularly enterprising.

I agree that it may be better to allow a new ham to listen rather than jumping him on the air. He'll soon realize that we don't generally use certain terms. People generally try to fit into anything to which they are new and usually will come around to "doing as the Romans do" on their own.

Like you, I've had a couple of run-ins with "radio cops". I once used the local auto-patch, pounded it down, and made the usual announcement- "K4KWH clearing auto-patch after third party traffic with XXXX......." R-cop proceeded to lecture me that I was to do that BEFORE bringing down the patch. I didn't see the difference--still don't--just so I made the required statement. I was nice to the old codger, but I was seething. Some time went by--maybe several years--when one night I eased down to the local Dairy Queen for a huge cone of ice cream. The local club was having their usual Tuesday nite VHF net on the same repeater. All of a sudden, a pickup changed lanes and ran a Chrysler off the road onto the sidewalk. Poor guy (car) busted a tire, ruined a hubcap, bent a wheel, and missed a light pole by inches. Pickup kept going. I broke the net with my call, told the net control station I needed to call the police because of a hit and run, and he immediately yielded the repeater. I brought up the patch, started to dial 911 and somebody pounded it down right out from under me stating, "THAT IS NOT EMERGENCY TRAFFIC"! Guess who it was. The same old geezer that jumped me about the patch previously. It started something of an on-air debate/argument with this old fart trying to lecture ALL of us on what is an emergency or not. I didn't take kindly to this because the hit and run driver was long gone during this 3-4 minute debate. I finally spoke up: "JUST NEVER YOU MIND OLD MAN. THE HIT AND RUN TRUCK IS GONE AND I HOPE YOU'RE DURNED WELL SATISFIED!"

I wasn't the only one that got mad at him. The club was ready to expell him, but finally decided on a suspension. Trouble was, the old buzzard wouldn't let it die. He started talking about me on and off air to others, making most inappropriate suggestions about my qualifications as a ham. Completely out of line and unjustified. I had never done anything to him, nor had I actually met him in person. Of course, it got back to me. Fed up with this guy's attitude and antics, I finagled a personal introduction. Upon realizing who I was, he turned a little red! I then proceeded to inform him that if he did not cease and desist from his slander, that there would be legal action. If that didn't work? I think I remember putting it to him this way: Mr. ----, I have never met you before. I have never done anything to you. You have an "alligator" mouth and a "canary" a** and your mouth is fixin' to write a check yo' a** can't CASH! Do you understand me? You are not to speak

to me, call or correct me on the air, nor have any contact with me whatsoever!" That old man turned pale as a ghost, dropped his head and said, "yes, sir", like a scolded little boy. I haven't heard a peep from him in 5 years.

It makes sense that a licensee should keep their expired license for a period of time. I understand that it would be necessary to prove you were licensed during a period in the past(despite the fact you are in their dtatbase) if there was some sort of complaint. It would seem likely that there would be a statute of limitations though. For most things there is a five year or seven year statute of limitations. If there is none, I suppose the FCC could file an NAL for something in 1950? I'll be honest I don't still have a copy of my novice ticket.

Koresh was a nut, but he had a legal and moral right to be a nut as
long as he wasn't hurting anyone. He hasn't been proven to have
committed any felonies. The local sheriff's department had never had a
problem with going up there to talk to them, the feds screwed up. They
showed up wearing black and in masks without identifying themselves.
The poor cultists probably had no idea that those were even cops and
were just defending themselves. Please keep in mind, Koresh isn't
```

someone I would have wanted for a friend, I DO think he was a nut, but if someone wants to think they're the new messiah it's THEIR right. It's no more off the wall than thinking there's some guy up there with a long white beard waiting for you when you die to show you your place in heaven or whatnot.

Well, I don't like 'em either, but blaming them would shift the blame from where it justly belongs, and that is with the legislators. They deregulated the phone company federally. So the state thought they'd take a crack at the power industry. You ought to see all the fees, and surcharges, and taxes, and rebates on our electric bills now. Looks like it was designed by a committee, and nobody can figure out the damn things. The idea was to spur competition, but an unfortunate sequence of events, along with the help of some opportunistic and unscrupulous companys lead us to where we are now. It would have been difficult to foresee this particular outcome.

: > The Left has forgotten what it was like when the LEOs shot their way
: > into their homes in the '60s and '70s. Maybe they need a wake up call?
:
: SInce you've already posted an article in which you identify your
: group by saying "we ARE the police and the military ...", may I
: assume you are offering here to shoot your way into our houses?
:
:
: Of course we remember the 60's and 70's. We remember incidents
: like the assault on MOVE headquarters in Philadelphia. We just
: wonder why you support white, religious, right-wing cop-killers while
: damning non-white, left-wing cop-killers.

If you had read an of my posts, like the the ones in Talk.Politics.Guns on "starting the revolution", you would note that I find that type of talk foolishness. Yes, there is an element on the right that would like to believe that a revolution is the best way to solve their problems with an ever increasingly socialist government. For the most part these individuals only want to be able to live their lives in peace. They see people like you as little dictators who are always pushing the edge (so called progressives). If they could be guarenteed a life with no government interferrence then most of them would calm down.

The Left delights in frightening them. I guess that is my major bitch with Left Wingers is that they always have to push the edge. But I also have problems with those on the right who live on the edge of society as well.

And the Left has been far more willing over the last 100 years to use violence. (Do not give the crap about how right wing government as used violence, we are talking about the Left as individuals).

If you wait for everyone to accept you all you will do is wait.
I have been a Licensed Ham for over 18 years, When the FCC made the changes so 5 words a min was the max CW speed I needed to know I went down and got my General. For the first few months I was called a CB General, I did not let that stop me. I now play on the low bands (PSK31, RTTY, SSB) and I have only had one guy stop talking to me when I tell him I just received my general after the licensing changes. I can live without him..... I have made a BUNCH of new friends and even My Nasty Extra VE has now changed his mind about all the new blood comming into Amateur radio.

Go ahead and take the heat, take the tests, get your license and have fun. Sometimes I like hainging around on simplex with some of the new hams, they are fun to talk to, are excited about the hobby, and dont spend all there time running everyone else down.

Get your license, Be a Great Ham, Help Others & Do Public Service, In This Way Prove Them Wrong. If You Dont Get Your License You Are Letting Them Win.....

Right when Clinton is leaving office another sex scandal goes down with the democrats. Yes, seems like ole Jesse Jackson took his pregnant girlfriend to the oval offive to see Clinton a couple of years ago. This is great, both of these clowns were engaged in sex scandals, even Jesse says that he has sent the mother 10K per month since birth to take care of the bastard. Hope all of the hard working people who donate to Jesse send their dollars to a more deserving cause and individual. I would only guess that ole AF2Y will appear and pledge support for Jesse.

There may be times when using a radio out of its "type accepted" band is probably not all that offensive in spirit or practice even if technically against the letter of the law. (e.g. marine use where no harmful interference is involved). But using the FT-50 for FRS is not one of those times.

The deviation of the FT-50 is wider than that of the FRS radios. So when using the FT-50 on that band, you are not only transmitting at higher power than the FRS, but run the risk of splattering onto adjacent channels creating harmful interference.

Bill

Hmmm. I know a lot of those guys. I ran exams just down the river from them in Aurora. In fact, the guy that started the testing group up there years ago and I were both with DeVry VEC originally. I can't remember callsigns, since I've moved, but there must have been some turnover that leaves some uninformed VEs, because the guy I know wouldn't do that or train his people to do that. Sorry.

> I really don't have anything to complain about...

Yes you do. You were prepared for an exam and an incorrect interpretation by a team that should know better kept you from taking the exam when you were ready. Although you might not get any satisfaction, they need to be made aware of the problem so it doesn't happen again to someone else.

Gotta be paid for one way or another. Chalk up one good example of the
limits to scatterbrained deregulation. I'm a hardcore open-market
free-enterpriser to the core but this disaster has set the clock back to
justification for socialism, this is bloody ridiculous.
>
Here in Philly we pay the second highest rates in the country second only to
what ConEd gouges out of their NYC customers and have been doing so for most
of the prior century. The net result is that we're conditioned to getting
pounded by our power bills. Folks moving into this region from other places
routinely come unglued when they get their first PECO (or whoever it is
these days) bill. But there is some spare capacity here with more coming.
Two-three years ago the new-wave generating companies were mothballing
capacity. Now every steam turbine and generator shop in this country is
suddenly completely booked for years ahead for the first time since I was a
kid and that was a LONG time ago.
>
This thing hasn't even started. I noticed in today's news that the lawyers
and prosecutors are rolling up their sleeves and diving into this fiasco.

Dunno when David did that but I was temporarily working in a small burg north
of Jackson TN, winter 1980 or so, the locals had been paying three cents per
kwh while I was paying eleven cents per kwh back home in Philly. I got there
just after the TVA underwent some kind of major reorganization or another and
the rates had just taken a huge jump upward. Everybody had unisulated homes
with straight electric basboard heat, etc. Talk about massive trauma . . I
couldn't muster a whole lot of sympathy for 'em.

Yes,they are supposed to be.

These guys seemed pretty
> confident that they could charge $10 per exam

By the authorizing law they are not supposed to charge beyond recouping
their expenses, unless it has changed since I was active. I understand
that the FCC has stropped setting the mandatory fee, so the VEC under
which they operate should be doing it.

FCC never did stipulate nor specify what constituted an expense, they
just said that the expense must be related to the testing and that a
record of all monies received and disbursed be maintained.
The fee receipts were always split by the VEC (ARRL here) and the VE
team. The VEC sets the details of he split.

>
> ~Steve~

You ask a better question than you know, Steve. Where these incidents have occurred they are more than likely at Yuppieville Central rather than Ghettoville Tech.

The modern high school more closely resembles Stalag 17 than the ones anyone over 40 attended. When a local district went on the Community Service kick here (Omaha suburban district) the students reacted by hacking the computer system and issuing a mailer canceling the program and in a well-executed and purposeful burglary put a few drums of Tidy Bowl in the swimming pool before the state swimming tournament. As an ex 60s disturber, I was for the kids; the village idiot can be a vandal but this showed class!

Compared to mandatory community service before one is arrested, cell phones are the mewling of cattle. But the pattern of inmate vs guard goes on every day with predictable results. The day when someone with a 3.6 earned some special privileges and seniors were expected to behave as adults are long since over. We now run a closed campus far from anyone students might offend.

It possibly is why the US has world-class 4th graders, mediocre 8th graders, and drooling idiots at high school graduation.

I wish my wife was only "somewhat hesitant" to talk on the radio. It
took me some time to convince her to get the license in the first place.
She doesn't even like talking on the telephone. Of course, in person,
once she gets to know you, she'll talk your head off. And I can't get
her to shut up (especially while my favorite tv shows are on).

It's a classic case of officials burying their heads in the sand. Any schoolchild soon learns that you can't buy high and sell low and avoid financial collapse.Sure looks like they just ignored the liklihood that this *would* happen.
This is not something that developed overnight, of course. From all accounts it came from price controls on the retailers of electrical power while no controls were (or could be) placed on wholesalers (after the in-state retailers were forced to divest themselves of their own generating facilities, which was a curious requirement at best, pure socialism at worst).
This is not a problem that just struck like lightning from the blue, it took a while to develolp. Meanwhile did the state officials believe the problem was just going to go away because the solution wasn't pleasant?
And then not a single new generating facility has been built in California in the past 20 years. Where did they think the supply for all the growth demand was coming from? Meanwhile, the state is loaded with environmental activitists who feel real good about locking away all the natural resources for "posterity" instead of meeting the environmental protection challenges headon with sensible protective requirements that are enforced.

You're probably right, Ed. I'm still working to get my wife excited about radio again. And I've become the biggest advocate for new hams in my area. I like to be known as the ham anybody, including the newbee, can contact.

In fact, because of my friendly attitudes towards newbees, just about everyone in the area who is bringing a new person onto the radio for the first time almost always insures that I'm the first person they make contact with.

I've met a lot of interesting people that way. In fact, over a period of time, the numbers really add up and I'm never lacking of someone to talk to on the radio. Most of the time, I end up with too many people to talk to when I sign on (they know my normal on-air times, and are usually waiting).

> hiding under the banner of "free speech"?

Lets keep our perspective about this, Jim. Saying "QSL" on the radio is a long way from off-color jokes and so forth. No, we should not just accept anything anybody does on the air unless it's a clear violation of FCC rules.

However, it is just as much of a stretch to suggest that we can "enforce" a gentleman's agreement (especially if the gentleman in question didn't agree in the first place). Likewise, it is unreasonable to say that there can be "violations" of a gentleman's agreement (again especially if the gentleman didn't agree in the first place)

In the end, I strongly suspect that ham radio, and ham operators as a whole, can be better served if we all follow a simple rule - mind our own business. After all, its no skin off anyone's back if someone else breaks a minor tradition.

If you want to lead, and influence others, on the radio, do so by your actions, not by confrontation.

1415. The Real Bill Clinton Legacy

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-19 06:12:52 UTC
From: Dwight Stewart <stewartx@sccoast.net>
Message-ID: <3A67DAD1.161C45F2@sccoast.net>
Source record: 95143

There has been much talk about the Clinton legacy. As William J. Clinton leaves office, lets take a look at a few things around the country to discover the real Clinton legacy.

Politics & Race Relations...

- A wider divide between Republicans and Democrats than anytime in recent memory.

- A wider divide between blacks and whites than anytime in recent memory.

- Massive expansion of executive power over almost all aspects of American life.

Energy...

- An energy crisis in California, complete with high prices and rolling blackouts.

- High home heating fuel, and vehicle gas, prices nationwide.

Economics...

- An ongoing loss of income for the often white middle class over the last eight years.

- An unwavering increase in the gap between rich and poor.

- An unstable stock market.

Crime Control...

- Youth violence, and other crimes by youth, higher than any other presidential period in history.

- The largest prison population in the world.

- A memory of a president impeached for lying under oath.

Civil Rights...

- Ongoing discrimination against whites in black-owned schools, organizations, and businesses.

- Continuing hiring discrimination against whites through affirmative action programs.

- Widest suppression of religious freedom in the history of this country.

- Significant loss of gun ownership rights.

- Failed program of allowing gays in the military.

Education...

- Strong emphasis on liberal political bias in classroom instruction at public schools.

- Government finance of private colleges and universities with extreme liberal political bias in classroom instruction, while at the same time refusing finance to conservative private schools.

- Emphasis on "feel good" teaching methods rather then on teaching methods which challenge students.

- Least well educated children during any period of nation's history.

Family...

- A historic record for divorces, single parent families, and children born out of wedlock.

- A wider divide between parents and children than anytime in recent memory.

- Diminished parental control over their own children due to endless government intervention.

- A historic record for children giving birth to children.

- A memory of an extramarital affair while president.

Sadly, I wish I could say that these things will improve after Clinton leaves office. But, as long as liberals continue to control so much of American life, these things are simply not likely to improve.

Like Clinton did, Bush also has an opportunity to influence each of these things, but he has not shown any indication so far that he intends to challenge the liberal stranglehold on this country.

Actually it was a congressman and he was referring directly to the BATF tactics and methods. It was then quoted by LaPierre in an interview. Bush's handlers probably made the decision for him, feeling that the "mood" of the country favored gun control.

It doesn't matter whether we need it or not, it is our right. I do not beleive in school having extraordinary authoritive power over us. Every year policy is getting more strict. Last year we were banned to have food outside of cafeteria area, this year we are banned of going upstairs without staff permisison and having walkmans at school PERIOD. No holding hands, hugs lasting over 15 sec is considered exceesive display of affection and all this shit. They are taking away our basic rights and this is not right. If we let this go we'll eventually have a staffed bathroom to control smoking and such. Hell they've taken down all the doors on bathroom cubicles for that purpose few years earlier.

> there is the issue of obstructing legal communications.

If it is specifically forbidden by federal communication commision, by no mean school shall operate such a device. I do beleive school's "no cell phone for students" is far less meaning full to anyone, but the brain-dead administrator than FEDERAL regulation prohibiting deliverate interferance with approved communication.

The VE's were incorrect to ask for another fee to take the extra. That
should have been covered under the one fee.

Also, the VE group can keep a part of the fee, but only enough to cover
their expenses. Their time cannot be charged. The rules did just change on
keeping records of expenses incurred.

According to the ARRL VE Manual , Eith Ed. , 2000, p. 50,
under "Retesting,"
"An applicant who fails an element at an ARRL/VEC-coordinated session
may retake that element at the same session, if (1) the administering
VE team has a different version of that element, which the applicant
hasn't taken (section 97.509), (2) the VE team has the time and
resources and is willing to readminister the additional version; and
(3) the applicant pays an ADDITIONAL (emphasis mine) TEST FEE (because
the candidate is then considered a walk-in candidate who just arrived,
even if he or she arrived at the beginning of the session). Again, a
retest fee charge is only required if an element is retaken, after
being failed at your session."

The W5YI VE manual has the same thing .

The reimbursement fee (test fee) is the only fee that may be charged at
a test session. Now, if the test session occurs at a hamfest,
instruction class, or other gathering, an admission fee may be charged
and it has to be kept seperate from the test fee. If you're just going
to the test sesion at a hamfest, you shouldn't be charged a fee.

The current mainstream Technician license class is easily attained
by young people and meets these goals perfectly; your proposed Barbie
Doll class would establish a channelized CB-like ghetto separate from
mainstream amateur radio, creating additional "we vs. them" divisions
in the Amateur Radio service. Personally, I think this is just another
spin on your attempt to establish a defacto expansion of FRS and MURS.

> It is a Suburb school in OR.

I was wondering where you were so I could possibly drive by to see how severe the jamming was, OR is a little too far from NY to just pop on by. Is it possible to find out what equipment the school is using to jam the cell phones? I could find a jammer "jammer".... kind of like a radar detector "detector". Let me know.

>

Some of the students used them to call the police and parents during the siege - I think you took my statement as being against the usage of the cell phones in school... quite the contrary, they have the potential of saving lives!

Don't hesitate to write me directly, I am looking to defend my rights too. First it's schools, then it is (who knows)?

Dwight,

Of course you are entitled to your own interpretations and views.
However, this newsgroup is about amateur radio, not politics, relgion,
or other unrelated issues, and it is an inappropriate forum for personal
soapboxes on issues unrelated to amateur radio. I also suspect that most
subscribers to the NG probably couldn't care less about US politics or
domestic issues -- newsgroups are not just for domestic US consumption -
they're international. I'm sure there's a
"US.politics.domestic.anti-liberals" or something newsgroup somewhere
out there which is more appropriate.

No disrespect intended.

73, Darrell
nr3y.

There is something you need to learn, everything you want to do in life is not your right, most things are privileges that must be earned. The sooner you learn that the less strife you will find in your so-called life.

It's nigh-unto impossible to work on fine-pitch SMT with conventional
soldering tools. Heated air (using a proper size shaped nozzle) works
far better. Try to find a local electronics shop (TV repair place?)
which has the right tools.

I broke down and bought a used MTR5000 rework station ($3K used) for my
ham shack. Now I can build/rebuild anything!

Your "rights"?. You have been listening to too many TV programs. As a minor
you get exactly what you are permitted to do as rights.

Save this message until your children are in school and then get it out and
re-read it. Compare your attitude then, with now. What will be the
difference? At that point you will have gained responsibility, the
prerequisite to rights. At your age, your "rights" are limited to those that
provide a safe environment and sustenance.

OK, fine Dwight - I agree. But where's the line to be drawn, and who
draws it? That's what we really need to be discussing.

On this I have to disagree. Much of what hams do is regulated by
gentleman's agreements, and when someone doesn't follow them, the
result is often chaos, interference, bad feelings and a reduction of
everyone's fun.

For example, it's perfectly legal to operate simplex FM voice all the
way down to 144.100. Considerate hams don't do so because that part of
the band is where the weak signal folks hang out. But in recent years
there have been enough incidents of FM in the "SSB" part of the band
that a VHF society petitioned the FCC for a rules change that would
have set up a subband free of FM. The FCC said no, and the problem
continues.

What should the 2 meter SSB DXer do when a couple of local FM simplex ops takes out most of the band that is used for SSB DX? Changing frequency isn't the answer, because doing so would make the SSB op inconsiderate, too. The FM folks can't hear the weak DX, and can't understand the SSB op, either.

I disagree to point. See my story below.
>
> If you want to lead, and influence others, on the radio, do so by your
> actions, not by confrontation.

That's what I do, Dwight. I'm not a "radio cop" on the air. There IS a middle ground between strict regimentation and anarchy, but nobody seems to want to define it clearly. All I'm trying to do is get a discussion going about what's acceptable and what isn't, and why.

Hans told a story of a new ham who was corrected on a few minor points, and who left ham radio because of it. I think his message was that we shouldn't sweat the small stuff, and I agree - but there's another side to this.

Here's another true story:

The repeaters around here are mostly "open" - anybody can use 'em, no fees, no PL tones, the more the merrier. Some are linked so to promote 220 and 440 activity. 'Radio cops" are notably absent.

Scanners are also popular here. Many of the police/fire/public service folks are still on VHF FM, and the airport is close by. Many new hams first discovered the ARS by finding our repeaters while scanning.

Few years ago, a couple of new hams with shiny new callsigns and rigs showed up on the local repeater. They chose this particular machine because of its excellent coverage to their homes and workplaces. They were welcomed, and nothing was said about their use of "cb lingo" and seeming ignorance of "gentleman's agreements". We figured they'd pick up on them by the example set by others.

They seemed to mostly want to talk to each other, which was no problem. Trouble was, they saw the repeater as their own personal system. They would ignore a request for an autopatch or quick call ("call please" around here usually brings instant silence on a repeater - another "gentleman's agreement"). Scheduled nets would be ignored - they would be annoyed and sometimes refuse to stop using the repeater when the NCS would ask for it.

Things got worse over time. Soon their conversations included topics and descriptions that were definitely not "family oriented". Not legally obscene or profane, but not what you'd want anyone to hear as an example of ham radio. Certainly not your kids. Or anybody's kids.

They did NOT pick up on the example of the more experienced at all. Instead, they mocked it.

The repeater committee began to receive complaints from hams - and then from scanner users. Folks who used to enjoy the repeater found these antics revolting, and said so. The repeater committee tried to talk reasonably to the new folks - first in person, individually then by letter, then on the air. The response was always one or more of the following:

"Nobody ever complained before - what are you, a prude?"
"I've heard a lot worse on Howard Stern"
"You're not the FCC and what we did isn't against the rules"
"I paid my dues to the club and I'll operate however I please"
"We did worse stuff on 11 meters and the FCC never did a thing about it."
"It's only a hobby - you take it too seriously"
"You are violating my First Amendment rights!"

Finally the repeater committee refunded their dues and changed the control codes. They still tried to use the repeater. When that would happen, a control op would shut the repeater down until they went away - which often took hours.

"No skin off anyone's back"? Well, the worst part is this: Several folks who were scanner enthusiasts were completely turned off to ham radio by this whole thing. At least a dozen prospective hams, most of them young people, went away and never came back. You can bet that when the subject of ham radio comes up, they won't have good things to say about it. All because of a few newbies who didn't like the "gentleman's agreements" of ham radio.

What should we have done differently? How do we define a set of basic "radio values" and get folks to follow them?

The problems start when the "small stuff" is ignored.

Check out the ARRL webpage and see what Riley has to say about "radio rage", too.

Indeed it would be a somewhat segregated area for younger people to get started in ham radio. But that is a big part of what could make this work, as the main idea is to set up a small, less intimidating environment for young beginners, where they can work primarily among their peers, and those willing to help them learn. I have thought about what you are saying about a "we vs. them" division, such as what used to exist with the code/nocode divide(and I suppose still persists); however, I think the difference between a Colt and a Technician would be akin to the difference between a General and an Extra, and not like the old difference between a Nocode Tech and a 13wpmGeneral/20wpmExtra that was so devisive.

> Personally, I think this is just another
> spin on your attempt to establish a defacto expansion of FRS and MURS.

Well, I suppose you are right there. If something can't be done to create a better environment for kids to experiment on the virtually unused VHF/UHF bands(with the noted exception of a few high-profile repeaters), then nature will take its course, and water will follow a path of least resistance. I'm just trying to create a small area of "lower resistance" and "higher potential" for young experimenters on the ham bands, where I think it deserves to belong - rather than in the Personal Radio Services.

I look at the current "communications gap" situation that is developing between the United States and Japan/Europe in the same vein as the "missle gap" that started to develop between the USA and USSR in 1958. However, today's problem is probably more real and dangerous,

yet less obvious, and more insidious than the problem of 1958. There will be no "Sputnik" to help immediately shock us back to our senses, and therefore no equivelant to the National Defense Education Act will be forthcoming anytime soon.

I am curious - are there any hams that remember what the policy of the ARRL, FCC, and hams in general was in 1958, in regards to the issue of Sputnik? Were there any pushes back then to get more young people interested in Amateur Radio? From what I can tell, Sputnik does seem to HAVE been a factor behind the push for implementation of incentive licensing during the late 50's and early 60's. However, as is usual in the Amateur community, change occurred very slowly and painfully - with the the first real change taking 10 years to even be started to be implemented.

Interestingly enough, I found the following on the ARRL web site:

http://www.arrl.org/news/stories/2000/10/04/2/

It mentions how Sputnik spurred the creation of the NDEA and NASA(and
eventually our trip to the moon), but it doesn't mention anything about
hams, or what hams thought or did about this significant event.

Wrong...wrong...wrong...What you need to do is have these "kids"
(as you would ANY newcomer) IN THE MAINSTREAM. They don't need to be
off in some netherworld of their own.

Part of the problem with the now defunct Novice license was that
mmany people didn't want to go up to the Novice subbands. Take a
listen there lately? THERE is your "Colt" class license right now.

In Chattanooga we have quite a few under-21 operators, and EVERY
person I hear "working" them takes extraordinary steps to be
accomodation and helpful. These "kids" are at Field Day, ARES
activities, and occassional club meetings. And I CAN'T believe that we
are the only club/community that is so disposed to do so.

My suggestion...?!?! If you haven't sent this "proposal" off to
the FCC yet, DON'T. They are going to get used to seeing your name
attached to frivolous RM's and may, in the future, automatically turn
their collective noses up on any subsequent submissions you may make,
regardless of how truly beneficial it may be.

Hi all,

Yes, I am asking for some input before I go and rip some surface mount resistors out
of my 1K$ radio. Would it be okay to use a 15 watt grounded tip soldering iron to heat up
the ends and pull it out with some needle nose pliers? Or should I try to use the desoldering
wick I have? Please advise on the correct way to remove these suckers. I would like to be
able to put them back in if need be.

Thanks,

Scott.

Quite the opposite would be true!

That segregation absolutely guarantees that the concept would fail!

The channelized "childrens band" would be held in disdain by mainstream amateurs, the participants would be insulated from mainstream amateur practices and procedures loosing the benefits of exposure to more experienced and skilled operators, and they would be barred from participating the host of activities which would occur outside their cozy little ghetto.

> I look at the current "communications gap" situation that is

> and inductors would not be required.

Most telling, however, is the stupendous chasm between your stated concern about the "communications gap" and your incredibly minimilistic proposed technical requirements! Since radio today is all about digital circuitry and RF, I'd expect the tests to emphasize those areas. Instead the theory you'd require is hardly sufficient to design a flashlight! There is no mention of digital principles, and worse yet, a specific prohibition of material on capacitors and inductors (components which are the heart and soul of radio technology)! This dichotomy discredits your stated goals of "encourage basic knowledge of radio, electronics" and "provide a path......interested in further radio experimentation".

This whole thing is a non-starter, dead on arrival.

For resistors, it's generally not too hard to just heat both ends with an iron and remove it with tweezers (or very fine needlenose, perhaps). I generally just heat one end then the other, back and forth, till I can push the R off its pads with the iron. Clean the pads on the board w/ solder wick before re-installing the resistor .. or better, use a new resistor. ICs are more problematic, but not impossible with a good iron and solder wick and patience.

Cheers,
Tom
who was dragged not quite kicking and screaming into SMT about ten years ago and immediately fell in love with it for homebrewing...far fewer holes to drill!

I believe these areas were also left out of the old Novice exam.

> This whole thing is a non-starter, dead on arrival.

Do you think it was a good idea to get rid of the Novice class?
Shouldn't there have been something done to keep it and update it for
today's world?

> Were there any pushes back then to get more young people
> interested in Amateur Radio?

>
There was no lack of young people then, I was one. Kids flooded into the hobby. The creation of the Novice license in 1951 was extremely successful in luring kids into ham radio. The availability and readily accesibile dirt-cheap military surplus radios and parts was another huge boosting factor. Any kid could and many did get on HF for well under a hundred bucks in 2001 dollars. Srounging was an artform and part of a perenially-broke kid becoming a ham and a lot of fun in itself.
>
Just about all large high schools had school-supported ham clubs and club stations. The 80 & 40m Novice bands crawled with other kids. A kid could actually understand the circuitry and get a soldering iron into the radios. The VHF & UHF bands were for experimentation for the most part. There were very few antenna and tower restrictions, "real people" didn't live in apartments. If you were a kid interested in electronics the customary gateway to an EE was a ham ticket. Got ya points with admissions officers.
>
Life in general was also very different from today. The overall pace of life was slower and simpler, people had more spare time. Ya didn't mess with girls until you were 16-17. There were no home computers. There were ham stores in every populated area. There was no horde of CBers, no cell phones, no Internet, endless list.
>
It's all changed and I have my doubts about how much "better off " ham radio is today vs. 1958 even though the number of hams then was some small fraction of today's license count.

>
It wasn't particulary relevant to ham radio much beyond a few hams becoming "Sputnik Chasers" because they knew how to use HF radios and had the equipment. The launch of Sputnik I really caught the aerospace industry with it's rado pants down and hams jumped into the vacuum for the first few days after Sputnik popped up on 15m. Beyond that the space race was pretty much a ho-hum as far as it's impact specifically on ham radio went until hams got into the game with the Oscars much later.

You see what I mean, Dwight? Lose the nonsense about crying. Both you two cry because a "CBer" is interested in crossing over to the Ham frat. And I don't give a Damn whether or not you are interested in Elmering anyone person. Doesn't this NG have an extent on providing "good" advice to other people regardless of hobbies? Especially trying to become Hams? And in no way did I try to "trash YOUR hobby..." All I did was tested your "attitudes" as well as others (like old fart BRUCEY) to see where you HAMS actually stand. As far as I can see, I see nothing but self-preservation. "If I had to pass a 13wpm code test, everyone else has to..." I see no room from your end as well as others who flamed my post for expansion. CODE is OUT! No one uses it anymore except Hams...

Bruce? Pull out your tampon and shove it in your mouth. If that is what you expect of a "CBer" to say, then thats what you get. You're the one crying, not me. Eff you, "Losssssssssssssssssssssseeeerrrr!!!"

So far as I'm concerned, you'll be happy to know I will not post here no more. That way I can save you money on tissue and Bruce on tampons.

The thing is, the percentage of hams using HF is way down too. To be
able to reach a critical mass of other people to communicate with on
VHF/UHF, you really need more people.

Everybody's curious to see what an example of an evolutionary dead end looks like, christian academy boy!!!! What's the matter, were you too FUCKING stupid for public schools, so as an CHEAP ASS alternative, you get indoctrinated with the dogma that you parrot so frequently?
Your so-called schools don't allow for independant thought...and it SHOWS.
Let's not forget you just have a CERTIFICATE from a community college, not a degree.
What'd you complete, about 40-50 credit hours to get it, if THAT?????

Did you hear it today? Limbaugh was talking about Clinton's good-bye speech last night and how it was filled with: *I...I...I, I...I...I*.

This message did not originate from the Sender address above.
It was posted with the use of anonymizing software at
http://anon.xg.nu

Using a little iron on each end like tongs is how I do it.
If the soldering iron tip is too big a file will make it
smaller.

Ham radio - just like the past 100 years or so.

> MURS might
> help a bit(if Motorola doesn't

Have you actually looked at the new Technician class tests? 35 multiple
choice questions, mostly on the regs and safety. Most of them are
common sense.

> Everyday now the USA is falling further and further behind Europe and
Japan

> in the wireless communications
> race.

I don't know about that. I do know what you propose won't help matters
any.

>As hams, it is time we make an effort to insure that our young people

> young technical minds are being taught properly.

Sounds good to me. Teach a class, donate some books and/or equipment,
set up a demo, make Field Day more of a family picnic/radio demo thing.
Works for me.

Whoa there. First you say it was good, then you say it was bad. Huh?

> as it is doing poorly in drawing young members into
> the Service.

How do you know that? Data, please.

> As a result of license restructuring, it is now actually
> harder for young people to obtain an Amateur license than it was
before
> restructuring.

I disagree. It's easier. Instead of two exams totalling 65 questions
there is now just one totalling 35 questions. Almost no theory at all.

How, with such rigid limits and simple tests? You think they are gonna
build radios?

>
> 4) Take advantage of the success of the Family Radio Service, and
provide a
> path for those young users interested in further radio
experimentation.

FRS is a success because you don't need to know anything about radio to
use it.
>
> The Colt license exam would consist of 25 fairly simple questions.

The Tech is only 35.

>Emphasis
> would be put on understanding the existing operational, safety,
etiquette

and
> their power dissipation, would be required.

That's a lot more than the current Tech requires. Try one, and
intentionally get all the questions requiring math wrong and see how
you do.

> Knowledge of capacitors and
> inductors would not be required.

Why not?

It's pointless, Stew. Young people will be drawn to ham radio by the
challenge, not by being spoonfed and treated like they are helpless
babies.

That was computer science you studied, right? Did they instruct you about the significance of website hits? Did you learn that every return to the home page from one of your SPAM subpages counts as a hit? Did you learn that a hit is recorded everytime someone just goes to see what a doofus you are, whether they like the page or not?

Now, if you had a guest book and forwarded some glowing reports, that might be another story... Nah, they'd all be from DX300, 301, 302, etc., or some other of your noms de web.

You see, when you go to real college, you learn statistics and what all these numbers really mean.

By the way, I've noticed you mentioning how "they're your views and no one can change your mind." Did you ever stop to consider that a whole bunch of reasonably intelligent, helpful (there've been many of us who've tried), erudite people telling you that your thinking is askew might be a major clue that your thinking might be askew?

Can you imagine how much easier your life would be if you'd take a listen?

". The idea was to spur competition, but an unfortunate sequence
of events, along with the help of some opportunistic and unscrupulous
companys lead us to where we are now. It would have been difficult to
foresee this particular outcome."

"Opportunistic and unscrupulous"? Not hardly - just the natural outcome
of a VERY flawed bit of political manuevering - BLAMING someone for
stooping over to pick up GOLD thrown at their feet is unrealistic - it
was ALL very predictable!

As a friend pointed out, the "emergency" will go away as soon as the $$$
start rolling to the "right" people - and those primary power
transmissions that were so overloaded as to require rolling blackouts
will immediately, overnite, become magically once again able to handle
to loads they had formerly been unable to...

Deregulation will continue to be the ffort here in California and other
states to follow, and the public will "benefit" from that deregulation
of electrical power JUST as we have in the area of fuel for our
transportation - you're free to buy it wherever you choose - at THEIR
price!

Yep, that's the way I often do it too. Great minds and all. If I only have one or two to take off, I just use a single iron (sometimes adding a bit of solder, bridging the R end to end to heat both ends at once). Seems like the only problem components are the ones that are glued down (typically on the "bottom" of boards that are wave soldered).

Cheers,
Tom

What you describe is, indeed, an unfortunate problem. We haven't had anything like that around here (yet). Reading the posts concerning the operating practices of new--or even old--hams, I have wondered about the following appproach to this: Why couldn't VECs take a little time after a test session to explain the "gentlemens' agreements, operating practices and something of the "culture" of Amateur Radio? IOO, discuss some of the things that newbies are likely to find are objectionable to other hams, urge them to listen to the more experienced folks. maybe talk about pro words and/or phrases that hams do/do not use. Explain that 10 codes, for example, *might* meet with resistance. It wouldn't take but a few minutes to just talk about their new hobby and the courtesies that are to be expected. Such introduction, rather than just turning them loose to the wolves, as it were, might be appreciated by the newbies and enhance their on-air experiences. By teaching them to "do as the Romans do", we could prevent such events as you have described. Any thoughts?

I wonder if it would be possible to get the text of the arguments made for the successful creation of this license class back in 1951. Even though they would be 50 years old, I am sure there would be some relevant ideas.

This stuff must be archived in Washington, DC, somewhere. I would think it would have been put on microfilm a long time ago. Does the FCC have a library for this kind of thing?

horseshoestew,
There's a lack of hams on HF? We must be listening
to different HF bands! Most HF bands have more people
on them than there is room for.

Top ten signs your phone company is in Glendale, WV

10. All calls are $2 for the first minute, $94 each additional minute
9. Operator makes you describe what you're wearing
8. Their so-called "dial tone" is just a guy with a kazoo
7. You can only place long distance calls during an electrical storm
6. They bill you for calls made by some guy named Roger, and when
you
complain they say, "whatsa problem, man, you no like Roger?"
5. Whenever you call their office, you hear gunfire
4. For some reason, your phone doesn't work unless you're wearing
3-D
glasses
3. Everyone you talk to sounds like the guy at the drive-thru window
at
McDonald's
2. No matter what number you dial, you always get Roger Wiseman
1. Their slogan is: "Reach out and touch yourself"

Can anyone tell me how to nondestructively disassemble my DJ160. I can get to disassembly easily enough, but I can see where advice could also help me make sure that I'll be able to reassemble the rig when I'm finished. If I get too heavy-handed in the process of disassembling in the wrong fashion, I can see a need to try to epoxy broken pieces together.

Please e-mail me directly.

Didn't say that. Go back and read. Again - I said the percentage of hams using HF is down. I would guess that the number using HF has remained fairly constant. As you know, those that are using VHF/UHF communicate over shorter distances - it is these people who I am talking about. Every year they become a greater and greater percentage of the ham population. The problem is that less and less of all hams are ACTUALLY using VHF/UHF.

Andy Roonie mode on:

Didj'a ever notice the only time a liberal mentions religion is to excuse
the actions of another non-believing liberal.

Jew's are fond of using Jesus' words in much the same way.

Liberal Jews can become more Baptist than a southern preacher when it comes
to excusing the peccadilloes of Clinton or Jesse Jackson.

Dear all,

This might be slightly off topic, although this was the closest
newsgroup I could find so I hope you guys don't mind this. I'm trying
to find out about legality of institutional use of cell phone jammer. I
have been told FCC bans any device that is meant for malicious
intereference with authorized communication device. I am almost certain
that individuals are not allowed to operate them and I'm pretty sure
schools aren't allowed either. For somereason our school have them and
we can't use cellphones. If it isn't legal can someone provide me with
the FCC statue regarding this? The FCC statue would be a great help
in fighting against schools as if they are in violation of FCC law
they'd have to stop using it, which means we can use cellphones.

JC

>
> Yes, it is your right and you should fight to keep it!
>

I believe so. I should fight for it. School might have the right to write out all
this crap in their policy book, but they have no right to violate FCC rule in order to
enforce it.

>
>
>
> Deliberate interference should not be tolerated in any form, I am agreeing with you.

If they are allowed to do this, we students should be allowed to eat whatever we are
pleased to in the classroom and interrupt the class as how we plese.

The blocker means that student that walks to school can't call home without waiting in looong line at pay phone to arrange a pickup when you discover its raining outside really hard.

>FCC have a library for this kind of thing?

FCC tended to throw out old stuff like the plague several years back.

Here's the basic story:

Before 1951, there were three classes of ham license in the US - A, B and C. All required 13 wpm code, sending and receiving, plus a written test of 50 or so questions. These questions involved multiple choice, drawing schematic diagrams and some essays. B and C were equivalent except that C was by mail. The top class of license (Class A) required a year's experience and another written exam that was much tougher.

And there were about 90,000 US hams in 1950.

The 1951 restructuring renamed the existing classes and added three new classes: the Extra (20 wpm, 2 years' experience, and a written that made the Class A look easy) the Technician (5 wpm and the same written as the old Class B/C, but only good on 220 and up) and the Novice (5 wpm, very easy written, only good for a year, very limited privileges).

The purpose of the Novice was NOT to attract young people. It was to create a training step so that hams could develop their code skills and technical knowledge by doing. Many Novices built their own gear from scratch or kits, or converted military surplus to ham use.

Do you think many "Colts" would build anything?

The world was very different then, however. W3RV describes it exactly. He was there. I was there a dozen years later (mid '60s) and things had changed very little. The main differences between his Novice time and mine was that in my day ham radio had to compete with the CB craze, and in my day there was more store-bought gear. But there was also a lot of building, military surplus and kits.

The thing that motivated kids like me and Brian and a bazillion others was being able to work other hams all over the world on our little stations, using our own work, skill and knowledge. Without a bunch of nosy parents and well

meaning elders hovering over us all the time. A corner of the basement, a decent yard with a tree or two for wires, some castoff tools and furniture, a little support here and there and TIME was all we really needed. It's all any kid really needs.

Look at the current Technician test. It's not too tough for anybody with a real interest in radio. Most of it is regs and safety - just as it should be.

I am waiting for the day when a BATF/SS/FBI-HRT/DEA raid goes real wrong. Like they take out a day care. Or a retired folks home. Or a church full of non political worshipers.
OR, when they go up against someone with the brains to use their own tactics to kill a bunch of human scum. All of the afore mentioned agencies have some decent, hard working, well meaning employess. And a lot of gung-ho goons who do not understand anything about our constitution. If a raid team gets eliminated the rest might stop to think. Up to now they are the ones doing most of the killing. Imagine home made claymores. Or a porch that collasped to a killing pit. OR a flame pit. Their bullet proof "vests" only protect against one threat. Imagine a comercial insecticide (one is derived from Nazi WWII nerve gas experimnents and used to get a few farmers every year back in Ky) that is sprayed on the raid team. Twitch city.
And no, I am not advocating killing anyone. Either innocents in a day care, or the scum hiding behind the badges they dishoner.

>Liberal Jews can become more Baptist
>than a southern preacher when it comes
>to excusing the peccadilloes of Clinton or
>Jesse Jackson.
>
They have to stand in line behind the Liberal Protestants. Remember when the Southern Baptist Convention "almost" voted to censure Komrade Klinton? The operative word here being "almost".

We had a saying on the playground .. "almost only counts in horse shoes and hydrogen bombs".

Nope .. I am NOT lambasting the SBC. In fact, God bless and keep and prosper those SBC-ites who are aligning themselves with Founders Fraternal. http://www.founders.org

Far to the "left" of the SBC, you'll find "certain" religious bodies which paved the way into the values-free religious climate in which the antics of Klinton and Jackson are smiled upon and encouraged.

Wanna trace it back to the beginning? Start with a search for "Charles Allen Briggs". Think of him as "the heretic who won".

Dunno how "cool" it is but it was a poke at demonstrating why us Old Farts
come from fundamentally different "cultural" directions than do many of the
much younger hams of today. I mean like the whole point to RRAP is that it's
the current really whizzy outlet of convenience for the usual generational
warfare which probably goes back to when the first Species Homo Sapiens kid
told his father he wasn't gonna sleep up in the freaking family tree any
longer.

I guess so considering the big volume of hams today which don't have HF
privs which was not the case in earlier days. .
>
Fact is that there isn't any way to put the calipers on HF activity and band
utilization. If I had the time I could spend all day every day on HF and
barely even scratch the surface. Over the past half century four MF/MF ham
bands have come into broad use thus there is something of a dilution effect,
basically a 55% percent increase in the size of the playground. We got the
three WARC bands in '79 which accounts for three new bands plus 160 has
returned from the deep dark "200 Meters and Down" days into a very current
hot button.
>

> able to reach a critical mass of other people to communicate with on

You betchum. There was a huge outcry from the Old Farts of my youth about
the FCC and the ARRL having the unthinkable audacity to even suggest
letting pimply 5wpm weenies like me get on the HF ham bands until we did
13wpm solid copy with a pencil. In front of an FCC exaniner of course.

No. Regulatory agencies are not keepers of history. It's all in the ARRL
collection of QSTs now archived in CDs going to the 1915 issue one, volume
one, in particular cruise the Letters to The Editor columns for the
earlier iterations of rrap. Heh.

Do you have a reading problem, or what? I've already said that I, and most ham operators, do not care one way or the other when it comes to you getting a license. Furthermore, as I've already said, it should not matter to you at all what I think. If you get a license, it should be because of your own interests, not what I say. Likewise, if you don't get a license, it should be because of your own interests, not what I say. The same is true for what anyone else says in this newsgroup or anywhere else.

> [snip] Doesn't this NG have an extent on
> providing "good" advice to other people
> regardless of hobbies? [snip]

You got good advice on the issue you raised - CB'ers wanting to be hams. You just seem determined to ignore that advice.

> [snip] All I did was tested your "attitudes"
> as well as others (like old fart BRUCEY) to
> see where you HAMS actually stand.

You really do have a reading problem. I've already said that you cannot judge an entire community by what one person says. Bruce's 'attitude" is Bruce's attutude. My attitude is mine. And the attitude of all other hams are theirs. But none of that should concern you in the least (the license you get is yours, not Bruce's, mine, or anyone elses). The only thing you need to worry about is your own attitude.

And the attitude I've seen so far is not going to make friends in this newsgroup. So far, all I've heard you do is complain about the hams around your parts (and in these newsgroups), how you would be a fool to become a ham, people jamming you, a**holes in your town, my non-elmering attitude, your rats-ass, people giving you a hard time, how discouraged this makes you, and your nocturnal entertainment (eat s**t and bark at the moon).

You came into this newsgroup with an attitude, and you got exactly that in return.

> So far as I'm concerned, you'll be happy to
> know I will not post here no more.

Thank you. I'll try not to lose any sleep over that.

I'm just gonna find an appropriate FCC section and send it to school. As to making sure jammers are using jammer, they annouced "one will not be able to use cellphone inside the building as we have a cellphone blocker in use" on bulletin.

Why don't they make some effort to do more with geothermal energy? Ca.
is loaded with the stuff and there's no natural gas bills involved. Too
simple a solution?

I know there is some geothermal installations in northern CA but looks
like it would be -or would have been- an easy out for them all along...
Guess that's too much to ask from politics, 'specially on the Left
Coast. No "vested interests" in geothermal as in oil and gas.

Here is Asscrofts voting record:

Restricting abortion has been a hallmark of his career.
Opposes all abortion, even for rape and incest.

Voted NO on $1.15 billion per year to continue the COPS
program.

Voted YES on limiting product liability punitive damage
awards.

Voted YES on restricting class-action lawsuits.

Voted YES on repealing federal speed limits.

Voted YES on allowing another round of military base
closures.

Voted YES on cutting nuclear weapons below START
levels.

Cosponsored and won enactment of legislation providing
Education Flexibility to all 50 states, granting states the
power to waive federal requirements attached to certain
federal education programs to streamline paperwork
requirements and target funding where it is needed
most.

Led the fight against the President's national testing proposal
that was subsequently banned in law.

Voted NO on keeping CAFE fuel efficiency standards.
[A YES vote is considered pro-business].

Voted YES on defunding renewable and solar energy.
[You can thank Mr. Asscroft for your high gas bill this winter.]

Voted NO on restricting violent videos to minors.
Vote to kill an amendment that would prohibit the distribution
of violent video programming to the public during hours when
children are reasonably likely to comprise a substantial portion
of the audience.

Voted YES on allowing more foreign workers into the U.S. for farm work.

Voted YES on requiring licensing & background checks at gun shows.

Voted NO on including prescription drugs under Medicare.

Voted YES on limiting self-employment health deduction.

Voted NO on increasing funds for Medicare prescriptions.

Voted NO on increasing tobacco restrictions.
[Sales to minors]

Voted YES on Medicare means-testing.
[Most here will get the "quality care from the VA Medical
Center so you don't need to worry about this]

Voted NO on medical savings accounts.

Tougher school rules keep schools safe.
[a.k.a. Zero Tolerance]

Voted YES on using the Social Security Surplus to fund tax reductions.
Voted NO on allowing Roth IRAs for retirees.
Voted NO on allowing personal retirement accounts.

Ashcroft probably won't tell the government to halt entirely its antitrust
case against Microsoft. Ashcroft is one of the most tech-savvy senators,
and was one of the first to have a Web page. In a 1998 Senate Judiciary
Committee hearing, he he took a very skeptical view of some of the
company's business practices and noted it had a ï¿½monopoly share
of the market.ï¿½
Source: ABCnews.com, ï¿½An Ashcroft Justice Departmentï¿½ 12/ 23/ 00

Voted NO on Internet sales tax moratorium.

Voted YES on killing an increase in the minimum wage.

So expect LESS Gun Rights and BIGGER Government...

Enjoy....

Ike

I think you missed the point. We were talking about "violations" of a gentleman's agreement (the key word is "violation"). If you take that attitude about gentleman's agreement, especially with someone not aware of that aggreement, you're going to have trouble.

Lets give an example. You, Bob Smith, and I, meet on a street in your town. You and Bob Smith have an agreement not to talk about Santa Claus, yet I start talking about Santa.

Now, you have a choice at this point. You can either politely say that you would rather not talk about Santa or you can start lecturing me about your agreement. The first response will probably cause me to immediately change the subject without any hurt feelings, while the second responce is almost certain to offend (how the h*ll am I supposed to know about your agreement and I didn't agree to it).

The situation gets even worse if a forth person, Bob Jones (the cop), jumps into the conversation and starts lecturing me about your agreement. The rudeness of this intrusion into our conversation, and the embarrassment of being lectured, will almost guarantee an angry response on my part.

In the end, it is no different on the radio - the same results.

> What should the 2 meter SSB DXer do when a couple
> of local FM simplex ops takes out most of the band
> that is used for SSB DX? [snip]

Don't start lecturing about gentleman's agreements. Instead, excuse yourself for interfering with their conversation, explain the situation (you're trying to make contacts on the frequencies primarily used by SSB'ers and their signal is interfering with those contacts), and politely ask them to change frequencies (if you would, could you please move to another frequency - perhaps 145.???).

With this method, they have learned about the SSB frequencies, that talking near those frequencies cause interference, and that they should pick other frequencies for their FM conversations. All without being lectured (and the resulting bad feelings).

> Here's another true story:

Well, that was a nice story. However, we seem to be jumping all over
the place here. First, it was about an honest mistake by the newcomer.
Next, with your story, it was about the worse example one could think
of. Since most newcomers who make simple mistakes are not going to turn
into the nightmare you describe, I think I'll avoid comment at this point.

> What should we have done differently? How do we
> define a set of basic "radio values" and get folks
> to follow them?

And I think that is exactly where "we" will get into trouble. As soon
as "we" start defining 'radio values," and "we" start trying to "get
folks to follow them," "we" are going to have disagreements, arguments,
and fights. And ham radio will suffer even more than the original
problems might have caused in the first place.

I realise that it is hard to sit back and ignore those little rule
violations, but in the end that is far better for ham radio than the
confrontational approach.

> Check out the ARRL webpage and see what Riley has to
> say about "radio rage", too.

And I agree fully with Riley on this one (and I seldom agree with
him). Just like with road rage is for driving (where accidents are
caused by someone trying to get even with that person who is following
too close, etc), radio rage is just as much of a serious threat to ham
radio. Fighting with the person on the radio seldom works, and usually
results in the person trying worst things (the opposite effect of the
original goal).

Years ago, when I was on CB, I had a standing rule not to argue with
troublemakers (in many cases, that was exactly what they wanted).
Instead, if they did something I didn't like, I would politely ask them
to stop. If they failed to stop, I would just take a break for a few
minutes. Once they realised they were not going to get a response, they
usually went away. And, after a few weeks of doing this, I never had
any problems on the radio (nobody ever bothered me and I enjoyed great conversations).

I still apply that same rule to Amateur Radio (and it still works).

Entry into ham radio today is for the middle aged to the retired, for
those who "always wanted to but never had the time or extra money, job
and family responsibilities kept me out", etc, etc. Kids have no clue
nor any interest.

In the eight years I worked as a VE we handled almost no kids, nor
anyone under age 30. There were a few females, but very darn few. Most
of the crowd were aged 35 and up, with the oldest at age 80.

My VE time ended over 7 years ago and I don't think it has done
anything but get worse since then. At that time we had no Internet
access in this rural region. The arrival of that passtime pretty well

cinched it.

That's fine, Darrell. However, I suggest that you read back over the last few months (or years, if you prefer) to see the number of politically related discussions in this newsgroup. In other words, political topics have been part of this newsgroup since its very beginning.

And there are several reasons for this. The main one is that many of the regulars in this newsgroup post here rather than chasing each other around the newsgroups simply because it is easier.

Of course, this should not bother you since you're free not to read anything that does not interest you (nobody forced you to click on my message and read it). In other words, if you see a topic that does not interest you, simply move on to other discussions.

Obviously that is hard to do when you don't agree with the content of the message you're complaining about. And it is especially hard when you cannot think of an effective argument against what is said in that message. So, instead, its easier in this case to fall back on the old "this is a ham radio newsgroup and the message is inappropriate" argument in an effort to hopefully end the discussion before it gets started.

Likewise, no disrespect intended, Darrell.

I don't think he has read the newsgroup at all. Just glancing through the subject headers, at this very moment there are discussions about prisons, the California power crisis, cellphones, gay web sites, top ten most popular alchoholic beverages, and Jesse Jackson. Its not about politics - he just didn't like what I said.

The interesting thing about this is that it does not seem to bother the parentage that they are out of contact with their beloved offspring. In the age of 'helicopter mommies' ready to fly in at a moment's notice to be sure their chicklets don't suffer the consequences of their own actions this is uncommon to be sure. If you did get to mommy for a ride, she would have to fight the other mommies to get within three blocks of the school; the biggest traffic jam in town is at the local school at closing time -- the cops are there to suppress the fights among parents not the kids. Sounds a bit lame, JC.

Ever stop to think that the block might be done by the local cell phone company as part of their franchise agreement -- rare but possible as phones do have to be locatable these days. Might it be possible that the parentage are more interested in not being able to call your pusher than in being able to call them? Sounds like you need to do a bit of research and put an umbrella in your locker.

Before raising legal issues, you might want to contemplate a classic story from Oxford. Seems that a young man in perusing the ancient regulations found one which entitled him to a pint of beer each day during final week. The honcho of the college dutifully had his man deliver a pint to this student, the last one coming with a summons to the honcho's office. At the meeting, the student was fined enough under another old regulation to pay for the beer. His offense? Not wearing a sword.

HOW can Suzy get any cash based on a W-2 if she has not filed yet? Does Suzy go to one of those storefront services that gives "instant returns"?. You know what I mean...a cheap, low-life stopping-off point for those with no bank accounts and no credit? They give you seventy cents on the dollar for your tax return?
I suppose if you need the money bad enough and you have no bank account it is the only game in town.

First things first. Suzie will blame this post on her latest percieved enemies. Suzy cannot trace the headers and gets angry...ergo Suzy blames everybody and anybody. Years of Cannabis ingestion has a way of befuddling the brain.
Secondly, how can Suzy get a tax refund when Suzy has been unemployed for eight months?

Suzy...get on those rascals you think are posting...Give N9PEG some Hell for me and do the same for Graham W3GJB. You can get ohters too...you know who I mean. Jam em.
gee...maybe Suzy could get a job mowing lawns this summer. Beats washing toilets.

Yes you do have something to complain about. It's going to cost you
another $10 to take the Extra exam at the next session when it should
have been included in the last session. Whether you took it when you
upgraded for general or later, they are still going to charge you an
extra $10. I'd show them the FCC regulation (I posted it here in
another reply to you) and ask for a freebie.

You obviously have a computer, so the solution is to get some Morse training software. There's a lot of it on the Web for free - try Morse University at

http://www.ah0a.org

Also, look at:

http://griffy.nmt.edu/sara/sara/finley.morse.html

for an excellent explanation of how to use the Koch method. Written by Dave Finley, N1IRZ, it does an excellent explanation of the method, how to use it, and why it works better than other methods for most people. Good bibliography and a detailed explanation of how to do it with Super Morse.

All that you really need to know is right there.

Koch first published his method in 1936, but it got little ink, probably because there was no way to easily implement it at the time. Computers changed all that.

A group of Koch's students back then achieved 12 wpm solid copy in just 13.5 hours of practice.

I have no connection to N1IRZ - don't think I've ever heard or worked him on the air. His stuff is right on, though.

More resources:

Go to the MEGS site:

http://www.joates.demon.co.uk/megs/

and read the wonderful online book by N0HFF about all aspects of code learning and operation. Worth downloading the whole thing and printing out.

Quick tips (I can expand on these if you want):

- Train to be an operator, not just to pass the test.

- Practice at least 15-30 minutes/day, every day. Two or more short sessions are often better than the same time spent in one long session.

- Use the Koch/Farnsworth plan (See below).

- Study/practice both sending and receiving. Each helps the other.

- Use any and all available training aids - computer, tapes, CW receiver, etc. Change things so you get used to all sorts of code sources.

- Don't stay at one speed or with one set of characters until you are 100% copy. When you reach 90-95% copy, add characters or increase the speed.

- Don't worry about advanced stuff like a speed key or word recognition at first. Concentrate on getting a solid 15-20 wpm with pencil copy and a straight key first.

- Set up a proper CW station and use it.

- Try a lot of different things. What works best for one person may not be best for another. Some people find a pencil while others do better with a pen. Some find lined paper a help in copying, while others like plain white paper. Headphones are a help to a lot of folks because room noise and echoes are reduced.

- Keep practicing, and keep asking questions!

--

The Koch/Farnsworth method:

Get a code source that can do Farnsworth-type code (Most code practice software can do it). Set the character speed for 18 to 22 wpm, and the text speed for 10 wpm or so. The result will be code that sounds like:

dah.....dididit.....didit.....dididit

rather than:

daaaah.....dit dit dit dit.....dit dit.....dit dit dit

Start out with just two letters. Practice copying until you get to 90-95% correct copy, then add a letter. Repeat until you run out of letters. Add the numbers and characters until you run out of them.

The idea is that the fast character speed lets you hear the character as a single soundgroup (dadadidah) rather than several independent sounds (daaah daaah dit daaah).

Then increase the text speed (which decreases the space between letters) and pretty soon you'll be solid 20+ wpm.

This is the "Farnsworth-Koch" method. It's best used to learn the code from scratch, but is also useful for increasing speed.

Any more questions, just ask.

I did not think of that, and it is a *very* good question, what do the parents think and how come they have done nothing up to this point? What do your parents think of this? How about the other students parents? None of them have contacted the school on this issue?

That is a possibility too, needs some research. This is not going to be easy and will take some time.

I like that one. Make sure you are looking at the whole picture, some of the fine print could come back to haunt you in the end.

>

Have you contacted an attorney? Many of them have free first time consultations. Check your phone book, you could get lucky if you contact the right one.

According to the New Republic article, close elections usually
mean that the president does not drag in a lot of dead wood
or political hacks into congress. That means that these people
in Congress are pretty tough birds to try to unseat. Reapportionment
also shifts a number of seats from liberal states to more conservative
southern states. So do not get your hopes up.

As far as a down turn in the economy. Guys there are a lot of
folks who have been working 60 to 80 hours a week through
out the Clinton administration. They WANT a slow down in
the economy. And illegal Mexicans make up the bottom end
of the labor force, as guest workers. If we have a slow down
then it only takes INS to do massive sweeps throughout the
country and bingo we no longer have unemployment.

: So expect LESS Gun Rights and BIGGER Government...

The AG enforces law. It is congress that makes the policy,
not the administration. The real problem, which you seem
to not want to face, is that your fellow American want big
government. That is what makes it so hard to change the
direction of growth.

However, we Republicans have slowed the growth a great
deal. Liberals are no longer able to push their ideas freely.
You can thank folks like Rush Limbaugh for educating the
masses.

So stop being a radical. Our system of government does
not encourage fast change in the way government works.
It will take time to reverse over 50 years of socialism in
America.

Now go change your diaper, colostomy boy. That's what you have to do on
a hourly basis from what I've heard. Of course, it wouldn't have
happened if your drunken, alcoholic daddy didn't use you as his bitch
for years.

>BOO!

Even though you never have to really dress up for Halloween, it's still
way too early for it.
You're so stupid it's a wonder you can remember to breathe. A half-wit
gave you a piece of his mind, and you held on to it, isn't that true,
PISSFLAP?
Now, why don't you two attack W4NTI, he made a "non-agression" pact
with W4AMP as well?
Or are you just a couple of hypocrites?

What did you e-mail me that you liked to ream with your tongue??
> Asshole.

Yeah, that's what it was.....
Hey, I heard you went to the butcher and asked for 10 cents worth of dog meat and he asked you if you wanted it wrapped or if you would eat it on the spot.

Fuckhead.

Did not Jesus tell you to stand against evil? Did he not tell you to avoid sin? The Clintons are evil and cause others to sin. Best to avoid both.

Oh, if Clinton was a great leader in your mind, then you must have just loved Hitler and Stalin.

>
Good point. There's a lot to be said and a lot yet to be learned about
geo-thermal energy. Until very recently I was working on a project in a building
which was originally built as a commercial aircraft hanger. The next building
over is also a hanger converted to industrial use. The owner of that building
had a geo-thermal firm come in and punch twenty-some thermal wells in the front
lawn, install a complete heating/AC system, etc. Lotta bucks to get it running
but the owner expects to get heat & A/C energy savings somewhere in the 75%
range. Struck me as amazing, I had no idea it was possible. This is not SoCal,
our lows go to sub-zeros and the highs can hit over 100F with electricity
somewhere in the 13 cents per kwh. range. That guy is gonna save tens of
thousands of dollars per year, he'll get his investment back very quickly.
>
Yeah, a lot more needs to be done with geo-thermal energy in all it's forms.
>
A week or so ago it was announced that the first investor-owned wind power plant
came online, 200 monster high-efficiency windmills somewhere in the Northwest.

JEALOUS?

Or just lazy?

If "gays" (a category which include women, Blacks, Asains, Hispanics,
seniors as well young White males) happen to be affluent it just might be
because "they" STUDY hard, WORK hard.

If "gays" are morew afluent, it is is in spite of he fact that they don't
get a whole lot of the tax-breaks, lower insurabce rates, lower mortgage
rates that heterosexuals do.

However, the truth is that "gays", as as been stated numerous times, are
not more affluent as a whole than society as a whole.....

I'm absolutely convinced that the Internet is the worst thing that ever hit ham
radio. Beyond that I don't think for one minute that a "solution" is to introduce
Internet-like capabilities into ham radio, they're two entirely different animals
with the only commonality between the two being competition for what people chose
to do with their leisure time.

Enron has been running one in Iowa for years but is limited by Iowa P&Ls
grid. It is on their website.

Look at the companies they got to do the designs of everything from the
propellors to the gearboxes to the towers. Reads like a Who's Who of
engineering couth.

That goes without saying, and unfortunately phones have little to do with
it.

Additionally, I suspect he has one of the 1+ GHz phones and is running into
either too much rebar in the walls or just plain poor coverage. The grand
digital systems leave much to be desired. A lot of blank areas, poor
reception inside buildings, and other such. Maybe we can get him to study a
bit of radio fundamentals? At least his reading might improve....

Very well put and accurate. I just heard the former President tell
everyone how much good they had done. And that just because they were
no longer in political power, that was not a reason to stop doing what
they did for the last 8 years. Hmmmmmm, where's Monica?

I am holding out hope that after the American public saw the demoncrats
in action in Florida, they will put an end to this feel good crap once
and for all.

Amateur radio operators are thinking individuals. (for the most part)
Amateur radio operators think of other things, besides "rig here is".
(for the most part)

I have no problem of discussing things that effect our lives in the
context of a 'radio group'. In fact it gives us the thing that keeps
it all reasonably civil. And whats that you ask? A interest in radio.

Just my opinion, no disrespect intended.

I'm completely out of touch with that whole topic area, shame on me, I gotta
get up to speed. I've kinda had a jaundiced view of it because of some
business encounters with out-to-lunch basement inventor types who were
diddling with it. If the big guns are into it the scene has changed
dramatically.

He hasn't delegated the authority for the collapse yet :-)

just look at Enron.com and select Enron Wind. Incidentally, they run a
1.6 MW plant at Tehatchapi CA.

Dick

Naw, they were bitching about the 1996 Act, which allows deportation of immigrant murderers, rapists, gang bangers, drug dealers, robbers, burglers, and other poor "victims" of society.

I believe they are blaming the energy crisis on deregulation, but, like everything else, the blame will soon be on the GOP. However, we do tend to wait until someone is actually in a position to do something BEFORE placing blame, so as of today (YEAH!) it will be Bush's fault.

What a bastard!

1) We have "Black History Month", but no corresponding "White History Month."

2) Most universities and colleges have a "Black Student Union", but no corresponding "White Student Union."

3) Most universities and colleges also sponsor "Black Pride Week." Black students are given special t-shirts and encouraged to show their "black pride." If white students acted in a similar manner, they would likely be expelled for their actions.

5) In recent years, Martin Luther King, Jr. Day has been added to our calendars as a holiday. Meanwhile, Columbus Day has been de-emphasized or removed entirely. It's okay to honor a known womanizer and communist symphathizer, but not the man who discovered our country.

6) Why does the United States Postal Service issue a series of "Black Heritage" stamps, but no corresponding "White Heritage" stamps?

More to follow...

Ed,
In my opinion, the A.R.R.L. lost it's credibility, and deviated
from it's stated purpose quite a few years ago.
From experience, they are of little use when they are needed, and
I completely disagree with editorials which advocate not following
the Rules. I will not support an organization which does not
represent my views, or those of the majority of the 'ham' community.
I think that pretty well 'sums' it up...

California has considerable windpowered electric generating capacity
already, tho I don't know its efficiency level. Altamont Pass on I-580
about 30 miles east of San Francisco is almost surreal, you cruise over
the mountains surrounded by hundreds of large modern windmills, of
several designs including Savounis(sp?) Rotor ("eggbeater") style, all
churning away, dumping their output into the power grid. There's another
similarly sized field on State Rt 58 at Tehachapie Pass east of
Bakersfield, well to the south. These locations are places where the
wind almost never stops. I don't know much about the capacities of these
generators nor much else about them (and would be interested) but they
appear to be sizeable. I'm told that all are privately owned by
investors who sell the output to power distributors, who are mandated
under law to buy it.
Evidently these have long been absorbed into the consumption scheme
and many of the windmills have been in place for a long time, and each
time I go out that way I see what appears to be newly installed units.

You are an INS agent, how much has immigration added
to the problem? After all, California seems to have doubled

in population while not increasing any power plants over the same period. And a lot of that growth is due to immigration.

Hams were involved by listening to Sputnik. Some actually built crude tracking systems, and sent reports in.

The first amateur radio satellite, OSCAR 1, was launched just four years after Sputnik. It was the first nongovernment artificial Earth satellite.

To gauge the effect of Sputnik you first have to understand what ham radio was like in those days. Not just the license classes but the equipment used, the trends, and things like the SSB vs. AM wars, which make the whole "code/no-code" thing look tame.

Top ten signs you're in a Hiram, GA hospital

10. You go in for routine surgery, you come out with a tail.
9. You recognize your doctor as kid who was mopping the lobby when you checked in.
8. Instead of sponge bath, they send in a St. Bernard to lick you.
7. As you're going under, your surgeon says, "man, am I baked."
6. In operating room, you see Roger Wiseman scrubbing up.
5. Every couple of minutes you hear a bugle playing taps.
4. All the diplomas on the wall are signed by Sally Struthers.
3. You and your roommate have to take turns on the I.V.
2. Through fog of anesthesia, you hear surgeon shouting, "bring the damn scotch tape!"
1. Instead of "patient" they use the term "plaintiff."

Top ten signs you've visited a Hiram, GA chiropractor

10. When you walk, you make a wacky accordion sound.
9. Keeps saying, "A spine is like a box of chocolates."
8. Repeatedly asks, "You a cop? You sure you ain't no cop?"
7. Over and over, you hear crunching sounds followed by "Uh-oh."
6. There's a two-drink minimum.
5. At end of session, lies down on the table and says, "My turn!"
4. He was trained by Roger Wiseman.
3. Rushes in late to your appointment, still wearing his Burger King uniform.
2. Hints that for an extra $50, he'll "straighten" something else.
1. You're fully-clothed and he's naked.

Our last close election put Kennedy in office. Two years later, the
Democrats gained four seats.

>Reapportionment
>also shifts a number of seats from liberal states to more conservative
>southern states. So do not get your hopes up.

The balance of state legislatures is radically different than it was ten,
twenty, or thirty years ago. Redistricting will be to the Republican's
advantage, as well.

I have the xcam2 and reciever (NTSC) and wish to use it on a pal TV. Am I correct in thinking that the camera module actually controls whether it is pal or NTSC as this is the only place where there is a crystal. Also if this is so, does anyone know if I can change the XCam2 camera module to PAL from NTSC? E.g just by changing a link on the camera board, or even changing the crystal (FC14.318) for a different one?

Thanks,

Justin .

Source record: 94892

I've read this entire thread and there are merits to both sides of this issue. The issue of 'cell phones in schools' is a really small thing when juxtaposed with the larger issue of denying folks their rights. What happens in the schools has a nasty habit of happening in the community at large. We hear about students that are punished for the carrying of a nail file in the glove compartment in a car in the student parking lot (a student in a school district with a 'zero tolerance' policy for weapons) and students that are punished for carrying aspirin or menstrual relief medicine (students in a school district with a 'zero tolerance policy for drugs) all the time. There was a brief time in this country when all your property and anything you had and were likely to ever get were taken away as a consequence of the discovery of one marijuana seed in the cuff of your pants. I know of a community where the local government is dominated by school teachers and the same type of 'Stalag 17' policies seen in the school is now being imposed bit-by-bit on the unfortunate residents. The issue of prohibiting students using cellphones in the schools is probobly a necessary practicality but disabling them for all is an encroachment on the rights of everyone. What about the teachers? What about visiting parents? Here we have an excellent example an 'authority' removing a 'right' that is doled out later as a 'privelige'.

What the whining power companies in CA forget to mention is that
nobody stopped them from building more power plants. Solar is cheap
and abundant in the mojave desert and I understand that there are many
great sites for geothermal in CA also. Perhaps instead of whining
about buying surplus power from other power companies at 3X the cost
it would have been for them to generate it themselves they should
build more power plants so they CAN generate it themselves?

At least one thing is well known about Lloyd. We all know that he likes
women instead of the fags that permeate this newsgroup. The other liberals
however have their own boyfriends. At least, one thing about the fags, they
will not be able to reproduce and therefore eventually die off. That is why
they have to recruit little boys into their movement and brainwash people.
The queers are all about brainwashing and mind control so that they can keep
building their gay army.

Hey Charles, tell us all about your career as a dentist? We would all like
to know the full truth about your career as an orthodontist.

1620. Re: cellphone block

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-21 01:31:14 UTC
From: W4JLE <Fred@w4jle.com>
Message-ID: <94de5m$ip2$1@iac5.navix.net>
Source record: 94899

What a bunch of politically correct schlock. Get it through your head,
school and real life are two different things. The cell phone calls were all
blocked when I was in school by the simple fact they had not yet been
invented. How did we survive our youth without them?

The only "rights" kids have are to be protected and fed. Show me in any bill
of rights that some snot nosed kid has the right to a cell phone in school.

Like you I am of two minds on this issue. JC is an example of why
American grads are dunderheads as a group. There is obviously more to
this story than this apprentice-adult lets on.

I too have experienced bizarre behavior from educators -- enough to where
being a teacher ranks one slightly below a used car dealer a priori.
Never, never let the teachers' union have input to anything, class
scheduling, curriculum, nothing. As a group, they are dumber than dumb
and politicize everything. Rather reluctantly, I have come to support

vouchers out of sheer desperation and agree with GWB that accountability is the whole name of the game.

I coached middle-school aged football in Central Wisconsin for five years. The hardest part of it was overcoming the almost-instinctive urge of the players to be robots. When the message got thru that I would suggest a play to take the pressure off the QB but didn't really care if the QB called something else and that defense consisted largely of doing your job with the confidence that your teammates would do theirs we put together teams that might win or lose (more Ws than Ls) but you better have your chinstrap fastened. It wasn't my team, it was theirs; don't justify yourself to me it's your teammates that need convincing. Their school, a new one, had all the ambiance and certainly the design of a medium security prison (the state owned a dead ringer with three cellblocks I mean grade pods). We had a flap in another district (lived in it, coached next door) with the student paper in which one male columnist rather tastefully for 17 noted that one of the teachers caused some perfectly normal 17 year-old male fantasies; she of course threatened to sue. When the article appeared in a local weekly, the entire reaction was 'so what' but it had the super and the principal out rounding up copies of the paper -- incidentally one that had won several recent and deserved awards.

The tendency of those in the ed biz to chase the mice in an elephant stampede is absolutely incredible. The classic definition of a 'fanatic' is one who redoubles his efforts having forgotten his goals -- sure as hell fits. If he doesn't fit the mold, put him on speed. Never ceases to amaze how the hyperactive kid can play Nintendo for hours.

So my sympathies lie with the students for the most part. It is difficult to imagine one of the inmates having been granulated in June managing to show up for work on time, get to a 7AM college class, or ever getting used to the corporal with the garbage can lid.

Four ladies in their 90s were regular visitors at the Wednesday duplicate bridge game, tournament bridge if you like. One of them named Lulu had at one time been the high honcho for teacher education back in the two-year days. Get her going and stand back. Leave the curbstone psychiatry behind and learn to teach, to present, to be the actress the situation needs. It's a job, a craft, dammit not a social crusade.

Yet when having to deal with students who are so closed to change that they have to have outside distractions -- cell phones, walkmen, radios, etc. -- and no curiosity whatever, plus an administration that couldn't administer two carts in the same supermarket without a collision, not to mention the parents of these walking derelicts ready to be really sure our kidlet never has to bear hardship, depravation, or godhelpus a loss of self-esteem when there is no self to esteem, it is not a great wonder that the good teachers get the hell out.

When one is 14 there are only two steps left between pubic hair and adulthood: development of an identity separate from the herd and realization that there are long-term goals that require short-term

sacrifices. Both relate to development into semi-adequate parents not to mention other areas of usefulness. It is really scary to contemplate meeting JC behind the wheel of a car, fathering a child, or working someplace that involves my safety. It is also scary to contemplate meeting his principal at all.

Almost makes you wish to be God and start a hail of fire and brimstone or at the very least 40 days of rain.

Dick N&#65533;BK

First, I should say that I don't personally believe immigration has any substantial effect on our power requirements.

But, as we all know, if immigration was the cause, nobody would ever admit it, for fear of being labeled a racist.

Tell the truth, I have no idea why, all the sudden, we don't have power. We were a bit short last summer, but we still had enough, even though air conditioners were blowing full blast. Now, they are short, but we're using much, much less than last summer. No major power plants have gone belly up, no major disasters effecting key points in the grid, and no spikes in population. The rate of immigration (to the state as a whole) has dropped somewhat over the past couple years.

Personally, I think it's the power companies doing it. When deregulation hit, they were pissed, and they did everything they could to block it, including threats to raise rates, which they followed through on immediately. Some folks are now paying double or more. They also seemed to have changed the rules. Before, if power was short, they would cut off certain businesses first, as per their agreement in exchange for lower rates. So far I haven't heard of any businesses getting cut off. They're going straight for the houses.

I think Governer Davis has a part in this, too. He acts like he's trying to solve the problem. There's a couple things he could do, though he hasn't. He could call up the National Guard, who has generators that could power a whole city, or more. He could try to get an emergency bill passed that would end this deregulation nonsense and put the power companies back as public entities.

Yes, I think deregulation of public utilities is nonsense. First, even without our present problems, eventually they'd find a way to screw us, just like the phone companies, banks, and airlines after deregulation. Second, my city, as well as a few others, have their own, publicly owned power plants, and I have few complaints. Our power is reliable, their service is very good, and our rates are decent. We are immune to all the hoopla going on right now, thank goodness.

That last part I can't agree with. These migrant workers work all day in the dirt, in all weather, for little money. Nobody else is going to do this. When you see some fool on TV bitching about "Mexicans are taking our jobs!" he sure as hell ain't talking about his application at Joe's Strawberry Farm being turned down.

Also, when a sweep takes out 100 illegals, another 150 will appear out of nowhere to replace them, until they get picked up, and by then the first 100 are back, with another 100 of their friends.

We've had these guys beat the bus back from the border. LOL

We'll always have unemployment. When I go through cities with high unemployment rates, I still see dozens of Help Wanted signs in the windows.

1.6 MW? That takes about 3000 HP to generate....any
respectable freight locomotive prime mover can do that.

(That's Tehachapi, BTW).

There has been a "windmill farm" in Altamont Pass, 45 miles
east of San Francisco, for over 25 years. As long as the state
PUC mandated that the PG&E had to buy its power at retail
rates, it worked. When the state subsidy ended, PG&E said
"thanks but no thanks".

I wonder whether the windmills were spinning this week.

Call the FCC Consumer Assistance Center (1-888-225-5322) and
request that they send/FAX you a copy of the FCC Public Notice
issued a few months ago warning that the use of these devices is
unlawful. If that does not persuade the school management to
cease and desist, call the same number and lodge a complaint,
which will be investigated. This has a much higher priority
than kerchunking on two meters.

Well, not true. See below.

> We all know that he likes women instead of the fags that permeate...

We know nothing of the sort. What evidence is there of your sexuality at all? There are the postings of your net ad for female companionship, but that could be a phony coverup to mask your true sexual orientation.

> ...fags that permeate this newsgroup.

Hmmm. A sudden preoccupation with sexual orientation. Who do you know in this ng (and which ng, by the way, since your message was crossposted to several?) who is admittedly and certifiably a homosexual? Since you probably can't name more than one (or two, if you count yourself), that hardly represents a significant number, which you seem to be implying. By the way, look up "permeate" to see how ambiguous your possible assertion is.

> The other liberals however have their own boyfriends.

Geez, what does this mean? "Other liberals" as opposed to what? Your original premise was "fags that permeate [sic] this ng." so how do we get from there to liberals, much less OTHER liberals? Then you further muddy the waters with "boyfriends," which most girls, liberal or otherwise, tend to have.

By the way, speaking of the "link" between liberals and girlfriends, how do you categorize Cheney's daughter or Gingrich's sister? Presumably they are both of conservative bent, given their upbringing, but both openly gay, another anomaly, given their upbringing. Are they conservative or liberal, and why?

> At least, one thing about the fags, they will not be able to reproduce
> and therefore eventually die off.

So you would expect that in the space of, say, three generations, there would be no more homosexuals, right? But the historical record is rife with examples of known homosexuals for several centuries. How does that jibe with your "eventually die off" theory? Doesn't seem to be a very well thought out proposition, Lloyd, but then yours never are.

> That is why they have to recruit little boys into their movement and
> brainwash people.

But if they will eventually die off, who is going to be left to do the recruiting?

> The queers are all about brainwashing and mind control so that they
> can keep building their gay army.

Well, you are a prime example of the effect of brainwashing with your lockstep regurgitation of RG Stair drivel, Hal Turner offal, and countless other nonsensical purveyors of lunatic fringe rhetoric. And you don't seem able to control your mind by yourself, letting others do it for you. So, Lloyd, by your definition and logic, you must be gay (or damned worried about it)!

Suzy says she has a full wave loop up 100 feet for her 75M activities.
Oh? How does she get a full wave loop on such a small rental lot with no trees? Must be another "fly-high" pipe dream.
Course, seeing as Suzy is a self-proclaimed "Electrical Engineer" this month, anything is possible. The Sally Struthers mail order diplomas must impart instant knowledge upon those who order them.
Suzy's vivid imagination is glowing in the dark....

Now go take on the day.

"More to follow" ?

May I step out on a very short limb and speak for the
rest of the news group... NO !

Sure wish the NNTP server I use would down load more
useful header information so I could just block the
entire Deja domain period.

Why don't you go post your crap to a political news
group?

You won't do that because you are a coward.

If you posted your crap to an appropriate group
people would be interested and respond to your
posts and you would then have to defend them.

Then you would have to think. God forbid that.

: At least in the tech industry, yes. We're still 500,000 people short.

The average factory worker was doing between 60 and 80 hours
of forced overtime. The news magazines have had a number of
articles about how people were becoming tired of being forced to
work overtime.

1642. FT: Beautiful Yeasu FT-767GX!!!

Newsgroup: rec.radio.amateur.misc

Greetings!

Up for trade this time is a BEAUTIFUL Yaesu FT-767GX! This is a wonderful HF rig with space for 3 additional VHF band modules (no band modules included). This rig does it all! Only rig I've EVER seen that has a digital SWR and Power Output meter! Neat feature! Also, BUILT-IN AC Power Supply, built in tuner, and ALL the bells and whistles! Putting this up for TRADE ONLY! Interested in possibly a Kenwood TS-940SAT w/ options, or what do you have?!?! Make me an offer! Would also consider the Ten-Tec Pegasus with keypad and Desk Mic. Would prefer an 'in-person' trade. I am in Beloit, WI...well within driving distance of Chicago, Milwaukee, or the Twin Cities area, but again, will consider all trade offers! I do have the original box and manual with this rig...

73, es gud dx de N9LXX~~~

: > out the Clinton administration. They WANT a slow down in
: > the economy. And illegal Mexicans make up the bottom end
: > of the labor force, as guest workers. If we have a slow down
: > then it only takes INS to do massive sweeps throughout the
: > country and bingo we no longer have unemployment.
:
: That last part I can't agree with. These migrant workers work all day in
: the dirt, in all weather, for little money. Nobody else is going to do
: this. When you see some fool on TV bitching about "Mexicans are taking
our
: jobs!" he sure as hell ain't talking about his application at Joe's
: Strawberry Farm being turned down.

Here in Indiana we have Mexicans working at good factory jobs
because there are not enough black and white US citizens to take
the jobs. We are talking about jobs that make over $15/hr.

Now that the ecomony is slowing down, the Mexicans are being
laid off. They are guest workers.

: Also, when a sweep takes out 100 illegals, another 150 will appear out of
: nowhere to replace them, until they get picked up, and by then the first
100
: are back, with another 100 of their friends.

:
: We've had these guys beat the bus back from the border. LOL
:
: We'll always have unemployment. When I go through cities with high
: unemployment rates, I still see dozens of Help Wanted signs in the
windows.

But it is even the good jobs that were hard to fill. A slow economy
means that US citizens might take up a lesser job.

How about a "black mayor's conference" that is held every year. Try holding a "white mayor's conference" and listen to all the reverend Jackson's scream. There is a "miss black america" beauty contest, try holding a "miss white america" beauty contest and listen to the shouts of racism.

While I'm not an expert on power, how about other sources of power
generation? Tidal generation, hydrothermal, hydroelectric, and yes,
nuclear (although isn't there something called a "breeder reactor" or
something like that that can make nuclear fuel? I'm not sure).

Thats a load of crap. Your statement doesn't make anymore sense than "Space travels are blocked to average civilians, because no airline current offers it". Sorry I know how you feel jealous about not having an opportunity to use high-tech gear during your teenage year.

> How did we survive our youth without them?

That was past, this is now. Past, Present and future are three different things buddy. Do you drive a car? Probably. Do you have a electricity in your house? I'm 99.9% sure. How did your great great grandfather survived without a motor vehicle? How did people in the 18th century survived without electricity? If they lived we can live on same setup. Is that correct?

JC wake up and take a bit of responsibility: buy an umbrella the next time you are infesting the mall. Jealousy is your schtick. Whether you know it or not, you have been feminized beyond all belief. Men have a problem with eunuchs, OK?.

You have my sympathy, not my respect (we mean that differently BTW). There is not a man alive who would be a teenager again. You have been unfortunate enough to be caught up in a sterile environment not of your creation, to which you have responded by adding sterility. More pathetic than sympathetic on both sides.

Bullhemican Rhapsody
(R. Wiseman/F. Bulsara)

Is Bull a person?
Is he an entity?
Big waste of bandwidth
A true UseNet travesty.

Skivvies all wet, logs on to the net to see
College graduates, oh how they flame me!
Easy come, easy go: output high, content low
Won't you click on 'da bull? Won't you pay attention to me? To Me?

Wiseman just libeled me
Called me lots of hateful names; laughing at my lameassed flames
Wiseman, you "circus monkey" scum
Watch out, I'll roast your ass away
Wiseman, baaaa! Did you mean to make me cry?
If I don't make good on my promise
I'll pretend, I'll pretend (tell me, won't you click on pitbull?)

Too late, to take them back
Every racist word I said, now I wish that I were dead
Goodbye gooks and n*****s, the pitbull's toast
Gotta leave it all behind for Deja News
DX-40(?), ooh, I hate it when I cry
I sometimes wish I'd never logged on at all

I see a gristy Wiseman hanging upside down
Circus boy, Circus boy, will you do the James Lysen
Ballsless Assholes, Turder, Stromleiter, Dewsgoats, Dx 40(?), help!
KC8JBO (KC8JBO)
KC8JBO (KC8JBO)
K-C-8-J-B-O......
And L-Rod-o
Magnifico!

I'm just a poor bot, no one can stand me
Bull's just a poor bot, written quite shittily
Please pull the plug on this monstrosity
Output high, content low, time for you to go
Lllllloyd Davies! No, we will not let you go
(Let Bull go!) Lllllloyd Davies! No, we will not let you go
(Let Bull go!) Lllllloyd Davies! No, we will not let you go
(Let Bull go!) Will not let you go

(Let Bull go!) Will not let you go (Let Bull go!) Ah
No, no, no, no, no, no, no.
(Oh, kind Sir KC8JBO, kind Sir KC8JBO) Please Sir KC8JBO, let me go.
George Arsics has got a rogue cancelbot reserved for me, for me, for me!

So you think you can flame me and shit in my sty
So you think you'll abuse me and laugh as I cry
Oh, Wiseman! Can't do this to me, Wiseman
Just gotta get out, just gotta run right out of Dodge.

Won't you click on pitbull? pllllllease, sir, you see
Can't you click on pitbull.
Can't you click on pitbull for me?

<fade out>

Tidal generation is more theory then reality. The same with hydrothermal. Hydroelectric generally requires water - something not widely available in Southern California. It could come from other areas, but environmentalists are resisting new dam construction.

Nuclear reactors are a possible solution, but not something that most people (myself included) are comfortable with. By the way, breeder reactors don't make nuclear fuel - they use lower quality nuclear material, the stuff used in power plants, to produce the enriched nuclear material used in nuclear weapons.

> Strawberry Farm being turned down.

Bullcrap. Millions of Americans grew up on farms and would be thrilled to do these jobs if the pay was reasonable. Hell, I would be willing to do this work if the pay was reasonable (I love working outside).

But the pay will never be reasonable as long as migrant workers are willing to do this work for ridiculously low wages. I've got to feed my family (who is not willing to live twenty to a hotel room like many of the migrant workers are), and my family would starve on the current wages if we also had to pay rent or house payments.

> We'll always have unemployment. When I go
> through cities with high unemployment rates,
> I still see dozens of Help Wanted signs in
> the windows.

And have you checked out the jobs behind those signs? Many are either too dangerious (night shift in high crime area) or the wages are so low a person could not survive on the income.

Heck, there is one of those jobs just down the street - damn good wages for night shift employees. However, the store has been robbed four times in the last six months and last month an employee was killed during the night shift in one of those robberies. As you can imagine, people are just rushing to get their applications in. But, the sign is on the door (which seems good enough for you to justify your opinion).

Sorry, but that is wrong. The majority of blacks in this country today are not descendants of American slaves, but are descendants of blacks who entered this country after slavery was abolished. In fact, a huge percentage of the black population entered this country within the last thirty years, attracted by this country's pro-black government policies.

Check it out for yourself if you don't believe me (and you won't believe me, so do check it out on your own).

Message-ID: <94eohjpjp0@dosa.alt.net>
Source record: 94841
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

Attempting to cancel someone else's post is really, really dumb because:

1. 80% of the news servers now ignore cancel messages, due to past abuse;

2. Automated software run by usenet admins flags such cancel messages as "suspicious" because critical header elements don't match. Suspicious messages are published in a summary which is available to everyone;

3. 99% of ISPs regard rogue cancels as a violation of their terms of service and will terminate the account of anyone caught issuing such cancel messages.

So, if you only catch around 20% of the news servers, trigger software which records your cancels in such a way that you can be traced by your ISP, and if your ISP is among the 99% who will terminate your account for such activity, who is the dumb guy?

Hey, dork brain
Columbus didn't discover this country, idiot. And Columbus should be relegated to the nethermost regions of historical obsecurity for what he was; a mass murderer anong other things.

You should be happy about one of the blackest days in America.
Sieg heil der new Fuhrer Herr Bush

He will see to it about taking away Black rights. And unions. And what little is left of the Constitution. Good-bye Social Security. AFDC. SSI. Give the $ to the big corporations.

```
: > : I believe they are blaming the energy crisis on deregulation, but,
like
: > : everything else, the blame will soon be on the GOP. However, we do
tend
: > to wait until someone is actually in a position to do something BEFORE
: > placing blame, so as of today (YEAH!) it will be Bush's fault.
: > :
: > : What a bastard!
: >
: > You are an INS agent, how much has immigration added
: > to the problem? After all, California seems to have doubled
: > in population while not increasing any power plants over the
: > same period. And a lot of that growth is due to immigration.
:
: First, I should say that I don't personally believe immigration has any
: substantial effect on our power requirements.
:
: But, as we all know, if immigration was the cause, nobody would ever admit
: it, for fear of being labeled a racist.
:
: Tell the truth, I have no idea why, all the sudden, we don't have power.
We
: were a bit short last summer, but we still had enough, even though air
: conditioners were blowing full blast. Now, they are short, but we're
using
: much, much less than last summer. No major power plants have gone belly
up,
: no major disasters effecting key points in the grid, and no spikes in
: population. The rate of immigration (to the state as a whole) has dropped
: somewhat over the past couple years.
:
: Personally, I think it's the power companies doing it. When deregulation
: hit, they were pissed, and they did everything they could to block it,
: including threats to raise rates, which they followed through on
: immediately. Some folks are now paying double or more. They also seemed
to
: have changed the rules. Before, if power was short, they would cut off
: certain businesses first, as per their agreement in exchange for lower
: rates. So far I haven't heard of any businesses getting cut off. They're
: going straight for the houses.
:
: I think Governer Davis has a part in this, too. He acts like he's trying
```

to
: solve the problem. There's a couple things he could do, though he hasn't.
: He could call up the National Guard, who has generators that could power a
: whole city, or more. He could try to get an emergency bill passed that
: would end this deregulation nonsense and put the power companies back as
: public entities.
:
: Yes, I think deregulation of public utilities is nonsense. First, even
: without our present problems, eventually they'd find a way to screw us,
just
: like the phone companies, banks, and airlines after deregulation. Second,
: my city, as well as a few others, have their own, publicly owned power
: plants, and I have few complaints. Our power is reliable, their service
is
: very good, and our rates are decent. We are immune to all the hoopla
going
: on right now, thank goodness.

I was surprised to hear, I think it was on Rush's show, that
LA and Orange county have their own power companies.
Therefore they are not being hurt. It is mostly up in the SF,
Bay area and Sacramento that are getting hit.

Who is the DUMBASS who can't read or tell the difference between a
cancelled post and a followup to a post that was a parody of a cancel.
Learn to read, Republican!

But that's only IF you can hear the harmful interference over all the paging
tx'ers going bad..... :) I was under the assumption that the FT-50
deviation was the same as my Visars, which I use on FRS almost every day.
what gives?
thanks!
Randy

You'd pick strawberries for 14 hours straight, 7 days a week?

> But the pay will never be reasonable as long as migrant workers are

What's reasonable pay?

Well, anything seems pretty reasonable when the alternative is $0. These
guys get paid under the table, so someone on welfare or unemployment could
easily pick up some extra money, tax free.

I'll point out that these guys also send money home to support their
families.

So the best alternative is no job at all?

The whole point of work is that you have to start somewhere, then, as you gain job skills and/or education, you increase your worth to your present or future employer, thus eventually making more money and so forth.

> Heck, there is one of those jobs just down the street - damn good

> during the night shift in one of those robberies. As you can imagine,
> people are just rushing to get their applications in. But, the sign is
> on the door (which seems good enough for you to justify your opinion).

As a guy who's worked totally shit jobs, I'm certainly entitled to my opinion. I've worked side by side with illegals when I was out of a job for a few months, for $5 an hour. At one point the boss and myself went to one of those corners where illegals hang out for day jobs. There were mostly Hispanics there, and a couple white guys, and, since they spoke English, they had first crack at the job. Of course, they turned it down, because they prefered to stand there on that corner for the rest of the day earning nothing (except when they scored by begging, which the Hispanics refrained from). The Hispanics worked their asses off all day, and though there was somewhat of a language barrier, they told me this was the easiest job they've had in a long time.

This store you mention, odds are an immigrant will take this job, and as you pointed out, they'll live in crowded conditions for a time, combining their income and saving money. Eventually, they'll get on their feet, get a better job, buy a house, car, and basically live the American dream.

Then there's the guy from Iran, who "took" an American's job delivering pizza to support his family of four. Back in Iran, he was an officer flying helicopters, so this was a big step down for him, a big blow to his pride. Still, he worked his ass off, and also managed to get a real estate license. Now he drives a Mercedes and lives in an upper class area.

When the snow falls in the hills, a few groups of guys (don't know if they're immigrants) go out and offer to install chains on people's tires. They'll work all day in the cold, but make very good money (I believe it was $20 a car a couple years ago). They found a niche where people were willing to pay to sit in their warm cars instead of tromping out in the slush.

Of course, there's the internet, which is the REAL hero of our present economy. On here you can find jobs, get an education, and even create your own business, and all for free, or damn close to it.

What these immigrants have going for them is a super strong work ethic, where a man is defined by his willingness to work. They overcome their handicaps (language, customs, immigration status) and create a life for themselves. They could just as easily sit on their asses and collect welfare, bitching about how they're no jobs around.

> generation? Tidal generation, hydrothermal, hydroelectric, and yes,
> nuclear (although isn't there something called a "breeder reactor" or
> something like that that can make nuclear fuel? I'm not sure).

Environmentalists fight all these tooth and nail. Tidal generation works in other countries, but it would never happen here. Same goes with geothermal. There would be too many lawsuits and violent protesters to contend with.

Hydroelectric is good, except there aren't too many suitable rivers, and again, environmentalists would throw a shitfit.

Nuclear is about our only alternative, but as other's have pointed out, most folks aren't comfortable with it. Not only is there no good place to dump the waste, but earthquakes are a constant threat, especially along the coast, which is the best place for a reactor (no worries about cooling towers like the ones at 3 mile island).

Solar could work, but nobody wants to make the initial investment. Wind power is used out in Palm Springs and Alaska, but we don't have the steady wind in most places where this would work, except for the coast, which again, the environmentalists would fight, as they would solar, since this would have to be in the desert, and this would be sure to upset a lizard or dried out piece of grass.

As you've guessed, the people who should support clean, free energy are the ones most dead set against it. They don't mind USING it, but they hate the idea of anybody else benifiting from technology, even when it improves the environment.

Yup. Also in San Diego, where, although they've so far escaped blackouts,
they are paying two or more times their previous rate.

But it's not the counties that have their own power supplies, it's mostly
the cities.

I wish you guys would all go back to 3894.5 14.313 and 3.901
Not that I'm bothered by your postings, not at all !
It was just *alot more fun* listening to it live and in Technicolor
on the above frequencies till R.H. stepped in and killed ham
radio's Comedy Channel(s). How about ad least getting on every
Sunday afternoon for a little radio fun? Shit, it would be alot
better than listening to that screwball prozac-preacher's pontifications!
(the guy who's so batty, he chose a vanity callsign similar to kv4"fz"
retired call - unquestionable proof that this squirrel outside Atlanta is several
bricks short of a load or one paddle short in his rowboat...)
Please? Just a wee-bit of the "good old days" of .313 ? Ad least until OTK gets
back on and straightens the whole thing out.

Ok, so we must do what we must also.
I agree with you though. We should have returned
them back to africa and set them free there.

Not exactly true.
Most of the blacks in america are not even black, they are mixed mutts
who real african's wouldn't want to claim as their own.

Oh yes. I forgot about the Black Miss America contest.
How can blacks hold there heads up and bitch about unfairness
after sponsering such events.
Makes me want to say, " Go back to Africa you bunch of fucking
niggers" But I won't cause I'd be accused of being a racist.

I think the reason blacks have a seperate contest is because a
black contestant would never win with white ladies running.
Even the black male judges would vote for white ladies because
they are much prettier than blacks.
Look how many black guys are dating white ladies.
And look how FEW white guys date a black lady.
I hate having to admit it but a very large majority of
blacks are homely and unattractive. (large distored facial
features.. lips, teeth, jaw,kinky hair, etc)
They do look a lot like the pitbulls of the human species.
This is not racist talk. These are facts.

Richard,

I tend to agree. While he/she may have a valid "legal" point, I can't help but notice how *badly* kids are treated these days. You know, the "necessary" car at 16, money to buy huge amps for their stereos, pagers, cell phones, more money to "slam" their cars, put funky lights underneath them, hydraulics. I mean, what's 20 grand these days? My, my, how badly they are treated! I hope we never have another depression to contend with. What would they do without all those "necessities"? To see the most recent generations deprived of such would scare me to death. Really! How would they react to having to WALK to school or (HORRORS!) ride a school bus, do without a cell phone, or a phone altogether. Tragic.

The sad thing is, that the abundance of "things" and electronic media has helped in the decline of education. I mean, when it seems that everything is just *there* for the picking, why does one need an education? For the kids coming up today, they have no concept of hardship or the inability to get a decent job. It's all out there, right? They have never really had to work for anything--not all, but most. Parents just hand out money and goods. Instead of coming home from school, and feeding the chickens, gathering eggs, slopping the hogs, watering livestock, many come home to an empty house, a pop-in pizza, and Nintendo. Anything the kids do is OK, and don't the teacher DARE try to keep order or respond to impertinence. It would seem that the rules require that if a teacher comes under attack, he/she must stand there and not dare defend him/herself. I'm glad that I didn't do what I started to do for a career: English teacher. I wouldn't have lasted long in today's environment! The first time a kid attempted to smack me, he'd better have filed a flight plan, cuz he'd be going for a short "flight"! LOL! So my career choice (railroad) was the better one!

Cell phones in school? I may be missing something, but I don't see the need for kids to have them at school. Again, the person *may* have a legal gripe against the school. However, I wonder if it is a matter of resolving a legitimate gripe, OR just a way of one-upping "authority".

Jerry

Yeah, you should have a GMRS radio. You can get a one from PRYME radio products. Ham radio outlete has them for about $200. Its called the Family Radio Plus. GMRS requires a license that cost $80.

The first 7 channels of GMRS are the same as the first 7 of FRS, but with GMRS can put out 4 watts.

Also afraid to identify yourself, eh Mr. ip39.vanb3.pacifier.com?

1698. Suzy Steals Toilet Paper

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-21 20:52:30 UTC
From: Buzzsaw <"Catch Me."@edu.com>
Message-ID: <94fi4m$902$0@dosa.alt.net>
Source record: 94876

Atlanta, GA (AP)--- Suzy Da Pig's plan to drive off with a truckload of stolen toilet paper went straight down the toilet.
Suzy flipped a tractor-trailer filled with toilet paper onto its side Saturday morning as she was being pursued by police. Suzy had allegedly stolen the truck from a local Wal-Mart, fully aware of its cargo.
Nobody was hurt in the accident, which was videotaped by news cameras in a helicopter above. Suzy jumped from the truck and ran, but police using flashlights found Suzy hiding beneath a near by outhouse. Suzy told police she hid here because, "it smelled like home".
Police suspect Suzy carried out another theft of toilet paper-filled tractor-trailer from the same Wal-Mart a month earlier. After the earlier heist, Suzy was seen trying to sell the goods on the streets of Atlanta.

I knew sooner or later we would agree on something!

These folks usually have few branches if any in the family tree.

OTOH, if you were these folks how would you feel as an adult when a 16 year old black kids jump ahead of you and gets to work the drive up window at McDonalds instead of you? Being white and feeling inferior must be hell, ehh?

Glenn

We all keep waiting for you state some facts rather than you bigoted version of history and the downing of the "white man".

When you going to start boy?

Glenn

BTW, why all the effort to try and hide you're posting from gte.net? You talk big BS but don't have the balls to identify yourself?

Cowards and bigots seem to be the same.

Notice the only people so far who are not racist in here are mostly
canadian, and europeans except for a very small amount of freaks like
MWBryant who were beaten by their drunk daddies so are too filled
with hate to see past their hate for their daddies to see the truth in other races.
Canada and Europe doesn't have the same kind of black people or
the same problems. Over there, blacks act normal, civilized and speak
with cool accents and are great people. They fit right in.
You foreigners need to come over here and live awile and see how blacks
effect you then you will understand and be "englightened" as to what we
are speaking of. Until then, you have no business talking as you don't have
a clue as to what our issues are.

Hey, YRAC! I don't think you know who this is! I have and never will post anything to the CB Group. I don't even own a CB! Better get you facts straight before you open your mouth! And that goes for everyone. And NO I don't use this radio out of band I have a Motorola that I use,I was just wandering what the effect would be!

Thanks for the trouble!sorry to have to put it so "Straight foward" for those that don't get trouble started!

SB DX @ WW < KB8NW $OPDX.495
Ohio/Penn DX Bulletin No. 495

The Ohio/Penn DX PacketCluster
DX Bulletin No. 495
BID: $OPDX.495
January 22, 2001
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters, AA1M, AD1C, KF2TI, N2WB, WB2YQH/WB2RAJ & The 599 DX Report, W3UR & The Daily DX, K4HB, K4WLS, N4AA & QRZ DX, WD4NGB, K8GG, K8YSE, N8BJQ, KU9C, W9VA, W0IS, CE6TBN, DL2VFR, DL3APO, DL5AXX, DL5EBE, DL9NEI, F5CWU, F5NOD, GW0ANA, HB9PL, OE3MZC, OM3LZ, UA2FM, VE3EXY, VK3TZ and ARRL Letter for the following DX information.

3D2, CONWAY REEF (Update/Change). Hrane, YT1AD, reported that the 2001 Conway Reef DXpedition will start a day earlier than planned. The team will go via Hong Kong instead of Kuala Lumpur, and the DXpedition will start on February 18th at 08:00 local time, or on February 17 at 2100z.

3G0, EASTER ISLAND. Norbert, DL9NEI, informs OPDX that a joint Chilean and German DXPedition will activate Easter Island between March 4-19th. Operations will be on all HF Bands mostly on CW/RTTY, on lower bands and the WARC bands. The callsign used will be 3G0Y. Look for the latest information still under development, that is happening now and during the operation on the following Web site coming soon at: http://www.qsl.net/3g0y QSL via DK7YY.

3Y, BOUVET. Chuck, 3Y0C, continues to be active in spite of the problems that keep developing. As this bulletin was being prepared Sunday morning, a short review of updates from the WD8NGB Web page reports that another big storm hit the island January 18th and snapped the antenna mast and smashed the beam. Chuck has managed to repair the beam and erect it on the shortened mast, but will try to get the beam higher in to the air. Chuck tried to take the photographs from the roof of the shack, but the wind speed is so high that he cannot stand upright on the roof. He will try again when the weather improves. The generator's engine continues to cause problems. The engine is not designed for extreme weather conditions and has allowed the crankshaft bearing seals to freeze and loose their sealing ability. The lubricating oil leaks past the seal and slowly drains. The leaking oil has to be captured, strained and returned to the engine. About 95% of

the oil is being recovered, however, they took enough oil for maintenance functions, not for leaks. Because of leaking, battery charging is thus extended from 2 hours to 4 hours at a time. Another problem is also reported by Chuck. It is now very unfortunate that his solid-state linear amplifier has failed, and he has been unable to find out the reason of the failure. Now for good news. The time set aside to listen for Asia and Oceania has paid off. Chuck on Saturday, around 0600z on 20 meters, worked many JAs and VKs. He will try this for the next few days, and these areas are to look for Chuck starting 0600z on 18130, 21295, 28495 and 14195 kHz. Also, it was mentioned that some RTTY operations will begin next week. For the complete/unedited up-to-date information mentioned above, check out the Web page: http://www.qsl.net/wd4ngb/3y0.htm

8Q, MALDIVES. Mike/OE3MZC and his wife Barbara/OE3YCB will be active from here February 7-21st, as 8Q7MZ and 8Q7BZ, respectively. Mike tells OPDX that they will be active from the Island of Kuredu during the first week and the Island of Velavaru during the second week. Activity will be on all HF bands, mainly around the IOTA frequencies on SSB. There will also be 6m, SSTV and PSK31. Mike informs us that this will be a holiday DXpedition, so please allow them some time for snorkeling as well as traveling from one island to another. For the latest news, check their Web site at: http://www.qsl.net/oe3mzc/

A4, OMAN. During an installation and commissioning of trunking communic-ations system in Oman by two Slovakian radio operators, Stefan/OM3RG and Miro/OM3LZ, will be active from the desert. This is thanks through the help of A41LZ, the Omani Amateur Radio Society which permitted their operation. Activity is now through January 25th (or 27th). Suggested frequencies are:
CW - 3535, 7015, 14035, 18080, 21035, 24900 and 28035 kHz
SSB - 3790, 7080, 14250, 18150, 21250, 24950 and 28550 kHz
They will use one TCVR with linear PA and vertical/wire antenas mostly during the evening hours. QSL direct to OM3LZ.

A52A BHUTAN VIDEO REVIEW (by KB8NW). James, 9V1YC, has done it again! I have just viewed the A52A video over the past weekend and I would have to say James has made another "**** Four Star Video". This high quality enlightening and educational video is a must for DXers. In James' video (as in all his videos) he mixes the sites and sounds of Bhutan which are breathtaking. OH YEA, the bus trip to the Pine Wood Hotel was great! Strap on your seat belts FOLKS! I personallly would like to thank James for the ride and view of Bhutan. For more information or to order a copy of this video, go to the Web page at:
http://home.pacific.net.sg/~jamesb

AX, AUSTRALIA (Update.... Attention Prefix Hunters!). Tony, VK3TZ, reported last week in OPDX.494 that the "AX" prefix will be aired once again by all Aussie amateurs on Australia Day - January 26th. The following times for the use of the AX prefix are for the 24 hours commencing 0000 hours local time for each state:
VK1/VK2/VK3/VK7 1300z January 25th to 1300z January 26th

VK4 1400z January 25th to 1400z Janaury 26th
VK5 1330z Janaury 25th to 1330z Janaury 26th
VK6 1600z Janaury 25th to 1600z Janaury 26th
VK8 1430z Janaury 25th to 1430z Janaury 26th
VK9N/W/X/Y/VK0 Various, since time zones are varied.

CE0Z, SAN AMBROSIO ISLAND (Update/Change). Marco, CE6TBN, Team Leader for the DXpedition to San Ambrosio Island during the second week in February, reports that "in an unusual determination the SUBTEL (Sub Secretaria de Telecomunicaciones) has changed the prefix to CE0ZT (from CE0XT)...." This due to a new Chilean rule stating San Felix and Juan Fernandez's prefix is now CE0Z.

D6, COMOROS. Josep/EA3BT/D68BT and Nuria/EA3WL/D68WL continue to be very active on all bands until January 28th. Due to a bad Internet connection, the logs will be posted every 2 days instead of every day. If you want to see new pictures and logs from the DXpedition, look every day at the following URL address on the Web sites:
http://www.qsl.net/ea3bt/Comoros-Picture_of_day.htm
http://www.qsl.net/ea3bt/index2.htm

DAYTON HAMVENTION 2001 DX DINNER. The Southwest Ohio DX Association is pleased to announce the Sixteenth Annual DX Dinner to be held on Friday, May 18th, 2001 at the Crowne Plaza Hotel, Dayton, OH. There will be a cash bar at 6:30 PM and dinner at 7:15 PM. Tickets are 32.00 (USD) and must be purchased in advance. Groups wishing to sit together must order as a group. A table seats eight. Please make your check or money order payable to SWODXA and send an SASE for ticket return. Seats will be assigned in the order that requests are received. Seats will be assigned on 11th March 2001. Seating is limited. Please order tickets from: Steve Bolia, N8BJQ, 7354 Thackery Rd, Springfield OH 45502. For information on the dinner, check the Web page: http://members.aol.com/SteveB4622/
Or contact Steve Bolia, N8BJQ at (937) 788-2803 or via his E-mail address at: n8bjq@erinet.com

DX MAGAZINE'S 100 MOST WANTED! Carl, N4AA, Editor of QRZ DX, reports that the results of "The DX Magazine's 100 Most Wanted Survey" for the year 2000 have been posted to the Web site (under "DX News") at:
http://www.dxpub.com
A complete breakdown by continent and USA time zone is included in the January/February issue of The DX Magazine. As it stands, the top ten are:
1 - P5, North Korea 6 - KH5K, Kingman Reef
2 - VU4, Andaman 7 - YA, Afghanistan
3 - BS7, Scarborough Reef 8 - VP8/SS, South Sandwich Island
4 - 3Y/B, Bouvet 9 - 3Y/P, Peter I Island
5 - VU7, Lakshadweep 10 - 7O, Yemen

DXCC NEWS. Submittals for the ARRL DXCC Honor Roll are due March 31, 2001. For more information, contact ARRL DXCC Manager Bill Moore, NC1L, via E-mail at: bmoore@arrl.org

FO/FO0/M, FRENCH POLYNESIA AND MARQUESAS ISLANDS (Update). Peter, DL3APO, informs OPDX that the callsigns for the upcoming FO and FO0/M DXpedition are now approved, and the German team will be using the CEPT license FO/homecall. So, look for FO/DL1AWI, FO/DL5XU and FO/DL3APO to be aired January 27th through February 28th (Please refer OPDX.491 -- Oh, remember to wish Peter a happy birthday on FO). The group has received a 2nd antenna in addition to the LP 5 from TITANEX - the V 160E vertical with tuning unit for the lower bands. They will also have two linear amplifiers with them. "The preparation is going well", states Peter and Wil, DJ7AA, will be their pilotstation. For more info, check Web page: http://www.radioklub.de/cgcg

FS & PJ8, ST. MARTIN and ST. MAARTEN. Bob/AA1M, Jim/W1HL and Mike/W1USN will be operating from both French and Dutch sides of this island. Look for them to sign PJ8/homecall and FS/homecall from February 27th through March 6th. QSL AA1M and W1HL via AA1M CBA or bureau. QSL W1USN to CBA or bureau.

GERMAN ISLAND AWARD/GERMAN IOTA. Ric, DL2VFR, informs OPDX that information on German IOTAs and the "Most Wanted German Islands" can be found in the weekly IOTA activity news on the Web page: http://www.iota-post.com The "Most Wanted German Islands" is based on applications for the "German Island Award" (tnx DL2MX/DL5RFF) and was based on the checkpoints for DL, HB, OE, I, IT9, IS0, T7, W4, W5 and, W6 (tnx DK1RV, I1JQJ, W9DC). The "German Island Award" links are available in German, English, French, Italian and Danish language.

IOTA NEWS.....
OC-136. Tony, VK3TZ, will be travelling to Phillip Island for a few days and will try to be active when he can during this trip. His suggested operating times are from about 0900-1200z and 2100-2200z, on the IOTA frequencies 14260 and 21260 kHz. This will only be a 3 day trip on January 24-27th. Tony states that this is not a radio orientated trip, so do not expect too much operating time nor a good signal. Operation will only be 100 watts into a dipole or vertical. He mentions that he may try to log into the Southern Cross DX net (on 14226.5) in the evening (0900z) and the 14226.5 net during his mornings LP about 2000-2100z.

KP2/NP2, U.S. VIRGIN ISLANDS. Look for the "Battle Creek Georges", W8UVZ and K8GG, to be operating from St. Croix for the CQWW 160M CW Contest. They will be active from January 24-30th. Before and after the contest they will use the callsign KP2/K8GG with an emphasis on the lower and WARC bands. During the contest they will use the callsign NP2S. QSL NP2S contacts direct to Martha Golden, NP2S, POB 1276, Kingshill, Saint Criox, VI 00851 USA. QSL KP2/K8GG via K8GG.

MD, ISLE OF MAN. Operators DL4ALB, DL4LQM, DL4WG, DL5AXX, DL5LYM and DL8WAA will once again be active from the Isle of Man, February 12-19th. They will be a Multi-Two entry in the ARRL DX CW Contest. Before the contest they will be active on 160-10 meters including the WARC bands, mainly on CW with some SSB and RTTY. Callsigns will be MD/homecall. QSLs

goes to the operator's homecall. QSLs for the February 2000 operation of MD/DL3OI has to be directed now to DL5AXX (via eMail-request, bureau or CBA).

PIRATE STATIONS REPORTED. There have been several pirate stations active over the last few weeks. Most noteable P25BH, VP8SSI and YA/RW6AC. Also, there has been reports of pirate operators using the callsign 3Y0C on CW and on 50 MHz. Also, OPDX was duped last week in reporting that 4W1CW and 4W1UN were active. They too are pirates.

PY0S, ST. Peter AND ST. PAUL ROCKS (Update). Bill, W9VA, reports, "Plans are moving ahead on schedule for the DXpedtion to PY0S in early February, 2001. All government permissions to operate from the Rocks are in hand, and the callsign PW0S has been issued. The team will leave Recife, Brazil, on February 2nd, arriving on the Rocks on February 7th, intending to operate for five or six days. This is a long open ocean trip and dates may vary. The operating team is led by Jim Faria, PY7XC, who previously operated from the Rocks in 1978 as PW0PP. Other operators are Fred/PY7ZZ and Ciro/ PY7ZY. All have previously operated from Fernando de Noronha and various Brazilian IOTA islands. Operation will be on 160 through 6 meters, CW and SSB, possibly RTTY. Steve, KU9C, has joined the team as QSL Manager. Financial support from clubs and individuals is most welcome."
Contact Bill, W9VA/PY0ZFO, for more information at: w9va@aol.com

QSL INFO AND NEWS.....
IMPORTANT NOTICE! Victor, UA2FM, informs OPDX that due to the new Russian Post Rules (Item "d", Para.123):
"123. The mail will be returned if:
d. If the NAME of adressee who is the subscriber of the P.O.Box, is not shown or if shown wrong."
These Rules are in force starting 1 January 2001. Victor states, "So please put name first, not the call, if you write to any Russian ham. As for RW2F@RK2FWA or UA2FM, please put neither call, nor "UA2 Contest Club", nor "Petrovo Radio Club" but Victor Loginov, P.O.Box 73, Kaliningrad, 236000, Russia. In case you send us QSL direct, please keep in mind that our postmen love 'green stamps', they have little knowledge about what IRCs are, but can destroy your letter with IRC as well. So we earnestly recommend you to send RK2FWA@RW2F cards via DK4VW instead."

HOW MUCH DO I SEND? Hal, K4HB, informs OPDX that he has put together a list of countries which require more than 1 US Dollar for return postage to the U.S. and Europe. For those who send DX stamps, Hal has a list of countries that had a postage hike during January. He also has information about Russia's dramatic increase in postage rates. Hal states that he doesn't get his information from individual's in the DX countries. Instead, he compiles the information from government and other reliable sites, also he uses input from "Bill Plum's Airmail and DX Supplies". Hal doesn't claim to be 100% accurate, and he states this on his Web page, but he believes the information on his Web page is as close as it gets. The URL address is: http://www.k4hb.com

Click on "Foreign Postage Rates" near the top. Hal's site is also linked from "Rod's Super Site" at: http://www.ac6v.com/irc.htm

QSL Cards are still at the printers for the "Flordia DXpedition Group's (FDXPG)" 2000 Guadeloupe DXpedition (October 24-31st, 2000). CARDS WILL BE MAILED AS SOON AS THEY ARRIVE FROM PRINTERS. William, N2WB, reports that it is a very nice Multi-Photo, Multi-Color QSL card. The QSL information is as follows:
FG/N2WB via direct to N2OO FG/W9AAZ via CBA
FG/W4WX via CBA FG/KR4DA via CBA
All QSL for FG5BG (for the CQWW SSB CONTEST 2000) "ONLY" go via Bob, KR4DA)

Gil, F5NOD, reports that around 8000 FR/F6KDF/T QSLs were sent out to EU, NA, SA, AS and OC. He states if you don't receive your QSL card, don't resend another request yet (save your money..). They have around 2000 QSLs that have to be processed yet, so maybe yours is still inside that batch. Next sending will be early in February. Gil states, "Anyway, don't worry, all qsl will be sent!!"

It has been reported that Lothar, DJ4ZB, will close the logs at the end of March 2001 of his following DXpeditions:
A35ZB (Oct. 1994) ZL7ZB (Feb/Mar 1997)
ZL7ZB (Feb./Mar 1995) ZM7ZB (Jan/Feb/Mar 2000)
T32ZB (Sep/Oct/Nov 1995)
QSL cards can be sent until the end of March 2001 to:
Lothar Grotehusmann, Quaekerstrasse 35, D-13403 Berlin, Germany

R1, FRANZ JOSEF LAND. R1FJV was been keeping the folks happy on 160/80 meters lately between 2300 and 2400z. Check around 1830 and 3505 kHz. Also, check 17 meters around 18077 kHz after 1000z. QSL via UA3AGS.

SPECIAL EVENT (Marconi). Look for two special event stations to be active from "Niton Radio" (GNI) and "Lizard Radio" (GLD) during the "Double Marconi Centenary" celebration January 21-23rd. The event stations will sign GB100GNI and GB100LD. Suggested frequencies are: 3650, 7060, 14200, 18150, 21200 and 24950 kHz. More details are available at the following Web site: http://www.needlesradio.org.uk/ (Check "Latest News")

TY, BENIN. Operators Flo/F5CWU, Thierry/F5MOO and Didier/F5AOV will be active from here August 9-31st. Activity will be on 160-6 meters, CW/SSB and the digital modes. They are currently waiting at this time for their licenses and to see what restrictions will apply. They plan to leave France with Quads antennas for 20m to 10m, verticals for the lower bands, a yagi for 6m and a 500 watt amplifier. Flo informs OPDX that they are looking for your needs from Benin. Please advise them on what bands, modes or any comments you have for them via the following E-mail address:
f5cwu@wanadoo.fr
Also, visit their Web site for the DXpedition (under the item TY-2001) at: http://perso.wanadoo.fr/f5cwu

UA0, ASIATIC RUSSIA. Valery, UA0ZC, in Kamchatka, in Zone 19, can usually be found on 20 meters CW around 2200-2400Z and 80 meters CW around 0630-0730z. QSL only direct to the following address, not to the one listed in the 2001 Flying Horse CallBook which is incorrect. The correct address is: Valery A. Makarov, P.O. Box 6, Petropavlovsk, Kamchatsky 683000 Russia.

VP5, TURKS AND CAICOS ISLANDS. Look for Jerry/WB9Z, Don/K9NR, Billie/K9QT and Howard/AK9F to be active this week, January 23-27th, signing homecall /VP5. Their activity will include the CQWW 160M Contest as a Multi/Single entry signing VP5F. QSL via home callsigns. Listen for instructions on the QSL info for VP5F.

XV, VIETNAM. Torsten, XV9TH, was heard on Sunday on 28466 kHz between 1200-1300z. QSL via SK7AX. Also, heard during the past week was XV2J on 7012 kHz between 1100-1130z and on 21012 kHz between 0100-0230z.

YI, IRAQ. YI1BGD was heard over the past week on 10 meters around 28415 kHz between 1300 and 1500z. The operator's name was Rodger. The operator made a brief apprearance on 12 meters after 1500z on 24942 kHz. Rodger states to QSL via G0MMI.

YV, VENEZUELA (Change in plans!). Rick, W0IS, will be going on a mini-DXpedition here next weekend, and informed OPDX that he will not be able to go to Los Roques (SA-035) as a side trip. Instead, he will be on the air from Caracas Friday, Saturday, and Sunday, beginning late Friday evening. Activity will be late night or early morning local time, probably around 0400-1000z. Operations will probably be somewhere near 7040 CW or 7075 SSB.

ZD7/ZD8, ST. HELENA AND ASCENSION ISLAND. Glyn, GW0ANA, Chairman of the Barry Amateur Radio Society, informs OPDX that on March the 19th, 4 members of Barry Amateur Radio Society (B.A.R.S.), Rich/GW4BVJ (CW op), Sheri their logistics manager, Doug/G0WMW (CW & SSB op), Glyn/GW0ANA (DATA & SSB op), will be flying down to Ascension Island. They intend to operate on all bands and various modes (i.e. 160-6 meters - Modes: CW, SSB, RTTY, PSK31, SSTV, MFSK, Heilshriber). They will be on Ascension for 8 days then it's off to St. Helena were they will again repeat the operation as on ZD8 using as many modes as possible. They will be on St. Helena for 15 days before returning to Ascension and then home. The callsigns are at this moment being finalized, so Glyn will tell us once they have confirmation. They also intend to be active on the Lower Frequencies (LF) bands as there is a need for LF QSOs from both of these islands. Doug, G0WMW, has built a "Dragon Special", a 75 foot vertical, which should give them a great signal at 1000 feet ASL on both islands and a amp on the bottom. The other antennas are Force 12 beam, phased twin Butternut verticals, and a GAP Triton together with a beam for 6 meters. Richard, GW4BVJ, is at present designing a web page for the DXpedition, and once completed it will be released to the DX community. QSL manager for both islands is Glyn, GW0ANA. Glyn states, "The object of this DXpedition is to commemorate the passing of a 100 years of Morse Communication from these islands. As once in the southern latitudes they were the communication hub for our far flung 'British Empire' using nothing but 'Morse Code'. So in keeping with us honouring the operators of old we will be spending more

time on CW and Data modes then normal for the most DXpeditions." This DXpedition welcomes any financial support from the DX community, and if you would care to make a contribution please send it to Glyn, GW0ANA, in any call book. All contributions acknowledged.

Don't look now, but you fell into the trap again. Wasn't your original jeer about people who can't read? So far, yours are the ONLY posts showing up in the news.admin news groups, where the Usenet admins hang out, and that was due to your own gaffe (Note to others: the word is not spelled "gaff", as was done in another thread).

I do have to admit that your command of English is impeccable, though. It fits you well.

It isn't illegal to be racist you moron.
Maybe he should report you to your ISP for being anti-racist.
It's the same thing.
All he's going to do in the worst case is pull out his credit card
and call another ISP and be setup in less than an hour and be right back
in your face. The best thing you can do is ignore him by using either a killfile
or descretion. Since you don't have any, I suggest you use a killfile and add me to
it while you are at it.

It is time for a big word. The word is "astute." It is the reason for the anonymous post.

Do you have a dictionary? Can you look up "astute" in it? If you can, go do it now. The word obviously encompasses ideas foreign to you and so you can learn from it.

See, there are more words in English than words like "dumbfuck". Isn't that simply amazing?

You are welcome -- SL

Poor thing. One wonders what would drive someone to such desperation over toilet paper. Suzy must be very troubled, and charitable people should really find a way to try and help out.

Do you think that a toilet paper drive would help out? Concerned amateurs could simply mail a package to Suzy and eliminate the middleman that so often burdens the act of charitable giving.

This is just an idea, because I'm sure that there are many clever people out there who can come up with some way to help Suzy. Let's discuss ways to help Suzy out; it is in the best traditions of amateur radio.

Is there an online archive where I can obtain a schematic for this
little receiver? It's my station monitor receiver and it just decided
to take a crap. Ideas anyone?

Of course we can, the Amish prove it every day of the week. California is learning to live without electricity as we speak. Granted a cell phone is a neat toy, but certainly not a right. You snot nosed kids are more worried about having the clothes with the correct name on the hindparts and the toys, that demanding your real rights.

You have a right to a decent education! These rights are being usurped by union teachers that don't give a damn whether you learn or not. Want to really make a difference?

Demand your rights to that education.

Demand the kid that thinks learning is "selling out to the man" be removed for disrupting the class.

Demand that your peers accept responsibility and demand the rights outlined above, that would take courage.

I suspect it is easier to be cool and bitch about the cell phone and will most likely be the course you will follow. No need to send the "You don't understand" message, I have heard it a few times before.

Think about it, what you just said there - because you are absolutley
right. "The system...does not encourage", of course the system serves
only itself - and not the people. Such being, radicalism just might be
the only viable option.

Get past your republicanism, it's blinding you - you've been bamboozled.
For God's sake, get of the Rush - he's a mouthpiece, nothing more.

Power corrupts, absolute power corrupts absolutely.

shan

The balance of power is the scale of peace. Thomas Paine (I think)

Glad to make you killfile. What that means to me is that a
negro ass kisser can't handle the truth.
You can only spew out politically correct BS and have no
ability to think for yourself.
Good riddens faggot ass and go fuck you're black ladies
in the ass.

That's a pretty close read I'd say. I've been around immigrants and overseas foreigners for many years. The ones that immigrate tend to be the same sort of restless energetic folks that came here 300 to 500 years ago.

I've even seen people from supposedly languid lifestyles, polynesian, that here, work long hard days doing heavy labor and laughing all day at the great pay, or the income from their business. Concreter rubble masonry has gotten big with some Micronesian immigrants and they make good money and very pretty walls out of it.

This immigrant energy is something we need to cherish and use and celebrate and maybe learn something from.

We still do it with our kids, letting them go and work for low wage jobs to get a start. I did it and my pay scale currently is a tad better...heheheheh(c)

But then I thought the Swilly economy was good. Why are we even having this discussion?

Finally someone has something intelligent to say on the subject.
BTW how do you know it was your ancestors.
Just cause we're white doesn't mean it was our ancestors.
What the blacks need to do is stop trying to get sympathy
for something that supposedly happened to their ancestors.
Their attitudes are what keep many of them from moving up
the corporate ladder... not this imagined racism.
Who the hell would want to hire a black with the racism
attitude. They are alway trying to get mileage out of the
issue because so many of them can't perform.
I have a third level manager who has none of the black
attitude and he is the coolest guy around. He just does
his job and performs well. So I know it can be done.
Enough said on the subject unless some other asshole
wants to step in.

I don't have any racists friends dumb ass. My best friends
are Phillipino, Lithuanian. I work with a black guy all day
long and he is cool as hell.
Pull your head out and realize that most blacks are the one
who are racist.
PS I thought I made your killfill brainwashed fool.

Has anyone purchased any used radios or other equipment from Burghardt? Do they check out the equipment before sale, and do they stand behind the used equipment they sell? Anyone have any experience with them on used stuff? Ken

My grammar and spelling is better than yours you uneducated
bastard. You're really embarassing yourself.
You watch too much TV and have been brainwashed into
believing that there is a conspiracy against blacks.
I'm here to tell you to wake up call them on their Politcally
Correct BS.

Bought lots of stuu from them all of it first class. Yes they stand
behind their stuff.

I bought a IC-706 MkII from them open box, Icom warranty 30 or 90
day can't remember, Burghardt warranty 1 year.

Good folks

Stan the fellow who started the business still comes in he is in his
80s

I'm curious Mr. Snot. Do you live in public housing in a "black"
section of town? Where does all your conflict come from? What
issues could you possibly have?

>Yes, it is your right and you should fight to keep it!

He does not have the right to disrupt the rest of the class when
his phone rings, especially when an exam is being administered to
the class. He's violated the other students' right to a class-
room free from annoying and disruptive behavior. (Our campus has
a student's bill of classroom rights.)

One of my colleagues will automatically lower a student's semester
grade one whole letter grade every time their phone rings or pager
beeps during class. They're given fair warning in his written syllabus.

> you to cuss like that.

Where did you learn to suck that kiddie dick??? Oh, that's right your drunken, alcoholic bastard father used to teach it to you, to keep you in the family business.

Doesn't matter what your opinion is nor how irritating you are.
This is a free country and this is what free speech is all about.
To live, say and if have to be, die for your right to have your own opinion.
Don't let the monkey lovers get you down my friend, I encourage you.
Just learn to tone it down a little so you don't get consumed with your own hate.
I understand you are in alot of pain and life isn't fair. No need to be consumed
with anger though and I say this for your own health as you will make yourself sick
if you aren't already. There is a time to stop hating so much, that's when it starts to
hurt
yourself. That's when it owns you instead of the other way around. I understand why you
hate though. It's easier to hate than cry or hurt anymore, just don't let it take you over.

I x-posted to alt.fan.furry because I knew that you like those gerbils
up your FATASS..alt.test was to piss you off....lol!!!!!
FUCKWIT. Hope you enjoy it, choad swallower.

> In the meantime, watch out that the capybaras don't get you. -- SL

Be sure to remove that gerbil from your well-reamed ass, it'll enjoy
the oxygen.

Burghardt runs all used equipment through their shop and brings it into
spec, or they won't sell it.

I have traded with them for over 30 years, both in used and new
equipment, and found them to stand behind every item that leaves their
store.

They are truly a "Class Act".

People who don't have the intelligence to make a point
often resort to spelling and grammar corrections.
Its so easy with spellchecker.

People who make comments about their perfect grammar and spelling
skills tend to get flamed when a mistake is noted.

It's better to keep quiet and have people think you're a fool, than to
open your mouth and remove all doubt.

There is no need to raise the awareness of people to white students.

> 3) Most universities and colleges also sponsor "Black Pride Week."
> Black students are given special t-shirts and encouraged to show
> their "black pride." If white students acted in a similar manner, they
> would likely be expelled for their actions.

I think everyone should be proud of their heritage. American black
heritage is unique, this is undeniable.

> 5) In recent years, Martin Luther King, Jr. Day has been added to our
> calendars as a holiday. Meanwhile, Columbus Day has been de-emphasized
> or removed entirely. It's okay to honor a known womanizer and
> communist symphathizer, but not the man who discovered our country.

MLK's message was one of peace and harmony, Columbus' message was one of
genocide, rape & pillage and take-by-force. Who would you rather live
beside?

> 6) Why does the United States Postal Service issue a series of "Black
> Heritage" stamps, but no corresponding "White Heritage" stamps?

Because the relevance of blacks on the history of America has been
sorely neglected.

There is no need to raise awareness to black students either. Its just a
bitching session.

>
>
> > 3) Most universities and colleges also sponsor "Black Pride Week."

So much for free speech in America! Did he not realize that the only thing worse than a hate crime was hate speech? He deserves to die for his political incorrectness. I would suggest first he be tortured by having to listen to the entire works of Maya Angalou.

Next her running mate Wesha'l Overcum will teach him the meaning of Kwansa. After that he shall be sentenced to four weeks of "sensitivity" training and then dragged through the streets tied to the back bumper of a 1992 Caddy Bro-ham that is playing rap music at full volume and engaged in a drive by. That will teach him, then we get his ISP to cancel him.

Imagine Stagger Lee
(J. Lennon/R. Wiseman)

Imagine Stagger Lee
It's not so hard to do
Kneeling in the boys' room
Slurping down some spoo
Imagine all the Cub Scouts
He has done this to!

Imagine Harris County
A breeding ground for hicks
When they hear how Stagger
Gets his seedy kicks
Imagining old Stagger Lee
Gumming winos' dicks!

Imagine South Texas
Copious cattle dung
No more shit to shovel
So Stagger Lee gets by with his tongue
Imagine him paying rent
With free shots at his bung!

We all know Stagger Lee is a reamer
But he's useful just the same
Where else would the group find a patsy
Half as sad or half as lame?

Lets find out what your ISP thinks of this Dickless.
You see dumbdick... you have to stop participating in
this back and forth stuff before people will believe that
you really care about it one way or the other.
What really is pathetic is how much of a hypocrite you
are. I know you feel the same way but are too much of a limpdick
to express your real feelings.

Of course I am a hypocrite, I have acquired the new sensitivity of the left. I am working extremely hard at eliminating the last vestiges of elitism. I take no positions to offend anybody, ergo I agree with everything.

I humbly apologize if anything I have ever written in my entire life was offensive to you, you might also want to read any of several books I have written for any statements you find offensive. Please let me know which ones caused you any angst and I will have them burned at once.

Perhaps you would do me the favor of reviewing my present book as I complete each chapter, God forbid that I may include something that is either racist, demeaning towards women, midgets... whoops little people, or any other thing that might offend the most sensitive sole.

My life is now dedicated to setting my standards so low, that all will find them agreeable.

Lets see what you folks view as having integrity.

2 War Criminals
1 Atty. Gen. Who will not prosecute said criminals
The Son Of a man who violated the Nuremberg Code.
A woman who admits harboring an ILLEGAL Alien
yet believe she is above the law

Gee not too good so far...

I just wonder how low the Shrub's Job ratings go before
we see a "Wag The Dog"?

BTW wasn't Shrub's excuse for not removing So Damn
Insane from power because "It would mean we would
be in Iraq as a Police Force to this day.."

Now correct me if I'm wrong but do we not STILL
have Service Personnel flying over Iraq TEN YEARS
later enforcing the No Fly zone? My question for Shrub II
is how about ending our participation in the U.N. RUN
No Fly Zone operation in Iraq? Or are we going to keep

being Iraq's Air Cops?

Ike

Still Looking for the perfect trade! Thanx to all who have responded thus far!

Greetings!

Up for trade this time is a BEAUTIFUL Yaesu FT-767GX! This is a wonderful HF rig with space for 3 additional VHF band modules (no band modules included). This rig does it all! Only rig I've EVER seen that has a digital SWR and Power Output meter! Neat feature! Also, BUILT-IN AC Power Supply, built in tuner, and ALL the bells and whistles! Putting this up for TRADE ONLY! Interested in possibly a Kenwood TS-940SAT w/ options, or what do you have?!?! Make me an offer! Would also consider the Ten-Tec Pegasus with keypad and Desk Mic. Would prefer an 'in-person' trade. I am in Beloit, WI...well within driving distance of Chicago, Milwaukee, or the Twin Cities area, but again, will consider all trade offers! I do have the original box and manual with this rig...

73, es gud dx de N9LXX~~~

>>
>Yeah, a lot more needs to be done with geo-thermal energy in all it's forms.

Yup.

I first saw this sort of thing on a PBS series called "Hometime". In one particular series they built a dream house in Minnesota, which is considerably colder in winter than Philly, but at least as hot in the summer. All heating and airconditioning came from special heat pumps that used ground water as the heat source/sink instead of the air.

Up there, the ground water temperature was about 43 degrees F year round if you went down deep enough. (They went deep enough). The heat content of 43 degree water is much greater than 43 degree air, of course, and it doesn't go down with the weather. In summer, cooling a house with 43 degree water is dirt simple.

Not cheap or simple to install, but once it's working, sure cheap to run.

One of the sources of California's problems is that the NIMBY principle has been replaced by the BANANA principle.

NIMBY = Not In My Back Yard
BANANA = Build Absolutely Nothing Anywhere Near Anything

--

The 'net is partly responsible for CA's problems, though. Even without any regulatory headaches, it takes years to decades to bring new generating and/or transmission capacity on-line. A new server center takes months to bring on line, and it consumes mass quantities of electricity 24/7 - not just for the servers, but for the climate control, backups, communications infrastructure, etc.

1788. Help Identifying Transmit tube

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-22 13:22:31 UTC
From: "Donald E. Smith" <desmith@innercite.com>
Message-ID: <3A6C3417.2D0D7970@innercite.com>
Source record: 94586
Cross-posted to: rec.radio.amateur.boatanchors,rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.amateur.homebrew

Might anyone help me in identifying this transmitter tube and its characteristics. It is air cooled like the 4CX250's but has rings at the bottom for electrical connection. It is about 3.5 inches in diameter. Please respond by email. Thanks Don Smith KB6GQA

>It isn't illegal to be racist you moron.

That's true.

Racist, anti-Semite, ultra-conservative: It's just as
legal to be those as it is to be a liberal.

It would be good for people here to remember that.

>Maybe he should report you to your ISP for being anti-racist.
>It's the same thing.
>All he's going to do in the worst case is pull out his credit card
>and call another ISP and be setup in less than an hour and be right back
>in your face.

You assume he is in an area served by multiple ISPs. Such
is not always the case. For some people in rural or out-
laying areas, one ISP is all they get.

>The best thing you can do is ignore him by using either a killfile
>or descretion. Since you don't have any, I suggest you use a killfile
and add me to
>it while you are at it.

Discretion.

That's always nice.

Why is this being cross posted? what group did it originate from? There are forums that deal with this nonsense why doesn't everyone take it there!!!!!!!

Not quite true, Dwight. (In fact, I may actually agree with some of your observations, but that isn't the point.) The frustration arises from what appears to be fairly intelligent people suddenly loosing it and feeling the need (or perhaps craving) to post a subject which has absolutely nothing to do with the charter of the newsgroup. I can only see two reasons for doing this: (1) they're trying to provoke a reaction by deliberately posting something that will offend/irrtate somebody, or (2) they're so emotional about a subject that they feel an uncontrollable urge to make some statement, however inappropriate the forum. If it's case number 2, then there's plenty of appropriate newsgroups out there, and hey, go for it!

In response to W6DKN's comment: you're partly correct, I have been off this particular NG for some time. However, I don't see the logic in the statement that because somebody posts an OT message, it's therefore okay for everyone else to follow suite. Curiously, this NG seems to be particularly affected, whereas posts to the more technical NGs seem to pretty much stay on topic -- although I will agree that not always 100%.

Sorry for the BW guys,

73, Darrell.

> > > 20th Centuries...

I beg to differ, Mr. Mathemagic. The 20th Century was less than a month ago...and severe discrimination against blacks is still within living memory of many people, black and white, today.

When *they* get a square deal (which is still hard to come by for many), then their complaints will be unwarranted. Until then, yours are unwarranted. I have none, since I have never once been discriminated against. Every opportunity I have had I have come by fairly and on my own merits, whatever they may have been. If you cannot make the cut against a black person, or anybody else for that matter, maybe you need to examine your own shortcomings (which I'd say are pretty numerous, based on your multitude of whining malignant posts).

BTW, have you gotten professional help yet?

Some useful code, needs Linux:)

```
/*
* File: jolt2.c
* Author: Phonix <phonix@moocow.org>
* Date: 23-May-00
*
* Description: This is the proof-of-concept code for the
* Windows denial-of-serice attack described by
* the Razor team (NTBugtraq, 19-May-00)
* (MS00-029). This code causes cpu utilization
* to go to 100%.
*
* Tested against: Win98; NT4/SP5,6; Win2K
*
* Written for: My Linux box. YMMV. Deal with it.
*
* Thanks: This is standard code. Ripped from lots of places.
* Insert your name here if you think you wrote some of
* it. It's a trivial exploit, so I won't take credit
* for anything except putting this file together.
*/

Definition:

Citizens Band (CB) radio (n):

Part of an ongoing government study, initiated by the
Eisenhower administration in 1958, in which the average
intelligence of the population is sampled by placing
inexpensive radio transmitters in the hands of a maximum
number of citizens. No intelligence has been detected
so far. (See also "2M Repeaters")

Sometimes when i'm spinning through the cw portion of 40m i'll hear someone calling CQ at about 15-20 wpm. I'm able to copy their callsign ok but i'm not (yet) good enough to copy a whole QSO at that speed. Occasionally i'll attempt to reply at about 7-10 wpm, but then the calling party replies and bangs away at the speed of light. If i can't copy 15-20 wpm should i not even attempt to strike up a conversation with these folks? tnx.

Oh thanks White. If you were refering to me... I have plenty
of ISPs here in my large city. But, of course, that isn't an
issue because there is no reason for me to be concerned.
If ISPs pulled people's accounts for simply being an asshole
or upsetting mindless morons... yours would have been
pulled long ago.
Not everyone in the world thinks like you white.

You take a certain risk in doing so, partially because you may - as you did - get a minor grade lid but also partially because once having reached the 16 or so that a journeyman gets to it is not among the easiest things to throttle back. If he is any good, he will leave his keyer at 16 and try to Farnsworth things a bit by letter and word spacing down to a more useable speed for you. Don't be too proud to QRS; some mules take more convincing than others.

There was a time when I almost dreaded working a 2x3 call because the 1x2 made me 'code practice' and virtually guaranteed a sweaty palm QSO on my end as we went to speeds no man has gone before or at least in the last week with less-than-classical spacing. Conversely, I have worked new Novices where I literally had to use the straight key with my elbow to give them a QSO.

Such is the wonder of restructuring and we will all need to work thru it.

Are you black? Go ahead and cite some examples of discrimmination
that blacks YOU KNOW have experienced.
Many blacks imagine they are being discriminated against
just because things don't go there way or they read something
into things that aren't there. Also, black GET AWAY with
discrimination all of the time. I'll cite you an example...
a black guy I work with constantly said, "That was mighty
white of you" and would laugh. I knew he had a sense of
humor about the whole whiny racial BS and I didn't think
a whole lot of it. But other white people in the office did.
And were totally shocked whenever they heard it.

"When *they* get a square deal (which is still hard to come by for many)"
You've got to be kidding! They are getting more than a fair deal in
this country. Our government agencies go way the hell out of
there way to make sure of it.
Stop listening to the crap about racism and pull your head out.

Yeah, i've tried the QRS bit, with not-so-great results. If they slow down
they're back up to light speed by the next exchange and i spend 2 or 3
minutes copying a mix of letters that seem to make no sense to me. :)

of a
> gentleman's agreement (the key word is "violation").

Excellent point. We need to use different words, because there are
really several different cases.

At one end of the spectrum is the honest mistake - the person who just
didn't know. At the other end is the the hostile person who knows but
doesn't care, and actively wants to start trouble. In between and off
to the side are all sorts of variations.

The word "violation" should really only apply to hostile, intentional
actions.

> If you take that
> attitude about gentleman's agreement, especially with someone not
aware
> of that aggreement, you're going to have trouble.

I'm not sure what you mean by "that attitude", but I do agree that
treating a "mistake" as a "violation" isn't the way to go at all.

> In the end, it is no different on the radio - the same results.

There are some flaws in your example, but let's ignore them for now.
Main point is how the agreement is presented. If you look at Hans'
story, the "radio cop" was actually polite and didn't lecture.
>
> > What should the 2 meter SSB DXer do when a couple

Agreed - the first time, anyway.

>Instead, excuse
> yourself for interfering with their conversation, explain the
situation
> (you're trying to make contacts on the frequencies primarily used by
> SSB'ers and their signal is interfering with those contacts), and
> politely ask them to change frequencies (if you would, could you
please
> move to another frequency - perhaps 145.???).

Sure - if you can get on FM.

What do you do if they say "We don't care - FM is legal here and we
were here first?" That's what the SSB folks have run into.
>
> With this method, they have learned about the SSB frequencies, that
> talking near those frequencies cause interference, and that they
should
> pick other frequencies for their FM conversations. All without being
> lectured (and the resulting bad feelings).

Some folks consider ANY sort of talk about "gentleman's agreements" or
operating practices as a lecture. That's part of the problem.
>
> > Here's another true story:
>
> Well, that was a nice story.

It was true, though. Caused all sorts of trouble. At least a dozen
potential hams driven away.

> However, we seem to be jumping all over
> the place here.

Nope - presenting the opposite extreme of Hans' tale.

> First, it was about an honest mistake by the newcomer.
> Next, with your story, it was about the worse example one could think
> of.

Not the worst. There are worse ones on other repeaters, like the K7IJ mess. I related my story because I knew it first hand, and because the troublemakers were not lectured by a "radio cop".

> Since most newcomers who make simple mistakes are not going to turn
> into the nightmare you describe, I think I'll avoid comment at this point.

Most won't, of course. But the point is, how do we deal with cases like the one I related, which are not uncommon and do enormous damage?
>
> > What should we have done differently? How do we
> > define a set of basic "radio values" and get folks

>
> And I think that is exactly where "we" will get into trouble. As soon
> as "we" start defining 'radio values," and "we" start trying to "get
> folks to follow them," "we" are going to have disagreements, arguments,
> and fights.

The alternative is anarchy. Any community has to have some shared values or it degenerates. "Leges sine moribus vanae" is the motto of my alma mater. ("Laws without morals are in vain").

When someone joins a community, part of the "price of admission" is sharing some of the community's values and practices.

"We" means the entire amateur radio community, not just a few "radio cops". Having standardized operating practices enhances everybody's fun and effectiveness on the air.

The most basic values are things like:

- The license is a privilege, not a right
- Nobody owns a frequency
- You never know who else is listening, so act in a way that reflects well on yourself and the ARS
- A thing done well is more fun than the same thing done poorly

--

For example, it has long been standard amateur practice to send one's own call last. "W5NET from N2EY" or "W5NET, this is N2EY", not "N2EY to W5NET". By sending the other station's call first, the listening

stations know who is being called immediately. If everyone does it the same way, confusion is lessened, particularly when conditions are poor. (This procedure used to be required by the rules, btw). Of course the best way to teach such prcedure is by example, and not to make a big deal out of variations from the standard method. But in a net situation, nonstandard practice is a real headache.

> And ham radio will suffer even more than the original
> problems might have caused in the first place.

I disagree. Good operating means adhering to standard practices that make sense and make everyone's operating easier and more effective. That doesn't mean jumping on somebody for a mistake, though.
>
> I realise that it is hard to sit back and ignore those little rule
> violations, but in the end that is far better for ham radio than the
> confrontational approach.

I think there are ways to get folks to "sign on to the gentleman's agreements" without being confrontational. But true rules violations must not be tolerated.
>

Exactly. It's that middle ground that I'm seeking.
>
> Years ago, when I was on CB, I had a standing rule not to argue with

great conversations).

I do the same thing - but in some cases the person doesn't go away. In the case of the story I told, the effect was that the troublemakers had the repeater to themselves, which is what they wanted.
>
> I still apply that same rule to Amateur Radio (and it still works).

>
Most of the time, yes.

Consider this: Are we lecturing each other here, or discussing?

I am not black.

As to your assertion, no doubt - many people have this "us vs. them" attitude that leads practitioners to believe they are getting screwed at every turn. I know lots of whites who are this way, too. *LOTS* of whites. My Dad among them, even though he had a good job and a great place to live his whole life.

I personally know of no blacks who have been discriminated, but I don't make it habit of discussing this with most of the blacks I know. I do, however, frequently hear of racially-motivated events in my area that are blatant; for example, racist graffiti, occasional crosses being burned on lawns, and that sort of thing. If you want a personal example of general discrimination, an Asian friend of mine, a generous and hard-working person who is respected by many who know him, has been frequently taunted and harassed and threatened by people, complete with name-calling, for being Asian. He was initially turned down for duty in a local fire department because he was Asian, even though he passed all tests with flying colors, more specifically, because the employer thought he would have clashes with the potentially racists firefighters on the squad. This was ultimately turned around, but by that time he had lost interest and went into a field where people were more accepting. Make no mistake, racism is alive and well, even in mostly liberal areas like San Francisco region.

> Also, black GET AWAY with discrimination all of the time. I'll cite
you an example... a black guy I work with constantly said, "That was

It will be a strange day when I think a joke among friends is discrimination (and it certainly sounds like he's joking to me). My friends and I joke all the time about these things, whether it's racial or political or lifestyle, and we do not discriminate against one

another :-| I hope you do not think this way.

The "QRS" procedure recommended by others is the way to go. Best to
indicate "QRS" when you call them ("WA3IYC DE N2EY N2EY QRS K")

The speeding up by the other guy is often unconscious and
unintentional. Many (including me) will give you "Farnsworth" on the
first try.

Keep trying - specially if you hear N2EY around 7040 or so!

Ahh- usually by the time i've sent QRS i've missed a good deal already.
Next time i'll include QRS in my ACK of his CQ.

> Keep trying - specially if you hear N2EY around 7040 or so!

Will do. Now that i'm working "/AG" below 7100 i figured it would
be more of a problem. Oddly enough, i hear some slow-pokes
(like me) down there also! I'm just looking forward to dropping
the "/AG" soon...

Let me then restate it, it ALWAYS works with me. The purpose of radio is to communicate, If I am sending too fast for you we are no longer communicating.

I used to spend a good bit of time in the novice band and particularly enjoyed the QSO's that started out with a shaky fist, "You are my first contact". I always took great pains to make it as enjoyable QSO as I could.

1821. shack grounding

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-22 23:17:16 UTC
From: Ken Anderson <longrange2@home.com>
Message-ID: <3A6CBE17.A625016@home.com>
Source record: 94599

OK, I have my IC-746 on the way, should get here in about a week. Up to this point I have been operating mobile only, so this will be my first attempt at setting up a shack. I am planning on setting up in the basement. I will be using a couple of smaller portable antennas for operation because of the CC&Rs in the neighborhood and eventually will probably put a dipole in the attic. I was wondering how some of the IC-746 users out there have their grounding set up. Do you use braided wire, copper strips, etc. I will probably be using copper pipe as ground rods. Any info on how you set up your own grounding would be appreciated. Ken

I am working on learning the Morse code to upgrade my ticket and have a question concerning telegraph. I noticed that a cowboy in an old B&W western the other day sent and received a message, but all the thing did, was click. Kinda like Click, click, clickety, clickety, click, click. How did they undersand telegraph code with all shorts and no "LONGS"??? I guess I am lucky to have come along AFTER that thing went out of style. Hi Hi. Johnny

Johnny,
Land telegraph used 'American Morse' code. The characters
are made with a combination of 'dots' and spacing between 'dots'.

I think its good practice to most often answer people who are sending at a speed you can copy. When I am on, if I have no takers at first, I will slow down my CQ with the intent of broadening the pool of potential respondents.

On the other hand, you must realize that its a drag to be constantly asked to QRS. At slow enuff speeds I forget where I am in a word or sentence, and my sending is not as good a slow speeds. When you answer a CQ with a request for QRS, remember that you are asking for a favor.

When I learned the code in the 50s I had the same question. All in what you learned I guess. What to me was even more amazing was that there were still some American Morse (a tad different from the International Morse you are learning) ops around dittybopping away on the air. These characters had learned it both ways, sound and clack, and trucked along at almost conversational speeds.

Over the years I had chances to see some pros and those who learned it from the military of WW2 vintage (my father for one) in action. It was truly slack-jawed amazing what these people could do.

Hello All,

I operate alot of 75 Meters, and I was wondering are there any traffic nets or Misc nets, (other than the Georgia traders net on 40 meters) I'm really looking for a group of hams that rag chew in the evening on 75 meters, weather they got a net or not... also something in early mornings would be nice, I already listen to 3897 and 3960 in the mornings....

Thanks..

> have run into.

Then there is not a thing you can do about it. As long as they are obeying FCC rules, you don't have a right to enforce any type of "gentlemen's agreement." Lecturing is not going to change that fact, nor is the radio rage that Riley talked about.

However, I must say that I have yet to run into a person who did not immediately change frequencies when asked politely to do so. Most of the time, they even apologized for causing interference.

> The alternative is anarchy. Any community has
> to have some shared values or it degenerates.

No, we're not just talking about shared radio practices. We're really talking shared radio practices enforced through lectures (and whatever), and that is where the problems begin. The polite radio operator will ask a person for cooperation (and does not interfere with a conversation to lecture about petty nonsense like the use of the word "handle"). The "radio cop" is just the opposite of that (no conversation is too important to override his need to lecture about how "we" do it).

> [snip] Having standardized operating practices
> enhances everybody's fun and effectiveness on
> the air.
>
> The most basic values are things like:
>
> - The license is a privilege, not a right

From our perspective, that other person's license is a right (given to him by the FCC). As soon as we start thinking that other person does not have a right to be here unless he follows "our" rules, than ham radio will cease to be the "friendly" radio service it is supposed to be (and we're right back to Riley's radio rage).

> - Nobody owns a frequency

Exactly what the FM user would probably say if lectured to move to another frequency by the SSB'ers above.

> - You never know who else is listening, so act
> in a way that reflects well on yourself and the ARS
> - A thing done well is more fun than the same
> thing done poorly

Ah, but now we're back to value judgements - and mine may not agree with yours. So, whose values do we accept as the standard? And, since we cannot possibly enforce it, why even consider a standard at all (other then those set by the FCC)? In the end, the only standards we possibly can have is those that people agree with. And that is where it should end (not with on-air lectures, banning the person from the club, etc).

> I disagree. Good operating means adhering to
> standard practices that make sense and make
> everyone's operating easier and more effective.
> That doesn't mean jumping on somebody for a
> mistake, though.

Absolutely. The key is standards that make sense and that people volunteer to comply with (not lectured because they don't).

> Consider this: Are we lecturing each other here,
> or discussing?

That is an excellent point. The key here is that we are in an open discussion about this very topic. However, the "radio cop" is one who jumps into an existing conversation (about a very different topic), and begins to lecture, often while presenting himself from a superior position - I'm a real (older, more experienced, higher class, or whatever you want to insert here) radio operator, and "we" do it this way.

Imagine this type of behavior in any other hobby. You're sitting in your boat, talking to a friend, enjoying the sun, when a total stranger rides up and starts lecturing about the "proper" way to bait your fish hook. Or you're playing volleyball with your friends when the neighbor walks up, stops the game, and starts to lecture you (in front of all your friends) about the "proper" way to hit the ball.

In most other circumstances, we would consider such behavior to be extremely rude. But, in ham radio, some really consider these intrusions to be honest efforts to educate, because the "price of admission" to our community is sharing our "values and practices." Sorry, but I still consider such behavior to be extremely rude.

True, but unless there is something that I'm not aware of, the only thing being seriously considered here is a massive off-shore system, which has never been tried on such a scale. It is believed that nothing less will meet the huge power demands in California.

> Pagan wrote:
>
>You'd pick strawberries for 14 hours
> straight, 7 days a week?

You must have posted a response in another newsgroup without including this newsgroup in the reply. Anyway, your message did not show up here on my news server (the only reason I saw it was that another person replied).

Anyway, I grew up on a farm, Pagan. So, yes, I'd pick strawberries as long as they need to be picked. So would millions of other Americans.

>What's reasonable pay?

I've already answered that. I've got to feed my family (who is not willing to live twenty to a hotel room like many of the migrant workers are), and my family would starve on the current wages if we also had to pay rent or house payments.

Give people a wage where they can survive comfortably (not get rich, just live comfortably) and people will do that work (the claim that Americans will not work hard is bullcrap). But you are not going to get people to work AT ANY JOB for one to two dollars an hour (which is about what most illegal immigrants are paid for farm work).

> Well, anything seems pretty reasonable
> when the alternative is $0. These
> guys get paid under the table, so someone
> on welfare or unemployment could
> easily pick up some extra money, tax free.

But the alternative is not $0. There is a required minimum legal wage in this country, and farmers are not, and should not be, excluded from that legal requirement.

> I'll point out that these guys also send
> money home to support their families.

Actually, most don't make enough to send money home (that is tv myth). Of those who do, it is often only because they are living in sub-standard conditions here (twenty to a hotel room, etc).

>So the best alternative is no job at all?

You've switched the subject, Pagan. We were talking about American jobs going to illegal immigrants, not about Americans on welfare who

refuse to work. The issue is employers hiring illegal immigrants because they are unwilling to pay a reasonable wage for this work.

And, contrary to the myths, it has nothing to so with employers not being able to pay decent wages (the profits are there), nor is it about Americans not willing to work hard. It is about employers lining their pockets with the money they save by hiring illegal immigrants at substandard wages.

> The whole point of work is that you have to
> start somewhere, then, as you gain job skills
> and/or education, you increase your worth to
> your present or future employer, thus eventually
> making more money and so forth.

So, that justifies the employer paying substandard wages. People have to feed their families, Pagan. People have to pay rent, utilities, car payments, gas for the car, and so on. If people cannot do this because the employer is too busy lining his pockets, and they refuse to take the job, then the employer should have no right to hire illegal immigrants instead.

> This store you mention, odds are an immigrant
> will take this job, and as you pointed out,
> they'll live in crowded conditions for a time,
> combining their income and saving money.
> Eventually, they'll get on their feet, get a
> better job, buy a house, car, and basically
> live the American dream.

You're probably right, an illegal immigrant will probably take that job. And, if he survives the many robberies, he probably will go on to live the American dream. But, in the process, an American will have been denied that dream, simply because the employer was too cheap to install simple security devices (or hire security). But, why should the employer be concerned, he is already living the American dream (and he doesn't have to work in those dangerious conditions).

> What these immigrants have going for them is
> a super strong work ethic, where a man is
> defined by his willingness to work. They
> overcome their handicaps (language, customs,
> immigration status) and create a life for
> themselves. They could just as easily sit
> on their asses and collect welfare, bitching
> about how they're no jobs around.

Bullcrap. What they have going for them (over Americans, who often have the same work ethic, etc, that you talk about) is a willingness to break America's immigration laws, and a willingness to live in substandard living conditions (better than they might have at home) while working for substandard wages (more than they might get at home).

And, of course, none of that (what you describe or what I just described) justifies the employer hiring illegal immigrants for substandard wages, forcing them to live in these substandard living conditions (I thought this country outlawed depression-style work farms years ago).

There are Americans who are more than willing to work. All they need is a job that pays a decent wage. Again, employers are not going to pay that wage if they can hire an illegal immigrant for far less.

Source record: 94626

Hello, I am looking to take the Tech exam at the end of this month. I have always been interested in electronics and radio so this seemed an appropriate route.

However, as an Internet junkie, the majority of info I have read recently is about the decline of amateur radio for whatever reasons: fewer operators, CW disputes (are you a REAL ham?), band re-allocations etc. Am I wrong about this? Are there GOOD reasons to be a part of this? It seems the reasons for pursuing it given by the FCC for amateur radio get lost in the wash or are just plain quaint:

1) mobile comm.: cell phones, FRS, etc.
2) worldwide comm.: internet, cell phones,...
3) emergency services: the new channels the FCC established for inter-agency communication seem to make this moot.
4) expanding the number of trained experts & advance the radio art: what i read is that there hasn't been a lot of advancement for whatever reasons and most people just use phone or CW.

Don't get me wrong; I plan to take all 4 exams. Not to have access to "all the bands", but instead because I enjoy learning. What I am wondering though, is this an exercise in futility? Or is the hype about the decline just that? Is there any GOOD news about getting into amateur radio?

Thanks,
Bob

FS: Icom IC-2800H Dual Band Mobile Transceiver with box and all accessories.
MARS/CAP modded. Works and looks great. Sell For $450 plus shipping

GENERAL SPECIFICATIONS:
Dimensions (projections not included): Controller: 140(W) x 70(H) x 34(D) mm
or 5-1/2"(W) x 2-3/4"(H) x 1-11/32"(D); Main Unit :140(W) x 40(H) x 165.8(D)
mm or 5-1/2"(W) x 1-9/16"(H) x 6-17/32"(D)
Frequency Coverage (MHz): (VHF) Tx: 144-148, Rx: 118-174*; (UHF) Rx/Tx:
430-450** [*Guaranteed 144-148; **Guaranteed 440-450]
Mode: FM, AM (RX only; 118-135.995MHz)
Memory Channels: 232 (inc. 12 scan edges, 10 log, 10 repeater and 2 call)
Tuning Steps: 5, 10, 12.5, 15, 20, 25, 30 and 50kHz
Frequency Stability: ±10 ppm (-10°C to +60°C;)
Power Supply Requirement: 13.8 V DC ±15% (negative ground)
Current Drain (VHF/UHF; at 13.8 V DC): Transmit Max Power: 12.0A / 11.0A;
Receive Standby: 1.2 A; Receive Max Audio: 1.8 A
Antenna Connector: SO-239 (50)
DATA Connector: Mini DIN 6-pin
External VIDEO Input: PHONO [RCA (75)]
Weight (approximate): Controller: 290 g/10.2 oz; Main Unit: 1.15 kg/2 lb, 9
oz

TRANSMITTER SPECIFICATIONS:
Modulation System: Variable reactance
Output Power (VHF/UHF): High* 50 W/35 W; Mid-H* 20 W (approx); Mid-L 10 W
(approx); Low 5 W (approx)
Spurious Emissions: -60 dB
Microphone Connector: 8-pin modular (600)

RECEIVER SPECIFICATIONS:
Receive System: Double conversion super heterodyne
Intermediate Frequencies: 1st 15.65MHz (VHF), 46.05MHz (UHF); 2nd 450kHz
(common)
Sensitivity: 0.16µV typical (at 12dB SINAD)
SQL Sensitivity: Less than 0.13µV (at threshold)
Selectivity: Wide: More than 12kHz/-6 dB, less than 28kHz/-60 dB; Narrow:
(Europe/Italy VHF only) More than 6kHz/-6 dB, less than 18kHz/-60 dB
Spurious And Image Rejection Ratio: More than 60 dB
Intermodulation Rejection Ratio: More than 60 dB
Audio Output Power (at 13.8 V DC): More than 2.4 W at 10% distortion with an
8 load
External SP1 Connector: 2-conductor 3.5(d) mm (1/8")/ 8

External SP2 Connector: 2-conductor 3.5(d) mm (1/8")/ 8

Hello Bob,

There's a great article on the ARRL website by W2FS on this subject.
Basically, the author says there are three basic motivations to get a
ham license:

Building radio gear
Operating radio gear
Commmunicating with other people electronically

The third reason has been all but eclipsed by cell phones, the net,
cheap longdistance, email, etc. The others are as strong as ever, but
are always undergoing change.

Long ago, hams built all of their gear because they had to - nothing else was available, or it was too expensive. Today there's a wealth of new and used gear available, plus kits and "rolling your own". It's a choice now, instead of an absolute necessity. True, very few hams build cutting-edge stuff, but that's been true for a long time. I build all my own gear - haven't owned a store-bought rig in 17 years.

There are more modes and types of operating available to hams today than at any time in the past, and far more than in any other service. Emergency and mobile operation are still needed when the cell phones and other methods fail - which they do sometimes, and often at the worst possible time.

Hams do radio for its own sake - that's the real defining element. Sure, I could buy my rigs - but it's so much more fun to design them, build them, get them to work and use them on the air. I could easily email somebody in Australia, but working them on the air is a completely different experience.

It's like the difference between piloting an airplane and riding in a commercial airliner. Both get you there, and if getting there is your only objective, the airliner is probably faster, cheaper and easier 99% of the time. But it's not the same thing as piloting your own plane.

Steve,

Don't worry about it. It's not your fault; rather, the fault of dis-
courteous operators--show offs, if you will. A courteous op will either
slow down upon hearing the speed at which he is being called or upon
your request to QRS.

Now, in defense of the speedy ops, I find that it is difficult to QSO
with really slow ops that space their character elements out. Used to
closer character spacing, I sometimes misread characters--A = E T. LOL!
But that's MY fault. It's just that my comfortable speed is around
15-20 and the 5 word guys just mess me up. That's not a slam. I easily
remember when I started.

I'm not talking about either. I'm thinking about how we can educate the
newcomers AND oldtimers to the idea that everybody can win in these
situations.
>
> However, I must say that I have yet to run into a person who did not
> immediately change frequencies when asked politely to do so.

I have. Rare but not unknown. Look at the enforcement log and see how
many uncoordinated repeater disputes there are. They are just the tip
of the iceberg.

> Most of
> the time, they even apologized for causing interference.

Sure - most of the time.
>
> > The alternative is anarchy. Any community has

> important to override his need to lecture about how "we" do it).

I have repeatedly agreed with all of this, Dwight. I've repeatedly
written that lectures and jumping all over mistakes isn't the way to
go. Such things are not the problem.
>

Let me restate: The license does not convey any rights, only
privileges. With those privileges come responsibilities.

> As soon as we start thinking that other person does
> not have a right to be here unless he follows "our" rules, than ham
> radio will cease to be the "friendly" radio service it is supposed to
be
> (and we're right back to Riley's radio rage).

Of course everyone with a license has a right to "be here". But they
also have a responsibility to others.
>
> > - Nobody owns a frequency
>
> Exactly what the FM user would probably say if lectured to move to
> another frequency by the SSB'ers above.

Again, I'm not talking about lecturing.

> > - A thing done well is more fun than the same
> > thing done poorly
>
> Ah, but now we're back to value judgements - and mine may not agree
> with yours.

Sure - but not all value systems are equal.

> So, whose values do we accept as the standard?

Those which have the best reasoning and results to recommend them. Like
the use of standard phonetics when phonetics are needed. Doesn't mean
nobody can use "cute" phonetics for fun, just that when phonetics are

used because of poor conditions, everybody should know and use the same ones.

> And, since
> we cannot possibly enforce it, why even consider a standard at all
> (other then those set by the FCC)?

Because the alternative is a mess. Chaos. And because without our own standards, we will either be legislated out of existence, or the standards will be enforced on us from outside.

Think about the proliferation of CC&Rs, and not just anti-antenna ones. Why are they so popular? Because people are afraid that "the neighborhood will go downhill". This is a symptom of a lack of shared values.

For example, where I live there is nothing to force anyone to mow their lawn, rake their leaves, or keep their houses in good repair, but practically everyone does because of the shared value of "let's keep the neighborhood looking nice". In other places, there are all sorts of restrictions written into legalese because of bad experiences with folks who don't know how to be good neighbors.

The freedom to set our own standards means the responsibility to do so.

> In the end, the only standards we
> possibly can have is those that people agree with.

Sure - that's what I'm talking about.

> And that is where it
> should end (not with on-air lectures, banning the person from the club, etc).

I disagree. Think about what happened on the repeater I told about - should have just accepted anything anybody did that wasn't a clear rules violation?
>
> > I disagree. Good operating means adhering to

For about the tenth time: No lectures.
>
> > Consider this: Are we lecturing each other here,

True.

> your friends) about the "proper" way to hit the ball.

Not good examples. How you bait your hook has no effect on me, and how you play volleyball doesn't either, unless I'm in your boat or on your team.

But how someone operates DOES have an effect, as my story shows. To use your fishing example, if someone makes lots of noise on a lake and scares the fish away, should everyone else say nothing? How about the careless fisherman who dumps unused bait overboard, or who violates the catch limits?

To use your volleyball example, if someone is constantly hitting the ball in such a way that it goes way out of bounds and lands in your tuna salad, you might say something.
>
> In most other circumstances, we would consider such behavior to be
> extremely rude.

Depends on the situation.

> But, in ham radio, some really consider these
> intrusions to be honest efforts to educate, because the "price of
> admission" to our community is sharing our "values and practices."
> Sorry, but I still consider such behavior to be extremely rude.

The intrusions are rude, yes. But the price of admission to our community - any community - really IS sharing our values and practices.

And let me close with this: On-air lectures by "radio cops" aren't the way to go.

1863. Home Electrical Power Generators--The Best?

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-23 22:51:31 UTC
From: Wayne Watson <mtn_view@sirius.com>
Message-ID: <3A6E0AF2.BA61A49D@sirius.com>
Source record: 94692

OK, anyone want to take a shot at the best power generators for backup of home electrical systems?
So far Honda seems to have the nod because they are reliable and have complete parts for all units.
I see Coleman has a series called PowerMate, but I don't know anything about them. Since Coleman is
big and has been in business for awhile, I would think they also have a good parts inventory.
Honda's prices seem higher than just about everyones. Any comments?

Most excellant idea! If you got to fight the fire, you've to fight
with fire! These filthy faggots will stop at nothing to silence us God-
fearing Patroits.

Turn the other cheek, Lloyd. Some things just aren't worth it. Make another web page, and make it bigger and better. Never sink to their level. Your hands created what was - now make something even more amazing.

73s,

Steve

1869. Re: tune up procedure for kwm2

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-23 23:27:25 UTC
From: Bruce McLaughlin <bmclaugh@primenet.com>
Message-ID: <94l4v0$5e1$1@nnrp1.phx.gblx.net>
Source record: 94695

I caution that the following is the procedure for tuning up a 32S-1 which I own and not the KWM-2 which I do not own. But I think the transmitter tuning procedure should be essentially the same.

First turn the mike gain fully counterclockwise (fully off). Put the emission switch to either upper or lower SSB. Switch the meter to read PA plate current. Turn the vox gain control fully counterclockwise until it switches the transmitter on in PTT mode. Switch the meter to plate current reading. It should read around 40 mils. If it is off, adjust the bias pot on the power supply until you get 40 mils. Then turn the vox gain to the right until it clicks again and turns off the PTT. (This need be done only once and should not need readjusting unless you change the finals or some other, major change is made to the unit.

Now peak the exciter preselector so you hear maximum band noise on the band and frequency you intend to use. Then set the tuning dial to an apparently empty freq nearby.

Put emission switch to tune position. Put meter switch to the grid position. Advance the mike pot until you get some grid current (about 2-4 on the DB scale is good). Readjust the preselector for maximum grid current at that mike pot setting.

Now switch the meter to read PA plate current. With the loading control set at 50 (Ohms) dip the plate current with the plate tuning control.

Switch emission switch to lock key and redip the plate.

Switch meter to read PA grid and advance mike control until the meter is about 1/4 scale (about 4 db on the db scale).

Switch meter back to PA plate. It should read about 250 mils at the dip. If it doesn't adjust the load control until it does. Redip after adjusting the load control. If for some reason you can't get 250 mils (or close to it) after adjusting the load control you may either have antenna trouble, final amp tube trouble or something else ailing it. When this adjustment is complete, reset the emission switch to upper or lower sideband. When speaking into the mike, adjust the mike gain for about 6 db peaks on the lower scale when the meter is in the ALC reading postion.

Note: When you get to the final tuneup stage, with the emission switch in lock key, try to be quick about things. You are putting full drive at full voltage on the final tubes and they don't like that for very long. I try not to allow tuning for more than 5

seconds at a time. If things are not quite right by then, I back off the mike gain to zero for a few seconds to let the tubes cool a bit and then readvance the gain to where it was before and continue tuning. You could do the same thing by switching out of lock key to one of the SSB positions of course.

While the above is a bit complicated, it will become second nature after a few times and you should be able to do the tuneup quite quickly.

Good luck.

Bruce - W8FU

Once you do the final set of adjustments with the emission in

Good practice and courtesy dictates that a station should come back to you at the speed you send. If the station does not do that, he or she is being very inconsiderate and apparently aren't interested in working you. I would look elsewhere for a qso when that happens.

Now contests are different. Some contesters will slow down a bit and some won't. Since you aren't going to have any extended qso with them, replying to a faster station can be good practice without stretching yourself too thin.

But for rag chews . . . do send only at the speed you are comfortable with. If you try to send at a speed much faster than you can really manage, your sending will be lousy and you do invite the other station to come back to you at the speed you are sending. In other words, you will get what you were asking for.

I think it's better to gradually push up your copying and sending speed rather than trying for a significantly faster speed which is really beyond your ability. A nudge from 15 wpm to say 18 wpm is or should be manageable and that's how you will improve. But if you're a 15 wpm op and try to send at 30 wpm, neither you nor the other station are likely to be very happy.

Good luck.

Bruce - W8FU

Lloyd, contact the Lewis Louis Detective Agency (Largest in the Southeast)
I'll bet they can track down the culprit (s).

I wonder how they will pay, do you accept credit cards, checks, money orders
or all of the above???

Imagine that, Lloyd getting a payback!!!!! LOL !!!!!

LOL!!!! So true, Brother Firebottle. But Lllllllloyd has a certificate in computer operations. Obviously, he should use that certificate for toilet paper, becasue that's all it's worth if he doesn't know there are plenty of websites that offer hosting services. Now, if he spams groups, posts racist and christian fundy shit and pisses several thousands of people off, he'll have plenty to suspects.....perhaps the whole internet?

: <del>
:
: > So stop being a radical. Our system of government does
: > not encourage fast change in the way government works.
:
: Think about it, what you just said there - because you are absolutley
: right. "The system...does not encourage", of course the system serves
: only itself - and not the people. Such being, radicalism just might be
: the only viable option.
:
: Get past your republicanism, it's blinding you - you've been bamboozled.
: For God's sake, get of the Rush - he's a mouthpiece, nothing more.

I am a republican because we are a republic. The system is the
constitution. It makes it VERY hard to do radical changes. The
system of checks and balances forces us, as a people, to come to
some sort of consensus.

: Power corrupts, absolute power corrupts absolutely.

That type of beliefs gave us Clinton. So many conservatives
are so paranoid, so fearful, that they "allowed" Clinton to win
over Geo. HW Bush.

: The balance of power is the scale of peace. Thomas Paine (I think)

If you noticed, the first American Civil War (the Revolution) had
a huge number of people who trusted God. So many these days
on the right trust nothing but themselves and their guns. In other
words they are patterning themselves after the godless French
Revolution. That revolution gave us communistic, Pol Pot,
the Iran revolution and such. Why? Because every revolutionary
after the French revolution had studied in Paris.

Without God, without being in his will, you will fail.

I got my ticket back in October of 1992 while I was still a senior in high school. I am 26 now, and I have graduated from college with a degree in Broadcasting. I have an advanced class ticket, and despite all of the b.s. you may read in this and other newsgroups or hear on the ham bands, it really is a fun hobby. There's just something really neat to me about being able to wake up at 7 or 8 in the morning on the weekends and talk to stations halfway around the world on a homemade dipole antenna and a 10 meter rig running 25 watts. Despite all of the technology that we to communicate with today, radio still fascinates me. I am even seriously considering going back to college and getting a degree in electronics, or a similar field. Don't let a few idiots ruin this great hobby for you, it really is a lot of fun and excitement. Good luck!

Mike KU4UV

Ho hum. He's back. 2 days. I said he wouldn't last a week. I must be psychic.

There are a couple of things that come to mind: "what goes around comes around"; "the sun doesn't shine on the same dog's ass everyday"; or for the biblicly inclined, "those who live by the sword shall die by the sword."

Now it's time to tool up for the next empty threat from Lllllllooooydddd.

I'm wondering (considering his attitude) if he had a backup. Due to a change in policy of my host, my site got dumped a while back (it sure was nice of them to tell me about it three days after they dumped it). I just went somewhere else, pulled out my backup and was up and running in less than an hour. Always make a back up, shit happens.

Bob, don't worry about a few AirHeads (known as AH). The amateur newsgroups can often resemble the rec.radio.cb newsgroup. These are a small (albeit vocal!) number of folks who won't really bother the hobby itself. As far as FRS - I'll take my 440 HT everytime. I have a consistant 15 plus mile range on six aa batteries to repeaters - which then give me a 30 plus (very plus, in some cases) range from them to mobiles or bases (or other HTs). I can punch into the local phone network easily and enjoy telephone contact via the 440 HT. True, the cellphone network can give you all sorts of coverage (as can the internet), but - and this is a BIG but - the same technological infrastructure that gives us all of this CAN and DOES fail at times. A few years back, there was a severe ice storm in the Northeastern US and Canada. They were begging for amateur operators with HF mobile capabilities! Gouverneur, NY, (where I was born and have relatives in) was largely without power (or heat) for a week or more! Telephones? Cell phones? They need power. Batteries won't cut it for long. The police in one locality were temporarily patched into an AMATEUR tower and antenna to regain coverage area. No, the phone patch traffic we used to handle is no longer a big plus since long distance rates have fallen. When in the service on Guam Island, a call to the US was $3.00 per minute with a minimum of $12.00. This was in the mid sixties. That was a fair chunk of change back then - more than the average serviceman really wanted to part with. The military was poorly paid back then. A lot of servicemen (and women) enjoyed the patches. Today, it is easy to become complacent. Remember, the emergency services have a much higher tower for UHF than amateurs. That translates into a LOT of wind loading. 50 MPH winds here in Rochester, NY are rare. A couple of years ago, just after labor day, we had a storm and winds were clocked at 87 MHP. Trees were uprooted. The well anchored shorter amateur tower may well survive what the commercial (read BIG) towers may not. When I was on Guam, a typhoon hit Rota (near Guam) and took out a 600 foot coast guard tower. A chief was sent over to re-establish communications with the Naval Communications Station on Guam. I heard both stations using tactical callsigns of 'sparkplug' and 'sparkplug one'. Guam could not copy, but we could in the ham shack. After debating with a couple of guys, we keyed up and called both stations. After about 15 minutes, Rota asked the HAM STATION to pass traffic to Commander Naval Forces, Marianas. Within an hour, the commanding officer, Captain Delany, appeared at the ham shack. The three operators were relieved of all other duties and commenced handling all traffic between Guam and Rota until we were otherwise notified. The ham shack handled the traffic for the Navy! It is not common, but it can happen. Believe it, the hams are still necessary. It is a fun hobby and can provide a real public service.

Dick, reminds me of the time when I was on Guam. I could copy morse
just fine (40 WPM perfect copy for a number of minutes in the US Navy
on a typewriter), but we had a guy (Gary Trice) who just thrived on
high speed CW. I usually operated out of KG6AAY, but one time I was at
KG6NAC (the US Naval Hospital) and was calling CQ at a comfortable 40
WPM. This guy came back - I swear it was 65 WPM - and I missed some of
the callsign. I called QRZ and he came back, again at 65! This time I
got the callsign ok, and he started with "hello Gary haven't heard you
in a while". I was very fortunate to copy at least that so that I knew
where the mixup was. I straightened him out and had him QRS to about
50. At least I was able to copy at that rate, but I DID have the
sweaty hand syndrome! Gary's old call was WB2CQG (CQ Gary, as he put
it). He has a new callsign, but I forgot it. You can look it up on
QRZ.com if you ever want a real workout on CW (I don't. I couldn't do
40 now. I passed the extra the 2nd time after letting my license go
for a number of years and after writing and debugging a couple of CW
programs for the computer might make 30.) Hopefully, anyone asked to
QRS will do so.

Well, you get what you pay for. Honda generators are very quiet, smooth-running units that are very reliable. Two of the members in my club have them, one for over five years, and other than a spark-plug change, both have operated perfectly. I'm amazed at how quiet they are. Several other club members have Colemans, Sears, or Onans, and you can hear them all the way accross our Field Day site. Except for some voltage regulator problems with the Onan, and the Sears that GUZZLES fuel, they seem to run OK.

Hans, when I was active on HF back in the 60s, that was the common expression. "The handle here is ..." was the norm. Apparently, CB picked up on this and therefore everyone now says this is a CB term. Oh well. I got my knuckles rapped for this once. I don't get upset anymore. We had a guy on 440 FM ranting on about the importance of CW. We tried to change the subject, but he wouldn't let up. Fortunately, the repeater owner was on the repeater in the group so ... he and I switched to F-2 emission - about 40 WPM. That ended that. Whatever someone wants, now I try to accommodate them. This even included (many years ago) switching to American Morse on the air!

Okay, I give up, Jim. As far as I see it, with the six to eight hundred thousand ham operators out there, the only way to impose "our" values and operating standards on others is thru prison, mass propaganda, taking away their privileges, or endless on-air lectures.

Since I assume you don't intend to lock people up for not following "our" values and standards, and the ham community has no authority to take away operating privileges (from our perspective, that other person's license is a right given to him by the FCC - we have no control there to enforce "our" values and standards beyond the FCC rules), and very few of us own or operate a medium capable of mass propaganda, the only thing remaining is the lectures.

However, since you insist that you're not talking about lectures ("I'm not talking about lecturing"), then what the heck are you talking about? I keep waiting for this, giving you every opportunity to lead into it, but so far I've not heard even a clue.

If this is nothing more than an exercise in semantics to satisfy your intellectual curiousity, than I have better things to do. Either offer some ideas of your own (that we can all discuss), or you can enjoy this conversation on your own.

Darn, you can try a person's patience. ;-)

True. I'm sorry. There were indeed some positive things. In addition to what you mention, there is also a renewed awareness of semantics, which can be very helpful for those having an affair (I did not have sex with that women - I don't define "oral sex" as sex). Boy, that can be stretched to fit many sexual activities (which is what makes it so useful), but I'll leave that to the imagination of others. ;-)

1892. Suzy And The Sanders

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-24 05:43:45 UTC
From: Buzzsaw <"Catch Me."@edu.com>
Message-ID: <94lq0thim0@pita.alt.net>
Source record: 94722

A police officer in Hiram responded to a 911 call. She had no details before arriving, except that someone had reported that Suzy was not breathing. Upon arrival, the officer found Suzy face down on the couch, naked. When she rolled Suzy over to check for a pulse and to start CPR, she noticed burn marks around Suzy's genitals. After the ambulance arrived and removed Suzy, who was declared dead on arrival at the hospital - the police made a closer inspection of the couch, and noticed that Suzy Da Pig had made a hole between the cushions. Upon flipping the couch over, they discovered what caused Suzy's death. Apparently Suzy Da Pig had a habit of putting his penis between the cushions, down into the hole and between two electrical sanders (with the sandpaper removed, for obvious reasons) and turning the sanders on. According to the story, after Suzy's orgasm the discharge shorted out one of the sanders, electrocuting him.
Suzy's life came within hours of possibly being spared, as it was later learned that the power company was scheduled to shut off the electricity the very next morning for non-payment.
Suzy's demise came (no pun) as a shock (again, no pun).

I think your forgetting about Clinton's ringer, Ross Perot. In both of Clinton's elections, good ol' Ross split the vote by enough of a margin to give the win to Clinton. Funny, where was Ross when AlGore ran, maybe AlGore didn't make him a big enough offer... ?

Acually, the hucksterism wasn't his fault. That was his syndicator Premiere Radio that was making him do all thouse comercials. One his conditions for returning was a cut back on the number of comercials. Also he will be going back to 5 hours.

> Jim

Jim, if I were a beginner watching this thread I think I might go into a dark corner, turn white, and begin to shake. CW is not something that comes natural to me, it has always been something of a tussle. I think that is true for anyone not doing it for a living. It is always easier to learn Urdu where everyone speaks Urdu and no one does CW for a living anymore. As some of the old ops put it, 'Twenty is plenty'.

My personal launching into high speed CW was running a kw on 20 CW during a Field Day. When I fed the generator at about 5AM, the birds and the crickets told me I was 5-9 in Southern New Jersey. Took the Extra about two weeks later.

Those of us with CW couth have to find and help with new 5wpm ops getting to the natural Journeyman speed of about 16 over the famous 'hump'. Not to keep cw alive, it is going to live or die on its own merits so long as we don't kill it but more like one of the greatest exercises in Elmering in the history of the hobby.

In the long run of things, getting the 5wpm guys to speed will make a lot more difference than absorbing a lot of codeless jabberjaws onto the phone bands.

73 yourself!

Dick N&#65533;BK, aging boy wonder.

>Honda's prices seem higher than just about everyones. Any comments?

Hello Wayne,

Here's my experience:

In 1991 I bought a Briggs-and-Stratton powered 2250 watt Coleman generator for Field Day use. I treated the thing like cut glass, changed the oil, filters and spark plug every 25 hours and even kept a little log book on it. Yet with less than 150 hours on it, the exhause valve guide failed, meaning it needs at least a new short block. The price of a new B&S short block was such that I just gave the whole thing away.

In doing more research, I discovered that Coleman uses at least two kinds of engines - B&S and Tecumseh. There may be more. In addition, the engines used vary from light-duty jobs to heavy-duty industrial ones. My use of the generator was on Field Day, where it ran almost continuously at light load for 25 hours at a stretch.

Honda, on the other hand, makes their own engines. Hondas are quieter, lighter and smaller than most other makes. Their resale value is also better. Next time I'll spend the extra money.

Which brings up a point - there may be a lot of slightly used gensets out there, bought in preparation for Y2K and hardly used.

Your experience seems to mirror what I heard from a ham. He thought Hondas were the best, although
carry a higher price tag. He didn't have a lot of good things to say about generator life times
other than the Honda offered some good hope. He also suggested I take advantage of the Y2K sell
offs. What's a genset? I'm considering this stuff for are little rolling blackout problem in
California. I'm not sure it's worth the fuss, but I'm thinking about it anyway. I'm not sure I want
to become my own power plant. A talk show host on the west coast who is *very* knowledgeable on such
matters suggests batteries are the way to go. He might be right for simple stuff like lights and
communications gear. My biggest concern is a well pump in the event of a long outage. I hope we
never get to that stage.

Hello,

First I wouls apologize for my very bad english-speaking.

I would like to know if there is an association of amateur radio in the Cameroon (TJ), or eventually if there are some web pages made by OM from Cameroon on the net.
The reason why I'm looking for this kind of information is that my YL has gone to this country and I would like to communicate with her without using ONLY the internet :-)

Best 73 to all and thanks by advance (maybe soon on the air ?)

Greetings:

I'm replacing the mic cord on an Icom HM-77 microphone. The RJ-45 connector was cut off and lost by the customer. Would anyone have the wire colour code used in this microphone?

The small green connector that plugs inside the mic has the following colours:

-shield
-blue
-green
-black
-red
-white

Thanks for any assistance.

A lot depends on which model you get. Some are really meant for occasional use, while others are designed to run continuously for many hours at full load.

The part that wears out, and which is responsible for most of the price, is usually the engine. To add to brand confusion, the same manufacturer may use engines from many different companies. For example, I just discovered that some models of Coleman generators use Honda engines!

> He also suggested I take
> advantage of the Y2K sell offs.

Yup. Lot of excess stock lying around. There are a number of companies that will ship nationwide, and shipping may be less than the sales tax.

Take a look at:

http://www.smallenginewarehouse.com

(I have no connection to them and have't done business with them - I'm not recommending them. Their website has a lot of info, though).

Also take a look at eBay by searching on "honda generator" or "coleman generator". You can get a feel for what they cost, specs, etc. A lot of them claim to be "new" or nearly so. Some of the auctions are dealers, too.

>What's a genset?

Short for "engine-generator set". Means the whole package.

>I'm considering this stuff for are little rolling
> blackout problem in California. I'm not sure it's worth the fuss, but
I'm thinking about it anyway.

Might not be a bad idea at all, if the folks in charge don't learn from this experience.

Noise level can be important in a residential neighborhood.

> I'm not sure I want to become my own power plant. A talk show host on the west coast who is *very*

For short outages and low-drain things, batteries will do the job. But you have to keep them charged, and their capacity is limited for high-demand things like a well pump or refrigerator. Batteries require maintenance even when not being used. A genset can sit in the shed for months with no attention.

Main disadvantages of a genset are noise and the fact that you have to keep it fueled.

I agree! I'd love to copy/send at 20 but without lots of on-the-air
practice,
i'm stuck around 7-10 wpm. I intend to continue to bang away at 7-10
until i'm more comfortable copying the speed demons! And without folks
willing to throttle-down to my speed, i'd be stuck! (so its appreciated!)

Oh thank God!
I hate all those damned commercials!
It's like they finish a single sentence and its commercial time again.
In the last few days, since I heard Art was coming back, I've tried to listen
to Coast to Coast. After listening to it for 3 hours, I gave up, turned the radio off
and said "screw it". Too many frigging commercials. I was getting more bombarded
with commercials than actual content of the show and it was extremely irritating.
That's why I stopped listening to beging with.

What I have seen recently is that the local county government has been asking for and getting information from the local ARES/RACES (amateur radio emergency service) group on where to locate county repeaters to eliminate dead zones in radio services for county police and fire. ARES is also helping out specifying equipment used to link together all the different radio systems used during a wildfire. Because of the rugged terrain, hams provide communications several times a year for wildland fires because the county and federal systems cannot handle the multitude of canyons in the area with reliable communications.

You are in the classic 'hump' area. When you do finally break out of it,
16 will not be a problem. It is caused by a number of bad habits you
picked up getting to seven. It is a bit harder than saying 'stop it' but
not by a whole hell of a lot. Reading teachers know that among the worst
things they can do is ask a beginning reader to read out loud; some kids
will be moving their lips for the next 75 years. But how else do you know
they are reading at all?

There are a lot of ways to learn code, most of which complement each other
and no one of which is preferable to another. So putting all the eggs in
the 'do it on the air' basket is a bit short-sighted but is ultimately the
purpose of the game so don't stop doing it. What I might suggest is to
set your compooter generator to 16wpm random groups and having at that.
Random groups have the advantage of treating all letters equally which, as
every Wheelie knows, is not the case with plain text.

OK you can't copy it. So make a handwritten (not printed) mark for every letter you hear whether you recognize it or not. Then pick 2 letters and write them down making the mark for the other characters. My first block would be the A letters: A, W, J, 1, R, L, P. Then the N letters: N, D, B, 6, K, C, X, Y and the fraction bar. Take a week and do one a day from each group. Then throw in E, T and the period as a reward. This will help get your brain out of it and also see if you are not trying to copy left and right-handed at the same time. If you are, put the off hand in your pocket.

Pay some attention to environmental factors. CW is distasteful if you get a tension headache from hunching over the table and gritting your teeth. Get a set of cheap phones for the compooter speakers. Being beaten with a rolling pin by a wife sick of the infernal beeping is probably not productive.

Copy the W1AW bulletins at 18 for a challenge. Cuss out the SUV ahead of you in Morse.
As your broker tells you, Diversify.

The path is not a straight line but some quiet day you will arrive and know it; few finer feelings in the world than accomplishment.

Thanks for the info, Dave. One thing is for sure, the government can't be everywhere and everything. I've seen amateur towers (repeaters) 'loaned' for police/emergency services until the the real thing could be repaired/rebuilt. I can well imagine trying to cover sparsely inhabited areas with a ton of cellphone towers - won't work, not enough subscribers to pay for it. Amateurs are still needed. Thanks.

Well, back in the old days was American Morse. Folks listened to
the 'sounder' and could copy what was being sent. There WERE dahs, but
there also was spacing between dits and dahs. Di dit dit could
be IE in international morse - however, with a bit less spacing between
the second and third dits, it could well be american morse for 'C'. I
remember whilst on Guam I found out the gummies (the electronic spys)
always copied every message out of the ham shack on our communications
station (KG6AAY). I had been drinking a couple of beers with another
ham buddy when he told me that. I immediately changed from 20 meter
SSB down to the bottom end of 40. And started. didit dit
dididahdit. didit dit dididahdit. The other fellow asked what
I was doing... I replied that I was calling CQ. I had memorized the
differing characters on a whim and was now about to try it. I did
latch on to an old timer and we had a good half hour (or more) QSO.
The realization hit the other chap in the station and he started
laughing. We were laughing so hard the tears were running down our
faces. Those gummies were probably playing the tape for a good day or
so decoding it! We had a ball. They DID take the beer cooler out of
the ham shack right after that incident, however!

73s from Rochester, NY
Jim AA2QA

ps - had to have him qrs to about 16 WPM since I was using a
mental 'look-up' table for the differing characters. A far cry from
the perfect 40 WPM for a number of minutes I copied in a test in the
Navy!

And the tides ranges (from high to low) in those estuaries are how great?
Most of the tides a,long the California coast lie are measured in
inches, very much like Florida of Hawaii.

That's how I paid for my school cloths when I was a kid.

The liberals had been in power long enough to make it illegal for my kids
to pick berries at school age, or they would have, too.

> >What's reasonable pay?

Where?

Certainly not around here.

> > Well, anything seems pretty reasonable
> > when the alternative is $0. These

> that legal requirement.
>

Actually, they are. The federal minimum wage laws only apply to jobs
relating to government contracts and "interstate commerce". Most states,
however , have minimum wage laws, some of which cover farm workers and
some of which do not. BTW, Oregon's minimum wage is about a dollar an
hour HIGHER than your holy (but cheap, symbolic?) federal minimum wage.

> > I'll point out that these guys also send

>

Where do you get your information?

Would you like to visit the farms in Washington County, Oregon and
actually speak to some of the migrant farm workers and see how they
actually live? I could arrange that for you.

> >So the best alternative is no job at all?
>
> You've switched the subject, Pagan. We were talking about American

Don't buy any form of League membership if you care about the integrity
of your license or ham radio. The ARRL will screw you when your head is
turned. Buy a membership only if you believe that the natural progression
of amateur radio should be to become more like CB, for this is what the
ARRL board of directors believe.
The ARRL isn't working to improve anything. They say they're working to
protect your service but then they propose limp-wristed policy changes and
watch the service rot from within.
If you want to save ham radio, then cancel your League membership as
soon as possible if you have one. Don't be a part of the Leagues plan to
furthur dumb-down ham radio and don't support their slight-of-hand policy
changes which welcome ignorant operators and CB style operating practices.

1929. Mysterious Signals - Can You Hear It?

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-24 22:03:35 UTC
From: Roger Williams <nospam@nospam.net>
Message-ID: <3A6F5137.3DFF7E80@nospam.net>
Source record: 94658
Cross-posted to:

I was reading this in another news group and hear the signal described -

Some very mysterious transmissions seem to have started about 2 weeks ago. This mysterious interference consists of short, 1 second bursts of data packets described as "vibrating noise". While there are no reports yet from other areas of the country, it is very possible that it can turn up anywhere at any time. It is most prominent in the North Eastern area of the country, particularly around the NY, NJ, CT (Hudson Valley) region, and has been noticed by many radio enthusiasts residing in Orange County NY. The most notable frequencies are 40.55 and 169.765 during the day (10 am - 3 pm is prime time), but occur everywhere and anywhere between 30 and 400 MHz - 24 hours a day, seven days a week. The data burst noise appears to change frequency for no reason, landing on frequencies allocated to specific police, fire, and ambulance services for a few seconds, then continue on to other frequencies only to return again a little while later. It always sounds exactly the same every time. These mystery signals also seem to transcend through the AM, FM, and WFM modes. All the usual suspects such as paging, radio stations, cable TV and satellite, links, telephone and utility lines have been eliminated as the source. The interference is equally present in urban and rural areas alike. Nobody can peg the origin - the signal is everywhere... but nowhere.

Anybody know what it is?

Go ahead and give a listen to the frequencies listed above, you will definitely hear it within a few minutes of plugging in those two frequencies. I receive it loud and clear on my base scanner and it only has the little stock antenna attached!

look i hate that word. If you guys haven't met a gay amateur radio operator yet, your blinders are on. Don't be so quick to judge someone by their sexual preference ok guys? Ease up on the gay stuff. Its hurtful.

>>Can anybody tell me what are the benefits of becoming a Life Member of
>>the ARRL. Thanks

Please don't pay any attention to the rantings from Vince. He
apparently has a beef with ARRL. While the ARRL's policies may not be
agreeable to every ham, they are the only organization with any clout to
stand between the amateur community and the FCC and a Spectrum hungry
Congress that would love to sell off our frequencies to business users..
As for benefits to becoming a life member, kinda depends on your motives
and your age. If you're young, it's probably fiscally prudent. If you
wish to support the ARRL and its objectives, that would be good too.

Thanks for your response. I kind of like the specs on the Honda eu1000. It's 1000 watts of sinsusoidal power, and I believe it keeps the frequency neary 60. It's small, quiet, and not too
heavy. It seems right for general use where I might want to throw a computer on it. Local price
here is $750 but I found a place in WA that has if for $650. The more I think about this the less
worried I become. I think we can survive 3-6 hour blackouts without much trouble. My 17AH battery
and inverter will keep a 60 watt bulb going for 3 hours in case of emergency lighting. If it looks
like we start getting frequent and long outages, I'll consider alteratives. I'll keep my eye out for
bargains though. In fact, I'm going to look on our local swap shop web site and see what's what.

Could this noise be caused by the recent flare-ups in solar activity? We've had a few coronal mass ejections lately.

Solar activity can't do this, not with such regularity and predictability.

It's definitely there. Sharp signal, data transmission, and then it drops.
33.480 is another good freq. I wonder how far away it can be heard. Post
your town and county if you hear it and lets see just how big an area this
covers, anyone up for the challenge?
I am in Washingtonville - Orange Co.

Sounds fine. I haven't operated in that state, but I have heard one small bit of custom from there: If you need to interrupt to join a conversation, don't say "break" but choose a better word such as "comment." I have heard that when one uses "break" in that region, local custom dictates that the interruption is for an emergency or semi-emergency, not simply to join a conversation (as it indicates here in California and many other places).

8:30pm - 9:00pm EST : The Great Gildersleeve

9:00pm EST : RE-LIVE THE LEGENDS :
Listen Each Week In February For An OTR James Stewart Episode

WIN A SONICBOX!

Each Thursday night in February tune in at 9:00pm EST for Re-Live The Legends. We'll be holding a contest about the life and times of that months focus, James Stewart. At some point during the show, we'll be asking THE SONICBOX QUESTION of the week. This question will be about some aspect of James Stewart. Some sample questions we may ask :

What movie did Jimmy share with a tall and furry co-star named Harvey?
What was the name of Jimmy's 1950's Western Radio Show?
What famous brunette Co-Starred with Jimmy in the 1930's Classic Pot O'Gold?

If you know the answer to the question we ask that night AND are the first to e-mail us with the correct response, then YOU will win a FREE Sonicbox valued at over $100 dollars!

For system requirements for The Sonicbox, go to their website at http://www.sonicbox.com.

10:00pm EST : Suspense
10:30pm EST : The Whistler
11:00pm EST : Lights Out
11:30pm EST : The Shadow

Friday Night Westerns

4:00pm - 6:00pm EST :
Classic Sounds Hour

6:00pm - 7:00pm EST :
Consecutive CBS Radio Mystery Theater

7:00pm - 7:30pm EST : Six Shooter
7:30pm - 8:00pm EST : The Lone Ranger
8:00pm - 8:30pm EST : Wild Bill
8:30pm - 9:00pm EST : All Star Western Theater
9:00pm EST : GunSmoke
10:00pm EST : Suspense
10:30pm EST : The Whistler
11:00pm EST : Lights Out
11:30pm EST : The Shadow

Saturday Night Shadows

6:00pm - 7:00pm EST :
Consecutive CBS Radio Mystery Theater

7:00pm - 7:30pm EST : Quiet Please
7:30pm - 8:00pm EST : The Clock
8:00pm - 8:30pm EST : Hall of Fantasy
8:30pm - 9:00pm EST : The Black Museum
9:00pm EST : The Haunting Hour
9:30pm - 10:00pm EST : Inner Sanctum Mysteries
10:00pm EST : Suspense
10:30pm EST : The Whistler
11:00pm EST : Lights Out
11:30pm EST : The Shadow

Try looking into some 12V fluorescent lamps from an RV supply place.
You'll get more light for longer times than running an inverter to an
incandescent bulb.
Jim

In good condition, some wear on 'Yaesu lettering' on base of microphone. First $125.00 via PayPal gets it. Works perfect. I just got it in the mail today, but am trading my FT-767GX/CAT so have no need for it now.

Also for sale a set of 'hamstick' antennas made by Valor. I have the 15, 20, 40, and 80 meter sticks, complete with whip and Heavy Duty spring. First $90.00 via PayPal gets 'em.

73, as always~~~

Only if you're willing to come here to see how migrant farm workers in the farm belt actually live. I'll be glad to take you to the Aquarious Hotel over on 10th Ave N (in Myrtle Beach, SC) to show you the six rooms that about 65 migrant workers live in. If that is not enough to convince you, I'll show you The Beach Motel (highway 544) where 25 people occupy two rooms. In fact, if you stop by almost any of the cheap hotels in this area, I'm sure you'll find at least one room in that hotel filled with illegal immigrants who work on local farms.

1952. PC BASED RECEIVERS

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-25 05:29:10 UTC
From: Ron Boutwell <boutwellron@hotmail.com>
Message-ID: <94odj2$l0j$1@nnrp1.deja.com>
Source record: 94681

A lot of people have asked for comparisons between the WinRadio and the Icom PC based receivers. About a month ago I inherited a WinRadio 1000i (unblocked version) from my dad. I purchased the Icom external version (1000 model). There's no comparison. Contrary to what most people will tell you, the WinRadio does sheild out a ton (almost all) of the noise produced by the PC's Athlon processor and the 17" monitor. In fact, on most frequencies I found no noise at all. Same goes for the Icom - virtually no noise. However, the WinRadio compromised on sensitivity wheras the Icom apparently did not. The Icom is way more sensative.

Now, in defense of the WinRadio, if you are simply using it as a scanner for Police, Fire, Aviation, Military...etc... And you are not trying to pick up a US Army convoy in Saudi all the way from Bakersville, Ohio with a telescopic whip antenna, then the WinRadio is a very good machine. The sound quality is quite good with low distortion. It is internal so it has no outside presence to take up a lot of space on the desktop. It comes with very good software. I truly do enjoy owning it. But,....for the money, Icom's external version is still the best performer and it is very sensative for a wideband receiver. WinRadio does make an external model now. I have not used it however.

Now, if you want a truly neat, handy, and even sensative toy, indulge yourself by purchasing an Icom IC-R3 handheld wideband with the TFT color screen. Pick up a Diamond flexable whip antenna for it too. My wife gave me one for Christmas. I never go anywhere without it. It's even very sensative on the HF frequencies.

I own a WinRadio 1000i, and it's working more or less fine, but I get a lot of noise from the power supply of the computer (I don't know wether it's the fan). How can I get rid of all that noise? I'm thinking of taking out the card and installing it in a metal box away from the computer, using an empty PCI card to make the connections. Can anybody advice me about it?

Iï¿½m looking for Winradio software as well, like WR Digital Suite. Does anybody have this program?

Thanx from sunny Spain.

Don't use this fake e-mail address. Use this newsgroup instead.

Ron Boutwell ha escrito:

If what everyone's discussing relates to his site showing the Nazi eagle, the bust of the "Aryan superman" and love for Herbie Schicklgruber, sure it's offensive but why demand removal? Have you every seen the REAL hate pages all over the Internet? The kind that tend to perturb the FBI, the ADL, the Southern Poverty Law Center and others? If they're allowed to exist under our guaranteed freedoms, why not Lloyd's which is not nearly offensive?

Heck, if the man gets a thrill out of acting like a stormtrooper, that's his right. If he feels that being the Minister of BARF Communications is a giant leap for his version of mankind, then what's the problem? Let's face facts, we are in no position to tinker with anyone's rights and in this country we are guaranteed the right to hate. I have as much right in attacking the Christian Right as Lloyd or anyone else my Jewish faith and it behooves us all not to be so thin skinned. Sorry guys but despite the fact that I dislike N0VFP, I cannnot sit idly by and watch his rights be destroyed by a so called lynch mob because if it's his rights now being imperiled, they'll be all of ours tomorrow.

Never did I think that a Jew would jump to N0VFP's defence and for all I care he could write back and call me a dirty one but THAT'S HIS RIGHT and I defend it. That's what America's all about friends and foes-CENSORSHIP SUCKS and anyone who was responsible for getting Lloyd's site booted off has much to learn about the meaning of liberty.

I, too, would stand to defend Lloyd's right to express his beliefs, no matter how repugnant they are to me, because we live in AMERICA. However, Doc, just to clarify, it's my understanding (from Lloyd's post quoting the internet hosting service) that Lloyd's account was yanked because he was spamming newsgroups and email accounts, in order to advertise his website. Again, seems like a tiny infraction to me, and his hosting service could've handled it better. But, as I've mentioned, if Lloyd would make backups, his website would be down for all of 20 minutes after discovering the old site was yanked.

My 2 cents, and once again: Even if I hate what he says, he's got the right to say it.

73s,

Steve

Hi,

Is it customary to send return postage when sending a QSL card to
a foreign country and asking for QSL back? That doesn't seem to
be the case inside the US but i'm not sure about non-US QSL'ing.

1966. 80m noise and distortion

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-25 16:42:01 UTC
From: jason_hsu@my-deja.com
Message-ID: <94pl0mlak1@nnrp1.deja.com>
Source record: 94544
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.misc

(NOTE: This may be a dumb newbie question.)

The good news: You need not let your bad QTH (even a ground floor apartment with no trees or bushes close enough for complete stealth) stop you from operating on HF, even at 80m.

I just tried 80m at night recently. To my surprise, I could hear a few S9 stations. Despite the fact that I was using an 80m Hamstick with only short radials clamped to the magmount (8 straight 3-foot radials, 8 straight 5-foot radials, and a few tight zigzag 9-foot to 18-foot radials), a few stations could hear me, albeit just barely over the noise and distortion.

The bad news: noise and distortion.

80m has a noise level of S4 to S5. 10m and 20m are nothing like this. The noise floor is hard-pressed to break out of S1 on these higher frequency HF bands.

LSB signals were also very distorted on 80m. Even some of the S9 signals were difficult to copy.

The noise and distortion were heavy despite the fact that there weren't any major storm systems for hundreds of miles around here. I can only imagine what it must be like on 80m in the summer.

So how do you deal with the noise and distortion on 80m? My inefficient antenna system (though it can probably be improved considerably with more of the 18-foot and longer radials) seems to be the LEAST of the issues. A more efficient antenna would improve the S-meter readings, but it wouldn't address the issue of the noise floor or the distortion.

Is this where those special DSP and narrowband SSB filters come into play? If 80m is brimming over with noise and distortion in the winter, how can anyone work 80m in the summer (when there are more thunderstorms as well as other factors increasing the challenge)? Was I simply unlucky enough to operate on a night after an explosion of solar activity?

Steve,
Yes, it is customary to send return postage. But, personally
I prefer sending an 'IRC'(s). If 'they' only accept cash, I have
doubts about 'their' purpose/honesty. I don't need 'their' card
that bad. then there's always the 'Buro'...
'Doc

1968. Re: qsl return postage

Newsgroup: rec.radio.amateur.misc

Source record: 94546
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.dx

Generally yes Steve. See QSL Tips and advice at URL:
http://www.ac6v.com/qslmisc.htm

For countries with a fair number of Hams -- I use the ARRL Bureau Outgoing Bureau. For a DXer, it is worth the ARRL membership just for the Bureau Service - but one gets a lot more of course.
http://www.arrl.org/qsl/qslout.html

With QSLing "By The Burro", sooner or later you will get a card from France, Italy, Germany, England, Brazil, Argentina, Australia, etc. At first it is tempting to send a QSL card to say Japan -- but they are the best QSLers in the world -- a bureau card is almost a guaranteed return. Get in a DX contest and you will receive hundreds from the JA's.

At 2 to 3 dollars a country -- DXCC can be upwards of $300 (Honor Roll $1000) so I use the ARRL bureau when possible --- $6.00 per each pound of cards --approximately 150 cards weigh one pound.
http://www.arrl.org/qsl/qslout.html
Also check out the ARRL Incoming Bureau - URL:
http://www.arrl.org/qsl/qslin.html

For rare countries such as most african nations, lesser ham populated South America, Islands, etc. postage is definitely in order. Be careful of sending Green Stamps to some countries where US currency is prohibited. See URL:
http://www.ac6v.com/qslmisc.htm

For any DX or DXpeditions with overseas QSL managers, also include postage and an SAE. You can help the managers a lot by reading the QSL tips for methods -- mentioned above. For example, envelope sizes are an issue.

For a stateside manager, an SASE - but I always include a green stamp to help them with printing the cards, etc.

Domestic QSLing is usually with an SAE, but give the small states like RI, WY, etc --- postage - an SASE. There are only a 2,343 Hams in RI and 1,598 Hams in Wyoming and they are swamped with requests both from the USA and Overseas.
Good QSLing

It is customary, in all cases, to include return postage if you
need a return card.

Domestically the most common way is simply to include an SASE
(Self Addressed Stamped Envelope).

For foreign cards there are three common ways to "finance" the return
card:

1) Enclose one or two dollar bills ("Green Stamps").
2) Enclose an IRC (International Reply Coupon).
3) Enclose postage in the form of stamps from the DX country in
question.

Jim,

That WAS funny! I could imagine the "gummies" trying to decipher it. I "almost" had a chance to learn American Morse. I worked in the railroad industry for 23 years. Over those years, as a clerk-operator, I met some of the old timers who ran telegraph. The last telegraph station that I was told about was down around Spartanburg, SC and was operating in 1960 (Southern RR). Of course, there may have been others on other roads. I got to hear many tales from the old timers about copying train orders via telegraph. In the 80s, of course, the telegraph was long gone and replaced by phone lines. We copied train orders thru a head set and mike something like the old telephone operators used to wear. We "transmitted" via a pedal on the floor, but the format was the same as in the Morse days using many of the same "pro" signs. OS stood for On Station meaning a train has arrived with so many loads/empties and departed at a certain time with so many load/empties. We used Y orders, X signatures and other "leftovers" from the old days. "Empty" was often written as MTY and many times this was found on documents other than train orders. Even when I was an op, old habits died hard. Even the job of clerk-operator died a slow death, and around 1990 was replaced with computers in the engines where the dispatcher transmitted orders directly to the train crews. I was one of the last generation of railroaders to copy "flimsies" and rush breathlessly out to the landing to "hand up" orders. That could be the scariest part of the job. Once an order was copied, they were attached to a string and placed on a long stick that looked like a slingshot or a "Y". This was placed with the orders at the top of the "Y" and centered. There was a spring clamp at the base of the "V" formed above the handle, and the string was twisted and pulled down tightly in this clamp. You had to be careful to place this stick in its holder so that the clamp faced the same way the train was going. When the engineer held out his arm to catch the orders, the string and all would come out easily leaving the order stick behind. If it was backwards, it would jerk the pole and all out. At best, you lost your stick (not too pleasing to the agent), at worst, you might hurt the engineer's arm. Sometimes stations either didn't have a holder, or it was broken, so you had to stand right at trackside and physically hand up these orders. Now, if you have never stood right beside the ballast while a brace of diesels come thundering down upon you, it is an indescribable experience! A steam engine is even WORSE! The first time I did this as a new employee I experienced TERROR! If the engineer obeys the rules, he is to slow to 45 MPH per the indication the op has set on the signal tower (yellow meaning orders are to be picked up). I had one engineer who wouldn't slow down and often blew by at 60 per! The effects on a person standing right at trackside are like being in a hurricane.

I handed up this way a couple times having my cap blown off, and nearly being sucked under the engine. I complained to the division trainmaster who ignored my reports. I determined that I would NOT hand up like that again. One day, having orders for this train, I set my board to yellow, and went out to the track to hand up. Sure enough, #157 was bookin' along at 60. When he got close, I jerked the orders down and shook my head violently from side to side. A train could not pass a yellow train order signal without his orders, and with a mighty squeal of brakes, the air went down, and the engineer passed me with a stream of profanities, stopping a mile down the track. The porter had to drive the orders to the head end. Trainmaster called me into his office to demand why I stopped a first class train by failing to deliver his orders. I refeshed his memory about my complaints and produced copy of a note I wrote to the hogger and handed up on the previous trip. He was mad, but so was I, and I told him I was not about to get killed for any job, and that a train's failure to slow was a rules violation that would get the engineer AND the trainmaster in deep trouble with the company AND the Federal Railroad Aministration. He knew I was RIGHT. Ah.....157 never passed at high speed again!

American Morse and the railroads were deeply entwined and the legends and stories of the old ops are well known. While I only learned a few characters from the old heads, it was just nice to have KNOWN some of them. One of them, Mr. Buck Cash, knew BOTH kinds of Morse having been a radio op in WWII. All these guys are long retired, even passed on, and even the jobs they, and I, held, are now history.

Sorry if I wasn't clear, Dwight. Apologies all around. Let me try to be more specific.

In the context we've been discussing, I take the word "lecture" to mean an uninvited on-air confrontation in which Radio Cop tells Newbie "we don't do it that way". That sort of thing, we agree, doesn't work.

What I'm looking for is ideas of what does work, because without any standards, we'll have chaos.

So far I've got the following:

- Set a good example
- Politely ask Newbie to do it another way.

After thinking on this a bit, I came up with the following:

- Inclusion of good operating practices in classes and VE sessions.

- Club programs and on-air forums about "the right way to do it" and WHY it's "the right way". These must not be aimed at any individual, of course.

- Articles (ham mags, websites, club bulletins, etc.) about "the right way to do it". One of the biggest helps to me as a Novice was an article called "Your Novice Accent" which outlined typical Newbie faux pas of the time and "how to do it right". And why. Such articles are needed today more than ever.

- Recognition of good operating practices through awards and such.

- Peer pressure, in the form of group "good example". If everybody on the repeater says "name" instead of "first personal", Newbie may go with the crowd after a while.

- If an on-air behavior is bad enough (borderline violations, off-color but not really obscene/profane talk, etc.) an OFF-AIR friendly note, either in person or by mail/email. (Depends on situation).

There must be lots of other ideas out there. Anybody got some?

Wow- good reading, and a ton of info. Thanks, its just what i
was looking for. I'm currently not active in contesting, maybe
after i speed up my code a bit. So, I just have a couple of QSLs
to send to Canada. Are IRC's the best way to go? Or would
i be better off supplying canadian postage (if i can find it) ?

You will see it as inversions of sense (P becomes X) or sequence (F and L) as it crosses from one side of the brain to the writing side. A number of people hold jobs that require mirror-image operations to be performed and try to learn CW both ways at the same time; it is a cluster job to say the least. Not likely as you have made it beyond the 6-7 wpm top limit of this process. That is why I suggested letters that are mirrors of each other. The cure is to learn code at 16 because it forces these habits into the open. There was a body of thought that this always was the right way for the individual; the Army always had more bodies and solved the problem in a way convenient to the Army.

Could be. There is also something as old as the Earth called diatherming that occurs in the atmosphere. Have you ever heard that washing machine sound that moves into your CB channel (example given because most people at one time or another have listened to noise on chicken band in their lives), then ruins it for communications, and then drifts up or down to another channel for a while, later leaving the band? That's the atmosphere, expanding and contracting, and doing unusual things to RF that is passing through it. What you're hearing is likely that or some similar atmospheric phenomenon.

Or them damn aliens... :-)

Hope this helps.

How, pray tell, are you 'escelating'? Going to listen for a extra hour a
day? Get on and spew more drivel at those who are illegal?

Explain.

Hi again Steve -- one green stamp or one IRC should be sufficient for
Canada, you can also use the Burro for Canada.

International Postage Stamps from many nations, envelopes, etc are
available from K3FN -- see URL:
http://www.net1plus.com/users/ryoung/index.htm

There are lots of SSB contests and you don't have to "be" in the contest
to make contacts -- see LA9HW Contest Calendar at URL:
http://home.online.no/~janalme/hammain.html
Just give the proper report -- usually 59 then your state or zone or
whatever is required in the rules -- Rules at LA9HW as well. Contesters
will love to get the contact. Jump in.

By the way -- best to give your callsign when posting here - not
necessary but nice to know who you are. Don't see you in QRZ by name
either unless you are N9XBJ??

I am searching the web for anything to do with illegal radio operators ,
amps, modded rigs, illegal shops, to date I have over 300 emails to the FCC
and over 300 thank yous. If you are illegal, I'm on your asz.Funny how only
the illegal keyclowns and illegal hambos cry the loudest and resort to
profanity. Legal ops have nothing to fear.

The MIGHTY N8WWM
Making keyclowns cry is fun!

Thanks - Yeah, but it seems the "buro" is more for bulk QSL'ing, right?
I'm just talking about a couple here. SSB Contests? Hmm, to be honest,
i have only worked SSB once, and that was in 1994 during field day,
right after i got my license. All of my HF work has been CW since then
(and that's not saying much, since i took a 5 year break from ham radio).
Its probally more accurate to say that i've been working exclusively CW
since my "return" to ham radio this year (2001). And yes, N9XBJ, I am...
upgraded from TechPlus to General just a week ago. I've worked 10
states and 2 countries (on 40m) since 1/1/01 (my return to ham radio)
and i'm loving every minute of it. The regulars in r.r.a.* have been
extremely helpful, and you're no exception. tnx again!

I'll make it easy for you to get two more "thank you's" from the FCC.

I have three amps. Turn me in! (Hey, maybe you'll get three "thank
you's", one for each amp.)

I have modified every radio I ever owned. Ham radio is all about
experimentation and trying to modify things to be "better". Turn
me in!

Ahh- there's something i didn't catch the first time i read this.
You're saying even for domestic QSL'ing include SASE? I've
received a couple of QSL's already (domestic) which did
not include SASE and i assumed that american hams generally
don't mind forking out the 33 cents on a QSL. (qsl managers
being exempt from that assumption). So if you received a QSL
card w/o SASE, would you ignore the 'pse qsl' ?

What's lost in all this is the apples and oranges nature of "censorship" and "first amendment rights," etc.

There is a big difference in the government protecting your "right to free speech" by so stating in the First Amendment of the Bill of Rights, and John Q. Private-enterprise exercising their subjective judgement on what they will or will not permit to be associated with in the context of their business.

I remember this same silly argument on packet a few years ago. Some of the messages would get deleted at various points in the packet network and some first amendment hotheads (that don't understand the Constitution) cried "Censorship!"

Well, duh! Of course it's censorship. Just exactly the sort of censorship that each of us who makes their private property (packet station) available for "public" use (packet network) is not only entitled to use, but obligated to (see Part 97).

The government (by fiat of the Constitution) guarantees a citizen the right to express their opinion or views on almost any matter (see "fire in a crowded theater" for exceptions), but that right is limited to the forums over which the government has control. In other words, the steps of the county courthouse, a poster on public property, and so on.

The right does not extend to the private sector. A newspaper that fails to publish your letter to the editor is not infringing upon your first amendment rights. A packet station who deletes your message because they feel it is inappropriate or even illegal is not infringing upon your first amendment rights. And an internet service provider who elects not to sell you space to post your opinions is not infringing upon your first amendment rights.

Those are decisions that each entity is entitled (and possibly obligated) to make, and doing so, although technically censorship, is not Censorship in the context of the First Amendment.

Learn the difference, gentlemen. It will save you a lot of heartache.

Ahh. Gotcha. Just for fun, i downloaded NuMorse and had it generate
a qso and send it at 13-spacing/10-wpm..... i got solid copy from that.
I would have tried faster but it seems the demo version tops-out at 10. Its
been so long since i took my code test that i forgot what 5 wpm sounds
like. I listened to W1AW today at 5 wpm and was suprised. I didn't think
i could copy 5 wpm in my head, but apparently i can. How odd. :) When
i first started out, I met a guy who told me he could copy 30-50 wpm in
his head... and i was amazed. If i can get up to the 20 wpm on paper
plateau,
i'd be happy!

Hi Steve,

I guess the key word is "need". It's true that a high percentage of
domestic cards come without an SASE, and most folks answer them with
no problem.

But it you "need" a card (for WAS, or County Hunting, or some other
reason) then your return percentage will be much better if you
include an SASE.

I answer all QSL requests, but I don't get huge amounts. Folks
in South Dakota or Delaware probably gets a lot more requests,
and 34-cents-apeice can add up quickly for an active operator.

Take a look at my webpages, nutmeg face, there is hardly but a few links
that goto in your liberal terms "right-wing talk shows" Other than that,
its a shortwave radio webpage, featuring some Radio Shack and Realistic
radios.

Yeah, we know all about that. It's ok for you liberals to have federal
funds fund artwork like a Cross in urine and stand against the 10
Commandments on the Corthouse. Ask Alabama Chief Justice Roy Moore on
that one, buddy.

True. But when one pulls someone's webpage or a poster off of someone's
buiding, they should at least be warned before it happens. But
nonetheless, there is always another webserver and another posterboard.
Ironically, I reposted my website back on the same server! Just used
another username!

Steve -- thanks for your callsign and past experience -- it will help me and others in formulating answers, for example now that we know you are a CW type -- won't recommend SSB -- hi hi. Congrads on the upgrade, great timing -- the sunspot cycle is up.

The ARRL Burro will send out as few cards as you send including VE's-- quote "A package of ten (10) cards or fewer sent in a single shipment costs only $1.00. But requires ARRL Membership - highly recommended.
With the new New postal rates for USA DXers: International Reply Coupons (IRC) increase from $1.05 to $1.75 starting January 7, 2001. A one-ounce letter sent air mail to any world destination (except Canada and Mexico) will cost 80 cents. A two-ounce air mail letter will cost from $1.55 to $1.70, depending on the destination. So 10X $1.75 + 10X $1,55 = --- well you get the picture as compared to $1.00 + postage to CT.

In a single contest weekend, you can easily work 40 to 50 new DX countries. My best has been 98 DX countries in one contest (can't break that 100 barrier - hi hi, many do however). Toward the end of the contest - in the last 12 hours or so -- you can hear the Caribbean and South American stations calling CQ with few or NO takers (they have worked em all!) and at that point many start to send slower CW. CW speed is not a big deal. Usually one can copy their call sign at any speed -- so you'll know when they come back to you. Just return your report with TU and thats it. By the end of the contest your CW speed will improve considerably -- jump in you'll like it. Set your computer for sending your callsign at 13 WPM and increase it until you can't discern the dits and dahs and the whole series takes on a musical ring. You'll soon copy your call at very high speeds - your ready for a contest.

An idea I've always used Steve -- for domestic -- is during a QSO ask
"exchange QSL's or QSL with SASE, SAE????
Then you know if the other operator needs postage assistance. Wyoming has
always asked me for an SASE in my 7-Band WAS quest.

Many DX stations will reply "QSL Via the Bureau". That way the can respond in
bulk with minimum mailing hassle. Some will state QSL via CBA -- Call Book
Address (since there are 680,000 hams in the US -- we flood the world's
countries with QSL requests -- so I always include return postage in any DX QSL
direct or via the CBA unless they state otherwise.

> solar activity?

Actually, 80 meters can be quiet enough for QRP signals. I have made QSOs on 80 meters with power as low as 10 milliwatts, so the station on the other end had a real quiet band.

You are correct; a better antenna will let you hear more signal, and more noise. Filters can help, sometimes, but going from 2700 Hz to 1700 Hz, about the narrowest you can manage on SSB, will gain you only about 2 dB. IF the noise is broadband and "white," the denoising function of some DSP filters may help some, but for the most part, denoisers make a somewhat noisy signal sound nicer, but don't really help with the ones that are buried in noise.

You didn't say what the noise sounds like. If it is pure "white" noise -- just a hiss, and pretty steady, it is probably coming from a switching power supply. If it has a noticeable "buzz" to is, 120 Hz in the US, it is electrical in nature, and could be power lines, a nearby fluourescent light, etc., to name just two examples. If it occurs in crashes, it is probably lightning.

Your solution depends on the source. If is coming from a device in your own home, entirely a possibilty, then finding that device is the surest way to go. Operate your receiver from a 12-volt battery if you can and turn off circuit breakers and find out if it goes away. If it is coming from a neighbor's house, you can do the same if you have a cooperative neighbor. (The rules are pretty clear; such a device may be legal -- until it causes harmful interference). If moving your antenna outside gets the antenna farther away from the source, that may help.

Many noise problems stem from power-line problems. Under the rules, power companies are expected to fix problems. Some do; some don't. ARRL has had some successes with power companies that receive our letters; others ignore us. Some of those that have ignored us have received letters from the FCC, under a cooperative agreement between ARRL the FCC. More ARRL contact is coming, especially when I can clear a backlog of cases. (ARRL has a help-wanted ad for an RFI engineer on its web page). Start by reading the info at http:/www.arrl.org/tis/info/rfi-elect.html and then contacting your power company.

If the source is pretty much a "point source," a noise-cancelling filter, such as those made by MFJ and JPS may help. These devices can get up to 50 dB of noise attenuation, but are tricky to adjust and need to retuned every 10-20 kHz or so. See:

http://www.arrl.org/members-only/prodrev/pdf/pr9602.pdf
and
http://www.arrl.org/members-only/prodrev/pdf/pr9804.pdf
for the Product Reviews.

Many folks might percieve noisy signals as "distortion." I know the Lab's distortion meter doesn't know the difference. :-)

Try Scott Malcom---he does a great job fixing old Icoms....he fixed my 211 in a very timely manner and at very reasonable rates. Here's his web page:

http://www.angelfire.com/biz2/mts/

There may be enough info at the site to point you in the right direction....if not I'd highly recommend letting him fix it for you.

Good luck!

Can't hear it in San Jose California.

My 1st wild ass guess: A foreign military satellite drifts out of position to a spot over the US East Coast.... Satellite thinks it is at home and tries to communicate with ground stations....

I don't believe even the black parts of the US government would use frequencies allocated to local police & fire services. That makes the transmission foreign. Spies want their burst transmissions hidden. So, I figure it is not spies, because of the obvious patterns and heavy use that you are monitoring. The only other thing I can think of is Foreign Naval Vessels in the Atlantic. However, I would not expect the highband or UHF transmissions to go very far inland, and direction finders or beam antennas would have localized it to the East by now. So, I exclude Foreign Navies. All that leaves is satellites.

Idea 2: Actual transmission is on legitimate government or military frequencies, but your radio seems to pick it up on public service frequencies due to receiver flaws.

[snip]

And just how are you making the determination about what is or is not illegal? If you start "turning in" legitimate radio repair shops because of something you read (and likely misinterpreted) on a web site, those businesses would be well within their rights to sue your "asz" off.

If you start flooding the FCC with hundreds of emails about allegedly "illegal" activities, you're only going to succeed in getting yourself written off as a kook. The "thank you" replies you're getting are generated by an autoresponder in the FCC's email system... it doesn't mean that they take you seriously. For that matter, you could send the FCC a recipe for beef stew, and get the very same "Thank you for your input, we'll give it our immediate attention" reply.

Unfortunately, it is likely to be a group of White racists, or a
major drug dealer group. In whicgh case, as far as PR goes, "The semi
solid excretory material _will_ impact the oscillating, rotary air
movement device," for the rest of us. The "public" will demand all
kinds of "restraints," and it will be d--n hard to stop.

I've got a very wild idea if all the guys hearing it are in the same general area. Cable TV systems use sweeping equipment that cover this entire spectrum. Normally its a rapidly triggered sweep, rapid enough to not interfere with the video being delivered.
My understanding of some of the modern equipment, is that the tech in the field can zoom in on certain frequencies by remote-controlling the sweep transmitter for different rates, etc. This could explain increased activity at certain frequencies if they are trying to troubleshoot something at that particular point in the passband.
But, on the logical side, if you don't have any other evidence of cable leakage at the normal cable TV carrier frequencies, there's no reason why the sweep should be leaking out of the system.
With the use of fiber optic linking, some cable companies are covering upwards of 100 miles radius from a single headend.
Check to see if you hear any of the video carriers, and if so, that might be the answer.

The person identifying as ETAGG is no one less than Edward Taggart, N2WKW. He is a Technician class ham operator. Below is his address as stated by the FCC database. However, his current address is not at that location and therefore he has not notified the FCC of his address change. Under Syracuse, NY the phone listing shows that Mr. Taggart lives in the 315 area around Syracuse.

EDWARD B. TAGGART
175 PARKWAY DR
SYRACUSE, NY 13207

2019. TVI 6 Meters

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-26 03:04:24 UTC

In brief, I have a multi element TV antenna with a amplifier connecting to 4 televisions. The house lot is laid out in such a way that it's very hard to string antennas up with out having them in close proximity to the TV antenna. Cable is not an option. Satellite is possible but would like to keep regular TV antenna.

At Christmas I found a Six Meter rig under the tree.(MFJ 9406 SSB/CW 10 Watts) which my wife gave me. I put up a dipole to try it out and to my surprise it works quite well. With a antenna tuner I have a 1.3:1 SWR.

My wife hasn't stopped yelling at me sense. Every time I key the mike or try out CW the TV's go blank. I have tried a HI PASS filter but that doesn't do much good at all.
My HF rigs cause no problems at all. I do have a good RF ground

WHAT AM I DOING WRONG??? HELP!!!

Any comments and suggestions would be gratefully appreciated.

Thanks

I see nothing wrong with the classes, but, since so few hams study for the exam through classes, will this have any effect? As for the VE sessions, you'll have to be a little more specific (are you talking about the exams, and including more questions on that exam, or something else).

> - Club programs and on-air forums about "the
> right way to do it" and WHY it's "the right way".
> These must not be aimed at any individual, of
> course.

I'd watch out about the on-air forums. It is almost certain that someone will use an actual person as an example sooner or later, and that will surely start a fight. Plus, you also risk strong disagreements over what exactly is "the right way."

> - Articles (ham mags, websites, club bulletins,
> etc.) about "the right way to do it". One of the
> biggest helps to me as a Novice was an article
> called "Your Novice Accent" which outlined typical
> Newbie faux pas of the time and "how to do it right".
> And why. Such articles are needed today more than
> ever.

The two largest ham magizines (QST and CQ), combined, reach only about 25% of the total licensed hams (less when you consider that many read both magazines, therefore the readership is actually lower than the total combined number of magazines sold).

Therefore, even an article in these magazines will have a limited number of readers (compared to the total ham population). However, I certainly agree that even that relatively limited number is substantial enough to make such articles worthwhile.

The problem I see is convincing these magazines to allocate limited magazine space to more articles of this type. Lets face it, articles like this don't sell many magazines or many memberships in an organazation.

And, with that, Jim, I'll hold back and let a few others get a word in (we seem to be the only two talking at the moment). Take care.

Forget Monica. Did you see Bill's eyes light up, and the grin on his face, when he saw those cheerleaders during his farewell ceremony? Heck, I thought he was going to get up and start chasing them right there.

Look, I'm all for enjoying the view of a nice looking woman (and, even more, the pleasure of a nice woman), but that man really needs to learn that there is a place and a time for all this (the oval office is not that place and a farewell ceremony is not the time).

From: antikeyclown <noillegalop@my-deja.com>
Message-ID: <94qufe$s0e$1@nnrp1.deja.com>
Source record: 94506

This is not true. N8WWM the poster is NOT N8WWM the person.
To prove this, I propose a test. At QRZ.com there is a page for every
member that you can put personal information on. The REAL N8WWM will
change the page by putting a new first sentence in. Go there now to see
the original page. I challenge the fake n8wwm@my-deja.com or
N8WWM@yahoo.com to do that. Of course it will be impossible. If you
email n8wwm@arrl.net,within 24 hours of 2200Zulu on 1-25-01, the REAL
N8WWM will send you the exact wording of what that first sentence will
be. AFTER 2200Z on 1-26-01 the this address right here will post
the sentence change in the profile on QRZ.
The ONLY valid address for N8WWM that has his callsign in it is
N8WWM@arrl.net. The FAKE N8WWM can't change that.

Well, unfortunately, this thing has escalated where a lot of folks are throwing profanities around (perhaps even using your call - plus a lot of responders doing the same) - what a way to attract kids to radio! I did see your offer of 'proof'. Yes, only you can change the info at qrz.com - but suppose (for sake of argument) you ARE the same individual making a lot of the posts (I'm sure you are not)? So, up goes the challenge. Sure enough, the data did not change on qrz.com. Why should you prove that one of the 'imposters' is, indeed, you? Of course, then you change the data, per your e-mails. That proves only that the individual offering the proof is, indeed, you. This does NOT prove that the rest of the 'imposters' are, indeed, imposters. Or is there a flaw in my logic?

This only proves that the REAL N8WWM can change the data. It does NOT prove the 'imposters' are NOT N8WWM. Why should you change the data on qrz.com to prove the 'imposter' is really N8WWM? I am not trying to say that it has been you all the time, I am pointing out a flaw (I believe) in your logic. I am truely sorry to see this whole mess degenerate to the point it has reached.

I see your point, Jim...However, the imposters are not me. If you would like to be the arbitrator of this issue, fine. I offered the challenge as proof. If you are interested you may email me thru ARRL.net.

2031. Challenge to fake poster from the REAL N8WWM

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-26 04:47:49 UTC
From: "The REAL N8WWM", "not the trashy fake." <noillegalop@my-deja.com>
Message-ID: <94qvhkssb1@nnrp1.deja.com>
Source record: 94511

A valid point if that issue was a concern of mine. However, all I am
concerned with is establishing that I am the real N8WWM. I dont
actually care that much if someone wants to be that dumb on here, I
just want people to know it is not me.
I think an even better thing to do would be to send out the text of the
change from THIS address.
N8WWM

Source record: 94512

I get a similar sound on my car stereo if I have my cell phone with me. The phone sends out a digitally coded message, a packet-type data burst to the cell service company, essentially saying "I'm still here. I'm turned on and ready for a call." It will do this (most of us have heard it) every few minutes without a seemingly regular pattern. It will come over the stereo regardless of frequency tuned to or mode...even when the stereo is off and the phone is in the center console. I don't however, hear it through any ham band gear I have aboard (2m, 6m, 10m and 70cm). Do you have a cell phone near your RXer? Just a thought.

2036. Re: Braided Grounding Strap

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-26 05:28:00 UTC
From: njradiodude@aol.com
Message-ID: <20010126002800.21580.00001325@ng-fy1.aol.com>
Source record: 94514

Putting aside the debate of braid over strap, if braid for a mobile grounding project and behind the stuff in your shack, I've used with very good success the braid from heavy coax. There always seems to be scrap coax of every length in the shack or garage somewhere. Yank the braid out, flatten in a bit without stretching it (since this narows the braid), tin the ends and solder on a lug or whatever terminator you want. It works well (provided there's no interaction with weather or severe moisture), it's cheap, and saves a trip out to the store. I've grounded every radio component I have in the shack and my truck, and have also used this method to ground vehicular body panels (hood, front fenders...inner and outer, etc).

Anybody using broadband antenna amplifiers are just asking for
trouble. If it has a frequency response something like 47 .. 860 MHz,
then there is no wonder that it is going to saturate :-).

Are you absolutely sure you need amplification for VHF channels ?
Wouldn't it be sufficient to put a UHF only amplifier directly after
the UHF antenna and just use a passive summing network to connect the
VHF antenna into the downlead ?

If this is not possible, but Band I is not needed (channels 2 .. 6 in
the USA), put a high pass filter around 150 MHz immediately in front
of the preamplifier.

If Band I channels are required, put a 50 MHz notch filter immediately
in front of the amplifier and make sure the amplifier has a good
metallic cabinet so that your transmitted signal does not go directly
into the amplifier.

Just to put my twocents in regarding Canadian postage:
I have ordered Canadian postage stamps by calling the Canadian
National Philatelic Center in Antigonish, NS and ordering stamps in the
amount for 1st class letter rate to the U.S. This used to be 55 cents
Canadian, but that may have changed recently. I used Visa and the
currency conversion was done for me. They haven't charged me postage
and don't charge foreigners tax.
National Philatelic Center
1-800-565-4362 M-F 7A-7P EST
I usually enclose a SASE for U.S. & Canadian QSLs.

You can make a good inexpensive notch filter by placing a 1/4 wave (on your 6M operating frequency) long piece of coax, shorted on the far end, across the input to the amplifier.

There is an open repeater in my area that uses a PL code for access. I can set the ctcss on my htx-400 to work with the repeater, but then I am forced to listen to all of the traffic on the repeater. I would like to selectively listen to only one radio, but my ctcss is already being used just to be able to access the repeater. Is there any way to use 2 ctcss codes at the same time? If so, I don't see a way of doing it with my radio. Are there radios out there capable of this? Do I have any option but to put up with the other traffic? Thanks in advance.

What good will that do ? I thought a 1/4 wave translated a short to an open.

In order to use two PL tones you will require a extremely selective
filter system. Not too practical actually.

You can utilize your touch-tone pad to allow access. You will need to
have a decoder at your receiver that is set to respond to your buddies
transmitted tones. The PL will be used only for repeater access.

So when he wants to call, he will have to punch in the touch-tone
sequence that will activate your audio to the speaker.

I won't argue the fact that the farmers shouldn't be excluded from the
minimum wage, but there are many Americans who would rather earn nothing
than work in a field all day long, even if it paid the minimum.

> > I'll point out that these guys also send

This is no myth.

> Of those who do, it is often only because they are living in

Sub-standard for you and I, but that doesn't negate the fact that they do
send money home. Hispanics have a very strong sense of family.

> >So the best alternative is no job at all?
>
>
> You've switched the subject, Pagan. We were talking about American

I thought the issue was illegal immigrants taking jobs from Americans.

> The issue is employers hiring illegal immigrants
> because they are unwilling to pay a reasonable wage for this work.

Again, what's reasonable? Minimum wage? Well, as you've said, even that
won't work for most Americans. What's the going rate for unskilled labor?
It's not very high, and it never will be.

> And, contrary to the myths, it has nothing to so with employers not

The employers should be held accountable, that's true.

> install simple security devices (or hire security). But, why should the
> employer be concerned, he is already living the American dream (and he
> doesn't have to work in those dangerious conditions).

I agree with everything except the part about an American will have been
denied that dream. If 10 jobless Americans walk past that "Help Wanted"
sign a day without stopping by and applying for it, they aren't being denied
anything. They are refusing the American Dream. They may have valid
reasons (low pay, takes too long to succeed, too dangerous, too much work),
but nevertheless, they actively choose to stay where they are.

But, when these same people complain that immigrants, legal or not, are
taking "their" jobs, it's just sour grapes. I've seen how bitter these
people get when they see a Hispanic guy driving a nice car, living in a nice
house, own's their own business, whatever, and if you ask them why they
haven't made it, you'll hear all kinds of excuses, my favorates being "The
Man" or "The System" keeping them down.

I've worked in just about every kind of job you can find in the city (where
unemployment is usually the highest), and not once have I been turned down
in favor of an immigrant willing to work for less money. Whether the
economy's been "bad" or "good", there's been jobs. When I left the army
with absolutely no decent job skills, I still found work.

If I open the LA Times Classified section, I'll find pages and pages of want
ads, and this is in Southern California, where we have a HUGE number of
illegal immigrants. Few of these ads are for minimum wage jobs. Yet, we
still have people on welfare, complaining about the lack of jobs.

> > What these immigrants have going for them is

> break America's immigration laws, and a willingness to live in
> substandard living conditions (better than they might have at home)
> while working for substandard wages (more than they might get at home).

I can't say I blame them. Personally, I think they'd be better off trying to fix their own country, creating their own jobs, and fixing their own government. But as lofty as those ideals are, they don't put food on the table.

But that willingness to break immigration laws isn't something they "have" over Americans. It's actually a handicap, since they know we'll be coming for them sooner or later. If they break the law, or even are suspected of breaking the law, and they find themselves in jail, they know they'll be deported, guilty or not. Although they can apply for and get social security cards and drivers license, there is some risk involved, and more cities are cracking down on this type of fraud. They know that at any time an INS bus will show up, with them being rounded up and sent back home. They know that if their employer goes belly up or flat out refuses to pay them, they have little recourse.

Americans don't have to worry about any of this.

As for substandard living conditions, that's purely subjective. I grew up in a smelly, crappy apartment. Now I live in a nice condo. In a few months, I'll be living in a nicer house. But what if you compare my condo to, say, some millionare's mansion in Beverly Hills? He would surely consider my condo substandard, just as I considered my old apartment.

Then again, there's the US Army, where you live 50 to a room at times, and in a sleeping bag on the lumpy dirt in 30 degree weather in the field. That, to me, is truly substandard, and I chose that route on purpose. Like these immigrants, I saw it as an investment in my future. After checking out your web site (pretty cool) I see you did too.

By the way, that's one job you won't worry about an illegal immigrant taking from you. So why don't all of these able bodied jobless folks sign up? All these branches, except the Air Force, are having trouble recruiting, and they ask for no skills, yet we still have unemployed Americans.

Steve,

Sorry we couldn't hook up last night on 40. The band was way long,
with European signals stronger than any US signals.

N5SU heard you calling me, but I couldn't even hear a whisper from
you. If you run into N5SU again, ask him about the 500 KW Continental
xmtr we had on Guam. He's usually active around 7040 in early evening.

OPEN on the far end!

Best use a piece of 'large' coax. I've used 3/4" cable TV hardline.
It's notch is wide enough that you should cut it low in freq. to keep
from killing any TV2 signal. Cut it for 49 - maybe 48 mcs --- you
can always cut long coax shorter, but you can't cut short coax longer.

The ARRL says they're trying to protect spectrum, true, but their own dumbed-down licensing & limp-wristed policy proposals will make it more and more difficult for them to do so, because how can they successfully defend amateur spectrum when its users are increasingly becoming as dumb as a post and as useless as CB'ers? Soon, there won't be anything good left to defend. What words can the ARRL use to convince the FCC or Congress that the spectrum is best left to poor operators with bad operating habits? The scenario is akin to a FLY defending a Dung-Heap (ARRL being the fly), they're trying to defend a service that progressively gets stinkier with every new policy they propose. If the ARRL wants to defend amateur radio, let them propose improving licensing standards. The high merits, integrity, and abilities of spectrum users is what will protect the spectrum best and will provide a pool of quality radio operators for service to the country when needed. Real Value!
I'd still be a league member today, maybe even a life member, but the ARRL screwed up when it went against it's long held principles and the founding purposes amateur radio was built on.

Make that 1/2 wave and you might see a notch :-) on that frequency
(and remembering to compensate for the velocity factor) if you are
using shorted stubs.

A 1/4 wave _open_ stub could also be used, but it is harder to tune.

Every little bit helps. The popularity of classes varies widely -
around here they are quite popular.

> As for the VE
> sessions, you'll have to be a little more specific (are you talking
> about the exams, and including more questions on that exam, or
something else).

More exam questions aimed at this issue are a good idea, but they must
be limited to the actual regulations. A series of "courteous operator"
handouts for new hams/upgraders is another possibility.
>

The first rule in the forums should be "don't pick on an individual".
The second should be "no fighting on the air".

> Plus, you also risk strong
> disagreements over what exactly is "the right way."

Disagreement isn't a bad thing unless it devolves into fighting. The
whole point of the forums is not to "lecture" but to let everybody have
their say, present their reasons, etc.

To use the "handle" example:

I just say "My name is Jim" on voice and "NAME JIM" on CW. "Name" is the shortest (one syllable/four letters) and everybody knows what it means. "Handle" is two syllables/six letters and a bit of jargon many people don't know. "First personal" is four syllables/thirteen letters, is extremely jargonish, and sounds odd and affected to most people.

The whole point of voice operation is that it's easy and quick. Why burden it with unneeded complexities?

They reach a much higher percentage of ACTIVE hams, though. Also, I know several folks who don't keep their ham mags - they bring the old issues to club meetings and hamfests and sell/give 'em away. Often they are passed around many hams.

I've collected almost all of the QSTs from 1923 to the present (the magazines themselves, not the CDs). I can't begin to tell you how much I've learned from reading them. And I sometimes wonder how many different people have read an old issue before I got it.

> Therefore, even an article in these magazines will have a limited
> number of readers (compared to the total ham population). However, I
> certainly agree that even that relatively limited number is substantial

Agreed. Much better than doing nothing.

> The problem I see is convincing these magazines to allocate limited
> magazine space to more articles of this type. Lets face it, articles
> like this don't sell many magazines or many memberships in an organazation.

I don't think they'd have a problem finding space for short, well written articles that address the problem. A while back QST ran a fiction series about two hams (Willy and Mike?) who discussed and demonstrated various modes and operating methods. The fictional story vehicle was used to avoid a dry lecture on "the right way".

Here's one more possibility: Put the articles on a website and point hams to it. A real weakness of magazine publishing is that you don't want to bore the steady readers with the same thing over and over, yet the new or occasional readers didn't see the article you did three issues back.
>
> And, with that, Jim, I'll hold back and let a few others get a word in

Mostly the early amateurs that "amateur radio was built on" were a
bunch of unruly rascals who roamed the spectrum at will, interfering
with commercial and military stations alike, and had to be rounded up
and corralled at "200 meters and below". Far worse than today's CB
crowd by a long shot!

>codes at the same time? If so, I don't see a way of doing it with my
>radio. Are there radios out there capable of this? Do I have any option
>but to put up with the other traffic? Thanks in advance.

Nathan, do I understand that there is one other amateur on that repeater
whom you only want to hear, and you don't wish to hear anyone else?
That one other person would himself have to be transmitting two PL
tones -- one to access the rptr and a second one, different from the
first, to open your tone squelch. But you've got your tone squelch set
to the rptr's tone freq. Is that the scenario? If so, both you and him
would need outboard tone encoders/decoders. Such units are on the market,
or you could build your own for the price of an IC and a couple other
other components.

Be advised that some rptrs are purposely set up to filter out any and
all tones, though -- his second tone, which is supposed to open your
tone squelch, might be blocked.

GL, Jeff KH6O

This is my signature "line" for today:

Got this from my gun club newsletter...

Election stats compiled by law professor Joseph Olson.

Counties won by Bush: 2,434
Counties won by Gore: 677
Population of counties won by Bush: 143 million
Population of counties won by Gore: 127 million
Sq. miles of county won by Bush: 2,427,000
Sq. miles of county won by Gore: 580,000
States won by Bush: 29
States won by Gore: 19
Av. murder per 100,000 residents in Bush counties: 0.1
Av. murder per 100,000 residents in Gore counties: 13.2
Gun ownership in Bush counties is much higher then
in Gore counties.

Of course you know what it means because your CB syntax is perfect. And
it doesn't appear to violate a single FCC regulation while getting the
meaning across perfectly. It's the kind of stuff I do on the air just
to aggravate the Radio Policeï¿½.

That's certainly easier to defend than the 'no users' scenario.

I really hate to tell you this,
buit given the fcc complaints, a conviction may not
be neccessary considering the seriousness of the charges.

since there appears to be ample evidence, you may be considered
guilty by virtue of the evidence already in hand.

However, that is still up to a court to decide, assuming you don't
screw up again and get your ticket pulled.

Seem's like the ARRL can't win, doesn't it. When folks were screaming to have the code requirement reduced or removed, the League was seen as a bunch of old fogies who wanted nothing better than to keep out anyone unable to copy code. Now that the licensing structure appears to have favored the no-code crowd, the opposition thinks the League is at fault.

If you want to change the League, join and vote. If you are not a member, quit complaining. The only reason I'm not a life member is the cost. I should have become a life member as soon as I was licensed in 1977. It would have paid for itself several times now.

Join the League or not. But the issue of licensing and code requirements are not decisions they make. The ARRL is the most vocal representation we, as amateurs and others, have with respect to hobby radio. If not for the League, only commercial interests would be heard by the FCC.

My opinion. I apologize to the newsgroup for wasting space where I would rather read posts swapping gear.

In its comments to the FCC wrt restructuring, the ARRL you espouse so strongly asked the FCC to increase the technical content of the written exams to offset any changes in Morse-code testing.

> The high merits, integrity, and abilities of spectrum users is
> what will protect the spectrum best and will provide a pool of quality
> radio operators for service to the country when needed. Real Value!

The ARRL has been steadily improving its Tech Info pages on the Web, has changed QST to offer material to help the newcomer learn the ropes, has started an Educational and Certification program, all intended to help hams be better hams and better fulfill the goals of the Service.

Hmmm...ignoring an off-topic post isn't the point. The point is whether the rules already set for each group is going to be followed. If everyone posted binaries to non-binary groups -- what's the point in having binary groups??

Faqs and rules MUST be followed on Usenet and if one doesn't like it, one should start one's own group.

Actually, this isn't a scanner newsgroup -- it's a shortwave newsgroup. Kindly edit your cross-posting.

I agree with you for the need for teaching ham "etiquette" in some sort of VE handout, or even just a verbal introduction by a team member prior to the testing. Starting with something like, "Welcome to the w4XXX VE test session. Before we get started, I'd just like to talk a little about what to expect as you meet new friends and pursue the exciting hobby of ham radio..etc." Then the team member could proceed to discuss the sort of "plain dress" conversation, the "Name is....." , and other information that may be useful to the new ham. Just a short intro-duction addressed to the entire group in a friendly welcoming sort of way that, I'm sure, the new folks would use and accept in the spirit it is given and, indeed, may welcome such information.

I don't hear much 10-20, or "whatcher 20", or "I'm just arriving at my home 20", but it does happen on occasion on the repeaters. Most of the guys ignore it, and eventually the new person gets the idea since the responses do not use the same CB terminology. At the risk of getting jumped on, I don't welcome CB lingo and "cutesy" phrases but I don't make an issue of it either. If I don't like what I hear, I can just QSY, right? But the source of my dislike for such lingo is really a product of the communications medium thru which I was trained--military. And that, of course, has its own protocol and trains its operators to neither engage in nor tolerate foolishness. And that *may* be a fault of my own that I tend to, while I love to have friendly, light QSOs, be less tolerant of on-air goofiness or stupid sounding phrases that could be shortened to a simple "yes".

On the military side, I instruct classes in Civil Air Patrol communica-tions which uses strictly USAF procedures, prowords, and protocol. The 10-code is strictly prohibited. And, of course, there is no need for introductions because the emphasis is on the traffic being passed and not on the operator. With new ops, especially, I have trouble getting them to stop trying to be "friendly". What I mean by that is, the tend-ency to use what I call "softeners"--extended phrases leading up to a proword such as "out" like "So this'll be XXXXXX out". While it is true that courtesey is expected and appreciated in the military environment, comms are sometimes abrupt unlike ham radio which has no rules against "jargon" other than profanity and certain unaccepted practices that rely on historic convention. Usually people will conform to what they hear if given time.

Postage from Canada to the U.S. is now 60 cents (Cdn) -- coincidentally, and possibly for the first time, the same nominal face value as postage from the U.S. to Canada, recently increased from 48 cents (U.S., of course). Your suggested strategy is exactly the same as mine, in reverse. I buy US stamps from the USPS philatelic service for use on SASEs. The USPS charges $6 S&H per foreign order, so it pays to order in quantity, but not so many that you don't use them up before the next rate increase! :(

Depending on the QSLing habits of the Canadian ham you are sending a card to, he might actually prefer a loose 60 cent U.S. stamp that he can use on an SASE to another U.S. ham or QSL manager. At today's exchange rates, it's worth about 50% more than the Canadian return postage. If you do that, you should explain what you are doing so he doesn't think you expect him to use the U.S. stamp on your return envelope; it's for his own return envelope to someone else. And whatever you do, don't stick a U.S. stamp of any denomination on your own SAE; that will be useless to him.

This sounds like a bunch of crap. Even if the files were corrupted there
are multiple copies of files backed up onto tape or CD-ROM. I know the
outgoing democrats were a mean spirited bunch of losers, but this is going
down as another ham lengend.

Regards,

Duffy - WB8NUT

2080. Re: Mysterious Signals - Can You Hear It?

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-26 23:51:55 UTC
From: Steve <mcsp@usa.net>
Message-ID: <3A720D9B.CD1C2ECE@usa.net>
Source record: 94458

No cell near the RXer, everyone in the area hears it loud and clear regardless of location, scanner brand, time of day, etc. A very diverse group of scannists hear it. There is a clear signal (pins my meter), then a transmission, and then drops. Very strange.

NJRadioDude wrote:

Why ?
I would have thought that cutting coax stubs is as easy / hard for
1/2 wave as it is for a 1/4 wave !!

Martin

2082. Re: Hams that the FCC caught..

"Eric Oyen" <n7zzt@home.com> babbled in message
news:3A71D6FB.9396749F@home.com...
> I really hate to tell you this,

Ah, there's Ewic sticking his nose in where it doesn't belong, as usual.

> buit given the fcc complaints,

"But," you fucking pissflap. What "complaints," you illiterate dung-
beetle? The FCC received some
manufactured evidence, and all I got was a warning in November, 1999.
Then about 8 months later, I got a letter to retest (July, 2000).
I have no idea to this day why I was asked to retest, no reason was
given. I PASSED my retest,
so I guess all from before was wiped clean.
That's usually what Riley does in such cases. I haven't heard a peep
out of Riley since that retest letter. So, sit and spin something else,
shit-for-brains.

> a conviction may not be neccessary considering the seriousness of
the charges.

Bullshit. You have your head so far up your ass you can chew your food
twice, Ewwwic.
What fucking charges, you drunken sot?
The first letter, may indicate an impermissible activity ocurred,
but by its nature is neither proof of the activity, nor guarantee of the
validity of the evidence, if any.The second letter addresses of-air
activities and tells two
people, not just one not to take their off-air argument onto amateur
radio bands.
The third letter was the retest..with no explanation, what is that
proof of, DUMBASS?
There is no evidence of any charges.

> since there appears to be ample evidence, you may be considered
> guilty by virtue of the evidence already in hand.

BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!! What "evidence," you
fucking moron??? What part of there is no evidence don't you
understand? How in the
HELL did you pass your test if you can't read and comprehend any better
than that?
There is evidence that YOU fuck sheep, and I judge you guilty, based on
the evidence at the Arizona State Police headquarters.

> However, that is still up to a court to decide,

BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!
I haven't received any notice to go to court, doodlefuck! Why don't you pull your head out of your ass, jailhouse laawyer? That *has* to be the only place you've "learned" law.

>assuming you don't
> screw up again and get your ticket pulled.

You mean like YOU almost did, Ewwic??? I heard you're one of the biggest JAMMERS in the
state of Arizona.

Sticking a needle through the shield and the centre conductor is a
reversible operation, cutting the coax is not a reversible operation.

> Lets find out what your ISP thinks of this [snip]

Do you really believe that the average ISP gives a darn what is said in these newsgroups? My ISP, like most ISP's, has a stated policy against censorship of any kind. In fact, I'm sure most ISP's are so fed up with silly complaints, from self-styled newsgroup censors, they simply trash such nonsense without even reading it.

But, even if they don't trash the complaint, what good do you think you're doing? If an ISP boots a person off because of complaints, it would only take a matter of minutes for the person to have another account with another ISP. For example, there are almost two dozen ISP's in my area, not counting the national ISP's. So, in the end, your efforts don't even rise to the level of a minor nuisance.

And, in the process, your complaint leaves youself wide open for a libel lawsuit. If challenged, are you prepared to prove in a court of law that the person you complain about is actually a racist (or whatever)? The courts have always given wide latitude to words under the 1st Amendment, so mere words, taken from a newsgroup, are not likely to prove your case. Of course, in reality, lawsuits like this would be very rare (as I said, this isn't even a minor nuisance), but there is nothing to stop such a lawsuit if the person wants to make an example out of you (and a name for himself).

However, you're free to do what you want. I, on the other hand, would be very cautious about sending a complaint such as this.

You haven't been around the military lately, have you? Citizenship is not required today to serve in the military. As long as you're registered with the IRS (have a taxpayer ID number), you can sign up. English is not even a requirement (other than to repeat the oath - even if you don't understand it).

But, anyway, we basically agree on most of this. The problem is that we keep getting the groups of people mixed up. In reality, we're talking about three groups of people...

1. The illegal immigrants.

2. The relatively poor Americans that are too poorly educated to work at the higher paying jobs. Those with past financial troubles, living on the underground economy, also fit into this catagory.

3. The lazy bum that simply refuses to work, preferring government handouts instead.

My concern is the first two groups (nobody cares about the third group). And these two groups often seek the very same jobs (and military service is out for those in the second group who are living underground).

Anyway, like I said, we basically agree. So, lets end this before we wear out our welcome. Take care, Pagan.

> --------------------------

I am tired of having "facts" and "numbers" thrown at me by everyone who is trying to prove
a point by twisting figures! Now I would like you to prove to me and the world that your
claims are indeed true. Even through I have spent many a hour taking care of my kids,
all 8 of them, cooked my share of meals washed my share of dishes instead of attending the opera
or theater. I think I made a good decision to get my children and the future of our species off to
a good start, and one I would do again! Now Mr. Ward and George I assure you that you will never
touch me in knowledge, learning or life's experiences,! And I assure you no matter how smart or
refined you may fancy yourself, Most if not All of the lesser educated and refined heterosexual's here
know at least that their rectum is not the place to be sticking everyone's fists in! I also assure that
most of the heterosexual population do not have to wear diapers due to anal seepage from
nonfunctioning rectums from fist's, gerbils, hamsters, shot glasses, and light bulbs that the
educated and refined homosexual population seem to love to stick up each other's ass.

Now Mr. I went to school longer please educate all us dummies to the epidemic rates of
Syphilis, Intestinal parasites, and liver disease that is running wild in the homosexual communities,
Mucus Membranes either in the rectum, vagina or elsewhere were not made to be ruptured, That is
an open invite to every parasite known to man.

Oh, By the way should you, your George and a dozen of your friends manage to live for the next
hundred year's You will never read half of what I have read or know a quarter as much so stick that
"figure" right up your diapered ass and burp it to all your friends!

Most of my traveling has been courtesy of the military in some of the most god-forsaken places
you could imagine under conditions you will never know so "gentleman" like you and George boy
could attend theater, opera, and concerts, without the worry of "Those nasty guys" who marched
into town and lined up all your friends in front of firing squad's and deprived them of their
civil rights and heads as would happen in Many countries to this day, Why don't you attend a
play in Cuba or China and see just how must they would care about your right's?
Many of your age group were stacked like sardines and lived in tents

surrounded by miles
of sand, fleas, scorpions and snakes, So PLEASE excuse them if they
haven't reached YOUR
level of sophistication and elegance!

I admittedly have spent the last 15 or so years in the middle of
Pennsylvania coal country
which may not be a mecca of culture but why don't you march your ass down
one of these
coal mines and see just who works harder, O.K. you may get a very fast and
rude
awakening over just what "working harder" is!

Now tell us ordinary folk all about NAMBLA what they are, What they
represent and
just how they manage to hold a seat in the U.N. (something that should be
packed
up and be given a one way ride out of here)

Yes there are Homosexual groups that have brought Hollywierd, media and
contribute heavily to what is referred to as "liberal" causes which are
nothing
more that socialism and serfdom and it is hard for John Q to get any
substance out of his propaganda box but share with everyone what is
going on in the back rooms, everything from the CDC sandbagging epidemic
levels of
disease, The average life span of a homosexual is about 42 year's. And the
facade
of caring that is portrayed all over the leftist media, I don't justify
the death of the
homosexual in Wyoming but I don't condone the media cover-ups of the young

children butchered by homosexuals in search of sexual gratification every
year.
Having worked as a instructor in a state prison I have seen different
aspects of
homosexual lifestyle the media seems to forget about for example going
into a housing
unit and seeing 2 ot 3 showers going with only 1 shower having feet
visible
and finding homosexual's doing everything from swallowing each others
semen
to fisting each other and the number of light bulbs that medical had to
screw out of
various asses would be funny if not for the fact that it is so sad, Not to
mentioned
the number of ruptured Penises from "rolling over while aroused"

In the final phase I do not have T.V.. due to the fact that every time it
is turned on
every middle-aged white male is portrayed as an idiot who is totally
incapable of

doing anything right due to being either an idiot, wimp, or pansyassed fruit.

There are many things in society I don't agree with but something I tell you is true
If you and George want to hold hands until hell freezes over that is fine with me,
I wish you true happiness just keep your hands off my children, my family myself and my toys also my guns including the loaded .45 I keep in my desk draw.
Keep your "education" out of the school's and learn to give the space to everyone
who may not " appreciate " your view of the way the world be.

I am studying to upgrade to Extra and cannot figure out how the answer is determined in questions E5H01 @A5J01 through E5H10 @A5J10 .
I want to know how to do this rather than just memorizing the question and answer. I have included one of the questions of this type below for reference. The picture they are referring to has a voltage source and two resistors in series with a load resistor in parallel with the second resistor (V1 is 8 volts, R1 is 16 kilohms, and R2 is 8 kilohms) and the other picture they want you to computer VR2 and R3 for is a voltage source and a resistor in series with the load resistor. Thanks.

E5H02 @A5J02 (C)
In Figure A5-1, what values of V2 and R3 result in the same voltage and current as when V1 is 8 volts, R1 is 16 kilohms, and R2 is 8 kilohms?
A. R3 = 24 kilohms and V2 = 5.33 volts
B. R3 = 5.33 kilohms and V2 = 8 volts
C. R3 = 5.33 kilohms and V2 = 2.67 volts
D. R3 = 24 kilohms and V2 = 8 volts

Hi

Cutting a stub to the correct length is like playing Russian roulette.
The alternative is to cut the stub shorter than the calculated length
either quarter or half wave and use a small trimmer capacitor. Use one on
the input to the Amp and one on the out put as well. My experience
suggest that most on the damage occurs in the TV set mixer.
you can locate a stub if necessary at the TV set as well. I have had a
good results with co ax and trimmer it is very easy tune. After a while
you can simply guess the length of coax and tune the trimmer.
Regards Alan
VK3ry

That whole class of problems are called "Thevenin equivalents". All you need to know to solve 'em is Ohm's Law (R = V/I) and the voltage divider rule (when you have two resistors in series with a voltage across them, the voltage across either resistor is the percentage of the total resistance). In math terms. if V is applied across R1 and R2 in series, and we call V1 the voltage across R1 and V2 the voltage across R2, then:

V = V1 + V2
V1 = V *[R1/(R1 + R2)]
V2 = V *[R2/(R1 + R2)]

Here's one technique for the whole set of problems:

We need to know two things: The equivalent "open circuit" voltage, and the equivalent resistance.

To find the equivalent "open circuit" voltage, use the voltage divider rule:

V2 = V *[R2/(R1 + R2)]

Plugging in the numbers:
V2 = 8 * [8000/(16000 + 8000)]
V2 = 8 * [8000/24000]

V2 = 8 * 1/3
V2 = 2.67 volts = Eoc (First part of the answer)

Now we need the internal resistance. This is found by imagining that R2 is short circuited in the original circuit, and figuring out how much current would flow. Then we use that "short circuit" current and the "open circuit" voltage to find the equivalent resistance.

Isc = V/R1
Req = Eoc/Isc

Plugging in the numbers:

Isc = 8/16000
Isc = .0005 A

Req = 2.67/.0005
Req = 5330 = 5.33 kilohms (second part of answer)

There you go. After a while, you can do them by inspection. ;-)

Oh, get real. I simply responded to your post with regard to what server you are using. Your headers say that you are indeed using windows (the Forte Agent listed is a windows app), and that you are 8 hours behind Zulu time (translates to PST). You need to get better control of your headers before thinking that you are "anonymous."

You seemed to think that you were well hidden and you're not. Do something illegal and Altopia will cough up your identity and originating ISP in a flash. They've done it before and will doubtless do it again.

In the meantime, posting as "anonymous" is wishful thinking.

In part, it's the increase in web sites. Server Farms have enormous
power needs, per ft.^2. IIRC, last year was "mild" by CA standards,
with this year "normal." The same for the MidWest and NW. Ca can only
buy "excess" power. IOW, power someone else can afford to sell. We had
power shortages in Indiana last Summer, a couple of times, so I look
for worse this year. Especially since Ca has been a net importer of
power, for some time.

If the "electricity" available is the most costly to supply,
(Peaking units) someone has to pay for it. Wa,Or, Nv, etc. are going
to use the "cheap" power for their own customers. It's like running
out of money, and having to borrow some. If you really need it, and
your friends can't "spare" it, you pay whatever interest it takes, to
get a loan. BTW, major users are notified as soon as the problem
develops. Consumers (individuals, small businesses) are the _last_ to
be told.

Nothing, get rid of the amplifier. The amplifier is broadbanded and your simply overloading it. When you drive it to saturation, it cuts off the signal to the TV, ergo blanking the screen.

I live 60 miles from the nearest TV station and had the same sort of problem. I went with a channel Master amplifier and mounted it in a shielded box. At the input to the amp I installed a T connector and from the T have an open 1/4 wave stub adjusted for 52 MHz. I still get a wiggle or two on some freqs, but no blanking or severe interference.

Perhaps what you are talking about is a local problem, rather than
national.

BTW, what is your state's minimum wage? Oregon's is $6.50 per hour.

Mark

Hello Pat,

The radio is decent. I have owned mine for about 6 years and
the only thing that has gone bad is the 2 meter power module.
I had to replace it costing about $70 not including labor (mine).
Kenwood really should have used White Heat transfer
compound instead of that heat conductive gasket.

Oh, also the LCD went intermittent. I had to open up the display
and reseat the flexible conductive gasket. Worked fine from that
point on.

The CTCSS transmit is provided. Decode will require
a TSU-7 module. Also there is a DTMF module DTU-2 to allow
keypad direct entry and DTMF use.

Also the DFK7 or 11 remote front panel extender cable is a nice
addition if you are able to locate one.

Why should there be a flamewar? Morse as a testing criterion is going to die, the only question is when. Your problem is whether to learn it at a level that is more of an inconvenience than a test or bleat about it for the next 3 to 10 years.

CROSSDRESSING FELON "DX405" <lightnin9@hotmail.com> wiped his mouth after fellating his momma's dick jizzburped:

> At least one thing about Lloyd and pizzas, it proves that he has a job.

Being a 28-year-old pizza delivery boy isn't going to get him on "Lifestyles of the Rich and Famous, " GOOBER. Of course, since your appearance on "Ripley's Believe it or Not" soem people want to stop by and look at the malformed chipmunk boy, don't they? Your bag-boy job at the local Foodland isn't that high-paying career you need, Enclephalitic INBRED.

>Something that you haven't been able to achieve loser.

BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!
Wanna bet??????? Put your money where your herpes-infected mouth is. I have a printout from Social Security that proves I've worked since 1970-71. You can barely hold a job, from YOUR printout. Goddamn, you changed jobs 10 times just last year!
BAHAHAHAHAHAHAHAHAHAHAHA..You still selling drugs to kids in your neighborhopod, junkie?

> Still cashing in Mommy's SS Check for new radio gear,

Nope, paid for it *myself* in CASH!!!!! Doesn't that just make you jealous, minimum-wage bag-boy? Living there in your roach-infested, tar-papered hovel over what used to be a landfill must get on your nerves, no? And ol' KC8JBO can go out and purchase NEW radio equipment, while YOU have to either STEAL yours or buy that CHEAP-ASS shit. Well, You're just a CHEAP-ASS BITCH anyways.

How *does* DicklessX405 suck off those little boys in the greyhound bus station bathrooms?
> Wide Goober Mouth.

Yeah, I knew you were a bucktoothed CHOAD. Get that Rogaine,yet?

> So when are you going to get a job, you lazy slob.

I *HAVE* a job, shiltling. AND I'm going back to school, too!!!! Too bad you still get sponge baths from YOUR whore momma.

> Oh, and leeching of your mommy doesn't count

I don't HAVE to leech, moron. Your mommy, on the other hand, still dresses you the best she can from the Salvation Army. I suppose when

you get her age, the johns don't flock to her like they used to.

Now, What about how you steal radio equipment from silent key XYL's...I
have several newspaper articles telling the story of how you STOLE
radio equipment.......and should I mention that shoplifiting incident
when you ripped-off Radio Shack?

Thank you Jim. Although I saw the voltage divder in the problem I did
not know the voltage divder rule. When I used your procedure, I was
able to calculate the values without a problem. Much better knowing
how to figure out the answer instead of having to memorize 10 answers.
Thanks again, as I realize it took some time for you to write out the
explanation.

If you're using a tuner on HF, that doesn't have an inboard SWR meter, but you have an outboard SWR meter, where do you place it for the best SWR reading - between the rig and the tuner, or between the tuner and the antenna? Thanks.

> and the antenna? Thanks.

The tuner is a matching network between the transmitter and the antenna. The complex impedance of the antenna can't conveniently be changed, so the SWR meter between the tuner and the antenna doesn't provide useful information. You are interested in matching that complex impedance to the relatively fixed impedance of the transmitter. So insert the SWR meter between the transmitter and the tuner, and adjust the tuner until the SWR (between the transmitter and the tuner) is as close to 1:1 as possible, which indicates that you have matched the complex antenna impedance as nearly as you can to the fixed transmitter output impedance.

ANOTHER OF MWS IDIOTIC DEBATES WHERE HE SHOWS HIS TRUE IGNORANCE LIKE THE ALLEGED BIG SHOT HE CLAIMS TO BE. This one involves Michael bad mouthing a fellow debater. Shows his true colors once you read the whole thing.

> clearly in the context of racism.
>

1. You are beginning to insult me and i ain't liking too much...but i will answer your insults...
2. what is this new england bubble you refer to? You think i am sheltered because i attend a new hampshire school? This is quite ignorant...I have not only lived in new hampshire...i have lived in cities and i have lived in foreign countries...pleas don't make these sorts of comments, they are ignorant.
3. i am not being obtuse...i simply forced you to clarify a point...what you are truly equating is a clear out and out racist display, ie everyone agrees its wrong and deciding not to flow, which you think is wrong. There is a clear line here and you still have not explained the

similarity, unless of course you are saying that your views are the clear dilineation of morality...in which case, allow me to be the first to bow to your excellence...i truly hope that you are not saying this!

> > 4. Wouldn't the person who is being slurred against be able to say

> answer your question, I certainly hope I would intervene. There are
> relatives of mine that I cannot talk to due to their advocacy of
> racism.
>

1. you are again beginning to insult me...your lack of common ground that you refer to is that of your racist relatives...bear, get to know me before you call me a racist! This really pisses me off!
2. I did not say that the oppressed should redefine oppression, i merely said that they can tell whoever is doing it to cut the shit!
3. Again refer to my answer above, i am merely forcing you to admit that you are equating a clear form of racism, which is wrong and we all agree it is, to something that yoy think is wrong.
4. Just in case you are wondering i would also intervene!

> about.
>

I think you made this response without reading my full response I answer this on the bottom, but i will repeat it here for added clarity...you are

not forcing the debaters to slow down, you are forcing the debaters to be clear...what is the difference between this and yelling "clearer!" in the middle of the speech...you are still forcing the debater to change there current style, or would you not yell "clearer!"? If you don't, you are inviting the sloppiest debate in the world to take place and you be forced to evaluate a debate which was incomprehensible. If you do, then you too are enforcing a regulation on the debaters!

> > 2. I will agree that reserving this approach for just novice and jv is

> Well, I think these were the debates that korcok wasn't flowing....
>

I will let korcok answer this if he wants, but from my understanding, he has not limited it to just the novice and jv divisions (and i don't think he does it every time) Here I will claim ignorance and not speak about something that i don't know the truth of! I invite others who know the correct answer to respond...

> on the round?

I will say this quite clearly, I loved the no-flow judges as compared to the write down every word that comes out of my mouth judges...there is such a thing as getting lost in your flow...Again, you can go fast with a no-flow judge and clarity really is the issue...Again, My question about the poll was in response to you saying that most people agree that it sucks...which you do not know! There has never been such a poll, and it is ignorant to say what it is that most people prefer!

>

Read my entire post before you claim that i do not once answer you. I tell you quite clearly that a) it is irrelevant if i outline why some judges do it, the point here is that just because you can't think of it doesn't mean that it doesn't exist. b) i provide you with forcing debaters to increase their clarity, and forcing issue selection in rebuttals, these are two damn good reasons. c) there are plenty of others and if you take the time to ask around, you might just find out, don't just assume there are none!

>

1. I agree a debater can still be persuasive if the judge keeps a flow, but not keeping a flow, makes the debater issue selct and persuade even more.
2. You don't deny that not flowing forces persuasion, you just say there are other ways of getting there from here. Thanks for agreeing with me that there are other reasons other than egotism and laziness!!!
3. What are these many other ways of persuasion teaching techniques that have pretty high effectiveness?

Again, more proof that you answer as you and not answer after you read!
Read below, where I point out that increased clarity does not mean
reduced speed! You will see no cop-out from me, you will see what i
originally stated! Also, you trying to break this down to one or the
other, which it clearly is not!

> > > Mr. Honiball, I'm really just trying to understand. Should we embrace

Again an answer, before reading my next point, it is almost as if I knew
what your objection would be and I already answered it. Read below, it

is clear exactly what i say and it will answer every objection that you have listed above

> > 1. I don't see a difference here between going at a good clip and having a

> >
> Well, jonathan, at this point you seem to be agreeing with me that
> korcok is wrong. There is no direct causal link between speed and
> intelligence - at some point, speed becomes counterproductive and
> anti-educational.

1. How the hell am I agreeing with you?!?! There is a link between increased speed and intelligence, you DO NOT NEED TO SLOW DOWN TO INCREASE YOUR CLARITY!!!! Increased clarity means that you are forced not to go faster than you presently can...It can get faster, you go home you practice, you get faster and you increase your clarity, you go out the next tournament and you go faster, while still maintaining clarity!
2. I will grant out that at some point, speed becomes counterproductive and indeed anti-educational, now step back and reread this...It means that increasing speed increases intelligence and that when you go too fast, you are becoming incomprehensible and therefore are not increasing education.
3. The above not only means that Korcok is correct that fast debate increases education, it also means that not flowing is right because it forces debaters not to go faster than they actually are!

> > 3 If a judge doesn't flow, why can't a debater go at a good clip? This
> > is still a mystery to me.

> If the judge is not flowing and the debater is moving at a good clip,
> the judge is going to lose track of many arguments. It's inevitable
> and anyone that says they can remember every argument in a speed
> debate is lying. At least to themselves.

1. Just because you can't do it, don't assume that others cannot, this is ignorant!
2. Refer to my above points about increased clarity and issue selection, you seem not to care about these, or at least you ignore tham because I may be correct, or even worse, you agree with them...either way, a judge, who is trying hard (ie not lazy) and not egotistical can still follow the debate and make the proper decision.

>
> > 4. I think you have some sort of misunderstanding....going fast doesn't

> There is not any empirical data to support this thesis that is
> specific to debate.
>

A more important question is there any empirical data to this point?
Whether it is specific to debate is irrelevant...if talking fast makes
you smarter, then hooray, it applies to debate, end of story! If you
want I will research this as soon as I am done with my exams, I am pretty
sure such research exists, or perhaps if someone could backchannel me if
they know of where such material would be...

> doesn't necessarily make you smarter.

Yeah and neither does going to school necessarily make you smarter, there
is a surprising lack of 100% causalities in our universe, don't use this
as an answer!

> Most of our IQs are set by six.
> Before we even start to read. I personally prefer fast debate, as
> Korcok also claims to. I just can't see why anyone who prefers fast,
> clean debate would think that not flowing is the way to improve fast
> debate and increase the learning curve for the students. I am left
> troubled by the motives that I am left with. You certainly have not
> provided any justifications for not flowing.

1. Where is it set in stone that our IQ does not change from age six?
2. You weren't reading by age six? Most people I know were reading by age
four or at the latest five, so watch how you use the word "we"
3. Fast debate is good, but is it always clean is the question...not
flowing seems to be the answer to making a debate clearer!
4. I have provided several reasons not to flow, try reading them.

> Some folks are now paying double or more.

Deregulation is the problem, but for the exact opposite reason you suggest here. The power companies love deregulation because they are free to raise rates, and cut costs, to increase profits. The downside is that they also have to absorb the increased costs for materials which cuts into their profits (at least until they get around to passing the extra costs on to consumers).

And that is exactly what has been going on in california. The power companies raised rates immediately and have been slowly selling off older power equipment that is no longer profitable to maintain. The problem is that this older equipment was maintained under regulation exactly because it gave the extra power needed during peak demand periods.

Of course, all of this came to a head during this last year. Customers are raising hell about rate increases, so companies are cautious about raising the rates even more. At the same time, material costs have risen, but companies are wary about passing that on to consumers through still more rate increases (which

means they must absorb the costs).

And now, during the peak demand periods, the companies are having to absorb even more costs. To keep those losses down, they are simply not bringing extra equipment online to meet the increased demand (not that they have that much extra equipment to bring online in the first place). Instead, they have resorted to rolling blackouts and threats of still more power outages.

Of course, blackouts are actually beneficial to the power companies - nothing underscores the "need" for higher rates than a good old blackout. And, since there is little, or no, competition for the companies, there is little risk (its not like the customer can go elsewhere). In other words, after a few weeks of rolling blackouts, those complaining about increased rates will be silenced, the companies can raise rates to whatever they want, and the problem will suddenly be over.

Treating the consumer like this is certainly not a new game. Anyone around in the early 70's will remember the long lines at gas stations, rationing, sharply increased fuel prices, and the endless claims that there was no more than a five to ten years worth of fuel left in the entire world. Of course, here we are thirty years later - fuel is still available and those prices are still high. If you think about it, this california "power shortage" sure sounds a heck of a lot like that fake "fuel shortage" of the early 70's.

> I think Governer Davis has a part in this, too.
> He acts like he's trying to solve the problem.
> There's a couple things he could do, though he
> hasn't. He could call up the National Guard,
> who has generators that could power a whole
> city, or more.

What generators are those? While he national guard does have large generators, they don't have anything that would meets the needs of a whole city - a few blocks with reduced demand by the residents maybe, but not a whole city.

> He could try to get an emergency bill passed
> that would end this deregulation nonsense and
> put the power companies back as public entities.

In the end, that is probably exactly what should be done. However, there are some legal issues involved, and the cost of cleaning up this mess (buying new

equipment, etc) will have to be passed on to taxpayers
(which is exactly what is causing Governer Davis to
give pause to this idea).

> Yes, I think deregulation of public utilities
> is nonsense. First, even without our present
> problems, eventually they'd find a way to screw
> us, just like the phone companies, banks, and
> airlines after deregulation. [snip]

Now you're talking. Deregulation is one area where I
sharply disagree with fellow Republicans. It is a big
mistake - its gives way too much power to these large
companies (which are even more of a threat then big
government), and it never results in better services or
better rates. And, in the end, the consumer gets
screwed every time.

As for telephone service, we're paying more now for
calls to the next town then we paid for calls all the
way across the country just before deregulation. And,
after my last trips overseas (flying there and back), I
will never travel by air again (absolute misery -
cramped seating, bad food, not enough to drink, not
enough bathrooms, large terminals, rushing to catch
next flight after arriving late, rude employees, and so forth).

And, we haven't gained a thing from deregulation. We
got rid of Ma Bell, only to replace that with a bunch
of Baby Bells. Short of moving, I have no more choice
now than when the old telephone company dominated the
entire nation. In fact, my whole town has been divided
up like this. I have no choice when it comes to
everything from cable tv to telephone service.

I'd damn sure like to know who is conspiring to
divide up my town like this, and what the hell the
government (city, state, federal) is doing about it?
This has to be the largest conspiracy in the history of
this country, and government acts totally unaware of it.

You've just turned the thread back to where it started.

The problem seems to be that people feel they have sent money off
to get a service, rather than to fund experimentation. When they don't
get what they've paid for, they feel they are owed something.

AO-40 has immense value, just by being in orbit. If it doesn't
function to the full extent of it's design, it still has tremendous
value. As I said when I changed the subject of this thread about
a month ago, the only way to guarantee no failure is to not
start in the first place.

I saw Buzz Aldrin in an interview on TV last year, and he said
something about how society doesnt' want to take risks. He knew
it was risky to try going to the moon, but it was a risk he was willing
to take. When you stop taking risks, you stagnate. Once something
becomes commonplace, there is tremendous inertia to overcome in order
to change things, because everyone has invested in the old. Isn't that
what happened when spark transmitters were dropped, and when SSB
came into ham radio, and packet is mostly 1200 Baud because it
became a "utility" rather than an experiment?

So let's not go to expensive and innovative satellites, because
AMSAT risks "wasting" a lot of money, and stick to bands where
people have equipment and money tied up, because those consumers
see the satellites as a service rather than an ongoing attempt to
push what can be done by amateurs.

I earlier mentioned that in December it will be forty years since
the first ham satellite was launched; from this vantage point
we've basically been in sapce since the beginning. But December 2001 will

also mark the 80th anniversary of the Transatlantic Tests, where hams showed that thoes "useless" frequencies below 200Meters could be used for distant communication. And coincidentally it marks the 100th anniverary of when Marconi sent a wireless telegraph message across the Atlantic, which lead to hobbyists playing around with this new radio stuff, and ham radio was born.

If people weren't taking risks, all of these high tech gadgest that people want reliable service from would not exist.

City_Slicker wrote:
>
> Stew your cross posting to the CB NG is going to
> cause your ham groups much grief. Are you going
> to continue?

Son, I responded to an existing thread that had
already been cross-posted to the CB newsgroup (on a
topic of interest to all newsgroup users - complaints
to IPS's), and I'm sure that at lease some of the other
replies in this thread are from others in your
newsgroup (just like your message is - crossposted to rec.radio.amateur.misc).

So, to answer your question directly, I will continue
to post where I want, when I want, and on any subject I
want. It is neither your business, or your job, to
tell me to do otherwise.

Now, if you want to complain to my ISP about my use
of rec-radio.cb, I'll be glad to supply them with a
long list of people they can contact who can verify my
many years of citizens band radio use in this area
(which means that I have just as much of a right to
post to rec.radio.cb as you do).

But, even if that was not the case, it is still none
of your business what I do. So, I strongly suggest
that you back off, worry about your own cross-posting
to other newsgroups if that is a big issue for you, and
let me tend to my business.

By the way, if you want to "cause grief" to the ham
groups, that is your business. But, don't try to blame
your bad behavior on me, because I'm following
newsgroup rules. If you want to violate those rules,
than that is between you and the people who complain to
your ISP.

Good day, City Slicker.

Let us assume that the interference is really being caused by your very strong 50MHz signal getting into the antenna amplifier via the input connection (I'm sure that this will be the main cause, but it may not be the only problem). However, what you essentially want is lots of attenuation 50 - 52MHz, and as little as possible elsewhere. However....

Using coaxial stubs CAN be very effective, but there are several serious problems with simply adding a simple o/c quarterwave or s/c halfwave stub across the input of the wideband amplifier. These include:
1. The width of the notch will be so wide (even with the lowest-loss coax you can find) that you will also kill the TV low-band (Ch2 - 55.25MHz - will, of course be the worst affected).
2. As well as having a notch on 50MHz, here will be notches at odd multiples of 50MHz (if quarterwave) and all multiples (if halfwave). This may make a bit of a mess of several other TV channels.

The obvious solution to the width problem is to make the notch narrower. With stubs, you can do this by cascading similar stubs, each separated by a quarterwave of coax. This will also greatly increase the depth of the notch. A single stub will give you a notch of 25 to 30dB, and two stubs will increase this to nearly 60dB (I doubt if you'll need anything like this). However, this will not change the 'harmonic suck' effect (although these sucks will also be narrower).

You cannot eliminate the multiple harmonic sucks, but you can move them around so that they do not fall on those frequencies which you want to receive. You can do this (for example) by adding capacitors or inductors in the appropriate places (I won't go into this here).

You will probably be better off with a circuit using only capacitors and inductors. However, there will need to be more to it than the simple equivalent of a single coax stub. I have a typical circuit in mind, but you would have to calculate the values or do some 'jiggling' to values obtained by means of 'inspired guesswork'!

Having said all this, I'm sure that you are not the only one having trouble with 6m hitting TV (antenna amplifier or not). I wouldn't be surprised if there are several off-the-shelf filters which are purpose-made, and don't cost too much. If not, let me know - I'll move to the USA and set up in business!

73,
Ian.

Hey,

Im trying to test my radio but havent had any luck picking anything up. I am in the LA area with a 70cm radio. Would anyone be willing to help me test this?

Also if you know of any active repeaters please let me know.

Thanks, Ilan

Thanks very much for your replies, guys! That's the way my Elmer taught me when I started out hamming with a home brew tuner with no meter, and an outboard SWR meter. Recently one of my friends put up a fancy new antenna, but didnt' have a tuner so I loaned him my small MFJ mobile tuner which does have a SWR meter on it. He also put his Diamond SWR/PWR meter between the tuner and the antenna (on the direction of another old head ham friend) and it doesn't quite match up the reading on my little MFJ tuner, so I went over and moved the Diamond between the rig and the tuner. We can now tune the tuner and the SWR reading on both meters match up, but the other friend says it's the wrong place so I was just looking for a little confirmation.

When he gets a better tuner, he won't need the Diamond meter in the circuit at all, although it is a good meter.

73 and thanks again. George, N9EJS

The answer can be summed up in two words: Code Quick!

The web site is:
http://www.cq2k.net/

Too bad there hasn't been a review of Code Quick in QST. It's also too bad that Code Quick isn't better well known or better well promoted.

Code Quick may be silly, cutesy, and over-the-top, but it WORKS!!! I challenge you to find anyone who will say, "I really, really tried, but Code Quick didn't work." (That's right, none of the Code Quick critics actually used it.) Then compare the failure rate of Code Quick to the failure rates of the more conventional methods (Koch method, listening to Code tapes, memorizing dits and dahs, listening to Morse Code and expecting divine inspiration to take over, etc.).

If you don't believe me, just search for "Code Quick" on eham.net, deja.com, and other sites.

Code Quick probably works well at 5wpm. I could be wrong, but seems to
me, it wouldn't work above about 15wpm and would actually limit one's
maximum code speed.

Dave -

Traditionally, 6m has been the best way to get the "Worked all channel 2's" award. Various low and high pass filters, even (maybe especially) those that are effective on HF tend to be ineffective on 6m. The main problem is that 6m sits right in the middle of what would've been TV channel 1. TV sets tend to have RF front ends that are very poor in terms of strong adjacent channel signal performance. Also, TV's are usually poorly shielded (how many 15KHz harmonics can you count?) so 6m will be picked up by the power wiring and the TV circuitry itself!

What to do? I can't say what if anything will work for you, but here are a few things to try. I'm assuming that your 6m rig is clean, so my suggestions all apply to the TV system. 6m harmonics should not be much of an issue even if present because they impact only one VHF TV channel (11 I think). The basic goal here is to reduce the 6m signal strength at the TV's, TV amp and TV antenna.

1. Move your 6m dipole as far from the TV antenna as possible. The dipole is physically small (10' or so long), so this ought to be easy to do.

2. Keep the 6m and TV ant cables as far apart as possible. You say that you get an SWR of 1.3:1 WITH a tuner? Better to adjust the 6m dipole so that you have a low SWR *WITHOUT* the tuner, assuming that you're feeding the dipole with coax. If this turns out to be the problem, a "current choke" balun at the dipole may also help. If you're feeding the dipole with twinlead, you need to be more careful about what is near the twinlead's path from the antenna to your radio. In either case, the idea is to prevent the 6m antenna feedline from radiating.

3. Orient the 6m dipole so that the TV antenna is directly off the end of the dipole. Putting the TV antenna in an antenna null is the simplest way to reduce the 6m signal level at the TV antenna.

4. Choke/filter the AC power lines feeding the TV amplifier and the TVs. Radio Shack (and others) sell a ferrite core for this. I think they're fairly inexpensive - $3 for 3 or so...

5. Build quarterwave stubs tuned to 6m and install them at the antenna inputs to the TV amp and the TVs. This will selectively reduce the 6m signal level to the amp/TVs. It's possible that the only one you'll really need is on the TV amp - assuming that it's the only box being overloaded. If channel 11 is used in your area, the stub may also affect it. If so, the stub may not be a good idea. (BTW, the halfwave stub

suggested elsewhere would also affect the 2nd harmonic of 6m. Lucky for you, 100MHz is not a TV channel. Unlucky if you're using the same antenna for FM broadcast!)

Good luck. Enjoy 6m!

73 de Glenn wb6w

Dog did it. Hmmm, starts with the word dog, and dog starts with the
letter "D" so it must be a d. Heck of a look up table you have to carry
around in your head.

Thank God we only need 5wpm anymore.

Top ten signs you're staying at a racist, Hiram hotel

10. Their slogan is, "We'll leave the WHITE on for ya!"

9. First tip-off: Those Confederate Flag pillow cases.

8. Sign in the lobby announces: "Pat Buchanan Rally This Saturday!!!"

7. Sign behind the front desk reads: "You're damn right we're open on Martin Luther King Day!"

6. Sign above the beds reads: "Absolutely no HIP-HOPPING on the mattresses!!!"

5. Sheets and towels already have eye-holes cut in them.

4. No rating by the AAA. . . but 5-stars by the KKK.

3. Bible on the nightstand replaced with a copy of "Mien Kampf".

2. Instead of a "Presidential Suite" they have a "Grand Wizard Suite".

And the Top Sign You're Staying at a racist, Hiram Hotel. . .

1. Every morning the front desk will give you a "wake-up slur".

Ohio/Penn DX Bulletin No. 496

The Ohio/Penn DX PacketCluster
DX Bulletin No. 496
BID: $OPDX.496
January 29, 2001
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters, ARRL Letter & W1AW DX Bulletin, N2CY, WB2YQH/WB2RAJ & The 599 DX Report, W3UR & The Daily DX, N4AA & QRZ DX, WD4NGB, AC7DX, K8YSE, N0JK, CE6TBN, DL3TD, EA3AJI, EA5KB, F6AJA & Les Nouvelles DX, HA0DU, HK3JJH, HK6DOS, LU1DZ, PA3GIO, RA3SL, RA0FF, SM5DJZ, UA9XC, UA0MF, VK3EW and VU2JOS for the following DX information.

3A, MONACO. Laura, 3A2MD, is usually very active on 80 meters. Look for her on 3506 or 3798 kHz starting 0630z. She was also heard on 20 and 10 meters CW on 28031 kHz at 1330z or on 14033 kHz at 1500z working USA on long path. Frank, 3A2MW, is also active. Check 18135 kHz around 1000z or 14188 kHz around 1200z.

3C1, EQUATORIAL GUINEA. Erik, SM0AGD, is now active as 3C1AG until February 5th. He has been active on 80/40/30/12/10 meters CW and 20/15 meters RTTY. A report from John, SM5DJZ, indicates that Erik is using his normal AP8 GP, and has put up a dipole for 30 meters which later he will be changing into a 160 meter dipole. Erik has also promised some SSB activity, but his primary mode is CW. Erik has been very well taken care of by Alan/3C5I and his XYL, and they meet almost every night.
Suggested frequencies he intend to use are:
CW - 1825-1830, 3500-3510, 7000-7010, 10100-10110, 14035, 18085, 21035, 24905 and 28035 kHz
SSB - Around 14195, 21295 and 28495 kHz
RTTY - 14080, 18100, 21080, 24920 and 28080 kHz
QSL via his homecall SM0AGD. His pattern of operating last week seems to be the following:
10/12/15 meters - 0930-1730z 40 meters - 0200-0330z
20 meters - 2030-0130z 80 meters - 0430-0530z
30 meters - 0330-430z

3D2, CONWAY REEF (Update). Hrane, YT1AD, reported that the 2001 Conway Reef DXpedition needs 2 more operators for CE0ZT DXpeditions. If interested,

please send E-mail to: ce6tbn@dxpedition.org

3V, TUNISIA. A YL operator was heard at the controls last week from 3V8BB on 20 meters. Listen for Zaida to show up on 14260 kHz starting around 1100z and staying as late as 1400z.

3W, VIETNAM. This entity continues to have activity from it. 3W6AR was heard on 21274 kHz from about 0015z to 0100z. Hau, 3W6LI, was heard from Saigon on 28475 kHz around 0930z. QSL via IK2DUW.

3Y, BOUVET. Chuck, 3Y0C, continues to be active but mainly on 20 meters. However, he does show up once and awhile on 80/40/17 meters. From the WD4NGB Web page, Chuck's Icom PW1 amp is still not working, but support guys have been in daily contact with the Icom reps in Japan trying to find the problem on the PW1 amp. They are sending information back and forth daily on the results of many tests. Chuck's beam is repaired, and back up. He is still trying to make up some new antennas. The Hexbeam is the only one of the originals to be in one piece. It has been repaired, but the vertical was not repairable. He has put some low band wire antennas up and will work on them as time permits. Chuck has been very busy and in his spare time, he will try to get on RTTY within the next 2 days. Chuck has one more glitch in the RTTY software to correct, but it looks good.

A5, BHUTAN. The Johnson family (A52GJ, A52MJ, A52VJ and A52YL) will be active until February 2nd. Glenn, A52GJ, seems to be active the mostly. He has really been hitting the lower bands at various times lately. If you miss this activity, you will have another chance to work another operator. Look for Dimitri, RA9CO, to be active as A52CO March 15-21st on all bands CW and SSB.

AP, PAKISTAN. Bob, AP2JZB, has been calling CQ for stateside stations on 17/12/10 meters also daily between 1300-1430z. Check around 18125, 24950 and between 28470 and 28510 kHz. QSL via K2EWB.

C9, MOZAMBIQUE. Hans, C91CU, was active this past week on 14165 kHz for over an hour starting around 1715z.

D2, ANGOLA. Gabriele, D2EB, was heard on 15/10 meters this past week between 1700 and 1800z. Check 21333 and 28495 kHz. QSL via I3LLH.

D6, COMOROS. By the time you read this, the D68BT and D68WL will be QRT (expected at 1200z, Sunday, January 28th). Their estimated QSO count is around 24,000 QSOs in the log (with dupes, around 32,000). Check the following Web pages for more information:
Picture - http://www.qsl.net/ea3bt/Comoros-Picture_of_day.htm
Album Pictures - http://www.qsl.net/ea3bt/Comoros-Pictures_Album.htm
Log Search - http://www.qsl.net/ea3bt/Comoros-Logs%20Angl%E9s.htm

ADDED NOTE: If you missed working this operation, do not worry. A very large operation will be taking place between February 8-28th. Look for D68C to be active on all bands and modes.

FG, GUADELOUPE (Also KP4). Hiro, JA2EZD, who has been active throughout the Caribbean (FM/Martinigue, J6/St.Lucia, J7/Dominica) the last few weeks should be active from here as FG5BG. He is expected to leave here and head to Puerto Rico (KP4)in early February. Most of his activity has been on CW on 80/40/20/15/10, but there has been SSB. QSL via XW2A.

HK0, MALPELO ISLAND. Pedro, HK3JJH, sent a message to your editor in Spanish which I tried my best to translate. Pedro reports to OPDX that he is planning a DXpedition to Malpelo for which he has "corresponding permission". There were NO dates given. However, he is look for some help (green stamps) for this project. He plans to be on the island for a month and will be active on 80/40/20/17/15/12/10 meters SSB and possibly RTTY. Credits will be given to any individual or organiztion that helps or endorses his project.

IOTA DXPEDITIONS BY BERT. Bert, PA3GIO, informs OPDX that he is going to be very busy activing IOTAs this year in the Caribbean, Central America, India Ocean and the Tasman Sea. Here is his planned schedule:

March 11-16th - Bert, PA3GIO, will be active as V31GI on Southwest Caye, Glovers Reef, Belize (NA-180). Activity will be on 80-10 meters SSB only (check the usual IOTA or DX frequencies. QSL preferable by the Bureau to PA3GIO.
Website: http://www.pa3gio.nl/ca/southwest/
Mirror USA: http://www.qsl.net/pa3gio/ca/southwest/

March 28th through April 2nd - Bert, PA3GIO, will be active on Saba Island (NA-145) as PJ6/PA3GIO/m. Activity will be on 20-10 meters SSB only (IOTA or DX frequencies). QSL preferable by the Bureau to PA3GIO.
Website: http://www.pa3gio.nl/ca/PJ6/
Mirror USA: http://www.qsl.net/pa3gio/ca/PJ6/

September 8-14th (Exact dates depending on flights) - Bert, PA3GIO, will be active as VK9CQ from Cocos Keeling (OC-003). Activity will be on 80-10 meters SSB only (IOTA or DX frequencies). QSL preferable by the Bureau to PA3GIO.
Website: http://www.pa3gio.nl/VK9CQ/
Mirror USA: http://www.qsl.net/pa3gio/VK9CQ/

September 15-22nd (Exact dates depending on flights) - Bert, PA3GIO, will be as VK9XV from Christmas Island (OC-002). Look for activity on 80-10 meters SSB only (IOTA or DX frequencies). QSL preferable by the Bureau to PA3GIO.
Website: http://www.pa3gio.nl/VK9XV/
Mirror USA: http://www.qsl.net/pa3gio/VK9XV/

October 9-15th (Exact dates depending on flights) - Bert, PA3GIO, will be active as VK9LO from Lord Howe Island (OC-004). Activity will be on 80-10 meters SSB only (IOTA or DX frequencies). QSL preferable by the Bureau to PA3GIO.
Website: http://www.pa3gio.nl/VK9LO/

Mirror USA: http://www.qsl.net/pa3gio/VK9LO/

** ADDED NOTE. Bert adds that since January 17, 2001, he has mailed 20000 direct and bureau VK9CQ and VK9XV QSL cards. You can see what the VK9 QSL card looks like at his Web site: http://www.pa3gio.nl/

IOTA NEWS.....
AN-006. Paul, UX2HO, will once again be active as EM1HO in February from the Antarctic, from the Vernadtsky Base on Galindez Island. He will be active on all modes and bands (WARC and 6m included). QSL via I2PJA direct or bureau.

AS-025. Operator Yuri, RA0FU, is now active from the Island of Kunashir (RR-15-05) and will be active until January 31st. He will use an Icom 756PRO and R7 antenna. QSL direct to: Yuri Burykh, P.O. Box 12, Yu-Sakhalinsk-23, 693023 Russia. Detailed information is expected to appear on the "Asia DX Window-HF WebCluster" at: http://dx.bgtelecom.ru

AS-062. Alex/RU0LM will once again be operating as RU0LM/0 from Shikotan Island for about two month. His activity may begin next week or early February. QSL via UA0MF: Mike Filippov, P.O.Box 20, (not 29), Vladivostok, 690021,Russia.

J2, DJIBOUTI. Jean, J28NH, has been active lately on PSK31 on 10 meters on 28121 kHz around 0645z and 20 meters on 14080 kHz around 1700z. He has also been heard on 12 meters SSB on 24955 kHz around 1345z.

J3, GRENADA. Willi, DJ7RJ, is now active as J3/DJ7RJ until February 3rd. Over the last few days, he was heard on 80/40/20/15/12/10 meters CW/SSB. Check 80/40 meters after 0200z as late as 0800z, 20/15 meters after 1900z and 12/10 meters after 1330z. QSL via DJ7RJ.

KH9, WAKE ISLAND. Start looking for Terry, K7ASU, to be active from here as K7ASU/KH9 until February 24th. His activity will be mostly on PSK31 and with some CW. QSL via K7ASU.

NEW DXNL EDITOR. Lothar Wilke, DL3TD, Chairman of the DARC Committee for DX and HF Contesting, has announced a new editor for the DARC DX Newsletter. The editor will be Karlfried Henrichs, DL1EK, who is a well-known person within the DX and contest community. The first DARC DX Newsletter edited by DL1EK will be published during the first week of February. You can reach Karlfried via his E-mail: dxnl@darc.de

QSL INFO AND NEWS.....
David, VK3EW, reports that direct QSLs cards for the special event station, AX3OLY (VK3), active during the 2000 Olympic Games, will be going out or should be received shortly. Also, if you are in the log and did not send a card you will receive a special QSL via the Bureau shortly. The AX3OLY station achieved a QSO total of close to 1800 in 102 DXCC Countries in around 27 hours of the total operating time. QSLs for AX3OLY go to VK3WI.

Alan, VK8AV, was active as AX8AV on January 25-26th. Remember January 26th was Australia Day. QSL via UA9XC. Log search can be found on the Web site at: http://dx.komi.ru/ua9xc/ax8av.htm

Pepe, EA5KB, informs OPDX that he is now the QSL Manager for the following stations: CX5AO, CX2AQ, CO8CY and CE2LZR. He has all the logs. He states to please QSL via the bureau or direct to CBA.

Jon, N0JK, reports that he has received the QSL cards from the printer for his FG/N0JK operation, and they should be going out this past weekend. His FG/N0JK activity took place at the end of November where he was active on 6 meters and was in the CQWW CW Contest. More info can be found on the Web page at: http://communities.msn.com/6mdx

Oscar, HK6DOS, (QSL Manager for CO6XN) reports that the cost of the air mail postage increased in Colombia. To U.S.A., Canada, Central and South America it has gone up 60% and to Europe, Asia, Africa and Oceania 65%. One dollar is not enough to answer one QSL card. The note of one "green stamp" is a low denomination, and he can't change it for the real value. He states that it is better to send an IRC or two dollars. QSL cards that arrive without IRC or two "green stamps" will be answered via bureau.

Ron, AC7DX, informs OPDX that he has taken over the chores (from NU4N) as QSL Manager for the following stations: KL9A, KL7FH, WL7KY and KL1SLE.

The "Far East Island DX Club" (FEIDXC) has begun to send QSL cards out for the RK0FWL/p DXpedition (July-August 2000) from Moneron Island (IOTA AS-149). If you have not sent for the card, but are planning to, REMEMBER to send it to: Eugene Popov, P.O.Box 79, Yu-Sakhalinsk-10, 693010, Russia. It MUST have a name under the new requirements by the Russia postal service or the mail will be returned. The RK0FWL/p Web site with a Log Search, Photos and information on the island, can be found at: http://dx.bgtelecom.ru/shams/as149.html

Stations ZX7R and ZX7CW that were active over the past weekend from Fort King Magicians in Natal, Capital of Rio Grande do Norte State-RN (PS7), get QSLed via PS7HF: Fabio Hoelz, P.O. Box 974, Natal - RN ZIP: 59041-970, Brazil, South America.

S2, BANGLADESH. The "ARRL Letter and DX Bulletin" states John, KX7YT, is active from Dhaka until February 1st as S21YV. His activity will be on 20 meters only with operations on SSB, PSK31, MFSK16, and possibly CW and RTTY. He will be looking for stateside stations between 0100-0200z and 1500-1700z. He has been alternating days on 14195 kHz SSB and 14071 kHz on PSK31. QSL via KX7YT. Core says he will apply for an extension of operating authority and hopes to be back in Bangladesh in April as well.

SPECIAL EVENT. Only a few days left to work ZY3WSF which is active during the World-wide Social Forum (FSM) (taking place now through January 30th) for the first time, in the city of Porto Cheers, state of Rio Grande do Sul, Brazil. Activity is expected on 80-10 meters CW/SSB. QSL via PY3FBI ONLY DIRECT. Gilberto is NOT A MEMBER OF THE BUREAU.

TT8, CHAD. Two stations were active this past week, TT8FC and TT8RH. TT8FC was 7012 kHz between 0245 and 0430z. QSL via EA4AHK. TT8RH was heard on 20/15 meters CW. Activity on 15 meters was between 1030 and 1345 on 21020 kHz and 20 meters on 14010 kHz after 1600z. QSL TT8RH via F8BBT.

V2, ANTIGUA. Chuck, N2CY, will be operating here from February 27th through March 4th, and expects to sign as V26CY. He will be an entry in the ARRL SSB Contest, but expects to be on the air prior to the contest on all bands including the WARC bands, SSB and CW. QSL to his home call N2CY.

VP8, FALKLAND ISLANDS. Paul, VP8DBQ, has been active on 20/15 meters between 0930z and 1030z. Check 21297 and 14250 kHz. QSL via M1AIB.

VU EMERGENCY COMMUNICATION. A major earthquake hit India last week and the following information was provided by Jose Jacob, VU2JOS: "Members of National Institute of Amateur Radio (NIAR), VU2NRO, Hyderabad have established HF/VHF stations in the earthquake affected areas of Gujarat for providing emergency relief communications to the Government. Our main frequency is 14.160 Mhz. The callsigns are VU2LIC, VU2MYH, VU2LFA, VU3RBN..... Other local and out station Hams are also active." So, it is requested that all international amateur radio operators please stay clear of 14160 kHz and 7023 kHz until further notice.

YJ, VANUATU. Currently Sigi/DK9FN and Bernhard/DL2GAC are active as YJ0AFN and YJ0ABS, respectively, until February 10th. They do hope to activate some of the rare IOTA islands if they can solve transportation problem. Sigi is active mostly on CW, and Bernhard on SSB. Sigi is trying to work Europe on the low bands around his sunrise (there were 80m CW spots around 1700z). QSL YJ0AFN via HA8FW and YJ0ABS via DL2GAC.

Got to get to 5 wpm before 15 wpm. What's really the magic of code quick is that it allows your to PASS the 5 wpm and demonstrates that anyone CAN learn CW!!

Hey once I passed 5wpm I too began to learn the farnsworth method it was easy know I had a good foundation having use code quick

All,
I am looking for a downloadable copy of an amateur radio logging program that runs on Windows CE 2.0. I have a handheld PC that I'd like to put to good use.
If you know of a good website that has WinCE software for amateur radio purposes please let me know.

Thanks

Ray

2189. Screwdriver antenna for apartment

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-28 23:02:38 UTC
From: jason_hsu@my-deja.com
Message-ID: <9528eagcs1@nnrp1.deja.com>
Source record: 94367
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.misc

Some of the questions I have include:
1. Can I use one if I only have 8 feet of clearance on the small patio (8 feet wide, 8 feet tall, 6 feet wide) outside my sliding door? Is it possible to mount the antenna at a slant? I want to hear about any creative solutions from you.
2. What type of mount/tripod would be appropriate? (I don't have a railing.)
3. How quickly can I assemble and disassemble the antenna? (For stealth and security reasons, I need to remove the antenna when I am not operating.)
4. Which versions (original DK-3, ElectraSlide, etc.) of the Screwdriver are most appropriate for me? What advantages do the more expensive versions have over the original? Can some versions (like the D&K KH-600 HF MOBILE ANTENNA) really operate on 160m?

SOME BACKGROUND:
I am seriously considering a Screwdriver antenna for operating HF from my ground floor apartment (no big trees or bushes close enough to conceal wires and keep them out of the way of people or dogs passing by). A mobile antenna would be less cumbersome to work with than a big wire antenna. The Screwdriver seems to be the best antenna for me.

I have had modest success with Hamsticks I am borrowing, but I know that Screwdrivers are more efficient. Also, Screwdrivers are multi-band and are easier to tune (due to the automatic tuning aspect). Has anyone used a Screwdriver antenna for non-mobile operation?

I was considering a Texas Bugcatcher, but I am not sure about the quality of the version from Texas Radio Products, and the version from GLA Systems is too expensive. Screwdriver antennas are almost as efficient, and several versions sell for near or below $200.

Hi all of you satellite fans,
well ao40 doesnot work has expected BUt it is was ham radio is all about?
i have read many commentary about it ,some says to scrap it,it was a waist
of money ...
when you are putting some money in your car tank and polluting the
environnemnt dont you care???

ham radio is experimentation at first,read why you enter this Hobby,
if i have the ressource of Amsat i would try many other things about ham
communications.

Look at the cellular communication industries that are putting satellite in
orbit and it will not be possible to stay there in orbit because of
market!!!!!!!!

think about it and you will see that ao40 is what ham radio is all about
experimention and reaching the earth

jason,
1. Yes, probably, to both questions. Just have to try it
and see.
2. Your imagination is your only limit. How about a large
flower pot, fill it with concrete with a pipe standing up
in the center of it. Mount the screwdriver on a pipe that
would fit into the one in the pot. Paint the concrete
green and leave it on the patio. (tell them your plant died)
3. Beats me, just depends on how much you practice (LOL).
4. I think 'which' antenna you choose would be more a matter
of how much you want to pay for it. The 'High-Searas'(s) are
nice, but I don't think they're worth the cost. Up to you...
4A. 160 meter operation is going to depend on the length of the
'whip' you use, and if you use a capacitive hat. It's
certainly possible.

'Doc

Price is 85 bucks shipped to you by US Priority mail. This 500hz CW filter fits the TS-850S and others including 940S,930S,450S,690S,140S,680S.

This unit was pulled from an 850 due to the buyer not wanting the filter in the unit.

Kind of ironic. Insisting on following USENET rules, when the majority
of posters on this newsgroup routinely violate (and openly encourage
violation of) FCC rules with regard to radio operations.

People who do not respect the rules of one service are not likely to
respect the rules of another either. A consequence of modern
society.....

In addition to Bill's advice, you might also want to ask in some of
the ham radio newsgroups. Perhaps someone in there has experience
with this radio and can offer advice. In fact, I've crossposted this
message (from rec.radio.shortwave) to a couple of those newsgroups for you.

Howdy from Texas,
I have just finished cataloging the tubes from the estate of a local ham, now SK. There are more than 300 types and more than 1500 tubes total. You can view the list here, www.ditdit.com .

I think we need to differentiate between "risks" here. There are two kinds of risks associated with these satellite launches. First is the launch itself. Second, is the functionality of the satellite. I believe that all hams accept the risk of the launch as just a part of doing business. We've all watched as many high-profile launches have failed spectacularly with hundred million dollar commercial payloads aboard.

BUT, I believe that hams (especially AMSAT members and contributors to the program) feel that if the launch itself is successful, there is a strong expectation of a useful, usable payload in return for the investment.

In AO40, we had an entirely successful launch, but we've had a number of on-board failures with the satellite itself. That is very disturbing. To AMSAT's credit, they are holding a board of inquiry. But, I think we all should be asking ourselves if we, as hams, should be spending the contributors hard earned money on highly complex satellites, using risky technology, with limited odds of being operational when launched.

Admitedly, the jury has not come back in on AO40 yet, and I am in no way disparaging the efforts of the many fine people who worked to build this satellite. (I sincerely hope we can recover use of the bird, if only for mode L/S) I am only questioning a philosophy. If we should "lose" use of AO40 for all intents and purposes, I believe that the inquiry board should further explore whether future AMSAT projects, funded with member contributions, should maximize the chances for a usable satellite in orbit, or continue to pursue complex, risky technology for it's own sake.

Good points!!!!

Something to consider also.....

With a space shuttle repairing sats all the time....Would it be
possible to talk NASA into doing a repair job? Or maybe just capturing
it and bringing it back down for repair/relaunch.......

I think that would be something to consider....

There's a crew of audio purists who hang out around 14.182 in the
evenings - W0JKD, W2ONV, etc. - check in with them, and you'll get a
lot of help.

I think not. The shuttle would have to match the orbit of the satellite.
Last I heard AO-40 had a maximum altitude of like 50000 kilometers.
The shuttle can only get up to maybe 800 kilometers (bad guess from
memory).

>sake.

The answer, obviously, is "yes". It is appropriate and desirable to do
both... although perhaps on separate satellites.

The problem here is in the expectations, not the hardware. Superficially,
it looks like this failure was a close counterpart of a launch failure:
the problem was in perfectly ordinary satellite hardware which was needed
to reach the final orbit, hardware based on stuff that worked fine on
previous spacecraft, not in something complex and risky and experimental.
An occasional failure of this sort is inevitable, and has to be taken
philosophically, like launch failures. Trouble is, AO-40 took so much
time and effort and money that there's only one of it, so everyone was
really depending on it working.

Future AMSAT projects, funded with member contributions, should sometimes
maximize the chances for a usable satellite in orbit, and sometimes pursue
complex, risky technology for its own sake, and sometimes even a cautious
mixture... but definitely should avoid major programs, leaning in either
direction, whose success or failure rides on a single satellite. (And I
doubt very much that either the inquiry board or AMSAT needs to be told
that!)

AO-40's orbit is far too high for the shuttle to reach it.

I don't think a $100M shuttle launch can be justified to repair a $4M
amateur satellite. Even if the orbits were compatible, which in the
case of AO40, they are not.

2231. Wiring up equalizer to microphone.

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-29 19:19:36 UTC
From: Scott McClements <yetbbwa@grove.iup.edu>
Message-ID: <3A75C248.212BE649@grove.iup.edu>
Source record: 94297
Cross-posted to: rec.radio.amateur.homebrew,rec.radio.amateur.misc

Hi all,

I have been playing around with different microphones and I am getting tired of
it. I bought some D-104s and put a Panasonic electret condenser full range
element (1K Ohm) in the D-104 head in place of the crystal element (no pre-amp).
The only problem now is, its way too muddy (bassy) for SSB use. I didn't want the
hassles of playing around with capacitors trying to fix up the audio.

Then I found this 8 band equalizer made by W2HIY. I don't like the Radio Shack DJ mixing board look of the unit, nor the layout, nor the price.

Then I started looking around and found a 31 band graphic equalizer can be had new for
around $120 (http://www.artroch.com/351/351desc.htm) and used for under 100$. I couldn't think of any reason I couldn't wire up my microphone to this thing. I was thinking of building
a box with the standard 8 pin connector on the front and running a 1/4" unbalanced
line into the EQ, then back into the adapter box and out the front to the radio. Now, I am
a novice when it comes to circuit design..but this seems pretty simple. The only
thing I figured I have to worry about is RF getting into the big mess. If I wrap
the power line to the EQ over ferrite and do the same in my box on all the lines,
and use a few capacitors here and there in my adapter box, should I be ok? Or will
this type of EQ just get destroyed by the smallest amount of RF and be a headache
to cure?

This exact kind of control over my microphones response is what I desire, but
is this a feasible project?

Thanks,

Scott McClements.

Not so obvious to most amateurs who made contributions to P3D.

>
> The problem here is in the expectations, not the hardware. Superficially,

Strongly Disagree.

> it looks like this failure was a close counterpart of a launch failure:
> the problem was in perfectly ordinary satellite hardware which was needed
> to reach the final orbit, hardware based on stuff that worked fine on
> previous spacecraft, not in something complex and risky and experimental.

No previous hamsats utilized either a large 400N engine, nor an arcjet
engine, or carried such a large amount of propellants.

> An occasional failure of this sort is inevitable, and has to be taken

Occasional doesn't cut it when you make a one of a kind, expensive sat
such as this, that took 10 years to devleop, build, and launch.

> philosophically, like launch failures. Trouble is, AO-40 took so much
> time and effort and money that there's only one of it, so everyone was

No doubt about it, they language you use in your posts and the childish ranting proves you are nothing but a cber who just happens to have a ham license. Just a simpleton cber, that's all, nothing else. You never crawled up out of the gutter, even getting a ham license did not help.

Um, have you overlooked AO-10 and AO-13? Both had such engines; indeed,
as I understand it, the AO-40 bipropellant engine was basically an updated
version of the AO-13 one.

>nor an arcjet engine

The arcjet, admittedly novel, doesn't *seem* to have been involved in the
AO-40 mess. (Indeed, it may help save the situation, as much as it can
be saved.)

>> An occasional failure of this sort is inevitable, and has to be taken
>
>Occasional doesn't cut it when you make a one of a kind, expensive sat
>such as this, that took 10 years to devleop, build, and launch.

Quite so. My point is that you *must* be able to deal with failures,
because they *will* happen. Repeat, they *will* happen. Trying to avoid
all failures is the mistake NASA historically makes, and not only does it
drive up costs tremendously, it *doesn't work* -- failures still happen.
(Indeed, it is not clear that NASA's tremendous expenditures on failure
prevention actually buy them any improvement in reliability at all,
compared to -- say -- the hamsats.)

The crucial mistake here is the "one of a kind... 10 years to devleop,
build, and launch" part, not the "new technology" part. A conservative,
cautious, no-unproven-technology AO-40 design quite possibly would have
failed exactly the same way. The problem is not new technology, but
betting the farm on one bird, no matter how it is designed.

Identical 400N engines were on Oscar 10 and 13!

In fact, the engine has become relatively smaller on this satellite.

DOODLEFUCK Cross-dressing Lllllllllllllllloyd, learn how to read, you
bible-school uneducated
nutsack goo slurper. Ever figure out what an urban legend is,
DUMBASS???? Lose any webpages lately!!! HAHAHAHAHAHAHAHAHAHAHAHA!!!
Why aren't you studying for that A+, LARDASS???? Shouldn't you be
getting to that minimum-wage pizza boy delivery "job?" Isn't it time
for your shift???BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!
Let's see, Llllllaaaaaaarddasss, you have shitty RADIO-SHACK stolen
radios that are so damn CHEAP they don't have the sensitivity. I have a
radio that has a sesnitivity of 0.20 microvolts in the 1.8-24 MHz range
SSB, 2 microvolts in AM and 0.5 microvolts in FM.
Now run along behind the dumpster, Llllllloyd, where you can get your
evening meal of nutsack goo.
Fuckhead.

2 Weeks to show up in the database (usually). One week after that to get the paper in the mail.

Remember that a month ago, we had some holidays. Although I expect things to be caught up with, it's possible that they're still a day or two behind.

You're lucky it's not 10 years ago, where the wait was 12-16 weeks and there was no database that could be checked for new issues.

Cleaning out the 'shack to buy some different gear. Have the following scanners/radios available for sale. (ALL are in absolute MINT/AS-NEW condition both PHYSICALLY and ELECTRONICALLY unless otherwise noted, with supplied accessories as noted for each one)..:
1.) PRO-2052 trunktracker.Does Motorola and EDACs.1000 channels.Lots of features.Retails for $369 In 'Shack catalog.Includes everything EXCEPT box. MINT.Low use (less than 4 hours total!)..... $250 (specs in current RadShack catalog)

2.) Bearcat BC-9000XLT "alphanumeric" scanner.500 channels.25-550 and 760-1300 Mhz (minus cell:('virtual conversion' can be done..will provide info IF requested...).Auto-store and MANY other features.Less than 15 hours use.Mint/ AS-NEW. With box and all accessories.Retails $349-$369 new!.....$255

3.) Sony ICF-SC1PC handheld scanner.NEW IN BOX! (Only removed to test for proper operation.)25-1300 Mhz (less cell, restorable)."Service search" features:selectable modes and step sizes.(no SSB).Includes all factory accessories & software disc.NEVER USED!.....$180

4.) Regency MX-5500 desktop scanner.25-550 Mhz continuous.20 channels.Selectable modes and steps.Superb sensitivity on milair band.One VERY light, nearly invisible mark on outer case side.Otherwise, in excellent to mint condition.Works superbly. Speed mod professionally done as is noise mod. A very nice radio for those not needing 800 Mhz.Includes power supply and antenna (no box or manual).....$85

5.) AOR AR-2515 desktop/mobile scanner.2000 channels.25-550 and 760-1300 Mhz (full coverage w/ cell).Very fast scan/search rate.Resembles the AR-2002 and 3000 in appearance.Selectable modes and steps.Perfect/MINT condition with box and all accessories.Light use (probably 18 hours total)Sold new for nearly $800.....$480

6.) Regency MX-7000 desktop/mobile scanner.25-550 and 760-1300 Mhz (including cell).Same features as MX-5000(above..) plus 800 Mhz.MINT with box and all accessories.Sold new for $399. Easy use(less than 22 hours total).Speed mod and noise mods professionally done. Excellent sensitivity and selectivity on all bands.....$185

Again, ALL radios are MINT/ AS-NEW unless otherwise noted.Please..NO trades or 'offers'.These are all my "personal" units and not just junkers for 'resale', so I KNOW they are as stated.Payment by MONEY ORDER ONLY! (Will accept personal check IF you dont mind 15 day waiting period for clearance.)<:
Kindly include $12 shipping EACH (except $ 7 for Sony)for FULLY-INSURED,WELL-wrapped, PRIORITY MAIL shipment.Radios will be sent SAME or VERY next day I receive your M.O. (again..checks WILL be held until clearing bank...sorry!)Email me directly with any questions.If multiple radios are

purchased at the same time, can give slight break on shipping charges.
THANK YOU and Happy Scanning ! Larry W. (Klarrg@aol.com)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network and AB5K & the AR TelNet Clusters for the following special DX information.

OOOOPPPPSSS!!!! On Sunday morning, your editor got carried away with the old "Cut and Paste" routine and made a big error in OPDX.496. The following statement was incorrect:

3D2, CONWAY REEF (Update). Hrane, YT1AD, reported that the 2001 Conway Reef DXpedition needs 2 more operators for CE0ZT DXpeditions. If interested, please send E-mail to: ce6tbn@dxpedition.org

It should have read:

CE0Z, SAN AMBROSIO ISLAND (Update). Marco, CE6TBN, Team Leader for the 2001 San Ambrosio Island DXpedition, reported that they needs 2 more operators for CE0ZT DXpeditions. If interested, please send E-mail to: ce6tbn@dxpedition.org

Sorry to Hrane/YT1AD and Marco/CE6TBN for the error in OPDX.496...

I used to have an Alinco DR-590 and it would only display
the aircraft band and 800 MHz.... you couldn't listen.
I even called up Alinco inquiring about this and asking for
a mod and he said that there wasn't one.

Steve Baker wrote:

I don't know why NASA is always mentioned in comparisons with amateur
satellite reliability. NASA doesn't build that many satellites, do they?
And they certainly don't launch many...

Looking at launch manifests it seems like the vast majority of satellite
launches are by commercial builders, operators and launchers. NASA usually
isn't involved, or so it seems.

> is this a feasible project?

A replacement mic element can probably be purchased for a tenth of
that, and it is primarily the mic element that effects the audio
sound. Buy yourself a pile of mic elements (tuned for various vocal
ranges), try them all out, use the one you like, and return the others.

If you want different sound for different modes, say for FM and SSB,
try an arrangement similar to the Heil HM-10 microphone, with two
elements controlled by a simple two way toggle switch (or three
elements with a three way switch, or four elements...).

In the end, this will bs far cheaper, and a lot less mess to worry about.

: hahahaha!!!
: You think *so*, do you.........HAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!
: Maybe it's deleting those much needed files right now.....

Posting, emailing, or otherwise transmitting a hostile piece of code to another computer system is now against U.S. federal law. I'd be very careful about making such claims in a public place.

Beyond that, AT&T takes a very dim view of posts like yours, and you could lose your ISP if you continue (wv.us.prserv.net is AT&T). You forgot to use subdimension.com in a number of critical posts now archived by Deja.

Let me make an "original" comment you'll understand:
Bwa HAHAHAHAHAHAHAHA!!!

Then insert the name of whatever national communications agency that
regulates radio in whatever little rock in the water you happen to live
on. I'm sure THEIR rules are being just as arbitrarily broken as well.

It's bad being a CB'er?
I admit I've not keyed up on a CB since the 1970's, but still, that's what got me interested in HAM radio as the clowns on CB didn't make for good conversation except in major cities where HAM's talked local on CB's, before 2 meter radio was popular. The person who got me interested in HAM radio was on CB.
His name was Don and went by the handle of Pappasan in North Dallas.
This is when the only people who used CB's were truckers and normal decent people, before white trash and black inner city ghetto dwellers came on and used it as the poor man's HAM radio with their amp add-ons.

On the other hand, I still have an Alinco DR-590 dual band mobile and a
DJ-580 dual band HT. Both of these rigs were readily modified to receive
both the 800 mHz and the AM aircraft bands. All it took was cutting one
teensy wire...
If you search on the net, I'm sure that you can find the mods for hte DR-592

I was afraid the only responses I would get would be get a Heil, try this element try that element. First off, you couldn't pry the D-104 out of my cold dead hands. I like it, it just feels right. Add a good electret condenser element with a wide flat response and ~10 bands of EQ and you accomplish whatever *exact* sound you want. Scoop the mids, boost the treb. you can perfect the sound in a few minutes, why would I want to play around with swapping elements when you mount them in their final location and find it sounds different than it did when you tried it out in the open?

Not to mention you got a mic that sounds as good as a studio mic and looks like it belongs in the shack and not a commercial radio station.

Scott McClements.

Yes, *IF* it worked as a lookup table, but I don't think it does.
I learned Morse with CodeQuick about 14 months ago, and I was explaining it to someone, and I found that I can't actually remember all the silly phrases and pictures, but I certainly have an association of the sound with the letter.

I don't mean to sound like a late-nite TV infomercial, ;-) but after about 2-3 years of frustration, trying everything, I went from 0-13 wpm with codequick. (I don't recall offhand how long it took, but it was pretty quick-- whatever about 1/2 the program is. maybe a month.)

Hey, everybody is different. It may not work for everyone, but it seems like a really good system to me, (because it worked wonders for me). I wouldn't guarantee it for anyone just because of how different folks can learn in different ways; But, I would suggest to someone that if they really wanted to learn Morse, and were about to give up because they couldn't, to try CodeQuick before giving up for good.

They get mentioned because they're the prominent example -- at least, in
the unclassified world -- of how to spend almost unlimited amounts of
money in (futile) hopes of improving reliability.

As for numbers, they typically build and launch (often via contractors,
but that usually involves heavy NASA intervention) several spacecraft a
year. They're no longer such an overwhelming force in the market as they
used to be, but they're still one of the larger players.

Scott,

I'm really not trying to bad mouth in any way, but this is how I see it.

Your project is definitly feasable, but I can't see what kind of return your getting. No one on the other end is ever going to hear the high end of your audio. Your rig is going to filter most of it out, and a tight audio filter on the receive end will wipe out all but about 2.1 KHz.

About the only enhancement that will go over the air is the increased low end, which you want to eliminate anyway.

You have taken the original element out of the D-104, which was already designed and optimized for SSB service, and put in a full range element. Now you have broadcast quality audio coming out of the microphone. Then you are going to put a equalizer between the mike and the radio and adjust it back to the same thing it was before. And in the process, spend a little money.

No one really cares about how smooth your voice is. All anyone wants is to be able to hear and understand you.

I have read:

OPTIMIZING SSB TRANSMIT AUDIO AND REVIEW OF THE W2IHY 8 BAND AUDIO EQUALIZER AND NOISE GATE

http://www.eham.net/articles/1582

It's kind of interesting but very self serving. The guy, W2HIY, is just trying to sell his product. Some people can make a very convincing agrument for just about anything.

Maybe all you need is a speech processor. A lot of new expensive rigs have these processors already built in, but the older rigs don't. If yours doesn't that you might want to try your hand at building one. A fairly simple design is below. All the parts should be available at Radio Shack.

Build An Audio Speech Processor

http://www.rason.org/Projects/speech/speech.htm

If nothing else, it's cheap to build, and if it doesn't do what you want, you can throw it away without worring to much. You may want to do a web search on "ssb audio processor". There is a lot of info on this kind of thing.

Well, I don't know if I have been of any help but good luck anyway.

Scott,
That's all well and good, butas I asked before,
how do you squeeze all that 'good' audio in to a
3 Khz signal bandwidth for SSB?

Good news. Suzy has been in a job crisis since last Friday
but today she landed a job, her first gainful employment in
over two years! Maybe she can pay for the ICOM IC-706 repairs
now.

www.ampland.com/humor/badjob.html

Suzy lacks qualifications for the above job, but she is
giving it her best, as you can see in the photo.

I wasn't suggesting that you get rid of your D-104. I was suggesting that you just switch out the element for something more to your liking. However, since you seemed to rule that out also, there is little else I can offer.

Of course, there have been many microphones over the years with tone controls (from a simple knob to equalizer-like sliders), including several now popular with the CB crowd, but I have always felt these were little more than a gimmic (once the sound is adjusted to the preferred point, why continue to have the controls in the way).

However, its your radio, so by all means go for it.

Sounds useful and has come up here before. I should try it. Does it
cost more than a pizza? More than a lobster dinner?

Yeah, DUMBASS Lllllllloyd would go for those that don't follow accepted practice regarding 3 Khz. SSB operation. Of, course, he could get on HF if he wasn't too fucking stupid to study and pass the General exam.

Let's check Deja.com for yours,
Lllllaaaaaaaarrrrrrddddddaaaaaaassssss Lllllloyd, the racist,
grossly fucking OBESE, inbred pizza delivery boy, shall we:
Here's a few of your little gems:

"YOU ARE NOTHING BUT A LYING JEW WHO LOVES TO CONTROL EVEYTHING AROUND
HIM. " drools the sub-human antisemite N0VFP, Lloyd Davies in
Message-ID: <19990730080252.21150.00003002@ng-
fx1.aol.com>

Lloyd A Davies (n0vfp@aol.com) neo-nazi idiot savant slobbered:
"No Doc, We have just begun. The Whites will rise again and take back
what
the Jews have taken and then some!"

Lloyd Asswipe Davies<N0VFP@AOL.COMNOSPAM proves is as ignorant of
history and
politics as he is in everything else when he "wrote" in message
<19990823214439.01713.00000283@ng-cd1.aol.com>...
"There are those call Liberty People "Nazis" What does supposed to
mean?
I thought a Nazi was a communist."

"People like AF2Y dont listen to reason! He's just a Jew!"
-Lloyd Davies, neo-nazi comic sex clown, keeping
that Old Auschwitz spirit alive, in <iDbA4.9105$_P5.1472043@news2.mia>

Racist "Lloyd Davies" <n0vfp@bellsouth.net> drooled in message
news:OYs16.135$Gc5.10799@news1.atl...
" Hey nigger breath, you and your "brothers" will all pay for all the
trouble you given us for many, many years.
It's CHRISTMAS, you jungle bunny. Here's to hoping you will get the
lynching you so deserve. Hoping someone will lynch you......."

Then you tried posting as "rattlesnake", but the same racist shit:
In article <7p3vjc$o8u$1@nnrp1.deja.com>,
rattlesnake <rattlesnake67909@my-deja.com> wrote:
" Doc Hate is no better is no better then SLOOP but you got to
understand he a JEW."

Then let's address your out-of-band-operations:

"I would not have a problem with using my dual-band HT with MURS .
It's
been modded for out-of-band. Same goes for a 440Ht to use on FRS too.
All you need to do is get the shortest antenna possible and use the
lowest
power, and noone will even notice." says the moron Llllloyd in
<0GQ_5.943$Yl.42496@news1.atl>

> It's shows your mental illness,

And what does YOUR posts say about YOU, LARDASS????? You are in no
position, fatass, to say anything about anybody's mental condition.
Your tight-fisted temper tanturms like posting "You take that back!"
BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!
Or your subscribing people to magazines and placing orders under
somebody else's name...you'll always be a little girl, Lllllllloyd.

> along with other forms of sexaual sickness.

Virginal Llllloyd "sexual" things are not sickness.....you are
likely to die a heterosexual virgin, even though you've had plenty of
homosexual experiences.

> You sir, are indeed sick.

You, Lardasss, Llllloyd, are clearly a FUCKHEAD.

> You have lots of enemies on the newsgroups,

Yeah, but I didn't get *my* webpages cancelled and get on here and whine and cry about it like YOU did, Porky!!!! Let them and you bring your own bodybags.

> Mr. Wideman.

Yeah, that's what the ladies call me, as compared to what they call you, "itsy-bitsy" man.

> I'd be careful if I were you.

Pretty tough talk for a man with tits! If I were you LARDASS, I wouldn't call anybody else FAT, you Frank Cannon lookalike! You're a funny, bald little fella, now, aren't you?
Back to your loser job, slingin' pizzas. Back to your loser pickup truck, and your loser, no - girlfriend life. Back to your lack of education. You wear ignorance SO very well.

Source record: 94165

I miss him too! Unfortunatly his 3-Year act on 3853 drew
the eventual attention and ire of R.H. He was a class act
however. Between him and "Sid the Lid" on 3950 you had
two concurrently running comedy shows on a late-nightly basis.
James however could out-pottymouth all of them with
one hand tied behind his back. My dream "qso" would have been
to hear a radio-war between k4oka and n5rlx - now that, were
it ever had taken place, would have been burned onto compact
disc and sold at Dayton as a gold collectors edition alongside
of the classic recordings of the "original" 3898, the finer moments
of wa4d on 40/75, and the infamous kv4fz 14313 wars.

ahhhh...what could have been created but for lack of infrastructure!

Question: What happened to n4rkl and the rest of the old 3853 gang?
Are they on a new frequency someplace? It was fun listening to those
guys too while doin work on the studio video equipment at nightshift

The Federal Communications Commission
is totally responsible for, and is the source of this content.

November 9, 1999

CERTIFIED MAIL-RETURN RECEIPT REQUESTED

Roger L. Wiseman

610 Glen Haven Avenue

Glendale, WV 26038-1302

Subject: Warning Notice: Amateur Radio License: KC8JBO

Dear Mr. Wiseman:

The Commission has monitoring evidence that you have been deliberately and maliciously interfering with the radio operations of other licensed Amateurs on the 14 MHz Amateur band. This interference has occurred at various times in the last several months and includes broadcasting music and other unidentified transmissions.

The Commission generally relies upon the Amateur Radio Service to be self-policing. Operation of the type described above is contrary to the basis and purpose of Amateur Radio and degrades the service for legitimate users. This serves as a Warning Notice that such operation will not be tolerated. Additional incidents of operation of the type described above will result in a monetary fine being levied against you and in revocation proceedings before an Administrative Law Judge.

You are requested to contact me at 717-338-2502 to discuss this matter.

Sincerely,

W. Riley Hollingsworth

Special Counsel, Amateur Radio Service

Enforcement Bureau

What else did you expect out of White Trash Wideman of Glendale, WV. He has pretty much exposed himself to be of low character and reprobate mentality. Just read his foul posts on this newsgroup. Especially that dirty mouth not to mention what he talks about. You would think he has an obsession with sexual perversions. Of course, that is him in real life. Probably telling his own story of sexual perversions

RST Engineering (www.rstengineering.com) is pleased to announce the upload of several engineering spreadsheets for your dining and dancing pleasure. Please use them with our compliments.

WIRE TABLE -- The standard AWG wire table with a calculator for resistance, voltage drop, and temperature rise for any wire gauge from 0000 to 40.

RF WAVES -- Free space path loss, receiver margin, and dbm/microvolt conversion.

SINE OSCILLATOR -- making a fairly low-distortion sine wave oscillator from a couple of opamps and a handful of passive parts.

COMPLEX IMPEDANCE -- Transforming series and parallel r+jx back and forth at various frequencies; adding, subtracting, multiplying, and dividing complex numbers.

MAKING L & C -- making your own inductors and capacitors.

MACHINE SCREW TABLE -- A simple table for screws from 0 to 1/4", sizes, taps, drills, dimensions, washers, and nuts.

STANDARD ATMOSPHERE -- The United States Standard Atmosphere with density, mach, temperature, and pressure. A calculator for pressure at any given altitude.

Please enjoy them with our compliments. If you find any errors (out to the first decimal place) please advise.

South Normanton & District Amateur Radio Club,
in Association with the G-QRP Club, will be holding
"Junction 28 QRP Convention" on Saturday 17th March 2001
at the Village Hall Community Centre, Market Street,
South Normanton, near Alfreton in Derbyshire.
Just 5 minutes from Junction 28 of the M1 motorway and the A38.
This will be a traditional radio event, organised in the true spirit of
amateur radio.
All under cover, there will be lots of traders with components, kits,
vintage and radio surplus, plus special interest groups and club stands.
Lectures throughout the day from Rev.George Dobbs G3RJV,
Rob Mannion G3XFD (PW editor), Tex Swann G1TEX (also from PW)
and Douglas Pitt of the N.B.T.V.A. (Not to be missed!)
Hot and cold food and drinks will be available, plus a licensed bar.
Talk-in will be provided by special event station GB0LOW on S22.
Doors open 10.00am. Admission is just ?1.00. Free prize draw.
Further details from the organiser on 01623 465443.
We look forward to seeing you there!

Nothing like OLD news.....
BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!
Poor Lllllllllllloyd. Still trying to beat that dead horse after
having sex with it.

Riley's going to look into your out-of band operations, Lllllllllloyd
Oh, and cunt-munching lesbian Melissa, keep your skanky, yeast-infected
ass out of my mailbox!!!!

Au contraire, my fuckheaded moron, but they are..you claim to be this
pious so-called Christian, but you wish others dead, and post some of
the most rancid, bigoted, anti-semetic drivel on the net.
And with a face like YOURS, Lllllloyd, you couldn't get laid in a
whorehouse with a platnium Visa<tm> card.

Let's put them back for the world to see:

"YOU ARE NOTHING BUT A LYING JEW WHO LOVES TO CONTROL EVEYTHING AROUND
HIM."
Drools the sub-human antisemite N0VFP, Lloyd Davies in
Message-ID: <19990730080252.21150.00003002@ng-fx1.aol.com>

Lloyd A Davies (n0vfp@aol.com) neo-nazi idiot savant slobbered:
"No Doc, We have just begun. The Whites will rise again and take back
what
the Jews have taken and then some!"

Lloyd Asswipe Davies<N0VFP@AOL.COMNOSPAM proves is as ignorant of
history and
politics as he is in everything else when he "wrote" in message
<19990823214439.01713.00000283@ng-cd1.aol.com>...
"There are those call Liberty People "Nazis" What does supposed to
mean?
I thought a Nazi was a communist."

"People like AF2Y dont listen to reason! He's just a Jew!"
-Lloyd Davies, neo-nazi comic sex clown, keeping
that Old Auschwitz spirit alive, in <iDbA4.9105$_P5.1472043@news2.mia>

Then you tried posting as "rattlesnake"and as usual, failed :

> that one 3 out of 10 for originality and wit.

I was not attempting to be a "smart-ass", as much as I was attempting to address a simple matter of someone picking nits, over a comment that was made as an observation.
While it is true that USENET is an international forum, the plain truth of the matter is that the U.S., by far, dominates the discussions on this newsgroup, hence the comment about "FCC rules". But if you apply the name of whatever rule making body that regulates radio communication, in your respective country, then the comment is still valid.

> >I'm sure THEIR rules are being just as arbitrarily broken as well.
>
> I wouldn't be so sure if I were you. The Radio Communications Agency
> appear to be an awful lot more proactive than the FCC when it comes to
> enforcement.

So, your assertion then, is that there are countries out there that actually ALLOW the use of 1KW+ power outputs, and the unrestrictive use of frequencies not allocated to their equivilent of the CB band? Somehow, I really doubt it.

> By the way, I have yet to see any message id's to support your
> original claim. Care to post the ids of the multitude of messages
> supporting your argument?

What the hell are you talking about? My "original claim" was that I found it ironic that there were people on here that were touting USENET "rules" , and how we should abide by them, while these same people, for the most part, routinely ignore FCC (Or whatever communication's agency regulates your version of CB) rules. I don't need any "message ID's" (whatever THAT means) to "support" what is nothing more than an observation on my part. If you doubt that there are "rule breakers" out there, just read the majority of message threads, and the subject matter

contained within them.

Hello Goosegrease Kaopectate,
As soon as you mentioned Montezuma I thought of last summer when my wife and I vacationed in Puerto Vallarte, Mexico. No, neither of us met Montezuma because the food was so damn bad at the famous La Jolla de Mismaloya resort, we hardly ate for a week. And the only water we drank was bottled. The best food we had in that week was when we landed at Houston's Geo. Bush airport for a connecting flight on the way to Newark and we had dinner in a steakhouse. Mexico was so pathetic, I now refuse to speak Spanish.

There are no Brother Stairs in Mexico which at least is one plus for the God forsaken place. The country is 99.9% Roman Catholic and my hunch is that if a Stair-like creature showed up, he'd be lynched. One thing: after what I saw down there, I'd like to see a large contingent of our overseas military be called back and stationed on the Cal., AZ, NM and Texas borders to stop the invasion. I've nothing against legal immigration but the dreck coming in illegally from Crapxico must be stopped.

==========
Indeed ,although it is a hobby ,things can be overdone .

For a crisp radio communication microphone passing up to 3000 Hz just use a
$1 electret mic capsule.
and a home brew amp which fits in a desk stand (if that's what you prefer)
A simple but effective design /construction project including Hi- and Low
freq boost adjustments can be found in QST - August 1989 , pages 18 - 19 -
20 - 21
The amplifier involves a 2N3904 transistor and a 741 OpAmp .
The circuit needs minimal 9 volts DC supply ,either from a PP battery or
from the transceiver.

Suggest you keep it simple

73 Frank gm0csz.kn6wh@ukrs.org

PS : The electret mic capsule can usually be found in scrap telephones. I
have a number salvaged from phones . Tandy sell a capsule as Electret
Condenser Mike Element Cat. No. 270 -0923

Suggest to keep it simple

2362. JBO wav files

He had his ticket pulled some time ago.

Sid's health had been failing in recent years the last time he
was seen he was towing an oxygen bottle. There is an
unsubstantiated rumor that he is a silent key but I have no
confirmation of this. He did move from NM to a lower elevation
but more than that I do not know/

No surprise there at all. With Lllllooooyyyyyddddddsss brain he thinks
up is down. But since the subject has been broached may I add the
following;

QST QST QST THIS IS W4NTI WITH A INFORMATION ANNOUNCEMENT FOR AMATEUR
RADIO OPERATORS AND WANABEES.

IF YOU ARE TIRED OF HEARING BUCKSHOT AND SPLATTER TEARING UP AND DOWN
THE BAND FROM 3.898 ON A NIGHTLY BASIS, PLEASE CONTACT THE FCC VIA E-
MAIL AT RHOLLING@fcc.gov OR VIA VOICE MAIL AT 717-338 2502.

THANK YOU.

This announcement is made at periodic times on 3.901. Riley says he can
only act if there are 'many' complaints. Seems strange to me that

EVERYONE else has to be legal. Wonder why they dont?

Thanks LLLLLLLooooooyyyyyyyddddd for bringing it up.

Dan/W4NTI

2372. ChipSwitch & Uniden HR2510 ONLINE MANUALS! *>FREE<* PDF

Newsgroup: rec.radio.amateur.misc
Date: 2001-01-31 16:33:19 UTC
From: Karl Vesterling <kjv@adelphia.net>
Message-ID: <j7Xd6.525$cm3.80119@news1.news.adelphia.net>
Source record: 94200
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.cb

For those of you who have purchased an HR2510 or Chipswitch and need a manual to it... Here's where to get downloadable versions of them *>FREE<* !

You will need the Adobe Acrobat viewer.

ChipSwitch Manual
http://kjv.homeip.net/~hr2510/html/chipswitch_information.phtml

The link to the manual is at the top of the page, just to the right of the Adobe Acrobat logo. You'll note a lot of care has been taken in putting together this ChipSwitch manual. It closely resembles the original manual for the HR2510. If you have sold a radio with a chipswitch, you may want to print out a copy for the person who purchased it instead of searching for the original manual. This one is by far easier to read and understand.

HR2510 Manual
http://kjv.homeip.net/~hr2510/html/radio_service.phtml?manufacturer=Uniden&model=HR2510

Click on the link above, then scroll down and you'll see the online version of the manual.This one is a bit larger than the Chipswitch manual as it's a series of bitmaps instead of text typed in. In the future I may decide to make a combination owners manual for the HR2510 and the Chipswitch and combine them into a single document. But for now they'll be two separate documents. Be prepared to wait a long time for this download if you are on Dialup.

**NOTE: The original HR2510 manual had the schematic in tri-fold fashion on the back of the front cover page. Because it didn't scan well, and most printers can't print out the detail (IE, anything inkjet) I decided to leave it out. Plus the fact that you'd need paper larger than 8 1/2" X 11" (Letter Size). So if you're looking for the schematic don't bother to download this manual, it's not included in it. Thought I'd mention it before anyone got disappointed.

We are looking for other manuals!!!!!

If you have an owners manual to a popular older model radio (Cobra 2000, or some such other radio) and it's in nice condition please contact lbridge1@juno.com (Doc's Wife) for information. What we would like to do is start to add on-line manuals to radios on Doc's site. We'll gladly pay for the shipping to and from yourself, and will have the manual back to you in a very short time.

Please, no manuals for newer models that are still in print. We're not out to step on the manufacturers toes here, we're just out to help the CB and Amateur community gain easy

access to otherwise scarcely available documents.

It's one answer, yes, but not THE answer. More tools in the toolbox is a good thing.
>
> The web site is:
> http://www.cq2k.net/
>
> Too bad there hasn't been a review of Code Quick in QST.

December, 1997, page 68. It's not a full-up product review, though.

>It's also too
> bad that Code Quick isn't better well known or better well promoted.

I learned about it many years ago in the pages of QST.
>
> Code Quick may be silly, cutesy, and over-the-top, but it WORKS!!! I
> challenge you to find anyone who will say, "I really, really tried, but
> Code Quick didn't work."

If it works for someone, then I'm all for it. But testimonials are not proof of anything other than that it works for SOME people.

A true test would be to have two or more large groups of students learn the code using different methods. One group would use Code Quick and other groups would spend the same amount of time and resources on other methods. The results at certain time intervals would then be compared.

Maybe ARRL Hq. could do a real Product Review on the various methods, using the above methodology.

It's important to define "success" and "failure" in this area, too. For the purposes of passing the test, 5 wpm is complete success. FOr the purposes of becoming a skilled operator, 5 wpm is the very beginning of success.

> (That's right, none of the Code Quick critics
> actually used it.)

A person who already knows Morse can't "learn it again".

Many of the critics are people who have lots of experience teaching Morse. Their comments deserve a look.

> Then compare the failure rate of Code Quick to the
> failure rates of the more conventional methods (Koch method, listening
> to Code tapes, memorizing dits and dahs, listening to Morse Code and
> expecting divine inspiration to take over, etc.).

Again, "failure" must be defined. If a person tries a learning method
for few sessions and then gives up, is that a failure of the method or
of the student or both?

One of the great things about packaged lessons like Code Quick is that
they set up a structure for the student. That's a big part of the
success equation right there.
>
> If you don't believe me, just search for "Code Quick" on eham.net,
> deja.com, and other sites.

I believe it works for the people who wrote the testimonials. Certainly
worth a look.

Looking for a schematic that shows the p.a. and the alc and output
adjustments for an Icom IC-725. A scanned page or two would be nice.
Need to know what the bias diodes are that go across the final
transistors, and would like to know which pots set ALC and such...
Thanks for reading, and all help is appreciated...

Looks like you should have the entire service manual.

I might be able to get you a copy for a reasonable figure, or just buy it
from ICOM. Probably around $30.

Nice!

Thanks, Jim, I've bookmarked the "complex impedance" spreadsheet for
sure!

Nope .. Sir Sidney did NOT get his ticket pulled. He had a scrape with Mr. H., but he received a "warning ticket". Did NOT lose his license.

Yep, he DID move to Oklahoma. He HAS returned to 3950 in the last week or so. In the process if re-installing his ham station at his new QTH, and should be back on the air full blast in the next 2 or 3 weeks.

The Great Liberty Net will be very glad to hear of "The Return of Sir Sidney".

First we need to see if your opinion matters, please answer the following questions.

1. Are you politically correct or a mean spirited, racist, bigot that voted against Al Gore?

2. Are you over the age of 30?

3. If you were caught in a burning airplane, would you refuse to use the parachute once you were informed it had been constructed from materials ripped from the bodies of abused silk worms?

4. Are you ready to rid the world of Dihydride Monoxide, the major cause of acid rain, and a strong industrial cleaner that finds it's way into "our children's" food supply?

Last I heard is that he was moving to Mexico and setting up a 50,000 Watt station on 3950. He claimed it was being funded by the Jewish ADL.

He stated the facts, as I outlined above, prior to leaving the air.

2394. Re: Alinco DR-592 Question

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-01 02:30:25 UTC
From: Mike Yetsko <joe@user.com>
Message-ID: <t7hirjsjbi5152@corp.supernews.com>
Source record: 94223
Cross-posted to: alt.ham-radio,rec.ham-radio,rec.radio.amateur.misc,rec.radio.misc,rec.radio.swap

The 590 had the code to talk to an 800MHz module, which was
a paddle board that was, as far as I know, NEVER provided
as an option. I don't know if that paddle board also had the
AM aircraft on it. There was a THIRD antenna connector
on the back panel as well for 800mhz. Never used. I think
the AM aircraft used the 2M antenna connector.

At one point, the AM aircraft was incorporated into the 59x
product line, but I don't think the way it was implemented
was 'compatible' with the way the 590 units did it, or expected
it to be done.

As to the 592, I suppose the only way to find out is to open
it up!

> or a mean spirited, racist, bigot

No, no, and no.

>that voted against Al Gore?

Yes. And so did a lot of others:

Got this from my gun club newsletter...

Election stats compiled by law professor Joseph Olson:

Counties won by Bush: 2,434
Counties won by Gore: 677
Population of counties won by Bush: 143 million
Population of counties won by Gore: 127 million
Sq. miles of counties won by Bush: 2,427,000
Sq. miles of counties won by Gore: 580,000
States won by Bush: 29
States won by Gore: 19
Av. murder per 100,000 residents in Bush counties: 0.1
Av. murder per 100,000 residents in Gore counties: 13.2
Gun ownership in Bush counties is much higher then
in Gore counties.

Some reason the Ham operators have a hard time with directing posts to the proper NG. This has no place at the CB NG. Probably can trace this one to Stewart too.

2401. FT: Ten Tec Jupiter! Beautiful!!!

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-01 07:32:38 UTC
From: foxblaine@aol.com
Message-ID: <20010201023238.24531.00000390@ng-ch1.aol.com>
Source record: 94230

Greetings...

Up for trade this time is a BEAUTIFUL, MINT Ten Tec Jupiter...Yup, the one EVERYONE is looking for! If you are not familiar, this is the same rig as the Ten Tec Pegasus, but has the front panel on the radio, for you ops that don't like computer controlled rigs. You can control this rig either by PC or the front panel. This rig was new in 11/2000.

I am looking to trade for another mid/high range HF rig. Such as a TS-940SAT or a TS-950SD. Maybe a TS-570SG???

I am really looking for a trade only. I will include the remote encoder/VFO for the right trade.

If interested, please contact me. My wife is having a baby tomorrow (02/02/01) so I might be a bit delayed in contacting you, although I have my cell phone in which I can access my AOL e-mail.

I would PREFER a 'semi-local' trade...I am within driving distance of Chicago, Madison, WI, or the Twin Cities...However, I will listen to trade offers from 'wherever...'???

73, es gud dx de N9LXX~~~

2402. Radio stations on 8000m peak expeditions?

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-01 07:53:21 UTC
From: Kalin Kozhuharov <kalin@thinrope.net>
Message-ID: <3A7915F1.C4B4BAF1@thinrope.net>
Source record: 94231
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.amateur.dx

Hello!

A bit off topic may be, but please help! This is posted also in
rec.climbing!

Next year there is a Bulgarian expedition on K2, first from my country
there. I have to tackle the question with radio communications, but
unfortunately there are to many variables :-(

Any info is appreciated! I will try also some radio-amateur groups.

Have you been to such expedition? What kind of radios did you use?
Model, maker or at least some specs (power, frequency)?

What about batteries? I guess the new LiIon are the best for cold
places.

In the base camp what kind of transmitter? Antenna?

Are there any special models for exp. use?

How long do you use a handy? Always on?

Anybody know of special regulations in Pakistan?

Thanks in advance!
Kalin.

AFAIK,the open 1/4 wave cable is a short circuit for the concerning frequency.Though he should take the frequency of the tv-channel for the 1/4 wave calculation.

Go ahead and try, City Slicker. The original poster was "rightwingradio@my-deja.com," which I assume was the one who added rec.radio.cb to the thread (I cannot verify this at the moment - the message has expired on my server and I don't feel like checking with Deja.com). So, for all I know at the moment, you're the one who first cross-posted this thread to rec.radio.cb.

> We actually see how you are in real life just by how you act on the
radio
> and in here.

Oh, so you draw an entire universe from a limited database, then. Just
how
do I "act" on the radio, since I really don't have much time to get on
it,
Chuckles the clown? I certainly don't hang out on
the LID frequency 14.313, and haven't for a long time now. I only did
so to
begin with because of the antics on there were humorous. As to in here,
LARDASS Lllllloyd and whomever he could recruit attacked me, so I simply
return the favor. All your whining about it is funny, though.
Besides, USENET is _not_real_life_. Fuckwit.

> Everyone can see that I am nothing more than a low class

That's right, Brother Sledgehammer. You know, up to now, I've been
wondering
just what "JR" might stand for.

Here's what I came up with, in a form that JR posts:

JR = Janet Reno. Our own JR is Janet Reno, now jobless. He/she must be
on that rug-munching, bulldyke station wagon trip.

Unlike others in here to "claim" to be attorneys, I don't claim to be one.
I simply made an observation. now, you (and others) can take it any way you want.

The fact still stands though. you screwed up and you will have to answer for it.

Interesting.

Considering that the FCC does have the RIGHT to pull a ham ticket over
such as this, I wouldn't be too surprised if Mr. Wiseman actually does
lose his ticket.

Given the actions of certain juvenile persons, we all face problems
based on the poor examples of folks like Roger Wiseman.

flame me all you want KC8JBO, it won't do you any good,
not that it makes any difference in the end.

One can readily see from your answers that your opinion has no merit, ergo will be discounted. Only those that are under thirty and have all the answers to the worlds woes and the human condition gleaned from the classic works of Jane Fonda, insync, and Maddona are capable of passing non-judgmental, but extremely valuable insight.

So mote it be...

Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.amateur.dx

As you know, K2 is a very dangerous mountain to climb; some say that is
more difficult that Everest. There are a number of books on
climbing Mount Everest that have the actual radio equipment used
on the climb. Perhaps the K2 books, which are less frequent, may have
the same. Since this is a life threatening mountain, I would check
with those people who actually climbed K2 or Everest and determine
what they used for communications between base camp and the climbers
and between the climbers. Also find out any difficulties they had
with the equipment/antennas etc. Check several sources.
GET THE BEST; LIVES MAY DEPEND UPON IT.

Looking for rig control software for alinco dx77 ... the few
that i've come across are either demos or they're only for
kenwood/icom/yesau. Any suggestions?

I would suggest that you confer with several manufacturers, letting them know your intentions. They know their equipment's limitations; they've probably assisted in every possibly installation that exists. Also, their corporation name will be riding on the success or failure of their equipment, so they'll hopefully do their utmost to ensure a successful outcome. You might even be able to work out an agreement with one of manufacturers -- they donate their best communication gear for the climb in exchange for the publicity of it having done the job.

I wish your team a safe return! They'll be in my thoughts and prayers.

There is a story about a kid from a farm just outside of Glendale, WV and one of the local bars there.

The kid's name was Roger.

It seems that he had just turned 21 and his father let him go into town alone to buy supplies and feed. Since it was his first trip to town as a man, his dad told Roger to go ahead and buy himself a beer while he was there.

Roger finished up at the feed store and went to the bar to do as his dad said he could. He ordered a beer and the bartender asked if he was new around town. As he was telling the bartender his history, a stunningly beautiful young woman came into the bar and sat down beside Roger. Roger was so powerfully affected by her presence that he began to lose track of his conversation with the bartender and to stammer just a bit.

He turned to the girl and attempted to start up a conversation with her, but she seemed to be distracted. She always answered him politely, but acted as if she didn't really want to talk to him.

A few minutes later, a second beautiful girl entered the bar. She immediately struck up a conversation with the first girl, and eventually they left the bar together.

"Don't worry" said the bartender "she wouldn't ever have gotten interested in you. She's a lesbian."

"What's a lesbian?" asked Roger.

"Well see, it's this way: Lesbians only think about girls. They want to hang out with girls, they want to kiss girls, and they want to sleep with girls."

"Get it?"

"Um, yeah" Roger said, and then left to bring his supplies home.

A few weeks later, Roger was back in Glendale and he stopped at the same bar again. After he'd ordered a beer and was sitting there drinking it, a talkative stranger entered the bar. He was a salesman and told Roger all about how wonderful his job was. Eventually he said to Roger, "Yep, I'm a salesman and proud of it. What are you?"

Roger blushed, looked at the floor, and said "I'm a lesbian."

> but more than that I do not know/

He's back living in Okla with family. The years of his pack-a-day habit
have finally taken their toll. All his ham gear is still back in N.M.
It's unlikely he will return to the air, perhaps in CW only, as he is on
24 hour oxygen and "joe Camel" has already claimed one lung.
Alleged he can't walk about much let alone hoisting up wire antennas
He was a lively person on 3950, but now that is all history and I hope for
his better health - seperating ham radio from the person I mean.
Another ham felled by tobacco. If cancer does not get you, loss of a lung
probably will.

2445. STAGGER LEE, OUTED SPERM_GARGLING HOMOSEXUAL

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-02 00:13:35 UTC
From: KC8JBO <roger_kc8jbo@my-deja.com>
Message-ID: <95cu39mqh1@nnrp1.deja.com>

Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

In article <3A79EFCE.2A8C8D9E@houston.net>,
AIDS CARRYING HOMOSEXUAL Stagger "FUCKWIT" Lee <SLee@houston.net>
slobbered:

> There is a story about a kid from a farm just outside of Glendale, WV

I live IN town..not on a farm, FUCKWIT SPERMGARGLER. Even though you
live in a tarpapered shack outside of town,
mainly because the TOWN issued a petition forcing you out of town with
your depraved,
perverse sexual exploits with other men and farm animals.

<...>

> "Well see, it's this way: Lesbians only think about girls. They want
> to hang out with girls, they want to kiss girls, and they want to
sleep
> with girls."

Proof positive "Stagger Lee" here IS a HOMOSEXUAL. Stagger Lee here
thinks sleeping with girls is somehow unnatural. Yep, I ONLY want to
sleep with girls/women, Faggot Lee. Nice to see you finally come out of
the closet! Yep, I want to kiss "girls", which beats the men's schlongs
YOU like to kiss, Shithead Lee. Yep, I want to sleep with "girls/women"
again it beats the farmanimals you currently have sex with.

Your little "joke" kind of BACKFIRED, since you maintain I like to have
sex with women!!!!!!!!!!!!

> Roger blushed, looked at the floor, and said "I'm a lesbian."

Yep, using YOUR definition of a "lesbian", I perfer women.
I even ate out your whore momma's cunt...BWHAHAHAHAHAHAHAHAHAHAHAHAHA!!
The best $10.00 I ever spent! <peals of derisive laughter>

"Stagger Lee" <Koko Taylor>

2000, Xmas eve, with a full moon over town
Stagger Lee sucked off Billy DeLions
And he blew that poor boy's dick.
Do you know what he sucked him for?
What do you make of that?
Cause Billy DeLions threw the lucky dice
Won Stagger Lee's Stetson hat.

Bayo, Bayo, tell me how can this be?
You arrest the girls for turning tricks

But you're scared of Stagger Lee.
Stagger Lee is a madman and he sucked my Billy D.
Bayo go get him or give the job to me.

Delia DeLions, dear sweet Delia-D
How the hell can I arrest him? He's twice as big as me.
Well don't ask me to go downtown, I won't come back alive [no more].
Not only is that mother big but he packs a .45 [four].

Bayo, Delia said, just give me a gun
he sucked my Billy's cum now I'm gonna see him hung.
She went into the DeLion's club through Billy DeLions cum
Stepped up to Stagger Lee at the bar,
Said, "Buy me a gin fizz, love."

As Stagger Lee lit a cigarette she shot him in the balls
Blew the smoke off her revolver, had him dragged to city hall
Bayo, Bayo, see you hang him high
He sucked my Billy dry and now he's got to die.

Delia went a walking down on Singapore Street
A three-piece band on the corner played "Near My God to Thee"
But Delia whistled a different tune, what tune could it be?

The song that woman sung was "Look Out Stagger Lee".
The song that Delia sung was "Look Out Stagger Lee".

BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!!

2446. Re: FT: Ten Tec Jupiter! Beautiful!!!

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-02 00:55:05 UTC
From: "J. Duffy Beischel" <duffyb01@fuse.net>
Message-ID: <t7k1a0677enl78@corp.supernews.com>
Source record: 94125

And what do you base that rather course opinion on?

The comments on eHam concerning the radio are very good. It has a rating of 4.8 out of 5 which is extremely good - Here are a few of the comments:

"I got my radio on Dec. 1st. I have made more DX contacts than in all of my 8 years as a ham. The idea of Ten-Tec is that you cant talk to them if you cant hear them you can hear static off a mouse 100 feet away.....Well not realy but.. up till now, if I can hear them I have talked to them. I have got very good reports on SSB and CW I have down loaded the flash program and up-graded mine once now I have two more functions I dint have at first. I only see it getting better as time go on and for the price you cant beat it if any one has question just e-mail me or just buy one you want be sorry!!! DEAN"

"I will save everyone a bunch of reading and myself a bunch of typing because you probably have read the review by WA6GDU. I am EXACTLY like him in so far as I also like to "grab and go" rather than waiting for deliveries. (I do PAY for the items that I grab!)
I am in complete agreement with his review. I have used the Jupiter as a stand alone rig AND as a computer controlled radio. (Pegasus emulation mode) I have a Ten-Tec Omni VI and must say that the Jupiter is very close to it in terms of receiver sensitivity. The Jupiter has a general coverage receiver and it is excellent. I have as much fun SWLing as DXing!
ENUFF SAID! I love the Jupiter and it was worth the wait! ONE POINT to anyone considering a Jupiter- - - get the remote pod! It allows direct frequency entry and has several other advantages as well. It is well worth the extra expense in my humble opinion. 73's BILL
PS; I also have a Kenwood TS-570DG. It is also a good rig. It is hard to compare but I would give the edge to the JUPITER due to IF ISP and other features"

"OK, I've waited for two months for this bundle to arrive and I've been a bit cranky because I'm used to just going out and buying something and bringing it home NOW.
The new Jupiter (you can read all about the specs on the link) arrived in perfect condition. I chose Ten Tec because of their fast and dedicated service reputation. This after reading many horror stories and reviews about getting service on imported rigs.
This is a first impression after only a few days of use. I know there is a lot of interest so thought others might know the rig is now being shipped. According to their web site the first production run is sold out and they are taking orders on their next run due to ship at the end of December.
This rig is quiet. The reciever is very senstitive and the controls are easy to use and figure out. It is smooth and has a feeling of quality. It handles

all bands from 160 to 10 @ 100 watts out. It appears that ALL rotary controls are encoders so there are no pots to get noisy over time. The screen is big with a lot of information. It never seems cluttered. Well organized.
All contacts I've made so far get unsolisited comments about quality audio. I'm using TenTec's mike. I've been a ham since 1959 and find the DSP noise reduction and automatic notch to be magic. The rig uses rotary controls for the most logical functions. One of the rotary controls is a mult-function affair and allows you to change a variety of functions such as audio, RF gain, mic gain, power, etc. A simple push of one of the lower buttons engages the multi-fuction category.
The band sweep feature is useful and I use it as I seach through the band. The tuning knob is big enough and is easy to use over long tuning sessions. The S meter is a bar graph with numeric display showing signal strength, for example S8+3. If you're used to the analog meter view you may not like this but I find it just fine although giving someone a 3 over 9 is not cool.
I have not connected this to the computer, that's another adventure, but I have read the manual and downloaded the software from TenTec's web site. You can also download upgrade software for the computer and upgrade its ROM immediately. TenTec says they will continue to provide new features and updates this way. That is refreshing. They also have their programing directions on line for those who want to really get into it.
Anyone who has experienced some of the new ham equipment with all those fancy computer, multi-function buttons will appreciate how simple this rig is to use.
I'm not a contest person but I did tune through the 10 meter contest this weekend and fond the selectivity very adequate on a crowded band. The 24 bandwidths on receive give you a lot of control over adjacent QRM and the knob is dedicated so its always there.
The transmit section seems bullet proof. It doesn't appear to have any wierd ghosts. I did find a few internal receiver birdies tuning outside of the 10 meter band.
All controls are where you want them. Phone jack, key and mike jacks on the front panel. I would prefer to have a dedicated volume control instead of making that part of the multi-function options. There is a dedicated pass band tuning knob that I believe would be more appropriate to have on the multi-function control and leave the volume as a stand alone control. This may be changable in software but the knob would have to be relabeled. Again this is a minor issue, but change to think about.
All in all, I am very pleased with my new Jupiter and can certainly recommend it to others. I know there are other rigs that cost a lot more, but, for the price the Jupiter fits the bill! "

Sounds like an EXCELLENT radio to me!

Regards,

Duffy - WB8NUT

Surprise , surprise, What else is new. This poor, fat, ,Mama boy, couch potato has been doing this qrm bit for a long time, Riley has known about him for at least two years. He has nothing in his life but this forum, his dinky little amateur radio station and four nasty roach infested walls. Take away this forum and the ham radio and he is a lost goose.

Doesn't this dam sicko ever get tired of harassing people he hates? My caller ID shows I'm getting calls from a pay phone near a liquor store in Hiram, Georgia. He must have got tired of harassing that retired FCC agent he hates so much down there by him. Looks like he has to get some liquid courage before he makes his hate calls.

This message did not originate from the Sender address above.
It was posted with the use of anonymizing software at

The letter seaks for itself, as does the FCC webpage and a few documents
acquired through the FOIA.

The preponderance of evidence presented thus far from these
"unimpeachable sources" suggests that you are guilty as hell.

Unless you can provide substantiative evidence to the contrary,
I am afraid that many will not believe you, and even fewer
will acknowledge you on the air.

You dug your own hole, Roger. now its up to you to put the headstone
on it and place teh coffin therein.

What does the FCC webpage say? What documents did you acquire through FOIA, and what do they say? Saying you have documents doesn't mean you do, and certainly doesn't carry any weight if you don't disclose their alleged contents.

> The preponderance of evidence presented

What is the "preponderance of evidence?" Cite your sources.

> thus far from these "unimpeachable sources" suggests that you are
> guilty as hell.

It's well you put quotes around "unimpeachable sources" because it is my understanding that the sources are far from unimpeachable. Cite your sources.

> Unless you can provide substantiative evidence to the contrary,
> I am afraid that many will not believe you, and even fewer
> will acknowledge you on the air.

Given that no substantive evidence is extant that the occurrence to which the single letter refers is factual or even plausible, there isn't any necessity to provide evidence to the contrary.

Unless you cite your sources, your attempt to legitimize an action that may have been founded on fraudulent evidence fails on its face.

> You dug your own hole, Roger. now its up to you to put the headstone
> on it and place teh coffin therein.

The fat lady hasn't even put on her costume yet.

I have no interest in Roger one way or the other. I don't particularly care for some of his rhetoric here, but that brush paints exceedingly wide, and covers a whole lot of other participants. In any event, given the utter lack of followup that one would expect had the cited incident

actually ocurred as presented, it has the appearance of a poorly prepared admonition by the FCC.

Apparently all of you who are so exercised over his presence can't seem to get over the fact that despite the recent posting, the letter in question was made public almost a year and a half ago, and the legitimacy of its assertions are largely in question. Time to move on.

>
>
> Surprise , surprise, What else is new.

Heyyyyyyyyy, Polly.......still making unidentified comments over the air I hear. Or should I say made a tape of and sent to Riley. How's your gay lover, Billy Jack??? Did the old bastard kick off yet?
You put him in the hospital when you bit down too hard in his groin area. Now, you have to get your kicks trying not to croak from diabetes.!!!! Hope you die soon, so a few of us can go and piss on your grave, you son-of-a-bitch.

> This poor,

Poor??? LOL!!!!!!!! You aren't the success story, mr. washing-machine repairman that was FIRED from Sears!

>fat,

I'm not the one who has to lose weight because of Diabetes!!!! Hahahahahahahahahaha!!!

> ,Mama boy,

At least I know who my Momma is!!!

> couch potato

I don't have TIME to be a couch potato, LARDASS!

>has been doing this qrm bit for a long time,

So have YOU, POLLY..........You've been QRMIng for years, ex-conditional class licensee!
Got those teeth in Polly, because those mules get nervous when you gum their dicks.

> Riley has known about him for at least two years.

Yeah, and YOU said I qrmed with a shortwave RECEIVER, you fucking illiterate.
Oh, and your musical skills are int he HACK range. Your guitar playing reflects your 10 thumbs.
Not to mention your dicordiant harmonica "playing", you remember, the same harmonica you QRMed with unidentified????

>He has nothing in his life but this forum,

BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!
You have nothing but having sex with farm animals, since Riley sent you that unpublicized letter.

> his dinky little amateur radio station

While YOU are using flea-market and third -hand equipment, Polly the son-of-a-bitch!
What's the matter, since you have alienated ALL the hams in the Memphis area, and they kicked your QRMing ass out of the clubs, you can't seem to get any help putting up antennas. Maybe it's because you smell like that mule barn that YOUR station is in. What's up with that, did that bucktoothed, hunchbacked,

> and four nasty roach infested walls.

There aren't any roaches here, DUMBASS. Say, aren't you a mason???
Isn't that the organization that has that big "G" for GAY as a symbol?
Have you even brought that mule barn up to code yet???? Why did you chicken out at Dayton, Polly???

> Take away this forum and the ham radio and he is a lost goose.

Yeah, but why do you let that hunchbacked Ruthie tell you when to squat to take a leak?

> W4FaggotQueerFuckhead

No, that would be YOU, Parrot. Die soon, old fuck.

LRod,
given the propensity that the FCC has for gathering
evidence (I've seen their procedures in action first hand),
I tend to believe that the letter does base itself in factual
(and very substantiative) evidence.

The FCC won't just issue such a notice unless they already
did the legwork and already had enough collected evidence to
support a case should they ever need to go to court.

as for other comments, read my replies below

LRod wrote:

> That assumes that the letter was based on factual evidence, and not

>

the FCC has a public web page (link posted in another message in here
recently)
that explicitly details recent enforcement action.

There was mention of more than one "personality" from the group that hangs
out
in this newsgroup. Roger Wiseman was the most recently mentioned of this
group.

>

cite my source? the FCC is the source. go look it up.

>
> It's well you put quotes around "unimpeachable sources" because it is my
> understanding that the sources are far from unimpeachable. Cite your
> sources.
>

again, refer to the FCC (they are the "unimpeachable source".
also, recently court motions filed in the relevant jurisdiction
(you can file Under the Freedom Of Information Act for this).

>
> Given that no substantive evidence is extant that the occurrence to

the letter by itself is substantiative evidence that the FCC has made a
case
(they don't send those out unless they are damned sure that they already
have enough to proceed with a case). Of course, this letter also is a
precursor to what may follow up (such as a notice of apparent liability, et
al).

>
> Unless you cite your sources, your attempt to legitimize an action that

Prove that the information furnished by the FCC is fraudulent. Please?

>
> The fat lady hasn't even put on her costume yet.
>

gee, They said that about Tim Hoffman out here, and he is paying out
a fine for his actions (not to mention that he is restricted from ever
using any radio equipment designed to transmit anywhere within any
amateur or business band).

>
> I have no interest in Roger one way or the other. I don't particularly

>

Actually, it looked like on of those old form letters... As for Mr.
Wiseman,
he has his own problems (like attacking character instead of proving
his case properly).

believe me, I've seen Government memo's that are a lot worse than the
letter
that was posted here a few times (you know how some folks in the
government services are).

>
> Apparently all of you who are so exercised over his presence can't seem

understandable. The problem is, time has not made an impression on
those who continue to wreak havoc upon several frequencies
in the HF spectrum. Also, with respect to the problems here,
it seems that mr. Wiseman has not seen fit to grow up
(and still behaves in a juvenile manner). I may not be the
best example of a ham, but be assured, I am far better than the
poor example he has offered in his writings of late here.

Well, we have at least ONE recent example to the contrary.

Well, maybe, maybe not. In addition to the AC5IU case cited in another post, do you recall the WA9KJI suspension and subsequent retraction?

> as for other comments, read my replies below

Yeah, me too.

> the FCC has a public web page (link posted in another message in here

So for all your blather about "evidence" on the FCC webpage, not only do you not post the site for us to quickly refer to, but you say there were "more than one 'personalit[ies]' from the group that hangs out in this newsgroup" and that RW was the most recently mentioned of this group.

Ahhh, I get it; you are referring to the letter sent to RW and one Steve Tunder of Ohio referring to a personal squabble on the newsgroups. And because ST's name was written first and RW's last, that comprises the "most recently mentioned," right?

That is the lamest, most pathetic excuse for logic I have ever heard.

> cite my source? the FCC is the source. go look it up.

That is the second lamest.

> again, refer to the FCC (they are the "unimpeachable source".
> also, recently court motions filed in the relevant jurisdiction
> (you can file Under the Freedom Of Information Act for this).

Save us all the time. If you have some evidence that is as strong as you purport, spill it here. Otherwise you sound like that idiot "pithbull" who claims to have AF2Y's driving records and was going to post them on a website a year and a half ago. We're still waiting. You sound just like him. All talk and no substance.

> the letter by itself is substantiative evidence that the FCC has made

So what we have at the end of the day, is this letter. Period. All the rest is circular reasoning, and your speculation of what *might* happen. You've said nothing.

> Prove that the information furnished by the FCC is fraudulent. Please?

Sure, just as soon as you prove there is all this other evidence you've mentioned. Prove that there is something more on the FCC webpage than the 18 month old warning, the Tunder letter, and the retest letter. Prove there's some court action that you got through FOIA. Saying something is so doesn't make it so.

> (you know how some folks in the government services are).

I'm retired from the government, what do you mean by that?

> The problem is, time has not made an impression on
> those who continue to wreak havoc upon several frequencies
> in the HF spectrum.

Cite a time and frequency where you have personally heard RW acting in an untoward manner.

> Also, with respect to the problems here,
> it seems that mr. Wiseman has not seen fit to grow up
> (and still behaves in a juvenile manner).

Well sorry junior, but *here* is the internet, which, if you haven't noticed, is loaded with juveniles. It has little bearing on the real world.

> fromt he? HAHAHAHAHAHAHAHA what is that?

> Can't even type.

Poor JanetReno, "JR", he didn't even complete Junior High School. He
was too busy sucking dicks on street corners and diving into dumpsters
for food.

> What a turd I am.
> jr = welfare cber

Poor "JR, you uses your unrequited, and might I add diminutive, excuse
for a hard-on as a sexual divining rod in a pathetic, fruitless effort
to find a woman, or at least somebody who has a few of the body parts,
who might actually fake nominal interest in that dog-eared, hackneyed,
nightmarish story that you have the nerve to call your life. Not
that "JR" here likes women, he likes the smelly, teethless old winos
he's been fellating.

Welcome to alt.oldjoke! Why does everyone think they
are the first person to hear a joke? One thing I can't
stand about internet 'humor' is that everyone tries to
rewrite the old joke to make it ten times as long. For
some reason that's supposed to make it funnier?

Source record: 94062

Roger Wideman (KC8JBO) is a fucking idiot. All this sick prick does is sit at his computer all day and flood this newsgroup with his insane accusations. This is supposed to be an AMATEUR RADIO group, not a forum for Roger Wideman's fucking ramblings.

Maybe Roger Wideman will grow out of this phase and stop flaming this newsgroup. Maybe he will take up another past-time, like fucking stray animals that wander around his house.

I suggest everyone ignore this piece of shit Roger Wideman. If you ignore this bastard maybe he will go away to.

This message did not originate from the Sender address above.

I totally agree Steve. Complain your asses off to AOL. When the person forging my name gets slapped by them, it will prove that the many false posts are not me, as I will still be here. So will my AOL account and web page. They are just pathetically reaching<Dweebo and twistie> for ways to make it seem that they are me. Dweebo has already been slapped twice by AOL, so lets just see what happens next.
REPEATING: THE REAL N8 ENCOURAGES ALL BITCHING POSSIBLE ABOUT ANYONE WHO IS AN AOL USER THAT IS FORGING MY NAME. N8WWM@my-deja.com is Dweebo.

MULE FELLATOR w4fqf@my-deja.com cackled as he sodomized those mules:

>
> I do believe I got

Believe whatever your empty-skulled, dumbo-eared, diabetic, soon to be DEAD, FIRED from SEARS, uneducated HACK musician, malformed skull wants to Parrot. Your so-called "musical skills" drive people to stick ice picks in their eardrums to save them from the monotonous, discordiant all thumbs picking. And let's not even start on your so-called "singing," which sounds like you've been gargling razorblades along with all that little boy sperm.

> to the fatboy,

I'm not the one having to lose weight because of their DIABETES, ASSHOLE! You and your hospitalized because you sucked him off too hard butt-buddy Billy Jerk look like death warmed over.
I weigh LESS than what you claim you want to lose weight to, CONDITIONAL CLASSED grandfathered to General, QRMer.

> go sink your elongated head in my mamas
> <Ruthie> flaccid cleavage and blubber

Well, at least that'd be _more sex_ than Ruthie's used to, eh, impotent Pollllllllly??? <snicker>

> potty mouth,

Pious hypocrite. Tell us alla bout how you're a church elder, Polly. Lie and tell us you're NOT a former CONDITIONAL CLASS licensee, who couldn't no more pass the Technician class or the Genreral class exam if he had to.

> couch potato,

I don't see the FIRED, broken down washing machine repairman getting any excercise except his alligator mouth. Whine and cry because you were "threatened" over ham radio, PUSSY.

What does Ruthie call you when she cooks that plate of beans for nightly dinners?
> BOY.

Figures.

> W4FQF..... "Man of Beans......."

Hurry up and die so we can piss on your grave!

Do you ever notice how this fuck-stick KC8JBO seems to post all day long? This uneducated bastard must not work. He probably sits at a library computer all day, just waiting for someone to post a message about him so he can respond in his usual vulgar way. A true example of a homeless reject of society.

The only break he gets is when he is cunt-mopping is mother with his face.

I wonder what some new ham thinks when he comes to this newsgroup looking for some amateur radio-related information, and finds fuck-boy talking about child molestation? Truly this sub-human is a contributing factor to the decline of amateur radio.

Fred, I'd be more than willing to "give it a break", if I stop getting
attacked. Why don't you say something to those idiots as well???
Or are you just hypocritical? Learn to use a killfile if you don't like
what I write.

Why do you talk so much about these topics. Do you have some skeletons in your closet regarding those sexual topics. Please elaborate about your knowledge in this subject. Or did you practice that lifestyle recently.

Right there shows the true degeneracy of your character. My mother wouldn't touch a lazy slob like you with a ten foot pole. Furthermore, my mother wouldn't be caught even talking to a piece of white trash like yourself. My mother has good morals and has religious beliefs. It just shows how much of a piece of garbage that you really are. As far as being grossly obese, I am six foot four and 230. Not to mention very well built and quite agile. I do a lot of stuff like basketball and other sports. Something that a lazy assed 45 year old doesn't do. Oh, thats right you just talk about having sex with other peoples moms. You are a real brilliant one and not to mention a 45 year old loser. Nice job on showing your true colors. .

> Yep, that's what your momma said when I had sex with her. She said you

Sounds like Steve wants to know his home address. That sounds like some sort of threat towards DX405. What are you planning Steve? Are you going to pay him a visit or are you going to send him dirty magazines. Actually, making comments of the sort as these indicates that you are going to try to harass DX405 in some way. Probably not a smart move since he could incite some sort of legal action against you. Seriously, though despite your hatred of him, it really isn't worth the time and trouble over what he says in here. Think about it Steve.

He's like Barbara Streisand -- always saying he's quitting and then
showing up again. But then "BS" is his middle set of initials, so no
one is really surprised (except for some folks in West Virginia).

Eric - I have posted on-topic MANY times more than five.

Why is it that you, Eric Oyen (AKA Proudhawk) are the most hated person on
the radio related newsgroups?

Eric Oyen <n7zzt@home.com> wrote
> Perhaps you should answer your own question...

2503. Suzy Da Pig getting divorced?

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-03 06:55:58 UTC
From: Buzzsaw <"Catch Me."@edu.com>
Message-ID: <95g9vjsaf0@pita.alt.net>
Source record: 94082

Is poor Suzy off and running on a new life? Is Suzy single again? Did Suzy's main squeeze leave Suzy high and dry? Whut will Suzy do for income since Suzy ain't worked for 8 months? Will Suzy put her rigs up for sale on Ebay? Seems a Biomedical Engineer such as Suzy could find a job at just about any latrine service. All Suzy has to do is be able to carry a bucket.
And to think that Suzy called everybody else a loser. Suzy gonna lose her rental house now....may have to go live under a bridge.
Car don't run, got no credit, got no money, got no friends. Bye, bye, Suzy.

also, you might wish to revise your statement there.
please note the e-mail addres.

it is valid. also, you will note that even though the IP is from
an @home address the same as the other person you mention,
you fail to realize that it is a unix shell machine (with
access to such utils as netscape, lynx, sendmail, etc).

it isn't that hard (as I am demonstrated before) to appear to
come from practically anywhere on the net with a little knowhow
and a few unix shell accounts.

Come off it john! you know a lot less about this technology
than you are willing to admit.

I can understand the lure of this thing. I can understand him coming back after getting rid of other problems.

THE BEST THING is that he say the amount of time for commercials will be VASTLY reduced and that he is getting paid less and that is fine with him. He also sadi he went to his ham radio wehn he wa off the air.

AT LEAST listen to the interview before you condemn him. The audience was being lost and big market stations were being lost with the new host, even though he was pretty good, and I can see that the network would do anything (even reduce commercials) to get him back.

We shall see, Art Bell with much less commercial time would be interesting.

Poor baby. FOAD, remora attached to the underside of Lllllloyd Davies.

> As far as being grossly obese, I am six foot four and 230. Not to
mention very well built and >quite agile.

Suuuuuuure you are.....maybe 5 foot 6 and 330.
BWHAHAHAHAHAHAHAHAHAHA!!!
You're the tallest in your inbred family, aren't you? Rumor has it
you're almost incomprehensible in person (owing to your heavily
accented and alchohol-slurred speech) and this combined with your being
dirt poor and ugly makes you very uncomfortable with human interaction
of any kind.
You have therefore moved yourself far from the mainstream of human
society, thereby earning its eternal gratitude.

> I do a lot of stuff like

Stuff your face with moon pies and ding dongs. Yeah, we know.

> basketball and other sports.

Suuuuuure you do, water boy. You may fetch the towels for the people
who DO participate.

> Something that a lazy assed 45 year old doesn't do.

Assuming, again, COWARD.

HI
i ues a Screwdriver off the back of my moble home it works very will
it stick up pass the top of the roof it is only up abt. 6ft. of the
grownd so i can take it down for use on the VAN . i thank one of the
reason it work so good is the hold moble home is the grownd plan steel skin.
to take off just undo power plug (power for tunning Ant.) amd lift off
I thank you would need some kind of grownd plan a long wire or some
thing

> Brucie, let me be among the first to wish you and Roger ecstatic
happiness!

Yeah, Staggering finally got back together with his former cellmate,
who made Stagger his prison bitch.
Staggering still hasn't gotten the reach-around, his lack of talent is
only exceeded by his inability to write something even remotely funny.
Despite his juvenile attempts to do so..
Staggering has a crush on KB1EVE, and sources say he's going to move to
Vermont.

> All you have to do is listen to 14313 in the daytime. Have a tape or
> digital recorder,

And you too can QRM like Polly Parrot....still making unidentified comments, you haven't made those filthy ones like you did on 75 meters..yet....still have that mobile antenna on that rusting tin-roofed mule barn, Poooooooollllyyyy???? You sure can't get any help erecting that 75 meter antenna, huh???
HAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!

> "Elongo"

Leave your ears out of this, Polly "DUMBO" Asshole, er, Ashley.

>is in there qrming

Prove it, shit-for-brains.
What about your unidentified comments on 14.313, 14.275, and 3.901, Polly????
W4NTI can testify to your QRMing on those frequencies. What about you running legal limit to talk to your lackey Billy Jack?

>decent people

That excludes YOU, Parrot. How do you live with driving your own daughter to suicide?

> all day

Prove it, Polly.

> long. The agoraphobic

Aww, did Polly have to go to the dictionary to look up a big word to use?

> bastard is afraid to leave the filthy shack to
> deal with decent people. Mean while

"Meanwhile," MEMPIS MORON....

>his lover,

Something Polly never had an abundance of, eh, Parrot. Is that diminuative size the reason for your handle Parrot?

>and we know who that is,lays nearbye, handy for his pleasure.

Yeah, and Ol' Ruthie the hunchback isn't one of them. You only married her for HER money, after your first wife took poison.

> What a creep.

That's what your former neighbors on Merritt in the slums of Memphis said about you, Polly.
They had quite the stories to tell.

> His bulk

How's the diabetes, going, LARDASS Polly......Poor Polly had to lose weight under Doctor's orders.

> is just about too much for that incestious

"Incestuous," Junior High School Dropout. You shouldn't use words if you don't know how to spell or define them, illiterate Polly.

> outrage.

So was your supervisor at Sears, that's why he fired you.

> W4FaggotyQueerFellow

2554. Kenwood G71/D7 Owners/Buyers Beware

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-04 01:18:38 UTC
From: Don Kulha <dkulha@vom.com>
Message-ID: <3A7CAFAD.56C514C7@vom.com>
Source record: 94032

Kenwood TH-G71/D7A Buyers/Owners Note...

Greetings....A brief tale of woe here in the hope it will save others some of the grief I and others have had with this radio. Two issues (maybe related, maybe not); the radio parting from the belt clip and the eeprom (or?) going flakey.

- Shortly after buying my G71 I brushed up against a screen door leaving the house. I heard a noise and looked down to see my new radio laying face down on the concrete. At first I thought I'd failed to clip it properly to my belt but discoverd the belt clip still behind my belt. This happened two more times. The last time the radio tumbled down about 15 feet of stairs and smacked into the wall at the landing. The battery clip boss on the battery was cracked this time (maybe it happened before and I didn't see it). Anyway I epoxied the clip to the battery but never trusted it to stay attached so I had to carry it in a pocket. This was so convienient I went back to carrying my old Yaesu (in 3+ years it never fell off my belt). So I reccomend if you have or buy one you epoxy the clip on and get a spare clip for any other batt you have (or buy one of the aftermarket batts with a studier clip/battery). The D7A HTs use the same clip but I don't know if they have the same problem (could have been too thin a battery case allowing it to flex or crack)

- I put the radio in a drawer in the office and left it there for about 6 months. I went to a ham show and while there bought a new battery (and a V7A). I dug out the G71, put the new batt on it and charged it up. When I turned on the radio I got the "Wait..." on the display. Never saw this before. The radio woke up but memory was empty. It also seemed to have "slipped" into european mode, ie., VHF and UHF ranges were off US spec, VHF step was 12.5, etc. I was able to do a hard reset and after a few times it corrected itself. Programmed my freqs into it and it worked fine. When I turned it on the next day I got "Wait...", all memory was lost and it thought it was in europe again. Well, I can't get it back to a US operating config (won't go over 145.995 in VHF and is stuck in 430-440 mode UHF). Whether this is a result of the hard knocks the radio got or a design flaw or poor assembly I don't know.

I've posted this info to a number of ham radio message groups and to many of the ham message boards. Kenwood "Customer Care" tells me that neither of these issues is a common problem yet I get messages from others saying their radio has fallen off too, has a cracked battery or are seeing the dreaded "Wait..." message/memory loss too. One guy wrote me and asked if I wanted his belt clip...his radio is somewhere on the bottom of Lake Havasu in Arizona. Noticed the number of busted G71's being listed on eBay? The busted ones all seem to have broken batts

and/or memory problems. Needless to say I don't believe Kenwood...if I've heard over over a dozen owners with problems similar to what I experienced there must be a lot more out there.

Kenwood says they can't give me an estimate on what it might cost to repair and to send it in (and that an estimate cost $35 if I don't choose to fix it). I asked them to estimate worst case but the fellow at Kenwood emailed me that he didn't fix the radios so he had no idea...send it in. I asked him to check with the repair group (I assume they have email or phones) but never heard back. I suspect the flakey eeprom (?) is a surface mount part on a board that would be prohibitively expensive to replace and don't want to pay $35 to find out it's not worth fixing. So basically I have G71 that will operate in VFO mode in the lower half of the 2m band. Hope this doesn't happen to you....Beware!

for the pork face to make anon posts when the ethyl alcohol kicks in, thus
imparting liquid courage.
Wonder if Suzy is gonna get a job? That would be a first...but first,
Suzy and his buddies have to trash the rental hovel he lives in before he
gets booted out.....too bad his wife took all the money...

2559. Capacitance hats

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-04 05:33:01 UTC
From: jason_hsu@my-deja.com
Message-ID: <95ipieaak1@nnrp1.deja.com>
Source record: 93887
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.amateur.equipment

I understand that capacitance hats are a loading scheme used to work low frequencies with a shortened antenna. Capacitance hats are more efficient than inductive loading coils but aren't very practical for mobile use (due to the impact of the wind).

My questions:
1. How close to the top of an antenna must the capacitance hat be? Does it have to be at the very top, or can it be several inches below the top?
2. If I buy a Screwdriver antenna, can I use a shorter whip antenna combined with a capacitance hat if the longer whip makes the overall antenna height too great? (I live in an apartment, and I am interested in buying a Screwdriver antenna.)
3. Can I buy a capacitance hat from vendors?
4. Are there formulas that one can use to calculate various performance parameters of a capacitance hat?
5. What are the ramifications of different capacitance hat designs? Designs include a single wire, disk, circle with spokes, and spider webs.
6. How do you build a capacitance hat? I imagine that various mechanical issues (supporting all the conductors, keeping the capacitance hat from sliding down the whip, etc.) come into play.

Suzy checked in to the Lib Net tonight and immediatelt began her usual psycho-babble, pretending to be an authority on world affairs. She concluded her pontificating by telling a racist joke about Jesse Jackson. Suzy was also conducting a rent auction tonight at her hovel. While Suzy was pontificating on the Lib Net, a drunk in the background at her house kept driving the bidding on the TM-621a and the FT-900at higher, which made Suzy happy, as the hovel rent is past due. When Suzy sobers up, she will decide which radio equipment will be auctioned to pay the utilities and put gas in the junker.

No, he just didn't quote my post correctly. He is very strung out and
up tight. Living in that part of the U.S. can do that to people.

With a little TLC, the nice man that Roger really is would once again
shine through.

I used a 2 feet diameter hat some years back. It was constructed from
#6 solid copper wire. A 2' diameter circle of #6 with 6 #6 spokes in
a hexagon configuration. It retained its shape very well up to... uhhhh...
whatever the freeway speed limit was ;-) It did deform a little when it
encountered a low flying tree at 50mph, but was not difficult to repair
once we stopped...

2575. Georgia State Flag

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-04 16:45:27 UTC
From: Oris Grim <oris@dirtball.com>
Message-ID: <3A7D8727.5B2690A0@dirtball.com>
Source record: 93904

The flag was voted not to change TWICE by the people of the great state of Georgia! Gov. Roy Barns, The House, and the State Senate decided that the people of Georgia didn't know what was right for Georgia. It looks to me that the government of Georgia with the fear of boycotts (South Carolina didn't
lose a dime) went against the people of Georgia. This has been a sad day in the state of Georgia and democracy. I wonder when they (Al, Jesse, and the NAACP) will have us change the state fruit because slaves picked peaches! It's never going to end. The Georgia government is scared of nothing. I say they just paid off the terrorists! I call for the boycott of the final four by the people of Georgia!

SB DX @ WW < KB8NW $OPDX.497
Ohio/Penn DX Bulletin No. 497

The Ohio/Penn DX PacketCluster
DX Bulletin No. 497
BID: $OPDX.497
February 5, 2001
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters, ARRL Letter & W1AW DX Bulletin, WA1YTW, W2LO, WB2YQH/WB2RAJ & The 599 DX Report, W3UR & The Daily DX, N4AA & QRZ DX, WB4PVT, WD4NGB, K5OVC, N5FPW, AJ6V, K6IPV, K6RO, K7BV, K8YSE, W9VA, WB9GYT, CE6TBN, CT1BNW, DL2VFR & IOTA-POST, DL4FP, F5NOD, F5SGI, G3XTT, G4XTA, GW4XXF, HK3JJH, I2UIY, I1JQJ/IK1ADH & 425 DX News, JA3MZB, PA5ET, S53R, V51EK, VE3NQK, VE7DP, VK4FW, VK0MM, YO3FWC, YS1RR and YT1AD for the following DX information.

EDITOR'S COMMENTS. There's so much DX activity and information there is not enough time and space to print it all..... Enjoy it all! de Tedd KB8NW

2000 CLINTON B. DESOTO CUP WINNER. The "ARRL Letter"reports that Bob Eshleman, W4DR, of Midlothian, Virginia, is the winner of the Clinton B. DeSoto Cup for 2000. The DeSoto Cup is a new ARRL award being presented for the first time which recognizes the station that's on top of the DXCC Challenge List as of September 30th each year. The Cup will be presented in May at Dayton's "DX Dinner" sponsored by the Southwest Ohio DX Association.

3D2, CONWAY REEF (UPDATE/DELAY). Hrane/YT1AD and Raymundo/YS1RR report that the Conway Reef DXpedition with 8 operators, 5 Yugoslavians, 2 Macedonian and 1 Salvadorean (YT1AD, YU7AV, YU1NR, YZ7AA, YU1DX, Z32ZM, Z32AU and YS1RR), will be delayed for 3 days. The delay is because YS1RR's visa for Fiji is still in process in the Fiji Embassy in Washington DC. Their departure now will be on February 17th, arriving Fiji on February 19th, and they will leave for Conway Reef on February 20th. They will arrive on the island February 21st later in the afternoon and hope to start operation on February 22nd at 0800z. On Conway Reef there will be 3 stations with 1KW each, using two 3 elements beam antennas for 10, 15, 20 meters, and 12, 17 meters. Vertical antennas will be used for the low bands, all running simultanously. The modes will be SSB, CW, RTTY, PSK31, SSTV, and the operation will last until March 1st, when they will head back to Fiji

on March 2nd. They will operate from March 2-8th from there with the callsigns 3D2AD, 3D2AU, 3D2NR, 3D2RR, 3D2ZM, 3D2AV,3D2AB and 3D2FW. For more details, check the following Web page: http://www.kragujevac.co.yu/3d2

3D2, CONWAY REEF (Second Operation Postponed). It has been reported that the Scandinavian DXpedition to Conway Reef planned by Mats/SM7PKK and Nils/SM6CAS, which was scheduled to take place April 5-24th, has been postponed. This due to some personal commitments by two of the team members.

3Y, BOUVET. Finally, good news to report from here. Reports indicate that Chuck's, 3Y0C, diesel generator is "FIXED". Chuck said they found a problem with the compression release. He will continue to collect info about the propane conversion just in case of more trouble. They will be able to get back to normal now and will be putting up new wire antennas for the low bands and some RTTY with a fully charged laptop. The other thing that this affects is that Chuck will be able to operate for more hours a day now instead of 30 minutes to a hour at a time because of weak batteries. However, the Icom PW1 amp is still dead.

4W, EAST TIMOR. Dennis, K7BV, provided information to OPDX about the rather dramatic drop off in activity from 4W since Dick, N6FF, and Dennis had the pleasure of operating from a wonderful temporary QTH provided by Thor, 4W6MM. Dennis states, "A recent E-mail from Thor, informs us that he was transferred out of Baucau right after we departed. He is now stationed in Oe Cusse, the small enclave to the west of East Timor proper that is completely surrounded by West Timor. He has his rig with him but only a 15 meter dipole two meters high for an antenna; a radical step-down from the 220' tower in Baucau. He has managed only about 100 QSOs under the current situation."
He also mentions, "Little has been heard from Ross 4W6UN; probably indicating he is as busy as ever carrying out his responsibilities to the UN mission in Timor Lorasae." ADDED NOTE (From Dennis): "Thousands of full color QSLs for our 4W/K7BV and 4W/N6FF operation will be in the mail within the next week. The story/photos of our trip will appear in an upcoming issue of DX Magazine." ADDED NOTE: Thor, 4W6MM, was reported this past weekend on 15 meters CW around 0500z and 0900z.

5U, NIGER. Look for operators Silvano/I2YSB, Paolo/I2UIY and Marcello/ IK2DIA to operate from here, February 27th through March 12th. Their callsigns will be issued after their arrival on the site. They will use separate callsigns for SSB and CW/RTTY/PSK31. Also, they will put on the air up to 3 stations when possible, operating from 160-10 meters on CW/SSB/ RTTY/PSK31 and on 6 meters on CW/SSB. QSLs for both callsigns will be OK via the Bureau or direct to I2YSB: Silvano Borsa, P.O.Box 45, 27036 Mortara (PV), Italy. A web page has been activated at:
http://digilander.iol.it/i2ysb/
There will be on-line logs and pictures available during their activity.

9H, MALTA. Karl, DL4FP, reports that there will be activity from February 15-18th using the callsign 9H3DLH (instead of 9H1DLH). QSL via DL4FP.

9M6, EAST MALAYSIA. Don, K6IPV, reports that plans are now finalized for their trip to Hillview Gardens Resort (9M6). Don, K6IPV/9M6IPT, will arrive at Hillview on the morning, local time, of February 11th. Since there is a complete station awaiting his arrival, he should be on the air that day, probably during the night to working stateside and Europe. Dave, W6AQ/ 9M6AQT, will arrive on the morning of February 14th. He will be bringing his Yaesu FT1000MP - MARK V, which they will use in the contest. Don mentions that he will make a stopover in Perth, Western Australia, for five days before going on to Hillview (around February 6th). He should be on the air from VK6XA's QTH, using VK6IPV. Don and Dave expect to operate more SSB than CW before the contest since neither of them claims to be a "hot shot" operator. They do anticipate using PSK-31 as well. They will do their best to correctly log every callsign that they can get and hope that the contesters will be patient with them as they will work toward accuracy rather than rate. They will operate the contest as a Multi-Single/Low Power entry. QSL via W6ORD, good in all callbooks and data bases for the last four years. Please do include SAE and sufficient postage for direct cards. Others will go by Bureau.

A5, BHUTAN. The Johnson family has left here (a day earlier than expected), but before leaving, Glenn, W0GJ (A52GJ), informed the DX Community that there are 7 new hams (nationals) with 10 meter privileges. Be on the lookout for them.

AP, PAKISTAN. Robert, S53R, informs OPDX that thanks to extensive help from "Pakistani Amateur Radio Society" and Tariq, AP2TJ, he will be active from the AP2ARS (ARS club station) from Islamabad. Activity will be almost 100% CW. He plans to be active from 40 meters up including WARC bands, mostly during the weekends due to work commitments. QSL should go to S53R. Robert adds, "In a very short period I'll be travelling to EZ, EY, EX and UK and will certinly try to do some radio from there too."

BQ9, PRATAS ISLAND. It was reported in the "425 DX News" that Paul, BV4FH, reports an operation as BQ9P is scheduled to take place from here March 6-15th.

C6, BAHAMAS. Gary, KI6T, is expected to be active February 13-18th as C6A/KI6T. He will also be active as C6AGS in the ARRL DX CW Contest. QSL both callsign via KI6T.

CE0Z, SAN AMBROSIO ISLAND (Update). Marco, CE6TBN, Team Leader for the 2001 San Ambrosio Island CE0ZT DXpedition, reports that a new team member has been added, Joe, KO4RR, (E30GA, K5K and T32R operations). He also mentioned that the CE0ZT San Ambrosio DXpedition will take part in the ARRL CW Contest February 17-18th, as a Multi-Operator/Single TX entry. The QSL Manager for CE0ZT (San Ambrosio San Felix group) is CE6TBN for outside USA and N6MZ for the USA.
CE6TBN - Marco A. Quijada, P.O.Box 1234, Temuco Chile
N6MZ - Michael Mraz, 15526 SE 50th St, Bellevue WA 98006-3611 USA

CQ, PORTUGAL. Cupido, CT1BNW, informs OPDX that he will operate during the next CQ WPX RTTY Contest, February 10-11th, using the special event callsign " CQ2CE ". The event is " Porto 2001 ", the Capital European

of culture. QSL only direct to: P.O.Box 4143, 4461-901 Senhora da Hora, Portugal.

CU8, AZORES ISLAND. Well-known DXer, Baldur, DJ6SI, was active this past weekend from Flores Island as CU8/DJ6SI. Activity was on 80/40/30/ 20/18/15/12/10 meters. Most of the activity was on CW and the WARC bands. QSL via his CBA.

D68, COMOROS. OPDX InterNet Subscribers will receive an additional bulletin containing the the latest and last update (very large) by Don Field, G3XTT, on the upcoming "Five Star DXers DXpedition" to D68. This contains info on the "D68C Awards Programme - SWLs", "Operating Patterns and Power Outages", "Contests Activity", "Pilot Stations" and their "QSL and QSLing Policy".

D68BT & D68WL ARE NOW QRT. Both Josep/EA3BT and Nuria/EA3WL are back in Barcelona as of Monday, the 29th. The final log count is more than 31,000 QSOs, and without dupes, they finally were 24,500 QSOs. The logs can be viewed at: http://www.qsl.net/ea3bt/Comoros-Logs_Angles.htm Josep's complete press release will be sent to all OPDX InterNet Subscribers as an additional bulletin.

DU, PHILIPPINES (IOTA Activity). Frank, VE7DP, informs OPDX that he will be here all during the month of February. He has been organizing with the "locals amateurs" in the Philippines to join him for several IOTA operations. The first one will be Polillo Island (OC-091) probably during the first part of this week. Roland/DU1KGJ (DX4RIG) and others wil be joining him. Other "targeted" islands are Lubang Island (OC-126), Batan Island (OC-092) and possibly a new unnumbered IOTA in the Luzon Coastal Island Group. Frank has meet with his partners last week, and they have decided on the following operating schedule:
OC-091 - Polillo Island. They will be active now through February 6th. Operators will be VE7DP, DU1KGJ(DX4RIG) and maybe 1-2 others.
OC-NEW - Activity from a new IOTA in the Luzon Coastal Islands Group is scheduled for February 8-11th. Operators will be VE7DP, DU1KGJ and memebers of DX1CW. They will applied for 4I1 prefix.
OC- 093. Batan Island. Activity will be scheduled for the last weekend in February. Operators will be VE7DP, 4F3XX, 4F1FZ and possibly others.
Frank, VE7DP, states more details will be forthcoming.....

HK0, MALPELO ISLAND. Last week (in OPDX.496) we mentioned that Pedro, HK3JJH, sent a message to your editor in Spanish which I tried my best to translate. This week I would like to thank both Rick Kissell, WB9GYT, and Mike Mattes, W2LO, who took the time to translate the message for me. Basically, I had the details right. Pedro is planning his next expedition to Malpelo, for which he already has the license. However, he did ask OPDX who he could contact about getting financial aid. Pedro states, "For example, the cheapest postage from here (Colombia) costs more than one American dollar." He receives only 80 American cents for an IRC, etc.... He will be on the

island for a month and won't be able to return sooner due to the lack of transportation. As mentioned last week, he will activate 6-10-12-15-17-20-40-80m SSB, I will try RTTY. Pedro states, " Of course contributors will be duly credited on the QSL card, it's also possible that I'll obtain a U.S. mailing address, to avoid a repeat of past problems with the mails. (I especially need a 6m rig with antenna, a lap-top, modem for RTTY.)" If you are interested in helping, let OPDX know and I will forward the message to Pedro.

HK0, MALPELO ISLAND. "The Daily DX" is reporting that a second operation is planned and scheduled to take place in April. Operators mentioned are: Jorge/HK5YBL, Jairo/HK5MQZ and Hiro/HK5QGX/JA8BWI. More details are forthcoming.

IOTA NEWS.....
AS-056. Masa, JA6GXK, will be active from Danjo Archipelago (Meshima Island), during the following schedule as follows: February 6-16th, February 27th-March 9th and March 21-30th. This is not a DXpedition. He will be active in his spare time. Suggested frequencies are: 14260 or 21260 kHz (both +/- 10kHz). QSL via only the Bureau.

EU-057. Andreas, DL5CW, will sign as DL5CW/p from Ummanz Island (GIA O-06), February 10-16th. Activity will be on CW/SSB on all HF bands. QSL via DL5CW.

EU-064. Jean-Marc, F5SGI, will be active as F5SGI/P from Yeu Island from April 14-21st. Activity will be mostly on CW, 80-10 meters. QSLs are sured via the bureau or CBA.

EU-129. Detlev/DL1RTW and Klaus/DL7UXG will sign homecall/p from Usedom Island (GIA O-013), April 2-4th. Activity will be on CW/SSB on 40-15 meters. QSLs via home callsigns.

OC-160. Bill, VK3FW, will arrive on Cumberland Island on February 6th for a possible 4 day stay. He states that this trip is work related, doing research for the "Enviroment Australia", so he will try to be active daily as time permits (mainly during his dark time hours). QSL direct via his home callsign with green stamps or IRC.

PJ2, CURACAO. Look for Larry/K6RO and Charlie/W6KK to be here from February 27th through March 5th. They will be active on CW and SSB and possibly RTTY. They will concentrate on the WARC bands before and after the contest. Larry, K6RO, will participate in ARRL SSB Contest as a SO/AB/HP effort using PJ2R. QSL PJ2R via K6RO. PJ2/K6RO and PJ2/W6KK via home calls.

PW0, ST. PETER AND ST. PAUL ROCKS. Team members of the St. Peter and St. Paul Rocks DXpedition (PW0S) have departed Recife, Brazil, on schedule on February 2nd, and expect to arrive on the Rocks about February 7th. It has been reported that a well-known Brazilian DXer Ely, PT7BZ, has joined the team. Operations are expected to be on 160 through 6 meters, CW, SSB and RTTY. QSL via KU9C.

QSL INFO AND NEWS.....
FR/F6KDF/T QSL UPDATE. "The QSLs are on the way", states Gil, F5NOD. Some are still being processed at their radio club F6KDF (around 2000 plus, but QSLs are received everyday). Gil states that he still receives many messages like: "QSL not received yet. -or- Have the QSLs been mailed???? -or- Did you receive my QSL ?". Gil will no longer answer these messages anymore. Next QSL sending will be at the end of this month or early in March.

NEW ADDRESS. Paul, G4XTA, the QSL Manager for 9G1BJ, 9G1YR, 9G1TM, VU3NSF and several rare UK callsigns, has informed OPDX that after living 18 years in the same place, he has a change of address. His new address is: Paul D.Godolphin, Pleasant View, Blencarn, Penrith CA10 1TX England.

Alan, K4AVQ, reports that the P40AV cards are going out now. He received cards back from his 1997 and 1998 operation just two weeks ago from the P4 bureau. These were sent to Aruba instead of the correct address. He is also in the process of sending these out the same way received. Alan mentions that JA cards have been sent for the stations asking for direct. Also, there were many U.S. cards sent without SASE, so these will be sent through the bureau.

QSL Update "Caribbean Tour 2000": Rob, PA5ET, reports, "We had many delays because of the holidays and many other reasons but the "Caribbean Tour 2000" QSLs (V26EA, V26ET, V26FM, V26WP, VP2MPA, 8P9JR, 8P9RS, 8P9JT and 8P9JU) finally arrived. As of the coming weekend and days after all direct QSLs will be mailed. As soon as all direct cards have been processed, the bureau cards will follow soon after. Direct QSLs can be sent to: Rob Snieder, Van Leeuwenstraat 137, 2273 VS Voorburg, The Netherlands."

V51ZSV, a special event station from Walvis Bay, Nambia, was on last week because the 500 kHz Wireless Telegraphy service from Walvis Bay Radio/V5W was officially closed down on the 1st February at 0900z. According to Hein Bertram, V51EK, the operation was to take place between January 26th and February 1st, CW only, operating around 14030, 21030 and 7030 kHz, depending on conditions. The station is situated on the premises of Walvis Bay Radio whose callsign had been ZSV until 1994 when they became V5W (hence the callsign).

VK0MM QSL INFORMATION. Alan, VK0MM, informs OPDX that the QSL Manager for VK0MM is Alan Roocroft, VK4AAR. QSL "DIRECT ONLY" to: Alan Roocroft, PO Box 421, Gatton, QLD 4343 Australia. Alan states "NO BURO CARDS". Alan is a well known and respected QSL manager, and he assures a turnaround of 24/48 hours once the cards are printed. The VK0MM card is in full color featuring the rare rockhopper penguin found at Macquarie Island. All excess proceeds from the QSLing process will be donated to "Camp Quality", a charity providing care for children with cancer and other terminal illnesses. Alan states, "The Australian postal system is efficient and secure, so please dig deep when mailing your cards." He also mentions that green stamps are preferred over IRCs. The log has been carefully checked, however if you receive "Not In Log" and are

CERTAIN that you had a QSO with VK0MM, then you should contact Alan direct at: vk0mm@yahoo.com
He will double check the original log in case of a typo. The QSL info page on the VK0MM website will be updated shortly with the above information.

T48, CUBA. "The No-Name DX-Group" will once again be operating from Santiago de Cuba this year. They will operating on 160 meters during the contest February 23-25th and the ARRL DX Contest in March 3-4th. They will also be operating on 20 and 40 meters as Multi-Op. It is hoped they will be active between the contests for prefix hunters. The logs will be posted on the "Kitchener Waterloo ARC" Web page at: http://www.kwarc.org
Click on the Cuban flag to go to the log site and follow the instructions. QSL via VE3ESE: Don Fisher, 48 Lucerne Dr., Kitchener, Ontario N2E 1B3.

VP5, TURKS AND CAICOS ISLANDS. Ed, AJ6V, will be operating in this month's ARRL DX CW Contest as VP5U from North Caicos Island in the single operator all band category. Look for him before and after the contest as VP5/AJ6V. QSL both callsigns to WA4WTG.

YK, SYRIA. The YK9A DXpedition is up and operating as this bulletin was being prepared. Reports from "The Daily DX" (again, as this bulletin was being prepared) indicated that the team has had some problems. The YK9A team arrived in Damascus, Syria, on February 3rd safely on schedule with about 90% of their equipment. Three of K9LA's bags didn't make it, but they hoped to pick them up on Sunday (the 3rd). Also, the report on Sunday, is that the team has lost contact with Bob, G4VGO. He was not present in Paris for the flight, and so far the team has not heard from him at all. They don't know why that is, but that means they have no FT-1000MP, or 1200W amp, 12V PS, or laptop. They now have to use the laptop which was used for the InterNet, for station logging. This will make the Internet access difficult. They will work out something. The team was a little out of sync with their schedule because they had to wait for the monitoring people which were not ready for them. The team will be active until February 12th. Activity will be on 160-6 meters CW, SSB and RTTY. Operators include Dick/N7RO, Bob/W4DR, Rosalie/N4CFL (YL), Carl/K9LA, Vicky/AE9YL (YL), Jim/W4PRO, Al/K3VN, Ali/JY4NE, Lee/VE7CC, Bob/G4VGO and the team leader Al/K7AR. There will be three stations active on the HF bands, with the fourth station monitoring 6 meter beacons and activity. Suggested frequencies are:
CW - 1815, 3515, 7015, 10110, 14002, 18085, 21002, 24905, 28002
SSB - 1840, 3790, 7047.5, 14145, 18115, 21195, 24935, 28295
RTTY - 14082, 21082, 28082 kHz
Check out the YK9A web site at: http://www.qsl.net/k7ar/yk9a_'01.htm
QSL cards will be handled by K9LA and may be sent via the bureau (outside of the US) or direct to Carl Luetzelschwab, 1227 Pion Road, Fort Wayne, IN 46845, USA. Cards will be available at the Dayton Hamvention.

YO DX HF CONTEST 2000 (Results). Ciprian, YO3FWC, reports that the final scores in the "YO DX HF Contest 2000" are now available on the "Romanian

Amateur Radio Federation" Web site at: http://www.qsl.net/yo3kaa

Z3, MACEDONIA. Zoki, Z31GB, informed OPDX that he has been signing Z33F since January 1st. He has been active on all modes and bands including the WARC bands. QSL via NN6C. Zoki states schedules can be made with him via his E-mail address at: z33f@freemail.org.mk

2586. TS430s ..fault...Help please

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-04 23:32:55 UTC
From: gary <gary@g4loe.freeserve.co.uk>
Message-ID: <95konl$u12$4@news5.svr.pol.co.uk>
Source record: 93916

Hi All,

I have just connected a 2m tvtr to the 430 which has caused a major fault with the rig.

The ptt or send no longer cause the rig to transmit (even without the tvtr), however if I set the VOX on and then use the ptt the rig will operate.

Can anyone help me pinpoint where the problem may lie, I have been sweating over the circuit diagram for some hours now and feel that it may lie somewhere in the switching transistors.

Any help would be really appreciated.

thanks in advance..73s......Gary G4LOE

2589. TS450S tuning knobs?

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-05 03:06:32 UTC
From: "Max Donoghue (VE3TMT)" <mdonoghue1@sympatico.ca>
Message-ID: <YMof6.189585$JT5.6928073@news20.bellglobal.com>
Source record: 93918

Does anyone know if there is a tuning knob available for the TS450S with a finger indent? I see them on the Yaesu and Icom rigs, but for some reason Kenwood didn't put them on the 450 or 850. Makes fast qsy'ing much easier.

2590. Re: John: A Liar? NOT AT ALL!

Lok at how people speak of you, constantly as a trouble maker. NO ONE
speaks positively of you, except for you OTHER ID of Proudhawk!

I wouldn't say that Glendale, WV is such a nice place. I was through there once and it looked like something out of the Deliverance. Actually, I have a job, pretty much could own your ass. By the way, which idiot did you steal the radio from. As far as food stamps go, you should know all about them not to mention the welfare check you get every month. So loser, perhaps if you would get a job maybe you would get to go on a trip.
No, you have Indiana confused with West Virginia which is a state of inbreeds and cross eyed mongrel. I can truly say that I have never met a smart person from West Virginia. Actually, You are prime example of what resides in Buckteeth, West Virginia and environs. You know it is a real shame too because West Virginia is a pretty state once you get past the bombed out cars pushed over the mountainside and the people who throw their garbage over the hill. Not to mention people who's idea of lawn furniture is twenty rusted out shitboxes sitting around. Of course, inbreeds will be inbreeds and buckteeth losers will always live in Glendale. Actually, you can't even figure out who your daddy is because he was one of many on the police pictures. I can only understand your plight especially when you are the effects of taking a trashy mom and combining her with a chimpanzee. Of course, that would explain your fascination with inbreeding and the anal function. That is why everyone knows you are a bucktoothed loser with cross eyes and an 80 IQ to boot. I think that a certain ham from Londonderry could tell us all about your living circumstances, trailer boy. So is the government helping with your heat bill, lazy ass? Because you sure don't have the gonads to go out and do it. Most of the time sitting your sorry ass behind a radio blowing off. But that is to be expected of illiterate white trash such as yourself. See you are one of those losers who believe that you are smart even though you have worked as a fry boy at Mickey D's for half your adult life. By the way loser, I am an accountant by trade and starting my own business in the future. And what are you, another blowhard from WV who's main accomplishment in life is to produce several kids of questionable mental stability just like their daddy. Tell me something idiot, how does someone who has a rusted out vehicle still be making payments. One thing though, I am not a big dumbass making big car payments either. My money goes into retirement while yours is spent on empty beer cans on the trailer floor and fixing the door that you tore off in a drunken rage. By the way, did you pay for the door or did your mother.
Another thing about your family tree is that it doesn't branch out like most peoples but rather your goes straight up like a totem pole. So sorry for you loser. Is the last three of your call, JERK BLOW OFF. JBO=JIZZ BLOW OFF

> mobile use (due to the impact of the wind).

True. What they used to do was make a ring of aluminum
with 4 "spokes" to couple it to the radiator. This way the
wind would blow thru it while mobile.

BTW - Don't forget that Art Bell returns tonite to late night radio.

see the URLs--> www.artbell.com and www.coasttocoastam.com

But also

2595. K5BLB returns to 3950 !!

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-05 13:03:59 UTC
From: Hey mon <hselisor@phillo.net>
Message-ID: <3xxf6.725$9%3.97722@newsread2.prod.itd.earthlink.net>
Source record: 93924

Last evening, the Grand Old Man of ham
radio returned to his rightful place of Channel
Master of 3.950

That's right folks!
Sid, K5BLB IS BACK ON THE AIR FROM
HIS NEW OKLAHOMA QTH. He was on
for several hours speaking with k1ugm.

Welcome back Sid! Let's hope he takes back 3.950
from the nitwits net.

This is really wonderful if you think about it.
Sid returned last night....and Art Bell returns tonight!
What a double-header this be or what?!

2596. SW TALK SHOW OFFERS $25 FOR TELEPHONE QSL + OPINION - TONIGHT!

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-05 14:23:36 UTC
From: Hal Turner Radio Show <Hal.Turner@HalTurnerShow.com>
Message-ID: <95md18$kce@dispatch.concentric.net>
Source record: 93925

Be sure to tune-in to the fastest-growing talk radio show in the world:

"The Hal Turner Radio Show"
Heard in 50+ countries around the world
Every Monday evening from 2300-2400 UTC
(8 PM - 9 PM Eastern US Time)
on WBCQ 7.415 MHz, short-wave
and simulcast live on the Internet at: http://www.HalTurnerShow.com

THE FIRST CALLER FROM EACH COUNTRY OUTSIDE THE USA WHO TELEPHONES THE HAL TURNER RADIO SHOW AND GETS ON THE AIR TO EXPRESS AN OPINION ON ANY OF TONIGHT'S TOPICS, WILL BE REWARDED WITH A $25 AMERICAN EXPRESS GIFT CHECK!

Tonight's topics: Jared Taylor of American Renaissance
exposes a grotesque scam by the US Dept. of Agriculture to pay billions to black farmers for "racism."

Also, hear about . . . . .

a) Mexicans in Los Angeles driving around with new, L.E.D. signs in their cars which read "F*ck You, this is still Mexico;

b) Anger over Christian Prayers that were given at the Inauguration of President Bush;

c) How homosexuals continue to prey on innocent children for their deviant lifestyle

d) The ongoing invasion of illegal and violent immigrants into America and other nations around the world.. . . . . and much more!

The TOLL-FREE Number to call in the US and CANADA to be heard on the air is 1-866-TALK169

Those OUTSIDE the US and Canada can call COLLECT - we will pay for the call! Tell your local telephone company that you wish to make a collect call to
the United States at Country Code 1, then 732-471-1713.

Remember, the show begins at 8:00 eastern US time, that's 2300 UTC Monday. Tune-in 7.415 MHz shortwave to listen and be sure to call-in first from your country!

http://www.HalTurnerShow.com

There has not been a functioning website at www.oarc.org since I've started trying to access it (for quite a few days now).

Does anyone know of another place to find details? All web searches seem to hyperlink back to the above URL.

2610. Engineers, Technicians, and Appliance Operators

Newsgroup: rec.radio.amateur.misc
Date: 2001-02-05 19:53:29 UTC
From: K0HB <K0HB@arrl.org>
Message-ID: <95n0bk$d3v$1@nnrp1.deja.com>
Source record: 93939
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc

ENGINEERS EXPLAINED

People who work or play in the fields of science and technology are not like other people. This can be frustrating to the non-technical (QCAO) people who have to deal with them. The secret to coping with technology-oriented people is to understand their motivations.

Engineering is so trendy these days that everybody wants to be one. The word "engineer" is greatly overused. If there's somebody in your life who you think is trying to pass as an engineer, but is really only a Technician at best, (often only an Appliance Operator) give her(or him) this test to discern the truth.

ENGINEER IDENTIFICATION TEST

You walk into a room and notice that a picture is hanging crooked. You ...

A. Straighten it.
B. Ignore it.
C. Buy a CAD system and spend the next six months designing a solar-powered, self-adjusting picture frame while often stating aloud your belief that the inventor of the nail was a total moron.

The correct answer is "C" but partial credit can be given to anybody who writes, "it depends" in the margin of the test or simply blames the whole stupid thing on "Marketing."

FASCINATION WITH GADGETS

To the engineer, all matter in the universe can be placed into one of two categories:

1. Things that need to be fixed, and
2. Things that will need to be fixed after you've had a few minutes to play with them.

Engineers like to solve problems. If there are no problems handily available, they will create their own problems. Normal people don't understand this concept; they believe that if it ain't broke, don't fix it. Engineers believe that if it ain't broke, it doesn't have enough features yet.

No engineer looks at a television remote control without
wondering what it would take to turn it into a stun gun.

No engineer can take a shower without wondering if some
sort of Teflon coating would make showering unnecessary.

To the engineer, the world is a toy box full of sub-optimized
and feature-poor toys.

HONESTY

Engineers are always honest in matters of technology and human
relationships. That's why it's a good idea to keep engineers
away from customers, romantic interests, and other people who
can't handle the truth.

Engineers sometimes bend the truth to avoid work. They say things
that sound like lies but technically are not because nobody could
be expected to believe them. The complete list of engineer lies
is listed below:

- "I won't change anything without asking you first."
- "I'll return your hard-to-find cable tomorrow."
- "I have to have new equipment to do my job."
- "I'm not jealous of your new computer."

POWERS OF CONCENTRATION

If there is one trait that best defines an engineer it is the
ability to concentrate on one subject to the complete exclusion
of everything else in the environment. This sometimes causes
engineers to be pronounced dead prematurely. Some funeral homes
in high-tech areas have started checking resumes before processing
the bodies. Anybody with a degree in electrical engineering or
experience in computer programming is propped up in the lounge
for a few days just to see if she [or he] snaps out of it.

RISK

Engineers HATE risk. They try to eliminate it whenever they can.
This is understandable, given that when an engineer makes one
little mistake, the media will treat it like it's a big deal
or something.

EXAMPLES OF BAD PRESS FOR ENGINEERS

- Incentive Licensing
- Hindenberg
- Space Shuttle Challenger
- SPANet (tm)
- Hubble space telescope
- Apollo 13
- Titanic
- Ford Pinto
- Corvair

The risk/reward calculation for engineers looks something like
this:

RISK - public humiliation and the death of thousands of innocent
people.
REWARD - a certificate of appreciation in a handsome plastic frame.

EGO

Ego-wise, two things are important to engineers:

1. How smart they are.
2. How many cool devices they own.

The fastest way to get an engineer to solve a problem is to
declare that the problem is unsolvable. No engineer can walk
away from an unsolvable problem until it's solved. No illness
or distraction is sufficient to get the engineer off the case.
These types of challenges quickly become personal - a battle
between the engineer and the laws of nature.

Engineers will often go without food and hygiene for days to
solve a problem - other times, just because they forgot. And
when they succeed in solving the problem they will experience
an ego rush.

Nothing is more threatening to the engineer than the suggestion
that somebody has more technical skill. Normal people sometimes
use that knowledge as a lever to extract more work from the
engineer. When an engineer says that something can't be done
(a code phrase that means it's not fun to do), some clever
normal people have learned to glance at the engineer with a
look of compassion and pity and say something along these
lines: "I'll ask Bob to figure it out. He knows how to solve
difficult technical problems."

At that point, it is a good idea for the normal person to not
stand between the engineer and the problem. The engineer will
set upon the problem like a starved Chihuahua on a pork chop.

--
"We are fellow travelers on a journey between two
eternities, and it's a trip far too brief for me
to be concerned about your speed at the Code of
Morse."

POSITION TITLE: Electrical Engineer RF

JOB DESCRIPTION:
Conceive, design, prototype and evaluate sensors for invasive medical device aplications. Design Radio Frequency subsystems for intravasular catheters. Design experiments to test the feasibility of solutions. Construct anlysitcal models to guide design development.

REQUIREMENTS:
BS/MS Electrical Engineering, PhD physics with Radio Frequency emphasis also considered. 3-7 years experience with RF antenna, transmission line and matching circuitry. MRI, ultrasound, or optical systems experience desireable. Experience should demonstrate a sound grasp of fndamental principles that can be applied to new problems. Experience with MEMS fabrication techniques is also desireable. Should be able to work autonomously within a team evironment.

> I <BITCHSLAP!>

Last Dance With Georgie Jones
(Tom Petty/R. Wiseman, KC8JBO)

He grew up in an Indiana town
Had a fugly momma who never was around
But Georgie blew 'em all and he blew'em right
Blowing them Indiana boys on an Indiana night

Well Georgie moved down here at the age of 18
He blew all the goats today, it was more than they'd seen
Georgie was introduced and the sheep started groovin'
He said, "I dig you baby but I got to keep slurpin'"
...cum, keep slurpin' cum

Chorus:

Last dance with Georgie Jones
Can't you just hear the sheeps' moans
Georgie feels that gerbil creepin' in
and he's tired of this ER again

Well I don't know but I've been told
Georgie never blows adults, he never blows old
He's tired of screwing up, He's tired of bein' down
He's tired of himself, He's tired of this shithole town
Oh my my, oh hell yes
Jonesey put on that party dress
Buy me a drink, sing me a song,
"Give it up the ass" Georgie growls 'cause he can't stay long

Repeat chorus:

There's pidgeons down in Market Square
Georgie's standin' in his womens' underwear
Lookin' down from a hotel room
Nightfall will be comin' soon
Oh my my, oh hell yes
Jonsey goes behind the dumpster and puts on that party dress
It was too cold to cry when he woke up alone
Georgie slurped the last nutsack, he looks like a toad

Repeat chorus and fade:

Its been a while since I had a 430 but here is one thing to check. As I recall, the transverter jack actually contains a built in switch. If it has not been used for a long while except for your recent transverter test it may not be making contact. Try inserting and removing the transverter plug several time to exercise the contacts and see if that helps.

looks like more demented paranoia from the demented W2ZB, ex K1QKJ. He is one sick puppy. He can be heard daily jamming 14.313 with music and recordings less than five miles from the monitoring station. The FCC continues to let this rabid dog menace the amateur community.

Well, maybe that puppy has been neutered...or is it spayed in his case?

Surprised that any one who knows where France is would listen to the
liberty net.
Don't you know, Vic is talking to a bunch of "WN" that don't understand
what he is saying?
Take another example, Steve from Indiana, he is always criticizing
commending and describing homosexuals and their acts.
He feels left out, and none has figured it out yet.
How often do you listen to the liberty net?

Relax, Dave. They're looking for someone to design the transmitter,
not for someone to actually try out the transmitter (those ads will
appear later).

Besides, you already have a transmitter inplanted in your head.
Didn't you ever wonder why you would get some song in your head,
huming along with it for days? Some lab technician was just having a
little fun listening as you tried to sing something else in an effort
to forget the first song (you don't sing very well, especially when
you're thinking of another song at the same time).

Could it be? After eight months of sopping up Mommie's paychecks is El Rotundo finally gonna become employed? Hard to believe....
There must be a lot of work available for Biomedical Engineers down that way....there are always bedpans to be emptied and sanitized.
Maybe Oris could give Suzy a part time job mowing his yard....if Suzy doesn't smoke it first. Oops! Wrong kind of grass.
Let's see...Suzy goes to work next week, has to wait two to four weeks for a first paycheck, Suzy falls behind on the rent, is already behind on the utility bills and is taking cold showers....Suzy loses house when landlord boots Suzy. Suzy sells more radios, falls further behind....and the beat goes on.
Suzy could always buy a sleeping bag and shack up under a bridge with some of her bosom CB buddies.....

Source record: 93960
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.cb,rec.radio.scanner

I just got back into amateur radio after a three to four year layoff. The language has changed a bit since I was last active.

For instance, where did saying "QSL" or "Contact" come from?

Q codes are for CW, not phone. Saying QSL is the same as saying 10-4 to my ears.

Contact? I have no idea where this could have come from. The traditional method of injecting oneself into a conversation (which is rude if the conversation is between two hams), is to announce your callsign. If the participants want company, they will invite you into the conversation. If not, you will be acknowledged as the next in line for the frequency when their conversation is complete.

I'm not stupid enough to think that anyone cares about my opinion, so there's no need to be offended. It's just that even I, an ex-CBer during the seventies, can see some of the CB SSB language infiltrating the ham lexicon/culture.

Does it matter? Not really, but it does seem to make us seem a little less intelligent. After all, the rules for telephony state that we are to use plain language, not codes or ciphers. But then again, that's just my opinion.

Guess what? There's more to a hamfest than "stuff". There are people.
Real, live, flesh-and-blood humans. They have ideas and opinions and they
might spark new ideas and opinions in the other attendees. It's sort of
like a take on the concept of newsgroups - only you're right there and it's
happening live!

The Armenian judges gave this a 9.8 on the Olympic Troll-O-Meter, but they were over-ruled by the umpires in instant replay, who award it a 2.6.

The Armenian judges lodged a formal protest!

It was sufficiently trollish, of course, but way too obvious. It was poorly written, poorly executed, and was so incredibly lame as to lack the true drawing power of a really masterful troll. Maybe as high as a 3.1 for the intense stupidity of the premise, but a 9.8? Never! The Armenian judges tear their hair out, throw their balalaikas down in dismay, and perform the traditional Armenian Dismay Chant! They demand a recount!

Somewhat out of sequence, but makes a good point. What page of
the 'liberal' manual did this come from?

Instead of registering guns, lets register Liberals.

Congratulations you figured it out....to continue.....more enforcement
that then forces the FCC to decide to terminate ham radio because it is
out of control.

Wonder how much money 75 meters will bring?

<Code Quick probably works well at 5wpm. I could be wrong, but seems to me, it wouldn't work above about 15wpm and would actually limit one's maximum code speed.>

Actually, many of the Code Quick users reported passing the 13wpm and 20wpm Morse Code exams before last year's restructuring. Also, many of the satisfied Code Quick users include people who ran into roadblocks using more conventional methods.

I will personally try moving up to faster Morse Code speeds. Maybe CW will allow me to work the 80m band, as SSB seems to be heavily distorted and/or noise-infested.

Y'know, this dillweed Roger Wiseman sounds more like Drew "CBRAMBO" Durigan all the time. Ol' Drew used to love to get on this newsgroup and make legal threats against anyone who posted negative comments about him. Now JBO is doing the same thing. Nothing ever came of Drew Durigan's legal threats, and chances are that ol' blowhard Wiseman can't even afford to hire a lawyer. And even if Roger does have a lawyer, what the hell is illegal about putting wav files of potty-mouth JBO on the Internet? Quit crying or go somewhere else to play, Roger. You're a big baby and an embarassment to the amateur community.

If they can think something like 'Clunky Clunky' when they hear a 'C'
in a word at 20wpm, they think a lot faster than I. At 20wpm, I would
consider 'Clunky Clunky' to be extremely distracting and limiting.

Havent operated on the old ham bands for a couple years now. I keep the license up to date, but there are just too many idiots on the air for it to be anywhere near enjoyable any more. don`t worry. the FCC is selling them off piece by piece anyway. Ham radio has had its day, and the ARRL and FCC let it go down the drain. It is now going to die a well - deserved death, and leave us all in peace. We still have the internet, and we can easily talk round the world on it. I stopped putting up with CB pond scum years ago, and since that is what the Ham Bands are on their way to becoming, I think it derserves equal attention .....

Actually, that's not necessarily the case. It's possible to learn at 15-20 wpm straightaway. In fact that's the secret of Farnsworth code - learn the characters at a fast enough speed.

We don't teach children to speak by talking to them very slowly.

> What's really the magic of code quick is
> that it allows your to PASS the 5 wpm and demonstrates that anyone CAN learn
> CW!!

No magic at all - just a method that works for a lot of folks who have tried it.

CodeQuick is not a "lookup table" because the soundalikes are wordphrases that imitate the rhythm of the character. "Dog did it" has the verbal rhythm of a long sound followed by two short sounds, which is of course the letter D. Add to that the fact that the phrase has three D conconat sounds in it, and the method is pretty clear. The whole thing is aural, not visual.

The important thing is that it works for some folks. That's a good thing.
>
> Hey once I passed 5wpm I too began to learn the farnsworth method it was
> easy know I had a good foundation having use code quick

There you go.

What's really needed is a large scale test of various methods to determine the effectiveness.

>think it derserves equal attention .....

The downslide began well before the current license testing scheme was put into effect. If the bands are sold off, so be it. I'll take my entire share of the profits of such a sale down to the corner Starbucks and by myself tall caramel macchiato.

NOT! The ARRL gave up helping ham radio and improving things about two years ago. From what I see they're not planning to propose making things better in the future either. ARRL stratagy is like Outcome Based education, they don't want quality, only quantity.

Could hardly disagree there,
When I was growing up if I misbehaved I got my ass busted, it didn't

matter if we were in the middle of a department store mom would
pull off her shoe and wear my ass out right there and man show
your butt on the toy aisle and the closet you got to getting a toy
was a Hotwheel track across your ass.
Funny thing it never made me want to go and kill, steal, rob or rape
As I reflect back on the past I think man that MADE me a better
person and I am grateful.
Bring prayer back to schools and corporal punishment
free the hands of parents who chose to discipline there children
Believe me folks there is a difference between punishment and abuse.
Wake Up America or is it to late?
Donnie N4JZH

If he had a license he is a HAM not a CB'er
Frankly Freebanders are like the Hams of old. If you look at the FCC
enforcement logs The Hams are out of control and need enforcement while
Freebanders are mature and working to improver thier knowledge, save lives,
promote freedom and democracy, and gernerally aid and improve the geneneral
welfare or thier comunities.

Looks like they really need our help, looks like they will be
spending millions on this program to test a rocket to send nuclear
weapons abroad, while the U.S. and others rescue there impoverished
and quake striken country, PLEASE!
Satellites my ass, Humanitarian efforts are great but this silly
from a country that is always crying poor, where are there priority's
What a crock...
Donnie

Monday February 5 7:02 AM ET
India Plans to Test Mega Rocket in March

BANGALORE, India (Reuters) - India's state-run space agency
hopes next
month to test a rocket that can launch heavy satellites deep
into space, an official said Monday.

``It will be the first experimental flight of the GSLV,'' a
spokesman at the Bangalore-based Indian Space
Research Organization (ISRO), told Reuters.

The GSLV or the Geostationary Satellite Launch Vehicle can carry
satellites weighing up to two tons into
high-earth orbits and will put India in a group of among
half-a-dozen elite nations with similar capability.

The ISRO spokesman said the GSLV test flight would carry an
experimental satellite, GSAT-1, to test the
rocket's reliability.

The rocket will be launched from ISRO's seaport in southern
Sriharikota town on the Bay of Bengal coast, he
said.

India's GSLV program has been hit by delays due to refusal by
Russia -- under pressure from the United States
-- to stick to its deal to provide India with rocket engine
technology in 1992.

Russia instead only delivered the promised seven rocket engines,
leaving India to develop the technology on its
own.

Washington has, over the years, restricted access to technology
that might have military applications and
slapped significant sanctions on India after its nuclear tests
in 1998.

Aerospace experts have said that India can offer satellite
launches at rates that would compete with those
charged by the United States, Russia and recent entrant China.

ISRO chairman K. Kasturirangan has said in the past that the
launches could be about 25 percent cheaper than
those of other countries.

India made a limited entry into the commercial satellite launch market in May 1999 when the Polar Satellite Launch Vehicle, PSLV-C2, launched two small foreign satellites into low-earth orbits.

Vince, be pragmatic. If it means the survival of the ARS, then we do
the quantity thing, and let Riley handle the guys that think they own
the ARS. If there's not a real breakthrough on the actuarial tables
soon, the ARS is in trouble.

Tracy, pretend for a moment that I know nothing of the ARRL and the ARS.
Now explain your position WRT the ARRL, and identify the organization
that you believe to be the solution, and state why.

Thanks, Brian

I couldn;t agree more myself. while I won;t disagree that there are some

bad eggs in both CB and Amateur. the are not ALL bad. And improvements can be made if you go about it in the right way.

I am in the proccess of getting my ticket. and I feel that I am a responsible and LEGAL CB operator and I will continue to be courtious and respectfull on the amateur bands when I finally have the priviledge to use them. I have friends here in town that are hams, sometimes I go over to their house for coffee and they share their wisdom and experiance with me. I just hope that someday I can do the same with a new radio operator.

Good Job Brenda Ann ... i have also been a ham since 1978 code never interested me at all i passed every element of the theory more than once in hopes that one day i would get my speed up to 12 wpm ... well i never did study anymore code and now thanxs to the fcc i am a general. and the same as you i know more electronic theory and amatuer operating principles etc than many extra, advanced and general class hams who have been able to pass the code portion. for what its worth.

2669. Suzy Lies and Lies and Lies...

Newsgroup: rec.radio.amateur.misc

Heard Suzy on 14.313 telling more lies this evening. Two things ya can count on with Suzy. 1. Everything Suzy has said is a lie, and 2. Everything Suzy is gonna say is a lie. Suzy never did answer Donnie's question about the person Suzy accuses of jamming all the time. Donnie wanted to know about the huge signal differences and Suzy, typical Suzy, would not or could not answer. Stupid in and stupid out. Suzy was hard to hear after that because of all the other stations talking over her. It is pretty obvious Suzy is not too popular on 14.313.

```
It's true look at your own foul and filthy mouth!
Ham's always use foul language and filthy talk on the radio just like they
do on this newsgroup. Freebanders know better. Freebanders are mature and
can express themselves without spewing forth filthy language.

You've seen "Hook line sinker, and part of the fishing pole" before?
